*Regulations for fixing the Thames Drainage Area and constituting the Thames Drainage Board.*

WM. F. DRUMMOND JERVOIS,  
Governor.

**ORDER IN COUNCIL.**

At the Government House, at Wellington, this nineteenth day of January, 1886.

Present:

HIS EXCELLENCY THE GOVERNOR IN COUNCIL.

**I**N exercise and pursuance of the power and authority conferred by "The Gold-mining Districts Act 1873 Amendment Act, 1885," His Excellency Sir William Francis Drummond Jervois, the Governor of the Colony of New Zealand, acting by and with the advice and consent of the Executive Council of the said colony, doth hereby make the regulations contained in the Schedule hereto for the purposes of fixing the Thames drainage area, and constituting the Thames Drainage Board, more particularly mentioned in the said regulations, and for prescribing the manner in which drainage rates as contributions for drainage works shall be assessed on lands within the said area, the making, levying, collecting, and recovery of such rates, and for regulating appeals against such assessments; and doth hereby declare that such regulations shall come into force on the day of the publication hereof in the *New Zealand Gazette*.

SCHEDULE.

REGULATIONS.

1. THERE shall be a Board, to be called "The Thames Drainage Board" (hereinafter termed "the Board"), and such Board shall have jurisdiction within the area hereinafter defined, which said area shall be known as "the Thames drainage area."

2. The Board shall consist of nine members, seven of whom shall be elected by the contributors assessed for the drainage rate, and, of the other two, one shall be elected by

the Thames Borough and the Thames County Council respectively. Failing such election for the period of one month by either the said Borough or County Council, or by both, the elected members of the Board shall elect one or two members as required to fill the vacancy.

Five members shall form a quorum.

3. The Board shall have a common seal, which shall be kept and used in such manner as the Board may, by resolution, determine.

4. A Chairman shall be elected by the Board at their first meeting, and shall have a casting as well as a deliberative vote.

5. The election for the first Board shall be held on the third Saturday in February, 1886, and thereafter the Board shall be elected annually on the third Saturday in January in each year. Members shall hold office until their successors are elected.

6. The qualification of an elector shall be one vote for every £100 or portion of £100 of annual drainage rates paid by such elector, the calculation of such rates being based upon the preceding year's assessment up to £500. Every contributor assessed for £500 and upwards shall be entitled to five votes.

7. The directors of any registered company, being owners of licensed holdings and of registered claims assessed for contribution as hereinafter provided, may appoint some person to vote on their behalf at all elections.

8. The first election of the Board shall be held at the Courthouse at Grahamstown. The qualification of every elector for the first election shall be one vote for every ten acres held as a claim or licensed holding, and no person or company shall have more than five votes.

9. It shall be the duty of the Board during the month of January in each year to make an estimate of the amount required to defray all costs and charges for drainage purposes during the ensuing twelve months.

10. In making an assessment for the purpose of striking such drainage rate the Board shall take into consideration—

- (1.) Area of ground held;
- (2.) Proportionate depth and extent of workings;
- (3.) Amount of benefit derived either from yield of gold or other minerals, or enhanced value given by such drainage works.

11. The Board, after making allowance for any surplus or deficiency in the previous year's revenue, shall proceed during the said month of January in each year to raise an amount sufficient to cover such estimated cost and charges, and the necessary expenses of the Board for the year, by striking a drainage rate upon all lands within the district area actually benefited by such drainage works, and all occupiers or owners of land so assessed shall be liable for the amount of the rate so made.

Such rate shall be payable either in one sum or by instalments, and at such time or times and place as the Board may determine.

12. Seven days' notice of such rate, and the time, place, and mode of payment, shall be given by advertisement in some newspaper circulating in the district.

13. The Board shall in such notice name a day on which they will sit to hear appeals against the assessments. Such day shall not be less than seven nor more than ten days from the first publication of the notice.

14. Any person feeling aggrieved by the assessment may appeal against the same to the Board, who shall sit on the day appointed to hear such appeals; and any person intending so to appeal shall give notice thereof in writing to the Board not less than three clear days before the day fixed for such sitting of the Board. The decision of the Board on all appeals shall be final, except as hereinafter provided.

15. Appeals against the rate as a whole may be made to the Warden's Court by any person assessed for contribution at any time within fourteen days from the publication of the notice required by section 12 of these regulations. Such appeal may be made on the following grounds:—

That any land held within the area is assessed too high or too low, as the case may be, or is not benefited by such drainage works:

That the total amount to be raised by such assessment is in excess of the probable requirements of the year.

The decision of the Warden's Court upon such appeal to be final and binding upon the Board and all parties interested.

The Warden of such Court shall have power from time to time to make regulations for the conduct of such appeal and costs thereof.

16. The Board may from time to time appoint and employ a Treasurer, Clerk, Surveyor, Valuers, Collectors, and all such other officers to assist in the execution of these regulations as they shall think proper and necessary, and from time to time remove any such officers, and appoint others in the room of such as shall be so removed, or as may die, resign, or discontinue their offices; and may, out of the fund at the disposal of the Board for that purpose, pay such

salaries and allowances to the said officers respectively as the Board shall think reasonable.

17. The Board shall have power to frame by-laws for the settlement of all disputes between contributors and the owners of any drainage machine; for providing for the regulation of its meetings, proceedings, debates and general conduct of the business of the Board, the appointment of Returning Officers, and the manner of conducting elections of the Board; and for regulating the duties, duration, and condition of service, and the salaries or other remuneration, of officers and servants of the Board.

