A section, containing 350 acres, at Kern's Creek is weighted with £185, valuation for improvements, which consist of about 35 acres cleared and grassed, about 45 chains fencing, an orchard, a small-fruit garden, and a dwellinghouse of five rooms, together with usual out-houses houses.

#### LOCALITY AND DESCRIPTION.

LOCALITY AND DESCRIPTION. The block is situated in the Maruia Valley, and adjoins the Maruia North Block (recently disposed of). The northern boundary is about ten miles from the main Nelson-West-port Road. The nearest town is Murchison, with which the block is connected by bridle-tracks, which are being greatly improved and in some cases made into dray-roads. From the northern boundary of the block to Murchison via Doughboy Creek is a distance of about fifteen miles. From the same boundary to Murchison via the mouth of the Maruia River and the south bank of the Buller River the distance is about eighteen miles. The track via Doughboy Creek is on good grades and will be most used for general horse traffic. The area extends from the confluence of Peasoup Creek with the Maruia River on the north to about three miles below the confluence of the Shenandoah with the Maruia River, and includes land on both sides of the valley.

with the margina layer, and marginal theory with the valley. The block comprises chiefly forest clad hilly country, with flats and sloping ground along the Maruia River and tribu-taries, the flats in some instances having a width of half a mile. The soil is good on the flats and along the creeks, and

may be classed as ranging from fair to poor on the spurs. The formation, generally speaking, is limestone, sandstone, and granite. The whole of the area is well watered. The block is separated from the Buller Valley coach-road by the Maruia North Block, which has all been taken up. Each section has been arranged so as to include a convenient homestead site, together with some adjacent flat land.

The altitude of the block ranges from 650 ft. above sea-level on the banks of the Maruia to 2,300 ft. on the back spurs.

The forest consists of red-birch and brown-birch, with a few white pine, black-pine, and red pine, and occasional totars and black-birch, the undersorub consisting of broad-leaf, five finger, pepper-tree, fuchsia, &c. There is thus good feed for stock in the forest. The Mid Maruia Block is capable of being utilised success-

fully as healthy sheep- and cattle-grazing country. The climate is good. The liberal terms—an immunity from rent and local taxes for four years — should insure its occupation by persons desirous of making a permanent home for themselves and families.

# LOCALITY AND DESCRIPTION.

Matakitaki, the distance from Murchison being about twenty-six miles, twenty-two miles of which is excellent dray-road. The remaining distance, a gap of four miles extending from the Maruia Saddle to the mouth of the Rappahannock Stream, is now in course of construction. The block is provisionally subdivided into fourteen sections, of areas varying from 286 acres to 370 acres, each section being apportioned a proportionate area of river-flat suitable for a homestead-site. The altitude ranges from 1,100 ft. to 2,600 ft. above sea-level, and the quality of the land is above the average. It consists of rich alluvial soil, from 18 in. to 4 ft. deep, on the river-flats, and fair clay soil, from 6 in. to 32 ft. deep, on the terraces. The higher portion of the block is killy, of conglomerate-rock formation, with soil good in the gullies and on the slopes, but inferior on the tops of the spurs. The main valley lies to the sun, and is exceedingly well sheltered from cold winds. The whole of the land is fore t-clad with light, brown-, and red birch, and there is a dense undergrowth of black scrub, horopito (pep-per-wood), konini (fuchsia), and puka (broadleaf) on the flats, and a lighter undergrowth of konini, horopito, and puka growing in the gullies and on the slopes. Good feed for stock is therefore supplied by the forest. The Rappahannock Block can be converted into excellent sheep-raising country; it adjoins the Maruia Plains, where settlement has commenced, and has a good climate and good road access.
