3, Adelaide Place, King William street,
London, July 19th, 1862.

SIR,—I have the honor to state that at the request of Her Majesty's Commissioners for the International Exhibition, I attended as Commissioner for New Zealand at the award of Prizes on the 11th instant, and received from His Royal Highness the Duke of Cambridge a book of the Awards.

The volume is addressed and forwarded to you separately by Book-post. It is gratifying to report that thirty-three medals have been awarded to Exhibitors of New Zealand, and that ten have received "Honourable Mention" for various articles. This encouraging result places New Zealand third in the list of Australian Colonies to whom the largest number of Medals have been awarded. It ranks after Victoria and New South Wales, and before all others of the group. A copy of the award of prizes has been transmitted to the Commissioners of each Province that forwarded a contribution for the International Exhibition.

I have, &c.,

JOHN MORRISON.

The Hon. Colonial Secretary,
Auckland, New Zealand.

WRECK BUOY OFF SHORTLAND'S BLUFF.

Notice is hereby given that the buoy placed on the wreck of the *Lady Harvey*, off Queenscliff Jetty, in 1854, will, on the 1st of September next, be removed, the wreck having disappeared.

GABO ISLAND LIGHTHOUSE.

In accordance with a Notice to Mariners, issued from this office on the 6th day of May, 1862, the old fixed light on Gabo Island was extinguished, and a *first order catadioptric fixed white light* was exhibited from the new tower, on the evening of the twentieth instant, which will continue lit from henceforth between sunset and sunrise.

The new lighthouse stands S. 46° E. twelve hundred yards from the old one, about one cable's length N. W. h. W. from the S. E. point of Gabo Island; its approximate position is latitude 37° 34' 5" S., longitude 149° 55' 7" E. The tower is circular, built of grey granite, and remains its natural color; the light-room and top of lantern are painted light grey.

The light is one hundred and seventy-four feet above the level of the sea, and is visible to seaward, in ordinary clear weather, at a distance of twenty miles from about N.N.E. round by E. and S. to W. $\frac{1}{2}$ S., allowing ten feet for the height of the eye.

The new lighthouse being further to the S.E. than the old lighthouse, vessels from the *northward* will see it over the shoulder of Cape Howe about three-quarters ($\frac{3}{4}$) of a point further to the south-east than the old light was visible, consequently the new light will be seen by them sooner and show more in shore than the old one did.

Vessels to the westward of Gabo Island, and standing to the northward between it and Mallagoota Point, will avoid the low Island of Tallaburga and the reef to the southward of it by not shutting in the light, which is screened towards Tallaburga and the mainland on a W. $\frac{1}{2}$ S. and E. $\frac{1}{2}$ N. bearing.

The following bearings and approximate distances are given from the light:—

Cape Howe N. 27° E. 5½ miles
 Mount Howe N. 30° W.
 South end of Tallaburga Island W. 4 miles
 Genoa Peak S. 89° 23' W.
 Ram Head S. 48° W.

All bearings are by compass.

CHARLES FERGUSON,
 Chief Harbor Master.

Department of Ports and Harbor,
 Williamstown, 26th August, 1862.
