Provided that in any case where the Inspector is satisfied that the aforesaid rate is insufficient or more than sufficient for the purpose of providing adequate ventilation either throughout the underground workings generally, or in any specified portions thereof, he may from time to time require such rate to be increased, or authorise it to be diminished, to such extent as in the circumstances he thinks reasonable.

- (2.) In any case where the Inspector is of opinion that, by reason of the use of timber or other inflammable material in a mine, there is risk of fire, he may require the holder of the mine to provide such number and description of smoke-protectors as the Inspector thinks necessary, having regard to the nature and extent of the workings and of the risk.
- (3.) Any requirement, order, or direction of the Inspector under the aforesaid section 206, or the principal regulations, or these regulations, may be made by writing under his hand addressed in general terms to the person in charge of the mine, and delivered at the mine; and it shall be the duty of the mine-owner and mine-manager to comply therewith in so far as is practicable.
