

SUPPLEMENT

TO THE

NEW ZEALAND GAZETTE

THURSDAY, NOVEMBER 12, 1896.

Published by Zuthority.

WELLINGTON, THURSDAY, NOVEMBER 12, 1896.

Notice of Acceptance of Complete Specifications.

Patent Office,

Wellington, 11th November, 1896.

OMPLETE specifications relating to the under-mentioned applications for Letters Patent have been accepted, and are open to public inspection at this office.

tioned applications for Letters Patent have been accepted, and are open to public inspection at this office. Any person may, at any time within two months from the date of this Gazette, give me notice in writing of opposition to the grant of any such patent. Such notice must set forth the particular grounds of objection, and be in duplicate. A fee of 10s. is payable thereon.

No. 8031.—5th November, 1895.—Joseph Charles Husband, of Ashurst, Manawatu, New Zealand, Settler. An invention for stump-extracting or lifting heavy weights. (Specification, 5s.; drawings, £1 1s.)*

No. 8042.—4th November, 1895.—James Arthur Hurley, of Wendonside Riversdale, New Zealand, Farmer. An invention for thinning turnips sown in drills, or other crops sown in drills. (Specification, 6s.; drawings, 8s.)*

No. 8108.—2nd December, 1895.—Thomas Branton, of Blenheim, New Zealand, Flaxmiller. An invention for improvements in the treatment of New Zealand flax. (Specification, 10s.; drawings, £1 6s.)*

[Note.—In order to more accurately describe the nature of the invention, the title in this case has been altered by order of the Registrar. See "Provisional Specifications," Gazette No. 91, 12th December, 1895.]

No. 8173.—3rd January, 1896.—John Montgomery Smart, of 34, Queen Street, Melbourne, Victoria, Gentleman (nominee of Alfred Thomas Perkins, of 2155, Central Avenue, Alameda, California, United States of America). An invention for an improved process of preserving fresh fruits, vegetable products, and other articles and substances of food from decay without the use of refrigerants. (Specification, 15s. 6d.; drawings, 16s.)*

vegetable products, and other articles and substances of food from decay without the use of refrigerants. (Specification, 15s. 6d.; drawings, 16s.)*

No. 8864.—17th September, 1896.—RICARDUS JOHN HENRY, of Ashburton, Canterbury, New Zealand, Saddler. An invention for an improved pneumatic horse-collar. (Specification, 3s.; drawings, 3s.)

No. 8954.—23rd October, 1896.—ILLIUS AUGUSTUS TIMMIS, of 2, Great George Street, Westminster, Middlesex, England, Civil Engineer. An invention for an improved food. (Specification, 3s.)

No. 8955.—23rd October, 1896.—Edgar Arthur Ash-croft, of 34, Queen Street, Melbourne, Victoria, Electrical Engineer. An invention for an improved process for the treatment of metalliferous ores and products. (Specification, 14s. 6d.; drawings, 13s. 6d.)

No. 8958.—23rd October, 1896.—George Poll, of 54, Lambton Quay, Wellington, New Zealand, Miner. An invention for an improved dredge. (Specification, 12s.; drawings, £2 2s.)

ings, £2 2s.)

No. 8962.— 21st September, 1896.— BUXTON ARTHUR LAURIE, of 29, Customs Street East, Auckland, New Zealand, Clerk. An invention entitled "Laurie's Pedestrian Race-starting Machine." (Specification, 4s. 6d.; drawings, 5s. 6d.)

5s. 6d.)
No. 8963.—21st October, 1896.—WILLIAM ALLEN JEWELL, Cabinetmaker, and Walter Coster Gee, Window-blind Manufacturer, both of 71, Cathedral Square, Christchurch, New Zealand. An invention for improved bat-blade protector. (Specification, 2s.; drawings, 3s.)
No. 8966.—24th October, 1896.—Walter Frederick Potts, of Wellington, New Zealand, Compositor. An invention for an improved laundry-strainer. (Specification, 3s.; drawings, 3s.)

vention for an improved laundry-strainer. (Specification, 3s.; drawings, 3s.)