Any vacancy occurring on the Drainage Board during the year shall be filled by some person nominated by the Board.

18. The Board shall have power to enter into contracts for the drainage of all or any portion of the lands within their jurisdiction, and, subject to the regulation as hereinafter provided, to purchase, lease, construct, or maintain any drainage works within the area; and all revenue accruing to the Board shall, subject to the payment of necessary expenses of, and incidental to, the Board's management, be devoted in such manner as the Board may deem best to the efficient drainage of all lands within the area.

19. Before purchasing, leasing, or constructing any drainage or pumping works, the Board shall obtain the approval of not less than two-thirds of those assessed for contribution.

20. The Board shall have power to make a supplementary rate at any time during the year, should any special circumstances render the same desirable. In making such a rate the Board shall take into consideration any special or additional benefit found to have accrued to all or any of the lands within the area since the striking of the previous rate.

21. Within the period of twenty-one days before or after the day appointed for the holding of any election, or of any meeting of the Board, or for the doing of any act, matter, or thing by these regulations required to be done on or before a day certain, it shall be lawful for the Governor to extend the time allowed for the holding of such election, a meeting of the Board, or for the doing of any such act, matter, or thing as aforesaid, notwithstanding the day may have passed on which the same ought to have been held or done, and to adopt, or cause to be adopted, such measures as may be necessary to remove any obstacle of a technical or formal nature by which the carrying-out of the provisions of these regulations may be impeded, and to supply any deficiency which may be required to be supplied in order to enable the said provisions to be duly carried out.

Mines Department,  
Wellington, 20th January, 1886.

THE under-mentioned special rules for the Hartley Colliery, Malvern District, are published in accordance with the provisions of section 31 of "The Regulation of Mines Act, 1874."

J. BALLANCE,  
(For the Minister of Mines.)

The penalties for the violation of any special rules established under "The Regulation of Mines Act, 1874," and for offences against the Act, are provided for in sections 22 to 28, in Part VI.

## SPECIAL RULES.

*Manager.*

1. The mine, and all the operative details of the management thereof, shall be under the control and daily supervision of the manager, whose duty it shall be to carry out, and see carried out, the various provisions of any Act for the time being in force for the regulation of mines, so far as incumbent upon him or those acting under his control or direction, and to see that the mine is properly ventilated, and that sufficient materials and appliances are always provided for the proper carrying out of all necessary operations. He shall be responsible for the appointment of a sufficient number of competent persons to carry out the requirements of the Act and the special rules, and also to see that the working of the mine is carried on with all reasonable provisions for the safety of the persons employed.

2. In addition to and without in any way restricting his general duties, the manager shall examine all parts of the mine daily, and also all the air-courses of the mine, and all stoppings and brattices connected with the same, and cause remedies to be provided immediately for all defects that may be found on such examination.

3. A safety-lamp shall be used in making all such examinations as aforesaid.

4. He shall see that a sufficient quantity of timber for props and other purposes is daily supplied to the workmen, and cause the same to be cut in proper lengths and laid down in the working-places, it being the earnest desire of the company that every proper protection shall be afforded to the lives of the workmen. He shall see that all the roads and tramways throughout the mine are kept in a safe and workable state.

5. He shall give all necessary instructions to the men or boys in the mine respecting their work, and shall see daily that these rules are duly observed.

6. He shall daily make a correct entry of the readings of the barometer and thermometer in the Mine Registry.

*Overmen.*

7. The manager may appoint one or more overmen to assist him in the performance of his general and the above special duties, subject, however, to his own general supervision and control.

*Firemen.*

8. The manager shall appoint one or more competent persons to act as firemen of the mine.

9. Before the time appointed for any shift commencing work in any part of the mine, the firemen appointed to inspect the mine for that shift shall inspect with a safety-lamp the whole of the workings in which such shift is to be employed and the roadways leading thereto, and shall make a true report of the condition thereof so far as the ventilation is concerned. Every such report shall be recorded without delay in the Mine Registry, and shall be signed by the person making the same.

10. In making the examinations provided for by the foregoing rules the fireman shall mark with chalk the day of the month upon the face of each working-place, as 1, 5, 10, 25, or other numbers, as the case may be. He shall be careful to ascertain that every part of the mine and roadways so to be examined are free from fire-damp, choke-damp, or other impurities, and are safe for workmen to enter and work therein; and, in case fire-damp or other impure air shall be discovered in any working-place, road, or level, the fireman shall, in the first instance, thoroughly clear the same of such impurity if that can be done easily, and shall thereupon report to the miners and other workmen that the same are safe; but, if the impurity cannot be readily or at once cleared out, the miners and workmen shall not be permitted to enter such working-places, roads, or levels until the impure air shall have been, by further appliances, entirely dispelled. He shall prevent miners or other workmen entering the roads or working-places until a report shall have been made that they are safe. If no fire-damp, choke-damp, or other impurity shall be discovered or suspected to remain after such inspection, the fireman shall so report to the miners and workmen, and allow them to proceed to work, and shall thereupon without delay enter such report in the Mine Registry.

11. In case, for any cause, the operations of the mine shall have been discontinued for an unusual length of time and thereafter resumed, no workman shall be allowed to enter the mine until the manager or fireman shall have first entered and reported on the state of the workings; and in discharging this duty the manager or fireman must proceed with great caution, and shall not go further into the workings than he, from his own experience, shall deem safe; and, in case there are reasonable grounds for apprehending the presence of impure air, he shall return to the mine-mouth and remain there until precautionary measures shall have been applied to restore the proper ventilation of the mine.

