Notice to Mariners No. 6 of 1902.

Marine Department,
Wellington, 24th January, 1902.

THE following Notices to Mariners, received from the Department of Ports and Harbours, Melbourne, Victoria, and the Marine Board, Port Adelaide, are published for general information.

WM. HALL-JONES.

VICTORIA.—PORT PHILLIP HEADS.—SUBMARINE BLASTING OPERATIONS.

NOTICE is hereby given that it is intended to commence blasting operations early in January, 1902, for the removal, to a depth of 37 ft., of the rock obstructions under 31 ft. to 34 ft. at low water, in the fairway entrance to Port Phillip, at about 9 cables S. 60° E. from Point Lonsdale. A steamer flying the red burgee at the main will be used to attend on the diver's boats engaged in such work.

Caution.—Mariners and boatmen are hereby cautioned not to approach such boats nearer than a quarter of a mile; and warning will be given by prolonged whistle-blasts from the attendant steamer when a charge is ready for exploding. Mariners approaching the locality and hearing the whistle signals should bring up at least half a mile off until after the explosion, when they may proceed on their course. Such operations will only be carried on just before and during slack water.

C. W. MACLEAN,
Department of Ports and Harbours, Port Officer.
Melbourne, 20th December, 1901.

VICTORIA.—PORT PHILLIP HEADS.—ALTERATIONS TO POINT LONSDALE AND QUEENSCLIFF LIGHTS.

Referring to Notices to Mariners Nos. 31 and 85, dated 1st February, 1900, and 21st May, 1901, respectively, it is hereby notified that a new lighthouse, 70 ft. high, built of concrete and painted white, has been erected near the extremity of Point Lonsdale, at a distance of 530 ft. from the old lighthouse, and in line with it and the signal flagstaff, and that on and after the 20th day of March, 1902, an occulting light of the third order, dioptric, having periods of twelve seconds light and three seconds eclipse, will be shown from the tower at an elevation of 120 ft. above sea-level, and visible in clear weather from a ship's bridge at a distance of 17 nautical miles.

From seaward such light will show as follows:—

Red between the bearings of S. 78° E. and N. 61° E.
White between the bearings of N. 61° E. and N. 43° W.
Red between the bearings of N. 43° W. and S. 78° W.

The intensity of the white light will be 22 and the red light 13 lighthouse units.

Simultaneously with the exhibition of such occulting light the green and red light at present shown from the old lighthouse will be discontinued; also, the western rays of white light from the Queenscliff low and high lights showing to seaward over and to the north-westward of Point Lonsdale will be so obscured that these lights will be only visible from seaward when bearing northward of N. 51° E. *Caution.*—The white light, illuminating an arc of 104° to seaward, will mark the safe navigable waters clear of Port Phillip Heads, and enable mariners to pick up the entrance to Port Phillip. The red sectors of light, between the limits of the white light and the coast to eastward and westward of Port Phillip Heads, are intended to warn mariners of their proximity to the shore; and should such red lights be seen when navigating outside the Heads, the vessel's course should be altered to seaward to get within the white arc of light.

DIRECTIONS FOR ENTERING PORT PHILLIP.

From Westward by Night.—Mariners making Port Phillip Heads from the westward should not lose sight of the fixed red light on Split Point until they see the white occulting light on Point Lonsdale, which should in clear weather be picked up after proceeding 10 miles from Split Point light abeam. Soon after picking up Point Lonsdale white light, the white lights from the Queenscliff high and low light-houses will respectively come into view, then steer to get

into the red sector shown from the low light, which will be first seen on a bearing N. 39° E., then bring the low light (red) in line with the high light (white) bearing N. 34° E., keeping such leading-lights on until the red sector of occulting light showing inside the Heads eastward from Point Lonsdale lighthouse has been passed. A course may then be shaped for the South or West Channel as desired. *From Eastward by Night.*—Vessels having passed Cape Schanck light about 3 miles off should pick up the white occulting light on Point Lonsdale, which should be kept in sight until the leading-lights at Queenscliff are brought in line, then steer through the entrance fairway as directed for vessels from westward.

C. W. MACLEAN,
Department of Ports and Harbours, Port Officer.
Melbourne, 19th December, 1901.

SOUTH AUSTRALIA.—STREAKY BAY, WEST COAST.

Masters of vessels and others are hereby informed that a fixed white light will be exhibited from the Streaky Bay jetty on and after the night of 1st January, 1902. The light will be shown from a square box painted white erected on the end of the jetty, and will in clear weather be visible for a distance of six miles over an arc of 24°—viz., between the bearings of S. 19° W. and S. 5° E.—but will not be visible from the perforated rocks on the eastern side, or Sponge Rock to the westward. On a clear dark night, however, a faint light may possibly be noticeable outside the limits of the fully illuminated arc.

This notice affects Admiralty Chart No. 1061.

"The Agricultural and Pastoral Statistics Act, 1895."—Notice No. 684.—Estimated Yields.

Department of Agriculture, Wellington, 28th January, 1902.

THE following table gives the area of wheat, oats, and barley for threshing, and the estimated yields; also the wheat on hand, as at 31st October, 1901. Owing to the very dry weather experienced, a portion of the areas returned at the time of the collection of the statistics as "For threshing" has since been consumed by stock. The total for the colony, thus dealt with, is estimated at 9,000 acres.

Wheat.			Oats.			Barley.

* Estimated has been consumed by stock.

	Bushels.
In the <i>New Zealand Gazette</i> of 24th June, 1901, the wheat on hand, available for all purposes, as from 28th February, 1901, was stated at	8,620,659
This has been disposed of as follows:—	
For seed, 167,474 acres, at 2 bushels per acre	334,948
Consumption for population of 820,000, at 6 bushels, for 8 months (28th February, 1901, to 31st October, 1901)	3,280,000
Wheat and flour exported from 28th February, 1901, to	2,100,347
31st October, 1901	2,189
Less imports	2,098,158
	5,713,106
Leaving on hand at 31st October, 1901	2,907,553
Amount actually returned at 31st October, 1901	3,182,007
Apparent surplus	274,454

A surplus of 274,454 bushels is shown, according to the amount returned. This may be due to the fact that the wheat on hand, unthreshed, has been overestimated, or that the yield last year was underestimated.

JOHN D. RITCHIE,
Secretary for Agriculture.
