NOTICE TO MARINERS.

*Colonial Secretary's Office,
Auckland, 25th June, 1844.*

HIS Excellency the Governor has been pleased to direct the publication of the following notice of the exhibition of a new light on the Light House erected at Madras.

By Command,

ANDREW SINCLAIR,
Colonial Secretary.

NOTICE.

*Marine Board Office,
Madras, 9th October, 1843.*

NOTICE is hereby given, that on and after the 1st day of January 1844, a light will be exhibited on the New Light House erected at Madras immediately to the northward of the Walls of Fort St. George; and that on and after the said 1st day of January 1844, the light heretofore and now exhibited on the old Light House within the walls of Fort St. George, will be discontinued. The new light (to be exhibited) will be elevated 128 feet above the mean level of the Sea,—and may be seen from the deck of a ship at the distance of 20 miles. The light is of the "Flashing Description" and the duration of the flashes to that of the eclipse or dark periods is in the ratio of 2 to 3,—but as the nature of the motion is reciprocating instead of rotatory, the above ratio merely expresses the aver-

age proportion of the light and dark intervals which are themselves variable according to the position of the spectator. The rapidity of movement is so adjusted, that the duration of the flashes will vary from 0" to 48", and that of the eclipse from 0" to 72", the sums of the duration of light and darkness bearing however, in every position, the constant ratio of 2 to 3. From the South Eastern extremity of the Pulicat Shoal the new Light House bears S. 23° W., and is distant 13 miles; but no ship or vessel when hauling in from the Northward for the Madras Roadstead should bring the light to bear to the Southward of S. 28° W., or S. S. W. $\frac{1}{2}$ W.,—unless her position is well ascertained. Commanders of vessels are hereby warned of the serious risk they incur by incautiously approaching the dangerous vicinity of the Pulicat Shoal, as hazy weather or other causes may obscure the light,—true soundings therefore and a vigilant look out are imperatively called for. The limits of the Madras Roadstead (in 8 or 9 fathoms) are comprised within the following bearings, viz. from the Northward the Light House will bear S. 56° W., and from the Southward N. 81° W. or from S. W. by W. to W. $\frac{3}{4}$ N.

The new Light House

At Madras is in Latitude 13° 5' 10" North,
And in Longitude 80° 20' East of Greenwich,

Published by order of the Marine Board at Fort St. George.

Acting Secretary.
