CHRISTCHURCH CITY COUNCIL.

Special Order to raise a Loan and making a Special Rate.

In pursuance and exercise of the powers vested in it in that behalf by "The Municipal Corporations Act, 1900," "The Public Health Act, 1900," and "The Local Bodies' Loans Act, 1901," the Christchurch City Council hereby resolves as follows:—

- (a.) That whereas section 66 of "The Public Health Act, 1900," provides that in any case where a sanitary work to be constructed has been recommended by the District Health Officer and approved by the Minister of Public Health, a local authority may, for the purpose of constructing the said work, borrow money by special order without taking any poll of the ratepayers or obtaining their consent to the work or the loan: And whereas the District Health Officer has recommended "that the Christchurch City Council establish lavatories, water-closets, urinals, and any similar sanitary conveniences that may be considered advisable for the use of both sexes of the general public," and the Honourable the Minister of Public Health has approved of the said Council going on with the said works: Now, therefore, the said Christchurch City Council doth hereby by special order resolve to borrow by way of special loan the sum of £4,500 during two successive years—namely, £3,000 for the year ending the 31st March, 1908, and £1,500 for the year ending the 31st March, 1909—the said loan to be for a period of thirty-two years, bearing interest in the meantime at the rate of £4 per centum per annum, for constructing the following sanitary work, namely: An underground urinal at or near the intersection of Manchester Street and High Street; an underground urinal at or near the intersection of High Street and Cashel Street; and underground lavatories, water-closets, and urinals for both sexes of the general public in Cathedral Square.

- (b.) That the security for the said loan and providing a sinking fund in respect thereof shall be a special rate of $\frac{1}{4}$ d. in the pound to be made and levied upon the whole of the rateable property within the boundaries of the City of Christchurch. It is proposed to pay out of the loan the cost of raising the loan. It is not proposed to pay out of the loan the interest for the first year.
- (c.) That, for the purpose of providing the interest and other charges on the said loan of £4,500, bearing interest at the rate of $\frac{1}{4}$ per centum per annum, so authorised to be raised by the Christchurch City Council, under the provisions of "The Local Bodies' Loans Act, 1901," which loan is to be borrowed during two successive years—namely, £3,000 for the year ending the 31st March, 1908, and £1,500 for the year ending the 31st March, 1909—the said loan to be for constructing the following sanitary work—namely, an underground urinal at or near the intersection of Manchester Street and High Street; an underground urinal at or near the intersection of High Street and Cashel Street; and underground lavatories, water-closets, and urinals for both sexes of the general public in Cathedral Square—the said Christchurch City Council hereby makes and levies a special rate of $\frac{1}{4}$ d. in the pound upon the rateable value of all rateable property comprised within the City of Christchurch, as constituted and described by Proclamation of His Excellency the Governor published in the Supplement to the *New Zealand Gazette* of Thursday, the 26th March, 1903, page 23, dated the 1st day of April, 1903, and the boundaries as described in the Schedule thereto, as amended by the Order in Council altering the boundaries of the City of Christchurch published in the *New Zealand Gazette* dated the 4th day of April, 1907, page 1136: and that such special rate shall be an annual-recurring rate during the currency of such loan, and be payable yearly on the 30th day of June in each and every year during the currency of such loan, being a period of thirty-two years, or until the loan is fully paid off.

3. Any person intending to land any sheep at Hobart, Launceston, Devonport, Burnie, Strahan, Stanley, and Currie Harbour (King Island), or elsewhere in this State under any such permission as aforesaid from any place beyond this State or any dependency thereof shall give to the Chief Inspector not less than three days' notice in writing of his intention to do so; and every such notice shall contain a statement of the number of the sheep intended to be imported, and the time when such sheep are expected to arrive at such place. † Populations of Wellington, Karori, Onslow, and Christchurch given according to alterations of boundaries since January.

Deaths occurring at hospitals, of persons not residents of the borough wherein the hospital is situated, have been allotted in each case to the borough where the disease was contracted, and not to that in which the death actually took place.

