Notice to Mariners, No. 15 of 1889.

Marine Department,
Wellington, 6th July, 1889.

THE following Notices to Mariners, received from the Portmaster, Brisbane, Queensland, are published for general information.

THOS. FERGUS,
(For the Minister having charge of the Marine Department.)

SOUTH ENTRANCE TO MORETON BAY.

NOTICE is hereby given that the channel across the bar, at the south entrance, has shifted farther to the eastward. Vessels should now enter with the northern shoulder of Mount Cotton open of Amity Point, about one-third of the distance across to Moreton Island, and steer for it, passing the elbow of the South Break on the port hand. When the first black buoy off the south end of Moreton Island is sighted, they should haul up and pass it as usual. The depth on the bar at low-water springs does not exceed 12ft.

G. P. HEATH, Commander, R.N.,
Portmaster.

Department of Ports and Harbours,
Brisbane, 13th June, 1889.

WIDE BAY BAR.—LEADING LIGHTS AND BEACONS AT SOUTH CHANNEL.

NOTICE is hereby given that, on and after this date, two leading lights will be exhibited for crossing Wide Bay Bar by the South Channel. The front light, which is red, is placed near the beach, midway between the positions of the front square and triangular beacons, as shown on the chart. The back light, which is white, is placed alongside the back square beacon leading through the North Channel, and, when in line with the front light, leads across the bar on a N. 46° 30' W. bearing, with a depth of water of not less than 11ft. at low-water springs.

Directions: After passing Double Island Point, and inside the Wolf Rock, steer N.W. for about two miles, when the red and white leading lights will be sighted; bring them in line and steer with them in that position until the water deepens to 5 fathoms inside the bar, when haul up and steer for the red light on Inskip Point, and pass up the channel as usual.

Great care must be taken to haul up and head for the red light before crossing the line of leading lights on Inskip Point. The new line for crossing the bar is marked by day by the triangular beacons, which have been shifted from their former position. As there is more water in the North than in the South Channel, the white leading lights have been temporarily re-lit for the use of those regular traders of heavier draught, which, in fine weather, can still use that passage.

G. P. HEATH, Commander, R.N.,
Portmaster.