12. All entrances to any place not in actual course of working and extension shall be properly fenced across the

whole width of such entrance, so as to prevent persons entering the same.

13. He shall report to the Manager—

- (a.) Any deficiency in the amount of ventilation;
- (b.) Any violation by workmen of the rule as to entering the mine before inspection;
- (c.) Any use or attempted use of gunpowder or other blasting material without permission;
- (d.) Any damage done to fences, signals, or marks in the mine.

*Roadsmen.*

14. The roadsmen, in their different divisions and shifts, shall daily make careful inspection of the whole drawing-roads and headings from the mine-mouth and throughout the mine, and shall keep the same free of all obstructions, and of the fixed height and width necessary for proper passage and ventilation.

15. They shall repair and remedy all damages and defects in the roads, and shall examine, put, and keep in proper condition all trap-doors, and shall see and enforce that the same be kept close, and, wherever practicable, shall make and keep all trap-doors self-acting.

16. They shall report daily to the mine manager at the termination of each shift. They shall also report daily to the mine manager any instance of neglect on the part of the miners in not carrying on their coal-faces or walls in accordance with the plan pursued in working the mine, or in not propping up and securing the roof of the superincumbent strata in those parts of the workings under their care.

17. As removing falls from the roofs of drawing roadways and air-courses, repairing defects, and supporting loose strata are within the roadsmen's duties, and as they are charged with the maintenance of all drawing-roads and passages in the mine, they are enjoined to proceed with the greatest caution, both for their own safety and the successful execution of their duties. In their operations they must exercise the greatest care, and are required to prevent all other workmen coming near any defective places, or interfering with them when at work. They are required to undertake no repairs of unusual magnitude or danger without sufficient assistance, and until provided with every necessary material, which will be supplied to them by the company on application to the mine manager. The progress of their work must be reported at the termination of every shift to the mine manager.

*Miners and Workmen.*

18. Every workman now or hereafter employed in any of the company's works or workings, whether on surface or underground, shall be subject to these rules, a copy of which he will be required to sign on entering the company's employ; and shall obey the commands or instructions of the manager, or of the overman, if any, in charge of the mine or part of the mine in which he is working.

19. Miners and other workmen are expressly forbidden to proceed towards or into their working-places at the commencement of any shift until it shall have been intimated to them by the foreman that the travelling-roads and working-places have been examined and are apparently safe to enter.

20. Till such intimation of apparent safety shall have been made, miners and workmen shall either remain at the pit-head or mouth of the mine, or at some other place assigned to them for the purpose. If no such place shall have been assigned at which to remain, they shall always understand that the pit-head or mine-mouth, whichever it may be in their case, is the proper place at which they are required to wait the requisite intimation.

21. On beginning work at every shift miners and others shall be bound to satisfy themselves concerning the safety of their working-places, independently of such intimation as aforesaid, and they shall thereupon work at their appointed coal-faces or other work continuously, industriously, and without unnecessary intermission while the shift continues, and shall obey the orders applicable to the safe and proper prosecution of the colliery works given them by the mine manager, overman, or other person for the time being placed over them.

22. If while at work, or at any other time, miners shall discover or be informed of the existence of any obstruction in the ventilation, or stagnation or impurity of the air of the mine, or of the existence of any defects in the walls, roofs, or any other part of the mine, they shall be bound to give instant information to the mine manager, overman, or the person in charge of the mine for the time being, so that these defects may be remedied and danger therefrom averted.

23. Miners are expressly forbidden to go into or improperly near any place throughout the whole mine where danger is known or supposed to exist, except for the purpose of effecting repairs or other necessary work directed by the manager or his overman. They are forbidden to continue working in any part of the coal-face where a sudden outburst of fire-damp shall happen, or where danger from any cause shall apparently threaten, until the same shall have been examined

by the manager or overman in charge and reported safe or the impurity obviated.

24. The common but highly dangerous practice among miners, of testing fire damp escaping from a blower by igniting it with their lamps, is peremptorily forbidden.

25. The company will supply all timber required for the proper working of their mines, and deliver it in suitable quantities near the working-faces. Miners shall be bound to secure the roof and also the working coal-faces, subject to the approval of the manager or overman, who, where the roof appears excessively dangerous, shall aid in securing the same.

26. If from any accident or other cause miners are at any time unable to find a sufficient supply of props when it is unsafe to continue their work without them, they are forbidden to remain at their working-faces; and no workman shall commence or continue to work in any place where he may consider the timber insufficient to support the roof of the mine, or discover any other cause that may render the place unsafe, until such defects have been put right by the person in charge.

#### *Drawers, Putters, and Drivers.*

27. Drawers, putters, and drivers shall not be permitted to approach or to enter the working-places until the miners shall have proceeded to work. Drawers shall carefully convey their loaded hutches to the pit-bottom or mine-mouth, and shall deliver the same at the place of delivery pointed out to them for the reception thereof, and shall place them securely under the supervision of those appointed to take charge.

#### *Miscellaneous Regulations.*

28. As a matter of common safety, miners, drawers, and all other workmen in the mine who shall observe or come to know of any defect in any road, roof, or air-course, or in any stopping or permanent or temporary brattice, or other appliances or work devised for making, maintaining, and promoting effective ventilation of the mine, are enjoined to give notice thereof to the manager or overman or other person in charge, so that the same may be forthwith repaired or rectified.

29. In like manner every miner, drawer, and other workman engaged in the mine who shall observe or come to know of any defect or flaw in the working machinery and gearing used in and about the mine, whereby the efficiency thereof may be impaired, shall be bound to communicate the same as above.