The total births in the above boroughs amounted to 609, against 599 in November—an increase of 10. The deaths in December were 220, an increase of 12 on the number in November. Of the total deaths, males contributed 125, females 95. Fifty-five of the deaths were of children under five years of age, being 25 per cent. of the whole number; 40 of these were under one year of age.

There were sixty-two deaths of persons of 65 years and upwards: Eight men, 67, 68, 69, 75, 77, 80, 85, 89, and eleven women, 65, 67, 72, 74, 75 (two), 83 (two), 84 (two), 88, died at Auckland; eight men, 70, 71, 72, 73 (two), 76, 79, 97, and four women, 69, 70, 73, 88, at Wellington; seven men, 66, 67 (two), 72, 74, 82, 86, and three women, 77, 79, 86, at Christchurch; and twelve men, 68, 69, 71 (two), 73, 74, 77 (two), 78, 80, 82, 88, and nine women, 67, 68, 73, 75, 76 (two), 80, 83, 86, at Dunedin.

The following Table shows the Causes of the Deaths of Persons of both Sexes under 5 Years of Age and 5 Years and upwards, and the Proportion per Cent. of Deaths from each Cause, in the Boroughs above given, registered during the Month of December, 1907.

In the first table are given the deaths and death-rates for each of the four cities, for the suburban boroughs severally and for each city with its suburban towns. As regards Auckland and Christchurch, the whole of the area usually recognised as suburban has not yet been brought under municipal government, and the vital statistics do not deal with such portions as still remain in road districts. But the omission is not very important, for there are in either case quite enough suburbs included within borough boundaries to give a fair idea of the death-rate of Greater Auckland and Greater Christchurch. As further boroughs are formed the vital statistics will be made to include them.

The inclusion of the suburban boroughs tends to lower the rate at Dunedin, but raises it at Auckland, Wellington, and Christchurch.

	Death-rates per 1,000 of Population.
Auckland City	0.89
and six suburban boroughs	0.97
Wellington City	1.04
and three suburban boroughs	1.05
Christchurch City	0.56
and one suburban borough	0.58
Dunedin City	0.93
and six suburban boroughs	0.86

Including the suburbs, the rate at Wellington is the highest, and at Christchurch the lowest.

Compared with December, 1906, the results are,—

Auckland and suburbs	1906.	1907.
Wellington and suburbs	0.76	0.97
Christchurch and suburb	0.75	1.05
Dunedin and suburbs	0.80	0.58
	0.77	0.86

Specific Febrile or Zymotic Diseases.—The deaths in this class at the four centres with suburbs in December were 22. Influenza was fatal at Wellington (1 death) and Dunedin (5 deaths). Whooping-cough caused 4 deaths at Auckland, 1 at Wellington, and 1 at Christchurch. Diarrhoeal diseases caused 5 deaths at Auckland, and 1 at Wellington. The above, with 2 deaths from measles, 1 from diphtheria, and 1 from puerperal septicæmia, complete the total.

Constitutional Diseases.—The mortality for December at the four chief towns was heavy (53 deaths). Phthisis and other tubercular diseases caused 33 deaths, and cancer 15.

Local Diseases.—There were 20 deaths from diseases of the nervous system, 1 of organs of special sense, 26 of the circulatory system, 17 of the respiratory, 24 of the digestive, 9 of the urinary, 5 of the reproductive, 1 of the locomotive, and 1 of the integumentary systems.

Violent Deaths.—These were 5, all accidental. One death resulted from fall over cliff, 2 from wounds, 1 from heat-stroke, and 1 from accident at birth.

The subjoined table shows the mortality for the last two months at each of the four centres from six principal specific febrile or zymotic diseases, and also the deaths from certain inflammatory diseases of the lungs. These causes of death have been distinguished from the others of the classes to which they belong as being the most important special diseases which give rise to sudden increases in the death-rates of towns, and the prevalence of which is closely connected with sanitary condition and climatic influence of the season on health.
