## Despatch.—Tonnage Measurement of German Vessels.

Department of Trade and Customs,  
Wellington, 13th November, 1889.

THE following despatch, received from Her Majesty's Principal Secretary of State for the Colonies, is published for general information.

EDWIN MITCHELSON,  
(For the Commissioner of Trade and Customs.)

(Circular.) Downing Street, 13th August, 1889.

SIR,—I have the honour to transmit to you, for publication in the colony under your government, a copy of an Order of the Queen in Council of the 23rd ultimo, revoking the Order in Council of the 26th day of June, 1873, respecting the tonnage measurement of German vessels, and substituting other provisions for the same.

I have, &c.,  
KNUTSFORD.

The Officer Administering the Government of  
New Zealand.

At the Court at Osborne House, Isle of Wight, the twenty-third day of July, 1889.

Present:

THE QUEEN'S MOST EXCELLENT MAJESTY IN COUNCIL.

WHEREAS by "The Merchant Shipping Act Amendment Act, 1862," it is enacted that, whenever it is made to appear to Her Majesty that the rules concerning the measurement of tonnage of merchant-ships for the time being in force under the principal Act have been adopted by the Government of any foreign country, and are in force in that country, it shall be lawful for Her Majesty, by Order in Council, to direct that the ships of such foreign country shall be deemed to be of the tonnage denoted in their certificates of registry or other national papers, and thereupon it shall no longer be necessary for such ships to be remeasured in any port or place in Her Majesty's dominions, but such ships shall be deemed to be of the tonnage denoted in their certificates of registry or other papers in the same manner, to the same extent, and for the same purposes in, to, and for which the tonnage denoted in the certificates of registry of British ships is to be deemed the tonnage of such ships:

And whereas by "The Merchant Shipping Act, 1876," it is enacted that, where Her Majesty has power under "The Merchant Shipping Act, 1854," or any Act passed or hereafter to be passed amending the same, to make an Order in Council, it shall be lawful for Her Majesty from time to time to make such Order in Council, and by Order in Council to revoke, alter, or add to any order so made:

And whereas it was made to appear to Her Majesty that the rules concerning the measurement of tonnage of merchant-ships in force under "The Merchant Shipping Act, 1854," had been adopted by the Government of His Majesty the German Emperor, with the exception of a difference in the mode in certain steamers of estimating the allowance for engine room, and such rules were in force in that country and came into operation on the 1st day of January, 1873:

And whereas by an Order in Council dated the 26th day of June, 1873, Her Majesty was pleased to direct as follows:—

1. As regards sailing-ships, that merchant sailing-ships of the said German Empire the measurement whereof should, after the said 1st day of January, 1873, have been ascertained and denoted in the registers and other national papers of such sailing-ships, testified by the date thereof, should be deemed to be of the tonnage denoted in such registers and other national papers in the manner and to the same extent and for the same purpose in, to, and for which the tonnage denoted in the certificate of registry of British sailing-ships is deemed to be the tonnage of such ships.

2. As regards steamships, that merchant-ships belonging to the said German Empire which are propelled by steam, or any other power requiring engine room, the measurement whereof should, after the said 1st day of January, 1873, have been ascertained and denoted in the registers and other national papers of such steamships, testified by the dates thereof, should be deemed to be of the tonnage denoted on such registers or other national papers in the same manner and to the same extent, and for the same purpose in, to, and for which the tonnage denoted in the certificate of registry of British ships is deemed to be the tonnage of such ships: Provided, nevertheless, that, should the owner or master of any such German steamship desire the deduction for engine room in his ship to be estimated under the rules for engine-room measurement and deduction applicable to British ships instead of under the German rule, the engine room should be measured and the deduction calculated according to the British rules.

And whereas it has been made to appear to Her Majesty that a new Imperial Ordinance, which came into operation on the 20th day of June, 1888, stipulates that the owners of German steamships may have the net tonnage of their vessels calculated according to British as well as according

to German rules, and shall have issued to them a separate certificate, to be used in foreign countries, showing the net tonnage calculated according to British rules:

And whereas it has been made to appear desirable to Her Majesty that the provisions of the said recited Order in Council of the 26th day of June, 1873, should be revoked, and a new Order in Council made and substituted in lieu thereof:

Now, therefore, Her Majesty, in virtue of the powers vested in her by the said recited Acts, and by and with the advice of her Privy Council, is pleased to direct that the said recited order of the 26th day of June, 1873, shall be and the same is hereby revoked, and in lieu thereof and in substitution therefor Her Majesty is hereby pleased, by and with the advice of her Privy Council, to direct as follows:—

1. As regards sailing-ships, that merchant sailing-ships of the said German Empire the measurement whereof after the said 1st day of January, 1873, has been ascertained and denoted in the registers and other national papers of such sailing-ships, testified by the date thereof, shall be deemed to be of the tonnage denoted in such registers and other national papers in the same manner, and to the same extent, and for the same purpose in, to, and for which the tonnage denoted in the certificate of registry of British sailing-ships is deemed to be the tonnage of such ships.