30. No workman shall, on any pretence whatever, be allowed to introduce into the mine any stranger without the sanction of the mine manager.

31. Miners, drawers, and all others in the mine who shall have occasion to pass through any trap-door shall thereupon closely shut the same, and shall on no account leave it open. All doors shall be hung so that they will close automatically, and no door shall be fastened back while on its hinges. On discontinuing work at the end of a shift, and especially when no work is to be done in the mine on the following day, care must be taken by every workman closely to shut all trap-doors, and thereby allow of the proper current of air necessary for ventilation being constantly circulated.

32. All workmen are especially forbidden to throw into, deposit, or leave coal, wood, stone, rubbish, or materials of any kind in any air-course or road, so as to interfere with or hinder the air passing into and through the mine.

33. All workmen are prohibited from entering or remaining in any place throughout the whole mine where not absolutely required by duty at the time.

34. Miners and all others are prohibited from defacing or removing marks which may be made in any part of the workings in connection with the survey of the mine, or for the guidance of the workmen in their operations. All workers are forbidden to displace, injure, or damage in any way the coal-stoops, props, hutches, rails, or any part of the machinery, gearing, or apparatus.

35. Blasting is strictly prohibited, unless with the express permission of the manager.

36. Meetings of miners and other workmen in a body within the workings, or in any of the roads or air-courses of the mine, are strictly prohibited.

37. No person shall be permitted to enter or to continue in or about the mine or works while in a state of intoxication. No intoxicating liquor, on any pretence whatever, except in cases of necessity and with the consent of the manager, shall be taken into the mine.

38. No person shall ride upon any tub or tram without the permission of the manager. No person shall go before any tram or tub on any incline, brow, or slope unless duly authorized. Every person working on any incline, brow, or slope shall secure his tub from getting loose; and before he attempts to take a tub down shall ascertain that he has proper scotches or other means for stopping it on the way when required. He shall not take more than one tub down at a time unless he has the means of holding them, and

when on the way he shall keep behind. Where machinery is used he shall not, without hooking or otherwise securing it, place a tub on the plates or rails so that it could run down. The taker-off at the bottom of a steep incline or jig shall not be in front of the tub when it is in motion.

#### *Rules designed to prevent Accidents from Fire-damp.*

39. The manager may at any time order that work in the mine, or in any particular portion thereof, shall be carried on with safety-lamps only, and in such cases stations will be fixed upon by the manager where the safety-lamps will be examined. From these stations no workman is to take a safety-lamp without it having been examined by the person appointed for that purpose.

40. The manager and overman shall have full power to direct the workman how to use their safety-lamps during the time of working, and it is particularly enjoined that every workman strictly attend to such directions.

41. Should any workman using a safety-lamp detect by the usual indications the appearance or presence of fire-damp, he is first to pull down the wick with the pricker, and then retreat to the lamp-station and give information to the manager, overman, or fireman.

42. Workmen are strictly prohibited from continuing to work in a place where such indications have been observed by them, and, should the flame continue in the interior of the lamp after the wick has been drawn down, the lamp must then be cautiously removed, and no attempt made to extinguish the flame by any other means.

43. Every miner, hewer, putter, or other person whatever in charge of a safety-lamp losing his light is to take it himself to the station where the lamps are examined to be re-lighted and examined before being again used.

44. It is expressly directed that any person witnessing any improper treatment of the safety-lamps by any one shall give immediate information to the manager in charge of the mine, so that a recurrence of such conduct may be prevented by the offending party being brought to justice.

45. Any person found smoking tobacco in any part of the said colliery where the safety-lamp is used, or found with a tobacco-pipe in his possession, shall be liable to be taken before a Magistrate.

46. Matches shall not be taken into any part of the mine where gas or fire-damp is known to exist, under any pretence whatever.

47. If at any time it is found that the mine or any part thereof, by reason of fire-damp, or any other cause whatever, is dangerous, the manager, overman, or foreman, whichever shall first be made aware of the same, shall immediately order all workmen to withdraw from the mine or such part thereof as is so found dangerous; and the manager, overman, or foreman shall, if the danger arises from fire-damp, inspect the same with a safety-lamp, and make a true report of the condition of such mine or part thereof; and workmen shall not, except so far as may be necessary for inquiring into the cause of danger, or for the removal thereof, or for examination, be readmitted into the mine or such part thereof as may be so found to be dangerous, until the same is reported not to be dangerous. Every such report shall be entered in the Mine Registry, and signed by the person making the same.

48. The workmen employed in the mine may, from time to time, appoint two of their number to inspect the mine, and the persons so appointed shall be allowed, once at least in every week, accompanied by the manager of the mine, or the overman or fireman of the mine, to go to every part of the mine and inspect the workings, both old and new, and the means for ventilation of the mine, and shall be afforded every facility for the purpose of such inspection. A true report of the result of such inspection shall be made in the Mine Registry, and shall be signed by the person who made the same.

49. Miners shall, in long-wall working, or at any time if ordered to do so by the manager, set sprags or holing-props as soon as there is room, and shall afterwards keep them set during holing. After taking out the sprags or holing-props, if the coal or other mineral will not fall with wedging or from the effects of the shot, they shall not hole further until they have reset the sprags or holing-props. In long-wall working miners shall pack or chock the ends of the main gateway.

50. No officer in a place of trust shall depute another person to do his work without the sanction of his superior; and no person in a place of trust shall absent himself without having previously obtained the permission of his superior officer for his term of absence.

