

SUPPLEMENT

TO THE

NEW ZEALAND GAZETTE

OE

THURSDAY, AUGUST 22, 1895.

Published by Authority.

WELLINGTON, THURSDAY, AUGUST 22, 1895.

Notice of Acceptance of Complete Specifications.

Patent Office, Wellington, 21st August, 1895.

COMPLETE specifications relating to the under-mentioned applications for Letters Patent have been accepted, and are open to public inspection at this office. Any person may, at any time within two months from the date of this Gazette, give me notice in writing, in duplicate, of opposition to the grant of any such patent, stating in such notice the particular grounds of his objection. A fee of 10s. is payable with such notice:—

No. 7270.—17th November, 1894.—Thomas Cook, of Petone, Wellington, New Zealand, Cooper. An invention for improved machinery for cheaply and expeditiously shaping staves for use in the manufacture of casks, barrels, &c. (Specification, 6s. 6d.; drawings, 7s. 6d.)*

No. 7283.—20th November, 1894.—WILLIAM FREDERICK CHARLES FAIL, of Dunedin, New Zealand, Brass-finisher. An invention for an apparatus for measuring and delivering special quantities of material, and entitled "Fail's Economic Canister." (Specification, 4s. 6d.; drawings, 3s.)*

No. 7626.—23rd May, 1895.—Samuel John Lauchlin, Mechanic, of Waterloo Avenue, and James Hough, Printer, of Kent Street, both in Guelph, Ontario, Canada. An invention for improvements in drawing, sketching, and designing tables. (Specification, £1 13s.; drawings, £1 15s.)

No. 7634.—1st June, 1894.—Edward Lloyd Pease, Engineer, of the firm of Ashmore, Benson, Pease, and Co. (Limited), Stockton-on-Tees, Durham, England, Gasholdermanufacturers, and residing at Hurworth-on-Tees, Durham aforesaid. An invention for a novel or improved structural arrangement for combining strength with rigidity in a manner applicable to flooring, walling, and to other structural purposes. (Specification, 13s. 6d.; drawings, 15s.)

[Note.—This application is readvertised (see Gazette No. 40, of 30th May last) owing to its having been brought under section 106 of "The Patents, Designs, and Trade-marks Act, 1888." The date given is that of the application in the United Kingdom.]

No. 7717.—4th July, 1895.—Thomas Holrovd, of 228, Barkly Street, East Brunswick, Victoria, Draughtsman. An invention for an improved knife-cleaner. (Specification, 4s. 6d.; drawings, 3s.)

No. 7763.—16th July, 1895.—John Drumm, of Manor Street, Dunedin, New Zealand, Farrier. An invention for an ointment for curing stiff joints, contracted sinews, bad

breasts, chilblains, cuts, wounds, burns, scalds, and rheumatic affections, to be called "Drumm's Ointment." (Specification, 1s. 6d.)

No. 7783.—1st August, 1895.—Arthur Selby, of Ashfield, Sydney, New South Wales, Gas Engineer. An invention for improvements in cooking-stoves. (Specification, 14s.; drawings, 12s. 6d.)

No. 7796.—5th August, 1895.—George Turner, of 106, Colombo Street, Sydenham, Canterbury, New Zealand, Artist. An invention for a new and improved aerial directory and trade advertiser. (Specification, 3s. 6d.; drawings, 3s.)

No. 7797.—6th August, 1895.—WILLIAM WATSON, of Maori Road, Dunedin, New Zealand, Civil and Mining Engineer and Draughtsman. An invention entitled "Watson's Goldamalgamator." (Specification, 3s.; drawings, 5s.)

No. 7799.—8th August, 1895.—Charles Gunerius Evensen, of Coromandel, Auckland, New Zealand, Carpenter. An invention for electrical stampers for ore-crushing. (Specification, 2s. 6d.; drawings, 5s.)

