* It is not unlikely that in some instances the places given under the heading "Residence" are not the present places of abode of the respective persons. They have been copied, however, as they stand in the General Register; and if they are inaccurate in any cases, it is because the changes of residence have not been officially notified to the Registrar-General, as it is obviously desirable that all such changes should be.—WM. Total	274	22	7	37	30	10	32	138	...

The deaths of persons not residents of the boroughs, occurring at hospitals, have been excluded in all cases.

The population has been estimated by adding the excess of births over deaths since the 1st March, 1874, to the then Census population. It is impossible to estimate the increase from immigration.

The births were 22 less than in November.

The deaths were 32 more in number than the deaths in November.

Of the deaths, males contributed 66; females, 72: 69 of the deaths were of children under 5 years of age, being 50.0 per cent. of the whole number; 52 of these were of children under 1 year of age.

There were 6 deaths of persons of 65 years of age and over: 7 of these persons were males and 4 females: of these, 2 males aged 69 and 85 died at Auckland; 1 female aged 68 at Wellington; 1 male aged 78, and 1 female aged 70, at Nelson; 2 males aged 65 and 68, and 2 females aged 70 and 73, at Christchurch; and 2 males aged 66 and 70 at Dunedin.

THE following Table shows the Causes of the Deaths of Persons of both Sexes under 5 years of age and 5 years and upwards, and the Proportions per Cent. of Deaths from each cause in the Boroughs named, and that were registered, during the Month of December, 1876.

 ORDER 4.—*Suicide*.—Suicide by strychnine (temporary insanity), 1.

The total of deaths in December exceeded the number for November by 32.

Zymotic Diseases.—These increased from 19 in November to 50 in December. Deaths from Scarlatina increased from 3 in November to 11 in December, of which 1 occurred at Christchurch and 10 at Dunedin. There were no deaths from Diphtheria in November, but 6 last month: 1 at Auckland, 4 at Wellington, 1 at Dunedin. Whooping-cough caused 5 deaths in December: 3 at Auckland, and 2 at Dunedin. There were none from this cause in the previous month. Dysentery and Diarrhoea were fatal in 6 cases during November, against 19 in December. These last occurred as follows:—2 at Auckland, 2 at Thames, 9 at Wellington, 5 at Christchurch, and 1 at Hokitika.

Diseases of the Respiratory System.—December shows a total of 15, being 2 less than the number for the previous month. There were 2 deaths at Auckland, 3 at Nelson, 1 at Christchurch, 7 at Dunedin, and 2 at Hokitika.

Violent Deaths.—The accidental deaths were 6 in number. Two persons were accidentally drowned, one man was killed by a sunstroke at Christchurch, one by fall of earth, and another by fall of a pair of shears. The remaining death was from Erysipelas, consequent on a fractured leg. There was 1 suicide by poison, and a child was found dead with marks of violence.

Comparison with December, 1875, shows a great increase in the mortality from Zymotic disease, there being only 29 deaths for that month against 50 in December, 1876. This is caused by the increased number of deaths from Scarlatina, Diphtheria, Whooping-cough, and Diarrhoea. The deaths from Fever decreased in number. Diseases of the respiratory system were fewer than in December of 1875. The mortality from all causes shows an increase for last month of 14 deaths.