51. Intoxicating drinks shall not be allowed in or about the mine without the consent of the manager, and then only in cases of necessity; and no person in a state of intoxication shall be allowed to be in or about the mine.

The following special rules shall be in force at every mine where men are raised and lowered in any shaft;—

*Manager.*

52. The manager must see that the signals for moving the cages are painted upon a board and placed in a conspicuous position.

*Underground Workmen and Boys.*

53. During the time of the mine-drawing every person in descending the shaft shall be under the directions of the banksman, and in ascending the shaft shall be under the direction of the onsetter, and no other person than the banksman and onsetter shall give any signal during such time. No person shall get on or off the cage after the signal to go on has been given, nor until it has settled on the props or reached the bottom. No person shall take with him down or up the shaft tools, rails, props, sprags, or other bulky materials, except for repairing the shafts. No person shall get on the cage after the numbers stated on the board at the pit top and bottom are on. Every workman and boy shall leave the cage immediately when ordered to do so by the banksman or onsetter.

*Banksman and Onsetter.*

54. The head banksman, subject to the manager's or underviewer's directions, shall have full control over the pit-top and over all persons employed under him. The onsetter, subject to the manager's or underviewer's directions, shall have full control over the pit-bottom and all persons employed there. No person under the age of eighteen years shall have charge of the pit top or bottom.

55. The head banksman or other appointed person shall be at the mine at the appointed time in the morning, and shall provide a sufficient number of lights on the bank; and before the engine is started, and from time to time during the day, he shall see that the pulleys, ropes, cages, chains, and landing doors or frames are in safe working condition; and he shall not allow any person to descend the shaft until he has put the loaded tubs into the cage, and the ropes and loaded cages have been run up and down the shaft, and the ropes, chains, cappings, and cages carefully examined by him. If any weakness or defect is found in anything belonging to the pit-top, or in the engine or machinery, he must not permit any person to descend or ascend until it is made secure. The banksman shall also attend to the proper signals. The head banksman shall not allow any boy under thirteen to work on the bank excepting under the exemptions provided by the Act, and in that case only with an order from the manager.

56. The banksman in charge of the pit-top shall not let a stranger go down the shaft without the authority of the manager. The banksman, when he is informed of danger in the shaft, shall not allow any person to go down unless for the purpose of repairing the shaft. He shall not allow any intoxicated person to descend. The banksman shall send all tools down the shaft in a tub or tram, and props, rails, brattice-boards, and other bulky materials shall be tied securely to the cage or rope by the banksman or onsetter when being sent down or up the shaft. If a rope is working in the shaft for underground planes, no person shall ride in the cage whilst this is running unless the rope be cased.

59. The onsetter shall be in the mine at the appointed time in the morning. He shall be at his station to give signals and perform his other duties under these rules, and he shall remain there to see the men and boys all safely into the cage and up the shaft at the close of the day.

60. The onsetter shall report to the underviewer any person that gives a signal or disobeys his directions. He shall remain at the bell-handle and give cautionary signals, if necessary, when any person ascends or descends the shaft. He shall only allow appointed persons to put tubs into or take them out of the cages; and he shall see that the coals or materials do not project over the cage.

61. The onsetter shall see that the water-sump is never uncovered when any person is ascending or descending the shaft.

62. The banksman shall keep the cages and pit-top clear.

63. The banksman and onsetter shall alone give the signals for moving the cages, which are as follows:—

To raise up after being stopped ..	Four times.

64. The banksman and onsetter shall not allow any person to ride on the cage without the cover, unless by special permission.

The following special rules shall be in force at any mine where any incline or engine-plane is in use:—

*Brakesman on Incline and Engine-planes.*

65. The brakesman shall, during work, see that the machinery, ropes, signals, &c., are in proper working order, and, if he perceive anything wrong, at once report the same to the underviewer or his deputy. He must be cautious in conducting the wagons, and see that they are securely coupled. He shall pay attention to giving and receiving the necessary signals.

66. The underviewer or his deputy shall see that proper stops and blocks are fixed at the top of each incline.

The following special rules shall be in force in any mine where steam-engines are used:—

*Enginewright.*

67. The enginewright or some competent person shall daily inspect the engines, boilers, steam-gauges, water-gauges, feed-pumps, safety-valves, indicators, brakes, drums, ropes, chains, cages, and all other machinery used for the purpose of raising men or materials from the mine, and shall cause the same to be in a state of efficient repair.

68. The enginewright or some competent person appointed must daily examine the state of the shaft by which persons ascend or descend, and the guides and conductors therein.

69. The enginewright shall see that the walling and timbering of the pumping shaft and the pumping apparatus are frequently examined. The fixed and suspended stages, cradles, land-loops, ropes, chains, gin, and capstan shall be examined before being used.

70. The enginewright shall see that competent persons of not less than eighteen years of age are employed for working the machinery used in lowering and raising persons employed in the mine.

71. The enginewright shall see that the bells and signals required by the Act are fixed and maintained in working order, and that the engineman understands the code of signals.

72. The enginewright shall see that every cage used for the purpose of raising and lowering persons in the shaft shall have a proper covering overhead.

73. The enginewright shall see that all ropes are carefully attached to the drum, and when the cage is at the pit-bottom there must not be less than two rounds of rope on the drum.

74. When a winding-shaft rope requires "capping" or "splicing," it shall be done under the direction of the enginewright or a competent person appointed by the manager.