No. 8969.—22nd October, 1896.—Francis William Payne, of 31, Moray Place, Dunedin, New Zealand, Consulting Mechanical Engineer. An invention for a safety catch and method of preventing accidents to cable-cars. (Specification, 5s.; drawings, 5s. 6d.)

No. 8970.—24th October, 1896.—Charles Brake, Farmer, and Andrew McNae, Commercial Traveller, both of Lincoln, New Zealand. An invention for drenching cattle and horses, to be called "The Drench-compeller." (Specification, 2s. 6d.; drawings, 11s.)

drawings, 11s.)

No. 8972.—26th October, 1896.—Donald William Jackson, of McKillop Street, Geelong, Victoria, Manufacturing Chemist. An invention for improvements in polishing com-

Chemist. An invention for improvements in polishing compounds for metals. (Specification, 4s.)

No. 8973.—26th October, 1896.—Carl Wilhelm Heinrich Göpner, of Canalstrasse, 46, 48, Uhlenhorst, Hamburg, Germany, Chemical Manufacturer; and Heinrich Ludwig Diehl, of K¹. Grassbrook Vogelreth, 8, Hamburg Germany, Chemist. An invention for improvements in the recovery of gold and silver from their solutions. (Specification 4s.)

recovery of gold and silver from their solutions. [Specimication, 4s.]

No. 8974.—26th October, 1896.—Louie Clark McAdams, of 1001, Broadway, Oakland, Alameda, California, Gentleman. An invention for improvements in engines. (Specification, 11s. 6d.; drawings, 18s. 6d.)

No. 8976.—21st October, 1896.—John Thomas Walker, of Wanganui, New Zealand, Settler. An invention for an improvement in wire-strainers, to be called "Walker's Simplex Wire-strainer." (Specification, 4s. 6d.; drawings, 11s.)

Simplex Wire-Strainer.

11s.)

No. 8977.—27th October, 1896.—George Smart, of 54, Lambton Quay, Wellington, New Zealand, Manufacturer. An invention for an improved apparatus for cooling or heating milk. (Specification, 6s.; drawings, 8s.)

No. 8979.—28th October, 1896.—Thomas Hamer Dolbey, of 4, Essex Court, Temple, London, England, Barrister at-Law (assignee of Karl Albert Frosell, of Smyrna, in the Ottoman Empire, but at present of No. 4, Sinclair Road,

West Kensington, Middlesex, England, Merchant). vention for improvements in window-blinds. (Specification, 7s.; drawings, 11s.) No. 8981.—28th

7s.; drawings, 11s.)
No. 8981.—28th October, 1896.—Romeo Grilli, of 15, Sumscaia, Charcoff, Russia, Cycle-manufacturer. An invention for improvements in or relating to bicycles. (Specification, 9s. 6d.; drawings, £1 1s.)
No. 8982.—27th October, 1896.—Donald Barns Morison, of Hartlepool, Durham, England, Engineer. An invention for improvements in stamping-apparatus for crushing ores, and other analogous stamping nurroses. (Specification

and other analogous stamping purposes. (Specification, £1 3s.; drawings, £2 5s.)

No. 8983.—27th October, 1896.—Edwin Robert Standfield, Medical Electrician, and Thomas de Renzy Harman, Solicitor, both of 71, Cathedral Square, Christchurch, New Zealand. An invention for an improved supporting attachment for safety bicycles. (Specification, 4s. 6d.; drawings, 8s.)

No. 8984.—27th October, 1896.—Edwin Robert Standfield, Medical Electrician, and Thomas de Renyy Harman,

Solicitor, both of 71, Cathedral Square, Christchurch, New Zealand. An invention for improved device for employment

Solicitor, both of 71, Cathedral Square, Christchurch, New Zealand. An invention for improved device for employment upon the handle-bar of a cycle, to hold the lever when the brake is applied. (Specification, 4s. 6d.; drawings, 8s.)

