Tenders Invited.

TO IRONMASTERS.—WANTED 100,000 TONS OF
STEEL RAILS.

Public Works Office,
Wellington, New Zealand,
6th November, 1878.

WRITTEN TENDERS will be received at Wellington by the Hon. the Minister for Public Works up to 30th September, 1879, for the supply of the whole or any portion of 100,000 tons of steel rails, to be manufactured within the colony from New Zealand ores. Payment will be made in cash on delivery at the works—the Government of New Zealand agreeing to pay, in addition, one-half of the cost of the conveyance to the colony by sea of the workmen to be engaged in the manufacture.

Information as to the mineral resources of New Zealand, and maps indicating the various localities in which mineral deposits are situated in relation to means of transport, may be had on application to the Agent-General of New Zealand, 7, Westminster Chambers, Victoria Street, London; or to W. Walton Evans, Esq., 66½, Pine Street, New York.

As it is unlikely that intending contractors will enter into an engagement of the above nature without first satisfying themselves by personal inspection as to the position and extent of the raw material in New Zealand required for the manufacture of iron, every facility and information on this subject will be

afforded on application to Dr. Hector, C.M.G., F.R.S., Director of the Geological Department, Wellington.

For the information of parties desiring to tender, it may be stated that the official returns show that there were imported into New Zealand, within the last eight years, 15,500 tons of cast-iron, and 93,000 tons of wrought-iron, exclusive of iron for Government and other railways, during which period 1,068 miles have been constructed and opened for traffic.

JOHN KNOWLES,
Under Secretary for Public Works.

New Zealand colonists who may have friends and correspondents connected with the iron manufacture are requested to be good enough to draw attention to the highly advantageous and profitable field for enterprise which this colony presents to those who can bring the necessary capital and practical experience to bear upon such manufacture.