2. As regards steamships, that merchant-ships belonging to the said German Empire which are propelled by steam or any other power requiring engine room, the measurement whereof shall, after the said 1st day of January, 1873, have been ascertained and denoted in the registers and other national papers of such steamships, testified by the dates thereof, shall be deemed to be of the tonnage denoted on such registers or other national papers in the same manner, and to the same extent, and for the same purpose in, to, and for which the tonnage denoted in the certificate of registry of British ships is deemed to be the tonnage of such ships: Provided, nevertheless, that, if the owner or master of any such German steamship desires the deduction for engine room in his ship to be estimated under the rules for engine-room measurement and deduction applicable to British ships instead of under the German rule, the engine room shall be measured and the deduction calculated according to the British rules; and that, in the event of any such steamship possessing a certificate of tonnage or other national paper issued as aforesaid on or after the 20th day of June, 1888, denoting the net registered tonnage of such ship under the British rules, the ship shall be deemed to be of the tonnage so denoted thereon.

PROCLAMATION

By His Excellency Sir Henry Brougham Loch, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Knight Commander of the Most Honourable Order of the Bath, Governor and Commander-in-Chief in and over the Colony of Victoria and its Dependencies, &c.

WHEREAS by "The Passengers, Harbours, and Navigation Statute, 1865," it is, amongst other things, enacted that the Governor in Council, by Proclamation published in the Government Gazette, may from time to time define the limits and boundaries of ports in Victoria, and frame rules and regulations for the governance and preservation of the said ports respectively, and for the regulation of shipping in the same, and also for the due protection and preservation and the good government and management of all public wharves, and may appoint officers to carry out and enforce such rules and regulations; and any such limits, boundaries, rules, and regulations may from time to time be in like manner altered, amended, or repealed, and others substituted in their stead:

Now, therefore, I, the Governor of Victoria, with the advice of the Executive Council, do hereby proclaim the following to be an additional port regulation, and to be observed accordingly:—

Submarine Electric Cable: For the preservation of the submarine electric cable laid between Swan Island and Observatory Point, Point Nepean, vessels shall not be anchored within four cables on either side of an imaginary line crossing Port Phillip Bay from Swan Beacon to Pope's Eye Fort, and thence to Observatory Point.

Given under my hand and the Seal of the Colony, at Melbourne, this twenty-first day of October, in the year of our Lord one thousand eight hundred and eighty-nine, and in the fifty-third year of Her Majesty's reign.

(L.S.) HENRY B. LOCH.

By His Excellency's command.

J. B. PATTERSON,  
Commissioner of Trade and Customs.  
GOD SAVE THE QUEEN!

INNER ROUTE TO TORRES STRAIT.

THE following information has been supplied by Lieutenant G. C. Frederick, R.N., commanding H.M. surveying ship "Dart":—

*Oswald Reef*, near Cape Melville, is 4 cables in length north and south and 3 cables wide, with a general depth of from 2 to 5 fathoms. It has, however, several coral heads with not more than 9ft., and one near its western edge on which there is only 4ft. at low-water springs, and which lies in the following position: Lightship, S. 20° W.; Sandy Islet, Pipon Islands, S. 64° 30' E.; left extreme, N. 87° E.

*Taiwan Shoal* has not more than 17ft. of water over it at low-water springs, and lies midway between *e* and *g* Reefs, with the beacon on *e* Reef bearing S. 34° W., and the beacon on *d* Reef bearing S. 56° E.

*Night Island*.—The reef off the N.W. end of this island, of which a notice was issued from this office in December, 1887, has been found, on examination, to consist of a small detached reef, its outer or north-western edge lying N.W.  $\frac{1}{2}$  W. 3 cables from the northernmost mangroves of Night Island.

The main reef extends 2 cables northward of the island, but all dangers may be cleared and a good berth be picked up off the Sandy Beach by keeping No. IX. Island its own breadth open to the westward of Night Island.

*Shoal and Rock near No. X., Claremont Island*.—A bank with 2 $\frac{1}{2}$  fathoms on its western edge lies 8 cables E. by N. from this island, and extends thence for more than a mile, with patches carrying 4 and 5 fathoms.