75. The enginewright shall report any breakage or derangement of machinery to the manager or engineer.

76. The enginewright or some competent person shall see that each boiler is laid off and cleaned when required; he shall make a careful examination of the same and all its connections, and not allow it to work unless in good working order.

77. The enginewright or some competent person shall see that all the signals are fixed that are required by the Act.

78. The enginewright shall see that every fly-wheel, and all exposed and dangerous parts of the machinery, shall be securely fenced.

*Enginemen and Stokers.*

79. Each engineman shall, every morning before commencing work, examine his engine and all the machinery connected therewith, and immediately report any defect to the manager or enginewright.

80. The engineman must run the ropes and loaded cages slowly up and down the pit before any person ascends or descends.

81. No one shall interfere with the engine except the engineman. He shall at all times gently lift the cage from the pit-bottom, and carefully drive the engine, and not leave the handle whilst persons are in the shaft, and shall not allow any person to remain in the enginehouse. He shall pay particular attention to the indicators and signals, and shall stop the engine if any defect is perceived.

82. The engineman shall not leave his work whilst any person is underground, except when he is relieved by the engineman coming on the next shift; and, in case of sickness or lawful absence, he must give early and sufficient notice to the enginewright, so that a substitute may be provided.

83. The engineman shall make himself thoroughly acquainted, and act in accordance, with the signals laid down in these rules.

84. When work is suspended the engineman shall leave the cages in such a position that they do not impede the ventilation, and so as not to leave the pit-top unfenced.

85. Whilst any person is in the shaft the engineman shall drive the engine at a reduced speed.

86. The engineman or stoker shall from time to time during the day examine the fittings of the boilers, and at once report any defects to the manager or enginewright. Description: The land now offered for lease is excellent pastoral country. The carrying capacity of the land when cleared and grassed, judging from the results obtained by the settlers on the adjoining bush lands, is from three to four cross-bred sheep to an acre. Particulars relating to soil and timber are printed on the map. The formation is a limestone and marl (papa). The bush is mixed, generally of a light description. The main line of road, now in course of formation from the sea-coast at Wainui, connecting with the Napier-Wellington Railway at Tahoraiti, runs through the centre of Block V. The road has been formed for dray-traffic through Block V. The shipping-place for the district, at which the small coastal steamers call, is at Cape Turnagain, distant about seven and a half miles. The road to the shipping-place is not metalled, but is a passable dray-road during eight months in the year.

## ABSTRACT OF CONDITIONS RELATING TO PERPETUAL LEASES.

The tenders will be opened at the meeting of the Land Board on the day above named, when the highest tenderer, if the tender shall equal the upset annual rental, will be declared the purchaser.

If there be only one tenderer for any allotment, he shall be entitled to the land at the upset rental, notwithstanding that his tender may have been for a higher rental. Any person tendering for more than one section must appear at the Land Board, either in person or by agent authorized in writing, on the day on which tenders are opened.

The number of the section and block, with the name of the district, must be written on the envelope enclosing the tender. The letter, being on Public Service, and addressed to the Commissioner of Crown Lands, need not be stamped.

Any person of seventeen years of age and upwards may become a lessee under this system. In the event of any person tendering for two or more leases, the deposit of a sum equal to one half-year's rent of the tender largest in amount shall be sufficient, together with the sum of £1 10s. to pay for the lease and registration thereof, paid either in cash, marked cheque, or bank draft, made payable to the Receiver of Land Revenue, Napier: Provided that in the case of a person tendering for two or more leases, such as he may in the aggregate become the lessee of under the Act, namely, in the case where the lands comprised in the several leases adjoin each other, in such case the deposit shall be a half-year's rent at the rate tendered for each such lease, and also the sum of £1 10s. in respect of each such lease, the fee for preparation and registration of same.

Any lessee of the Crown lands who has fulfilled all the conditions of improvements within six years can acquire the freehold of his lease on payment of the capital value, provided the payment is made within eleven years of the commencement of the lease.

But the lessees of any portion of the educational reserve lands cannot acquire the fee-simple of the land.

Limits of Area for each Lessee: No lease shall be made to any person owning, nor shall any person be capable of becoming the lessee under a lease, or a sublessee, who owns, any freehold land, or land held under lease or license under the Crown, whereby such person shall become either the owner, tenant, or occupier in the whole, either by himself or jointly with any other person or persons, including the lands comprised in the lease, of a greater area than 640 acres anywhere in the colony.

Improvements.—Every lessee shall bring into cultivation—

1. Within one year from the date of his lease, not less than one-twentieth of the land leased by him;
2. Within two years from the date of his lease, not less than one-tenth of the land leased by him;
3. Within four years from the date of his lease, not less than one-fifth of the land leased by him.

And shall, within six years from the date of his lease, in addition to the cultivation of one-fifth of the land, have put substantial improvements of a permanent character on the land to the value of £1 for every acre of such land.

Plans and schedules can be seen at the railway stations and post offices in the Hawke's Bay Provincial District.

Personal Residence: The Land Board will give permission dispensing with the necessity of personal residence for the first two years from the date of the lease.

Description: The land offered is well grassed plain, slightly stony on the surface, but containing from 8 to 12 inches of fairly good soil; it is all capable of being ploughed and laid down in English grass. Each section, except two outlying ones, abuts on the West Eyre Water-race, in which there is a splendid supply of water. The land is situated eight miles from Oxford, and four and a half miles from Sheffield, and two and three-quarter miles from Oxford and Sheffield Railway line, which is now open for traffic.

ABSTRACT OF CONDITIONS RELATING TO PERPETUAL LEASES.