No. 7801.—8th August, 1895.—Henry William Godfrey and Charles Frederick Leake, Engineers, and Charles Edward Lucas, Linoleum-manufacturer, all of Staines, Middlesex, England. An invention for improvements in machinery for the manufacture of floorcloths. (Specification, £1 7s.; drawings, £3.)

No. 7803.—10th August, 1895.—WILLIAM TYREE, of 42, Lambton Quay, Wellington, New Zealand, Photographer. An invention for improved device for indicating the boiling-point of kettles and cooking-pots. (Specification, 3s.; drawings, 3s.)

No. 7804.—10th August, 1895.—William Tyree, of 42, Lambton Quay, Wellington, New Zealand, Photographer. An invention for a new or improved egg-tester. (Specification, 2s. 6d.; drawings, 3s.)

No. 7806.—7th August, 1895.—John Rose, of 2, Commercial Chambers, Manse Street, Dunedin, New Zealand, Machinist. An invention for an improved apparatus for use in starting races. (Specification, 12s.; drawings, 5s.)

No. 7811.—8th August, 1895.—Thomas Goodwin, of Otahuhu, Auckland, New Zealand, Coachbuilder. An invention entitled "Goodwin's Adjustable Lamp-socket," applicable to vehicles of all descriptions. (Specifications, 4s.; drawings, 3s.)

No. 7819.—16th August, 1895.—Alfred Baldwin and Stanley Baldwin, trading as "E. P. and W. Baldwin," of Wilden Ironworks, near Stourport, Worcester, England, Engineers (assignees of William Felton, of Wilden Iron-

works aforesaid, Engineer). An invention for improvements in apparatus for producing and burning gas to heat steam-boiler and other furnaces. (Specification, 12s. 6d.;

menes in apparatus for producing and burning gas to heat steam-boiler and other furnaces. (Specification, 12s. 6d.; drawings, £1.)

No. 7822.—20th August, 1894.—William Lee Pilkington, of St. Helens, Lancaster, England, Glass-manufacturer. An invention for improvements in the production of corrugated sheet-glass, and in apparatus employed therein. (Specification, 6s.; drawings, 5s.)

[Note.—This is an application under section 106 of "The Patents, Designs, and Trade-marks Act, 1899," the date given being that of the application in the United Kingdom.]

No. 7823.—16th August, 1895.—The American Tobacco Company of New Zealand (Limited), whose registered office is at No. 102, Victoria Arcade, Auckland, New Zealand (assignees of Albert Leroy Munson, of 16 and 18, Reade Street, New York, United States of America, but temporarily residing in Melbourne, Victoria, Manufacturer). An invention for improvements in machines for making paper mouthpieces for cigarettes. (Specification, £1 6s.; drawings, £3 15s.)

C. J. A. HASELDEN,

C. J. A. HASELDEN, Registrar of Patents, Designs, and Trade-marks. Note.—The cost of transcribing the specification and an estimate of the amount required for copying the drawings have been inserted after the notice of each application. Any order for a copy or copies should be accompanied by a postoffice order or postal notes for the cost of copying.

An asterisk (*) denotes the complete specification of an invention for which a provisional specification has been already

The date of acceptance of each application is given after the number.

Provisional Specifications.

Patent Office.

Wellington, 21st August, 1895.

Mellington, 21st August, 1895.

A PPLICATIONS for Letters Patent, with provisional specifications, have been accepted as under:

No. 7747.—17th July, 1895.—DAVID RANKEN SHIRREFF GALBRAITH, of Victoria Crescent, Manukau Road, Auckland, New Zealand, Analytical Chemist. An invention for

No. 7788.—2nd August, 1895.—William Akersten, of Wakefield Quay, Nelson, New Zealand, Marine Surveyor. An invention entitled "Akersten's Mail and Treasure Barge."

