NOTICE TO MARINERS.

No. 10 of 1878.

Customs Department (Marine Branch),  
Wellington, 25th March, 1878.

THE following Notices to Mariners, received from the Portmaster, Brisbane, are published for general information.

J. BALLANCE.

SHOAL, TRINITY BAY.

THE position of the shoal reported by Captain Saunders, of the s.s. "Alexandra," and of which a notice was published from this office on the 16th November last, having been examined by Lieut. Connor, R.N., the officer in charge of the Admalty Survey, the supposed danger has been found to be the north-east extremity of the main reef, which lies in the following position, viz.,—

North extremity of Island Point, N.W. by W.  $\frac{3}{4}$  W. Round Hill ... .. S. by W. westerly.

Vessels passing along the coast will be clear of this danger while keeping the two remarkable hills denoted on the chart as 2,652 and 2,710 feet in height respec-

tively, and lying south-west of Cape Grafton, open to the north-east of Double Island; while vessels going to or from Port Douglas will clear it by keeping the hill, denoted as 1,757 feet in height, open to the north-east of Island Point.

G. P. HEATH, Commander R.N.,  
Portmaster.

Department of Ports and Harbours,  
Brisbane, 1st March, 1878.

NEW HEBRIDES.

PORT RESOLUTION, ISLAND OF TANNA.

Captain Kilgour, of the "Stanley" schooner, reports that the formation of Port Resolution has been considerably altered by the effects of an earthquake which took place at 7 a.m. on the 10th of January, and which was followed by a wave said to have been some 20 feet in height. The shock lasted about half a minute, throwing down—according to the report of Mr. Neilson, the missionary—about 40 acres of the high land forming the North Head. From the rocks on the north-west side of the entrance to the large shelving rock immediately opposite the missionary's house, Captain Kilgour found no change to interfere with the navigation; but the rock itself appeared to have been raised about 10 feet, and a long ledge of coral rock, extending from it S. by E. about 50 yards, thrown up above high water, thereby narrowing the harbour to that extent, just above what was formerly the best anchorage. He further states that the harbour now presents a totally different appearance to that shown on the charts and described in the sailing directions, the principal changes having taken place on the western shore, while the depth of water in the port has shoaled about a fathom.

Vessels are cautioned to be very careful if leaving the mid-channel, and not to proceed further up the harbour than Missionary's Point.

G. P. HEATH, Commander R.N.,  
Portmaster.

Department of Ports and Harbours,  
Brisbane, 5th March, 1878.

LIGHT VESSEL OFF CHANNEL ROCK, CAPE MELVILLE.

On and after this date, a Light will be exhibited from a Light-vessel moored in 14 fathoms in the following position, viz.,—

Channel Rock, S.  $\frac{1}{2}$  W.  
Pipon Island Reef Beacon, E.  $\frac{3}{4}$  N.

The Light, which is dioptric, is at an elevation of 35 feet above the water, and should be visible from the deck of a small craft about 10 miles.

Vessels in rounding the Cape will pass to the northward and eastward of the Light-vessel.

Portmaster.