No. 8986.—31st October, 1896.—DAVID CUNNINGHAM, of 2, Commercial Chambers, Manse Street, Dunedin, New Zealand, Blacksmith. An invention for an improved life-buoy line. (Specification, 3s.; drawings, 3s.)

No. 8989.—31st October, 1896.—FREDERICK DRYLAND, of Arch Hill, Auckland, New Zealand, Bootmaker. An invention for an improvement in heels of boots and shoes. (Specification, 3s.; drawings, 3s.)

No. 8990.—28th October, 1896.—Jean Francis Webb, of St. Louis, Missouri, United States of America, Lawyer and Mine-manager. An invention for method of obtaining gold. (Specification, 14s. 6d.; drawings, 18s.)

No. 8994.—29th October, 1896.—George Grant Mcalpine, of 71, Cathedral Square, Christchurch, New Zealand, Inventor. An invention for an improved tackle-releasing snatch-block. (Specification, 4s.; drawings, 5s. 6d.)

No. 8995.—30th October, 1896.—The Friend's Steam Generator and Imporous Butter-box Company (Limited), whose registered office is at Friedlander Brothers' Buildings, Asbburton, New Zealand (assignees of John Edward Friend, of Christchurch, New Zealand, Engineer). An invention for an imporous composition for coating the inside surfaces of boxes or packages for the transport or storage of butter or other edible substances, or for preserving certain kinds of fruit. (Specification, 4s. 6d.)

F. WALDEGRAVE, Registrar.

F. WALDEGRAVE.

Registrar.

Note.—The cost of transcribing the specification, and an estimate of the amount required for copying the drawings, have been inserted after the notice of each application. An order for a copy or copies should be accompanied by a post-

office order or postal notes for the cost of copying.

An asterisk (*) denotes the complete specification of an invention for which a provisional specification has been

already lodged.

The date of acceptance of each application is given after the number.

Provisional Specifications.

Patent Office,

Patent Office,

Wellington, 11th November, 1896.

A PPLICATIONS for Letters Patent, with provisional specifications, have been accepted as under:—
No. 8173.—3rd January, 1896.—John Montgomery Smart, of 34, Queen Street, Melbourne, Victoria, Gentleman (nominee of Alfred Thomas Perkins, of 2155, Central Avenue, Alameda, California, United States of America). An invention for an improved process of preserving fresh fruits, vegetable products, and other articles and substances of food from decay without the use of refrigerants.

No. 8956.—23rd October, 1896.—WILLIAM HENEY NICHOLS STEED, of Eagle Chambers, King William Street, Adelaide, South Australia, Clerk. An invention for an improved scoring-board for cycling and other sports.

No. 8957.—23rd October, 1896.—Frederick Templer, of 73, Tynte Street, North Adelaide, South Australia, Broker. An invention for improved method of disinfecting and deodorising closets, urinals, drains, and offensive matter.

An invention for improved method of disinfecting and deodorising closets, urinals, drains, and offensive matter.

No. 8960.—8th October, 1896.—Robert Elston, of Ashburton, Canterbury, New Zealand, Advertising Agent. An invention for an improved wool-working needle.

No. 8964.—22nd October, 1896.—ARTHUR JOHN CUMING, of Randolph Street, Woolston, New Zealand, Journalist, and CHARLES SYDNEY WHITM, of 174, Gloncester Street, Christchurch, New Zealand, Saddler. An invention for an improved method of obtaining and dressing the fibre from New Zealand Phormium tenax.

No. 8967.—24th October, 1896.—WILLIAM DEAR, of Wel-

No. 8967.—24th October, 1896.—WILLIAM DEAR, of Wellington, New Zealand, Bricklayer. An invention for improvements in the construction of concrete erections.

No. 8968.—9th October, 1896.—Charles Baker Gabb, of New Plymouth, Taranaki, New Zealand, Farmer. An invention for aërating milk, to be called the "Simplex Milkaërator.'

aërator."
No. 8971.—26th October, 1896.—George Aitkens, of Hawera, New Zealand, Clerk in Holy Orders. An invention for an improved perforator for perforating tape used in Wheatstone automatic telegraph system.
No. 8975.—26th October, 1896.—John William McDougall, of Napier, New Zealand, Journalist. An invention for improvements in bottles, and stoppers therefor.
No. 8980.—28th October, 1896.—Joseph Myers, of 54, Lambton Quay, Wellington, New Zealand, Merchant. An invention for improvements in seats for bicycles and the like.

