- (4.) And for paying £100 for the cost of raising the loan,—

the said Blenheim Borough Council hereby makes and levies a special rate of 1d. in the pound upon the rateable value (on the basis of the unimproved value) of all rateable property of the whole of the Borough of Blenheim ; and that such special rate shall be an annual-recurring rate during the currency of such loan, and be payable half-yearly on the 1st day of April and the 1st day of October in each and every year during the currency of such loan, being a period of twenty-one years, or until the loan is fully paid off.

Despatch.—Ordinance concerning Privileges granted to Ships of Foreign Countries in Swedish Harbours.

Marine Department,
Wellington, N.Z., 13th September, 1910.

THE following despatch, received from the Secretary of State for the Colonies, London, is published for general information.

J. A. MILLAR.

(New Zealand.—No. 158.)

Received 29th August, 1910. Government House, New Zealand.

Downing Street, 21st July, 1910.

MY LORD,—With reference to my despatch, No. 38, of 18th February, 1909, I have the honour to transmit to you, for the information of your Ministers, the accompanying translation of such part as refers to British vessels, of an Ordinance issued by the Swedish Government with regard to the privileges accorded to ships of foreign nations in Swedish harbours.

I have, &c.,

CREWE.

Governor, the Right Honourable Lord Islington,
D.S.O., &c.

Ordinance by the Government and Board of Commerce concerning Privileges granted to Ships of Foreign Countries in Swedish Harbours.

Given at the Castle of Stockholm, June 3rd, 1910.

THE Government and Board of Commerce hereby make known that the ships of foreign countries may enjoy the undermentioned privileges in Swedish harbours.

(N.B.—Questions of ships' measurements are dealt with separately.)

Page 8.—Great Britain and Ireland.

According to the Commercial Treaty of March 18, 1826, and the Royal Decree of October 26, 1849, British ships arriving in Swedish harbours are entitled both on entering and clearing to the same treatment as ships of the country as regards the shipping and port dues and other expenses for Crown, municipal, or separate institutions of whatever nature soever.

By the Royal Decree of August 15, 1854, so long as coasting trade may be carried on freely and unhindered between British ports by Swedish ships, similar permission will be accorded to British ships to trade between Swedish ports.

By the Royal Decree of October 2nd, 1874, so long as Swedish ships may carry on coasting trade freely and unhindered between ports of the British Dominions of Canada, Canadian vessels may carry on a similar trade between Swedish ports.

The nationality of ships and cargoes arriving under the British flag in Swedish harbours shall, by the Royal Letter of May 23, 1828, be considered as sufficiently determined by a certificate issued by the British Consul or Vice-Consul at the port of starting.

Page 17.—Great Britain and Ireland.

British sailing-vessels provided with a national measurement certificate, made out subsequently to April 30, 1855, are exempt from remeasurement in Swedish harbours; and British steamships which, according to the terms of the notice issued by the Royal Customs Administration on September 11, 1882, containing an agreement for mutual recognition of the measurement certificates of Swedish and British vessels made out respectively in their own countries, have undergone partial remeasurement for ascertaining the deduction to be allowed for engine-space, shall, in so far as the vessel is provided with the same measurement certificate unaltered as she possessed at the time of such measurement, continue to be exempt from remeasurement:

Whereas other British steamships, provided with measurement certificates made out after April 30, 1855, shall be subjected in Swedish harbours to a partial remeasurement for ascertaining according to Swedish custom both the gross tonnage of the space above the measurement-deck, and also the space to be exempted for engine-space, and other spaces situate above as well as below the measurement-deck, for which exemption from dues is granted in Sweden.

SUMMARY FOR AUGUST, 1910.

WITH the exception of the districts about Cape Egmont, and on the West Coast of the South Island, the rainfall was generally below the average, and especially in Otago and Southland.

The barometer was subject to frequent but not great fluctuations, which were of the usual type of westerly low pressure, the minimum passing in the far South. These movements caused changeable and showery weather in many parts. The most notable occurrence was a cyclonic storm, the centre of which passed through Cook Strait on the night of the 27th instant, and was followed by high southerly winds, with heavy rains and falls of snow in the South, and on mountains in North.

* These remaining suburbs do not lie within borough boundaries, and particulars respecting them have not been obtained for the Vital Statistics. Closely correct annual statements of population outside boroughs are not obtainable.

In the above table are given the deaths and death-rates for each of the four cities, for the suburban boroughs severally, and for each city with its suburban towns. As regards Auckland and Christchurch, the whole of the area usually recognized as suburban has not yet been brought under municipal government, and the vital statistics do not deal with such portions as still remain in road districts. But the omission is not very important, for there are in either case quite enough suburbs included within borough boundaries to give a fair idea of the death-rate of Greater Auckland and Greater Christchurch. As further boroughs are formed the vital statistics will be made to include them.

Deaths occurring at hospitals, of persons not residents of the borough wherein the hospital is situated, have been allotted in each case to the borough where the disease was contracted, and not to that in which the death actually took place.

LOCALITY AND DESCRIPTION.

Te Karae Block.

This block is bounded by the Mangamuka River, which is navigable by vessels drawing up to, say, 7 ft., giving an extensive frontage (apart from several tidal creeks which intersect the block) for easy delivery and receipt of settlers' products or exports.

The communication from Auckland is by steamer from Onehunga direct to Kohukohu, or by steamer from Auckland to Russell, thence overland from Opua to Horeke, where a steamer meets the coach. The settlers get their supplies *via* Onehunga.

There is a fairly good road from Kohukohu (the steamer terminus) to Broadwood, which road bounds the upper portion of the block and gives a main-road access.

The land is generally of good quality, having a north-eastern aspect and undulating from the Kohukohu-Broadwood Road to the Mangamuka River (practically the main river of Hokianga).

A butter-factory has been established at Wairupe (Motukaraka), distant about seven miles by the Broadwood-

Kohukohu Road, a complete service with the Broadwood and outlying and over-river districts having been established by launches and by horse-carriage from Kohukohu to Broadwood.

There is a good service by ferry from Kohukohu to Rawene.

The butter-factory is opposite, direct from Rawene, where the police-station and chief post-office are situate.

The sections up the Karae Valley are extremely good, being river-flats with good soil, while the land at the northern end is particularly adapted for sheep-grazing, and the bulk of the land is favourable for carrying on the dairy industry.

For the growing of fruit, the Karae Block has one of the best positions on the Hokianga River. Grapes ("Isabella"), peaches, quinces, lemons, and figs grow in wild luxuriance. At Te Mataa (which is about the middle of the block), at Hauai (the south-eastern end), and at Mangataipa (the northern end), there are ideal places for the cultivation of any fruit (as a speciality grapes, peaches, and apples).

Some years ago a viticulturist, speaking at a meeting of the Settlers' Association at Hokianga, said that "the land was equal to if not better than the land in Italy for fruit-cultivation, and all that was required was to plant the seed—the soil and climate would do the rest."

The sum of £6,000 is now being expended in forming the internal roads of the block.
