MONDAY, JUNE 13, 1859.

Colonial Secretary's Office,  
Auckland, 11th June, 1859.

**H**IS Excellency the Governor directs the publication of the following Letter from the Registrar-General, with the accompanying Statistical Tables, for general information.

HENRY JOHN TANCRED,  
(For the Colonial Secretary.)

Registrar-General's Office,  
Auckland, June 7th, 1859.

SIR,—With the view of meeting a general desire that certain results of the late Census should be officially made public before the period at which the Volume of Statistics for 1858, now in course of preparation, can be completed, I have the honour to present herewith a series of Tables which have been compiled with the greatest practicable despatch after the receipt of the Enumerators' Returns from the various parts of the Colony. They show the Number and Description of Houses, and the Population classified according to Sex, Age, and Domestic Condition; distinguishing between the Principal Towns and the other Parts of the respective Provinces, (except in the case of Hawke's Bay, the Returns from which do not, in their present form, admit of this plan being carried out):—also, the Number of Acres in Cultivation, specifying the chief Crops, and the quantity of Land Fenced; and the Numbers of Live Stock in the several Provinces. Similar particulars of Stewart's Island are added,—the only wanting District being the Chatham Islands, from which Returns have not yet been received, but the estimated European Population of which in 1857 did not amount to more than sixty-four. The branches of the

Census thus included are believed to be those on which there is the most prevalent wish to be informed without the delay which, from various causes, must attend a sufficiently careful compilation of other results,—(such as those relating to Education, Places of Birth, Religious Denominations, &c.,) throughout the Colony.

It may be proper to observe, with respect to the accompanying Abstracts, that, in a few instances, explanations are required from some of the Districts which may slightly alter the figures. But any corrections that can thus be called for, must be comparatively so trifling as not to affect any practical uses to which the Tables may be applied. Indeed the only reason for alluding to this contingency here is to guard against a possible doubt as to the accuracy of the Tables, should the finally revised figures which will appear in the Statistical Volume not be found in full and precise agreement with those now presented.

Comparative Tables are added, showing the Numerical and Centesimal Increase of the Population, and the Increase in Cultivation and Live Stock respectively, in the septennial period since the General Census of New Zealand in December 1851.

I have the honour to be,

Sir,

Your most obedient servant,

JOHN B. BENNETT,  
Registrar-General.

The Honorable  
The Colonial Secretary,  
&c., &c., &c.!

The Numbers for 1851 are from the Abstracts of the General Census of New Zealand taken in December of that year, as published in the *Government Gazette* of May 31st, 1853; those for 1858 from the Returns of the Census in last December; Stewart's Island and the Chatham Islands are not included.

Some qualification may be required from the circumstance that the Census of 1851 applied to the "Settlements" in New Zealand, while in 1858 the division of "Provinces" under the Constitution Act is adopted. But although the geographical boundaries of the latter extend beyond the less defined limits of the former, yet, in an enumeration restricted to the European Population, the difference is not so great as materially to affect the general value of the comparison.