No. 7789.—2nd August, 1895.—WILLIAM AKERSTEN, of Wakefield Quay, Nelson, New Zealand, Marine Surveyor. An invention entitled "Akersten's New Method of Carrying, Launching, and Lowering Boats and Rafts," and the construction thereof, specially suited for and applicable to this

Notice of Request to amend Specification.

Patent Office.

Patent Office,
Wellington, 21st August, 1895.

A REQUEST for leave to amend the specification (inmentioned application of drawings) relating to the undermentioned application for Letters Patent has been received,
and is open to public inspection at this office. Any person
may, at any time within one month from the date of this
Gazette, give me notice in writing of opposition to the amendments. Such notice must set forth the particular grounds
of objection, and be in duplicate. A fee of 10s. is payable
thereon. thereon.

thereon.

No. 7282.—13th November, 1894.—Alfred Launcelot James Tait, of Alexandra Street, Dunedin, New Zealand, Mechanical Electrician, and Walter Henry Pearson, of Argyle Street, South Dunedin, New Zealand, Gentleman. An invention for an electric-current generator, entitled "Tait and Pearson's Revolving Magnetised Wheel Power Generator." Generator.

The nature of the proposed amendments is as follows,

viz.:—
1. To alter the name "Alexandra Street," line 4, page 1,

1. To alter the name "Alexandra Street," line 4, page 1, to "Great King Street."
2. To insert the word "the" immediately before the word "waste," line 15, page 1.
3. To insert the words "carriage or car" immediately before the word "wheels," line 16, page 1.
4. To strike out the word "in," line 16, page 1.
5. To insert between the word "while," line 16, page 1, and "motion," line 1, page 2, the words "descending inclines, or when a rapid change to a slower," and the words "is required, or on other occasions," immediately after the said word "motion."
6. To insert immediately after the word "wheel," line 1,

word "motion."
6. To insert immediately after the word "wheel," line 1, page 2, the words "or wheels of a vehicle, and on one or both sides of such wheel or wheels."
7. To strike out the words "and also," line 10, page 2.
8. To insert between the words "used," and "in," line 17, page 2, the words "for any such purpose as aiding to heat the water in a boiler (if the vehicle has one), or for other heating purposes." heating purposes."

9. To insert after the word "desired," at the foot of page 2,

the following words, &c., viz. :-

"Referring to the accompanying drawing,—
"Fig. 1 represents the elevation of a wheel carrying the usual cores and coils as an armature; these are fixed to discs secured to the wheel. Fixed cores and coils are secured to similar discs attached to the axle-bearings.

"Fig. 2 represents an end view of the wheel, showing the

usual commutator and collector arrangements.

"Fig. 3 represents an end view of a fixed side or disc, as attached to the bearings or frame.

"A A represent a wheel of a vehicle (road or rail).
"B and C represent discs for fixing the various parts of an energy machine, insulated where required.
"D represents the movable parts of any dynamo, such as

the cores and coils shown.

"E represents the fixed parts, so as to form a complete machine.

"F represents the commutator and collector arrangements.

"F¹ represents the reverse side and method of leading the wires to the boiler or accumulator.

wires to the boiler or accumulator.

"G represents any car framework.

"H represents any springs, if required."

10. To insert immediately after the word "wheel," line 6, page 3, the words, &c., ", or wheels, of a vehicle."

11. To strike out the words "of any description," line 8, page 3, and to insert in place thereof the words "for the purpose of heating, or of accumulating of the said energy."

12. To insert between the words "as," and "described," line 10, page 3, the words "and for the purposes."

13. To insert, after the word "herein," line 11, page 3, the words "and as illustrated in the accompanying drawing."

14. To attach a sheet of drawings containing three figures.

14. To attach a sheet of drawings containing three figures. The applicants state as their reasons for the amendment that they "on mature reflection consider their claims too vague, and wish to confine themselves to a definite object."

C. J. A. HASELDEN, Registrar of Patents, Designs, and Trade-marks.

Applications for Registration of Trade-marks.
