The rural sections in Block XII., Kaipokonui, and Block IX., Ngaire, are inland of the Waimate Plains, west of the Waingongoro Stream and Eltham Railway-station. From Eltham and other points, roads have been opened up to this land, which is on the railway-line from Waitara and New Plymouth to Hawera. With the exception of a few rata, the bush consists mainly of soft woods and other light timber, and can easily be cleared. The country is well-watered, and is admirably adapted for conversion into grass lands.

Applications may be made at the Land Offices Patea or Hawera, on Wednesday, the 6th September.

Applicants for any of the above lands may send their applications and deposits, with statutory declaration as required by "The Land Act, 1877," through the post to the Land Office, Patea, to arrive on or before Wednesday, the 6th September. Envelopes should be marked "Application for deferred-payment land, ——— Survey District."

Residence not compulsory for bush lands.

In the event of more than one application being received for any one section, the right to occupy the same will be decided by public auction, at Hawera, on Friday, the 8th September, at 11 o'clock a.m.

The following remarks apply only to the above four principal boroughs:—

The births were 245 in July, against 230 in June, an increase of 15.

The deaths in July were 81, against 95 in June, a decrease of 14.

There were 7 deaths of persons of 65 years and upwards: two females of 89 died at Auckland; 2 males of 75 and 67 at Wellington; a male of 67 at Christchurch; and two females of 66 and 65 at Dunedin.

Zymotic Diseases.—These diseases caused 15 deaths in July, against 16 in June. In June, 15 of the 16 deaths were included in the order of miasmatic diseases, but in July only 12, two deaths in July having been directly attributable to alcoholism. There was an absence in July of any deaths from fever, but 4 deaths (in Auckland) occurred from measles.

Constitutional Diseases.—The deaths from diseases of this class were 10 in July, against 16 in June. The deaths from cancer were 3 in July, against 6 in June; and from phthisis, 6 in July, against 7 in June.

Local Diseases.—The deaths from these diseases were 33 in July, against 40 in June. Of these, diseases of the respiratory organs caused 10 deaths in July, against 15 in June, the number in May having been 10.

The subjoined table shows the mortality for the last two months at each of these four boroughs from six principal zymotic diseases of the miasmatic order, and also the deaths from certain inflammatory diseases of the lungs. These causes of death have been distinguished from the others of the classes to which they belong, as being the most important special diseases which give rise to sudden increases in the death-rates of towns, and the prevalence of which is closely connected with sanitary condition and climatic influence of the season on health.