At 1.9 miles E.N.E. from the island is a coral rock with only 5ft. of water over it at low-water springs.

*Rocky Patch off Cape Direction.*—On the edge of the shoal water to the north-eastward of the cape, and at a distance from it of 1.6 miles, is a sandy patch with only 1 fathom at low-water, with deep water close to, outside. It lies in the following direction: Beacon on *y* Reef, N. 60° E.; highest tree on No. X. Island, S. 36° E.

*Reef S.E. of Young Islet.*—Careful search was made for the coral patch awash at low-water shown on the Admiralty chart as lying about one mile S.E. of Young Islet, but no indication of shoal-water could be found.

*m Reef, Cape Grenville.*—A close examination of the north-west and western edges of *m* Reef failed to discover the out-lying patches shown upon the Admiralty chart.

The total births in the above boroughs amounted to 478, against 426 in September, an increase of 52. The deaths in October were 176, an increase of 20 on the number in September. Of the total deaths, males contributed 97; females, 79. Fifty-seven of the deaths were of children under 5 years of age, being 32.39 per cent. of the whole number; 45 of these were under 1 year of age.

† The information necessary for calculating the population has not yet been obtained from the Town Clerk.

It must be understood that the numbers of the population above given refer only to those within the several borough boundaries. To estimate the relative importance of the principal boroughs as centres of population it is necessary in each case to take into consideration the number of the population in the adjacent boroughs, some of which are included in the above table, and other districts which are practically suburbs of the central borough. This can only be done with any degree of accuracy for census years.

The populations of the four principal boroughs and their suburbs in 1886 were as follows:—

Auckland Borough .. .. .	33,161	Christchurch Borough .. .. .	15,265
Adjacent boroughs and road districts .. .. .	23,887	Adjacent boroughs and other suburbs... .. .	29,423
<b>Total Auckland Borough and suburbs...</b>	<b>57,048</b>	<b>Total Christchurch Borough and suburbs</b>	<b>44,688</b>

<b>Total Wellington Borough and suburbs</b>	<b>27,833</b>	<b>Total Dunedin Borough and suburbs</b> .. .. .	<b>45,518</b>

The population of Invercargill and suburbs at same date was—

Invercargill Borough .. .. .	5,212
Adjacent boroughs .. .. .	3,727
<b>Total Invercargill Borough and suburbs...</b>	<b>8,939</b>

The following Table shows the Causes of the Deaths of Persons of both Sexes under 5 Years of Age and 5 Years and upwards, and the Proportions per Cent. of Deaths from each Cause, in the Boroughs of Auckland, Wellington, Christchurch, and Dunedin, that were registered during the Month of October, 1889.

The following remarks apply only to the four principal boroughs:—

The births in October were 264, against 212 in September, an increase of 52.

The deaths amounted to 96, against 88 in September.

There were 16 deaths of persons of 65 years and upwards: 4 males of 80, 73, 72, and 67, and 2 females of 86 and 66, died at Auckland; 3 males of 80, 68, and 66 at Wellington; 2 males of 80 and 73, and a female of 80, at Christchurch; 2 males of 67 and 65, and 2 females of 96 and 67, at Dunedin.

*Specific Febrile or Zymotic Diseases.*—There were 6 deaths in this class in October, against 1 in September: 2 of these deaths were of children from diphtheria in Wellington.

*Constitutional Diseases.*—There was a decrease in the mortality from these diseases from 26 in September to 21 in October. Cancer caused 5 deaths, against 4 in the previous month; but the deaths from phthisis fell in number from 16 in September to 11 in October. The deaths from phthisis were more numerous in each of these months than in the corresponding months in 1888.

*Local Diseases.*—There was a decrease of 5 in the number of deaths from these causes in October on that in September—from 52 to 47. Diseases of the nervous system caused 9 deaths, against 12 in September; but diseases of the circulatory system (heart disease, &c.) were slightly more fatal, having caused 12 deaths, against 11 in September. There was a great decrease in the mortality from diseases of the respiratory system, namely, from 19 to 10 deaths; on the other hand, diseases of the digestive system caused 10 deaths in October, against 1 in September.

*Violent Deaths.*—There were 2 deaths in this class, of which one was of a child wilfully drowned in a bath; the other was of a child run over by a cart.

The subjoined table shows the mortality for the last two months at each of these four boroughs from six principal specific febrile or zymotic diseases, and also the deaths from certain inflammatory diseases of the lungs. These causes of death have been distinguished from the others of the classes to which they belong as being the most important special diseases which give rise to sudden increases in the death-rates of towns, and the prevalence of which is closely connected with sanitary condition and climatic influence of the season on health.
