

SUPPLEMENT
TO THE
NEW ZEALAND GAZETTE
OF THURSDAY, APRIL 4, 1878.
Published by Authority.

WELLINGTON, WEDNESDAY, APRIL 10, 1878.

Annual Stock Report.

General Crown Lands Office,
Wellington, 10th April, 1878.

THE following report, by the Chief Inspector of Stock for the Provincial District of Otago, is published for general information.

J. MACANDREW.

Sheep Inspector's Department,
Dunedin, 18th February, 1878.

SIR,—I have the honor to forward herewith, for the information of the Government, the Annual Stock Report for year ending 30th September, 1877.

Sheep.—Returns show a total of three millions nine hundred and twenty-eight thousand five hundred (3,928,500), being an increase of twenty thousand one hundred and fifty-two (20,152) upon last year's returns, against fifty-five thousand (55,000) for year previous.

Where Depastured.—One million four hundred and one thousand three hundred and ten (1,401,310) are depastured on freehold property, two millions four hundred and ninety-four thousand five hundred and seventy-nine (2,494,579) on runs, twenty-two thousand eight hundred and seventy-five (22,875) on hundreds, and nine thousand seven hundred and thirty-six (9,736) on gold-field commonages.

Imports.—Five hundred and sixty-nine (569) stud sheep, merinoes only, have been imported during the last twelve months, and these from Victoria, against four hundred and ninety-eight (498) for year previous.

Exports.—Nothing outside New Zealand.

Boiled down and Meat-preserving.—Eighty-eight thousand (88,000) sheep were passed through the different establishments for either preserved meats or tallow.

Owing to the severe drought in the spring, followed by bad weather during the lambing season, the losses in some localities have been very great, and as a whole the lambing will not be up to the usual average. Another source of loss, where rabbits are numerous, is unmistakably attributable to this nuisance; not only is the pasture destroyed by them, but the constant disturbance the stock are subjected to in the destruction of the pests tells severely against both increase and clip. I can safely assert that in some localities an annual decrease in the number of sheep is taking place from the above cause. I can still report all sheep within the District of Otago free from scab, and generally healthy.

Cattle.—The returns show a total of forty-seven thousand seven hundred and thirty-five (47,735); of these, thirty-eight thousand nine hundred and seven (38,907) are depastured on freehold, and eight thousand eight hundred and twenty-eight (8,828) on Crown lands.

It being the first year that a return of cattle has been collected, and as there are many who are cattle-owners without owning sheep, the number shown on the return cannot represent the total number within the district, but I am of opinion they can approximately be estimated at fifty-three thousand (53,000).

The number of cattle introduced from foreign ports during the year amount to thirty-four (34), being five (5) from Great Britain, and twenty-nine (29) from Victoria. None have been exported outside New Zealand.

I can conclude with reporting all cattle within the district healthy, and free from disease.

I have, &c.,

BENJAMIN P. BAYLY,

Chief Inspector of Stock, Otago District.

The Commissioner of Crown Lands, Dunedin.

RETURN of SHEEP and CATTLE for the PROVINCIAL DISTRICT of OTAGO, for the Year ending 31st December, 1877.