The tenders will be opened at the meeting of the Land Board on the day above named, when the highest tenderer, if the tender shall equal the upset annual rental, will be declared the purchaser.

If there be only one tenderer for any allotment, he shall be entitled to the land at the upset rental, notwithstanding that his tender may have been for a higher rental. Any person tendering for more than one section must appear at the Land Board, either in person or by agent authorized in writing, on the day on which tenders are opened.

The number of the section and block, with the name of the district, must be written on the envelope enclosing the tender. The letter, being on Public Service, and addressed to the Commissioner of Crown Lands, need not be stamped.

Any person of seventeen years of age and upwards may become a lessee under this system. In the event of any person tendering for two or more leases, the deposit of a sum equal to one-half year's rent of the tender largest in amount shall be sufficient, together with the sum of £1 10s. to pay for the lease and registration thereof, paid either in cash, marked cheque, or bank draft, made payable to the Receiver of Land Revenue, Christchurch: Provided that in the case of a person tendering for two or more leases, such as he may in the aggregate become the lessee of under the Act—namely, in the case where the lands comprised in the several leases adjoin each other, in such case the deposit shall be a half-year's rent at the rate tendered for each such lease, and also the sum of £1 10s. in respect of each such lease, the fee for preparation and registration of same.

Limits of Area for each Lessee: No lease shall be made to any person owing, nor shall any person be capable of becoming

the lessee under a lease, or a sublessee, who owns, any freehold land, or land held under lease or license under the Crown, whereby such person shall become either the owner, tenant, or occupier in the whole, either by himself or jointly with any other person or persons, including the lands comprised in the lease, of a greater area than 640 acres anywhere in the colony.

Any person may tender for one or more sections, and if contiguous to one another, may, if he wishes it, obtain a lease for any area not exceeding 640 acres.

Improvements: Every lessee shall bring into cultivation—  
1. Within one year from the date of his lease, not less than one-twentieth of the land leased by him;  
2. Within two years from the date of his lease, not less than one-tenth of the land leased by him;  
3. Within four years from the date of his lease, not less than one-fifth of the land leased by him.

And shall, within six years from the date of his lease, in addition to the cultivation of one-fifth of the land, have put substantial improvements of a permanent character on the land to the value of £1 for every acre of such land.

Plans and schedules can be seen at the railway stations and post offices in the Canterbury Provincial District.

Personal Residence: The Land Board will give permission dispensing with the necessity of personal residence for the first two years from the date of the lease.

Description: The block is situated in the West Oxford Bush, six miles from Oxford and nine miles from Sheffield; the new road being formed to Wharfedale goes through the western portion of the block, the southern boundary of which on this road is about two miles from the edge of the bush behind Mr. Gorton's station at View Hill. The land is all covered with bush, principally birch, with a few pine-trees scattered about; the ground is undulating and in places rather steep, but is well watered, as a running stream will be found in every section. A good many of the sections can only be classed as second-class or inferior land, and the capital value has consequently been put at the lowest price allowed by the Land Act in Canterbury—namely, £2 per acre, and the rental is only 5 per cent. on this; consequently, to bushmen wanting to establish a home, not frightened at hard work, the block offers the opportunity of obtaining a permanent lease or freehold.

ABSTRACT OF CONDITIONS RELATING TO PERPETUAL LEASES.

The tenders will be opened at the meeting of the Land Board on the day above named, when the highest tenderer, if the tender shall equal the upset annual rental, will be declared the purchaser.

If there be only one tenderer for any allotment, he shall be entitled to the land at the upset rental, notwithstanding that his tender may have been for a higher rental. Any person tendering for more than one section must appear at the Land Board, either in person or by agent authorized in writing, on the day on which tenders are opened.

The number of the section and block, with the name of the district, must be written on the envelope enclosing the tender. The letter, being on Public Service, and addressed to the Commissioner of Crown Lands, need not be stamped.

Any person of seventeen years of age and upwards may become a lessee under this system. In the event of any person tendering for two or more leases, the deposit of a sum equal to one half-year's rent of the tender largest in amount shall be sufficient, together with the sum of £1 10s. to pay for the lease and registration thereof, paid either in cash, marked cheque, or bank draft, made payable to the Receiver of Land Revenue, Christchurch: Provided that in the case of a person tendering for two or more leases, such as he may in the aggregate become the lessee of under the Act—namely, in the case where the lands comprised in the several leases adjoin each other, in such case the deposit shall be a half-year's rent at the rate tendered for each such lease,

and also the sum of £1 10s. in respect of each such lease, the fee for preparation and registration of same.

Any lessee of the Crown lands who has fulfilled all the conditions of improvements within six years can acquire the freehold of his lease on payment of the capital value, provided the payment is made within eleven years of the commencement of the lease.

Limits of Area for each Lessee: No lease shall be made to any person owning, nor shall any person be capable of becoming the lessee under a lease, or a sublessee, who owns, any freehold land, or land held under lease or license under the Crown, whereby such person shall become either the owner, tenant, or occupier in the whole, either by himself or jointly with any other person or persons, including the lands comprised in the lease, of a greater area than 640 acres anywhere in the colony.

Any person may tender for one or more sections, and if contiguous to one another may, if he wishes it, obtain a lease of any area not exceeding 640 acres.

Improvements: Every lessee shall bring into cultivation—

1. Within one year from the date of his lease, not less than one-twentieth of the land leased by him;
2. Within two years from the date of his lease, not less than one-tenth of the land leased by him;
3. Within four years from the date of his lease, not less than one-fifth of the land leased by him;

And shall, within six years from the date of his lease, in addition to the cultivation of one-fifth of the land, have put substantial improvements of a permanent character on the land to the value of £1 for every acre of such land.