No. 8985.—24th September, 1896.—Henry William Lovegrove, of Gapes Valley, Geraldine, New Zealand, Farmer. An invention for an improved sulky.

No. 8987.—31st October, 1896.—William Sclanders Falconer, of 54, Lambton Quay, Wellington, New Zealand, Cabinetmaker. An invention for an improved tire for whicks

wheels of vehicles.

No. 8988.—31st October, 1896.—John Thomson, of 54,
Lambton Quay, Wellington, New Zealand, Saddler. An
invention for improvements in seats for bicycles and the

No. 8991.—28th October, 1896.—John Senior Woodhouse, of Papanui, Canterbury, New Zealand, Gentleman. An invention for improvements in bolts and nuts.

No. 8992.—1st October, 1896.—Ewen Mackenzie McLauchlan, of Springhills, Winton, Southland, New Zealand, Farmer. An invention for an improved pulvering attachment to plumbs. ising attachment to ploughs.

ising attachment to ploughs.

No. 8993.—27th October, 1896.—George Hamlin, of Greymouth, Westland, New Zealand, Cabinetmaker. An invention for wire-net spring beds and couches.

No. 8996.—30th October, 1896.—George Osborne, of Willowby, New Zealand, Farmer. An invention entitled "Osborne's Combined Ridging-plough, Horse-hoe, and Singlerow Drill."

F. WALDEGRAVE, Registrar.

Note.—Provisional specifications cannot be inspected, or their contents made known by this office in any way, until the complete specifications in connection therewith have

been accepted.

The date of acceptance of each application is given after

Letters Patent sealed.

1423; 1773.—J. Frossard and Co.; Class 45. No. 65, of 20th August, 1896.) (Gazette 1424; 1700.—R. Gore and E. V. Sanderson; Class 50 (Gazette No. 46, of 11th June, 1896.)
1425; 1774.—C. Stubbs; Class 3. (Gazette No. 65, of 20th

August, 1896.)

F. WALDEGRAVE,

Registrar.

OPIES of "The Patents, Designs, and Trade-marks Act, 1889," with Regulations thereunder, and printed forms of application and specification, can be obtained from the Patent Office, the Government Printer, Local Patent Offices,

or Money-order Offices.

Local Patent Offices for the reception of applications for Letters Patent have been established at the following places: Auckland, Thames, New Plymouth, Wanganui, Gisborne, Napier, Blenheim, Westport, Greymouth, Hokitika, Christchurch, Ashburton, Timaru, Oamaru, Dunedin, Queenstown, Lawrence, and Invercargill. In every case the office is at the Courthouse.

Specifications of all Patents and Letters of Registration applied for in the colony can be inspected at the Patent Office, and particulars of Patents, &c., granted in England, the United States, Canada, and the Australian Colonies can be seen at the Patent Office Library at the Museum, Wellington.

The following publications of this office can be had from the Government Printer:—

1. Printed Specifications to the end of the year 1879.

2. Annual Lists of Letters Patent and Letters of Registration applied for, and Particulars of Applications, and Patents lapsed, from 1880 to 1888 inclusive.

3. Annual Report of the Registrar, containing list of Letters Patent, nature of Letters Patent, &c., applied for during the years 1889 to 1895, inclusive.

The Patent Office Supplement to the New Zealand Gazette is published fortnightly, and contains all notices required by law to be gazetted concerning Patents and Trade-marks. It also contains particulars of lapsed applications for Patents and of expired Letters Patent, and other information useful to inventors, manufacturers, and others. This Supplement is issued free to subscribers to the Gazette, and to others on payment of a special subscription of 10s. per annum, payable in advance to the Government Printer.

By Authority: JOHN MACKAY, Government Printer, Wellington.
