The Deaths from local diseases have also increased in June. The chief difference appears to have been in diseases of the Respiratory System, which have increased from 8 to 13.

Of the 5 deaths in Hokitika, 4 were of infants a few hours old, from Premature Birth; the other was a death from Phthisis.

The number of Violent Deaths was larger in June than during either of the three previous months. Of the 9 deaths of that class, 6 occurred at Dunedin.

The accompanying Meteorological Report shows an extremely heavy rainfall in Wellington during June; the excess being over $4\frac{1}{2}$ inches in excess of the rainfall in May, and nearly 3 inches in excess of the rainfall during June in previous years.