Plans and schedules can be seen at the railway stations and post offices in the Canterbury Provincial District.

Personal Residence: The Land Board will give permission dispensing with the necessity of personal residence for the first two years from the date of the lease.

They have been copied, however, as they stand in the General Register; and if they are inaccurate in any case it is because the changes of residence have not been officially notified to the Registrar-General, as it is obviously desirable that all such changes should be.—Wm. *Birth-rates.*—The birth-rates for 1885 were again much higher for Auckland and Wellington than for Christchurch and Dunedin. Although the estimates of population given may be somewhat incorrect, yet there cannot be errors of sufficient magnitude to account for the differences. The extremely low rate in Christchurch is attributed to the presence in the population of unduly high proportions of unmarried persons and of married persons of mature years; these proportions being raised by the settlement outside of the borough of young married people, for economical reasons.

The numbers and conditions of the population will be obtained at the ensuing census, when the causes for these wide differences can be better ascertained.

*Death-rates.*—The death-rates for Auckland and Wellington were very much higher than for Christchurch and Dunedin, and considerably in excess of the rates in 1884. The rates for the two years were as follow:—

	Deaths per 1,000 of the Mean Population.				
	1884.		1885.		
Auckland .. .. .	..	..	15.27	..	16.83
Wellington .. .. .	..	..	15.54	..	16.21
Christchurch .. .. .	..	..	13.08	..	13.79
Dunedin .. .. .	..	..	12.95	..	11.81

Comparatively high as are the rates for Auckland and Wellington, they yet compare favourably with the death-rates in urban districts in England and the adjoining Australian Colonies. The higher birth-rates largely increase the death-rates, as a large percentage of infants die within one year of their birth. Thus, if the Auckland birth-rate had been the same as that for Wellington, the smaller number of infantile deaths that would have occurred in consequence would have reduced the general death-rate to 16.24 per 1,000 of the population, or nearly the same as in Wellington, where the rate was 16.21 per 1,000. If the birth-rate had been the same as in Christchurch, even with the high rate of mortality among children under one year of age (14.45 per cent.) maintained, the general death-rate would have been reduced to 15.01 per 1,000.

*Infantile Mortality.*—The following table gives the number of deaths in 1884 of children under one year of age, and the proportion to the total births. The proportion of these deaths was greatest in Auckland, which also had the highest birth-rate and the highest general death-rate. In Dunedin, where the general death-rate was lowest, the infantile mortality was also least.

Boroughs.	Total Births.	Deaths of Children under 1 Year of Age.	Proportion per cent. of Deaths of Children under 1 Year of Age to Total Births.
Auckland .. .. .	1,343	194	14.45
Wellington .. .. .	992	102	10.28
Christchurch .. .. .	432	58	13.43
Dunedin .. .. .	717	69	9.62
Totals .. .. .	3,484	423	12.14 (Mean.)

A further comparison is hereunder made, showing the deaths of children under 5 years, and the proportions of such deaths to the total deaths:—

Boroughs.	Total Deaths.	Deaths of Children under 5 Years of Age.	Proportion per cent. of Deaths of Children under 5 Years of Age to Total Deaths.
Auckland .. .. .	480	245	51.04
Wellington .. .. .	374	139	37.17
Christchurch .. .. .	227	79	34.80
Dunedin .. .. .	295	88	29.83
Totals .. .. .	1,376	551	40.04 (Mean.)

The high death-rate per 1,000 of the population in Auckland is thus largely due to a much greater mortality among young children.

*Specific Febrile or Zymotic Diseases.*—These diseases caused 16.50 per cent. of the deaths in 1885. The following are those that proved most fatal in each of the two past years:—

	1885.	1884.		1885.	1884.
Diphtheria ..	32	18		Diarrhoeal diseases ..	107 .. 74
Typhoid fever ..	26	29		Whooping cough ..	14 .. 45

Diphtheria was most fatal in Wellington in 1885, 19 out of the 32 deaths having occurred therein. Auckland came next, with 11 deaths. The mortality from typhoid fever was greatest in Wellington (11 deaths), and next in Auckland (9 deaths).

Sixty-four out of the 107 deaths from diarrhoeal diseases occurred in Auckland; of these, 57 were of children under five years of age. There have not been any serious epidemic diseases during the year. Only one death has occurred from scarlet fever, and not one from measles.

*Constitutional Diseases.*—These diseases caused 18.82 per cent. of the total number of deaths; of these, the most fatal was phthisis, which claimed a death-toll of 145 persons. Cancer caused 41 deaths in 1885 against 50 in 1884.

*Local Diseases.*—The deaths in this class amounted to 635, or 46.15 per cent. of the deaths from all causes. Of these, the deaths from diseases of the nervous system amounted to 165, of which 25 were attributed to inflammation of the brain and its membranes (including 10 of children under five years of age), 42 were attributed to apoplexy, and 47 to convulsions, 45 having been of children under five years of age. Diseases of the circulatory system caused 99 deaths; of these, 85 were caused by various forms of heart disease. Diseases of the respiratory organs caused 168 deaths; bronchitis and pneumonia having together caused 118 of the number, of which 58 were of children under five years of age.

*Violent Deaths.*—The number of deaths classified under this head were 58, of which 51 were accidental, 1 was a case of murder, and 6 were suicidal. The deaths from railway and tram accidents were 3 in number, and those from drowning 11.
