N.B.—Although the Auckland and Hokitika Hospitals are situated outside the boundaries of the respective boroughs, yet the deaths in them have, for the sake of uniformity, been included in this Report.

The population has been estimated by adding the excess of births over deaths since the 1st March, 1874, to the then census population. It is impossible to estimate the increase from immigration.

The births were 16 fewer than in January.

The deaths were 18 more in number than the deaths in January, and exceeded by 38 the deaths in any month of 1874; or if the deaths in the two above-mentioned hospitals (the deaths in which were not included in the reports in 1874) be excluded, this excess will be reduced to 33.

Of the deaths, males contributed 102; females, 76: 119 of the deaths were of children under 5 years of age, being 66.85 of the whole number; 89 of these were of children under 1 year of age.

The deaths of children under 1 year of age were 16 more than in January; the deaths of all under 5 were 29 more than in January.

There were 7 deaths of persons of 65 and upwards,—4 males in Auckland of 65, 68, 80, and 85, and 1 female of 70; also 2 females in Wellington of 67 and 75 years of age.

THE following Table shows the Causes of the Deaths of Persons of both Sexes under 5 years of age and 5 years and upwards, and the proportions per cent. of Deaths from each cause in the Boroughs named, and that were registered, during the month of February, 1875.
