NOTICE is hereby given that the sum of £3,000 has been voted by Parliament for distribution to public libraries.

1. A library to be entitled to a subsidy must be public in the sense of belonging to the public, and of not being under the control of an association, society, or club whose membership is composed of a section of the community only, and if within a borough it must be open to the public free of charge. The receipts for the year from subscriptions and donations must not have been less than £2, exclusive of moneys received from endowments, or from Government, or from Borough or County Councils, or for special building purposes, or as rent, hire, or consideration for the use of any room, or building, or land belonging to the institution, in respect of none of which will subsidy be allowed. A subsidy will not be given to more than one library in the same town.

In the division of the vote a nominal addition of £25 will be made to the amount of the income of each library derived from subscriptions, donations, and rates, and the vote will be divided according to the amounts thus augmented; but no library will receive credit for a larger income than £75—that is, in no case will the augmented amount on which distribution is based exceed £100.

3. The whole of the subsidy must be expended without delay in the purchase of books for the library.

4. Application to share in the distribution must be by means of a statutory declaration by the Chairman, or Secretary, or Treasurer of the institution on behalf of which it is made, and must be accompanied by a statement of the receipts and expenditure of the institution for the year ending on the 31st day of December, 1910; and such declaration must be on the form provided for the purpose, which form shall be as follows:—

F. W. MANSFIELD,
Registrar-General.

* It may be that in some instances the places given under the heading "Residence" are not the present places of abode of the respective persons. They have been copied, however, as they stand in the General Register; and if they are inaccurate in any case it is because the changes of residence have not been officially notified to the Registrar-General, as it is obviously desirable that all such changes should be.

They comprise high open hill country of purely pastoral character, the spurs being intersected by deep rough gullies. The vegetation consists of native and English grasses, with snow-grass only on the higher altitudes. The runs are fairly well watered by springs and streams, but are liable to burn up in a dry summer, and, as the altitude ranges from about 1,500 ft. up to about 3,500 ft. above sea-level, it is liable to heavy falls of snow in winter.

This information is published for the information of intending purchasers, but must be taken as approximate only, as the final valuation will be made in accordance with section 244 of the Land Act, 1908, at least three months before the expiry of the present licenses, and the purchasers of the new licenses (being other than the present licensees) will be required to pay the amount of such valuations before being admitted to possession of the runs.

The licensee shall not, during the months of December, January, February, March, April, May, and June, or such other months not exceeding altogether seven in any one year, as the Commissioner shall from time to time determine, burn the grass on his run.

GENERAL DESCRIPTION.

Generally speaking, sections for selection lie midway between the Waihou River and Piako River, and extend from the Kerepehi-Turua-Netherton Road northwards.

The land is all excellent alluvial clay-deposit on sand, and none of the land offered for selection has any peat on it. It is all level, and is partly drained, and with the exception of Sections 12 to 15 and 17 to 20 inclusive, Block II, Waihou Survey District, are all in worked-out kahikatea bush, the remaining timber being of a generally light nature.

All roads, drains, and stop-banks shown on poster are either constructed or under construction, and will be completely finished by the Department.

The sections near the Piako River are covered with raupo and puroa grass.

Access to the lands is from Kopuarahi Wharf, on Piako River (readily reached from Thames by launches working under tidal conditions), and also from Turua, Kerepehi, and the several temporary landings erected where necessary on the Piako River.

Attention is drawn to the fact that rough sleeping-accommodation has been provided for intending selectors, at a point

known as "The Bush Shanty." Selectors must, however, provide their own blankets and provisions.

Various launches ply for hire between Thames and Piako River every day under usual tidal conditions.

Artesian bores have been sunk by the Department at several points on the Hauraki Plains, and very good flows have been obtained. The water is, however, mineralized, but is excellent for stock purposes. The Department is prepared to sink bores for selectors at practically cost price.

Guides will, where necessary, be stationed at different points to show selectors the various sections, but, generally speaking, selectors will not have the slightest difficulty in locating each section.

All road-lines forming boundaries of sections must be securely fenced so that cattle shall not damage the drains or stop-banks.

Stop-banks, roads, drains, and protective works considered necessary will be completed by the Department. All main drains will be maintained for two years from date of ballot.

The Department reserves the right at any time to make new drains or deepen drains through any section.

IMPROVEMENTS.

Attention is drawn to the fact that the fence and drain shown on eastern boundaries of Section 14, Block XI, Thames Survey District; Sections 7 and 16, Block II, Waihou Survey District; Section 7, Block VI, Waihou Survey District; and Section 1, Block VII, Waihou Survey District, have been erected and constructed by Messrs. Bagnall Bros. at their own expense. The fence where shown on plan is generally along the boundary-lines of sections mentioned, but the drain is entirely on the property of Messrs. Bagnall Bros.

The improvements which go with the land are as follows, the measurements being in all cases approximate:—

Block II, Waihou Survey District.

Section 13: 25 chains of combined drain and stop-bank. Section 14: 25½ chains of combined drain and stop-bank. Section 15: 34½ chains of combined drain and stop-bank. Section 17: 1½ chains of drain. Section 18: 35½ chains of combined drain and stop-bank. Section 19: 13½ chains of combined drain and stop-bank. There are also some old drains through the above sections, and also on Sections 12 and 20.

Block VI, Waihou Survey District.

Section 10: 40 chains of new subdivisional fence, and 17 acres of grass in good heart.

Block VII, Waihou Survey District.

Section 1: 22½ chains of new subdivisional fence, and 10 acres of grass in good heart. Section 2: 35 chains of new subdivisional fence, and 14 acres of grass in good heart.

GENERAL DESCRIPTION.

The Town of Pipiroa is situate in Hauraki Plains, on the west bank of the Piako River. The nearest access is by launch or steamer, &c., from Thames, which is distant about seven miles. Through-access roads from Pokeno and Waerenga Railway-stations pass directly through the town to Pipiroa Wharf, and then continue from the Kopuarahi

Wharf to Turua and Kerepeehi, these roads being now under construction.

The town lands are partly drained alluvial clay-deposit, and covered with native grass, manuka, and some mangrove. Some of the sections have small dried-up watercourses through them, which can, however, be readily filled in.

The suburban lands are also partly drained alluvial clay-deposit, and the vegetation consists of light and heavy manuka in places, raupo, cabbage-trees, native grasses, &c. There are a few dried-up watercourses passing through some of the sections, which can, however, be readily filled in.

The rural lands are similar in character to the suburban sections.

The roads will be duly formed and stop-bank and other protective works maintained for a period of two years by the Department.

LOCALITY AND DESCRIPTION.

Maraetaua Nos. 9c and 10 are situated on both sides of the Te Kuiti-Awakino Road, which intersects the block for a distance of about three miles. The road is metalled, and provides convenient access to Te Kuiti, probably the most prosperous township in the King-country. The portion of the block lying to the north of the Mokau River is in particular a good piece of country, in the main well suited for dairying, while the portion lying to the south of the river should be suited for carrying sheep and cattle.

Maraetaua No. 2B Nos. 3 and 4 are off the main Te Kuiti-Awakino Road, but a road has been surveyed to give access

to that road. This surveyed road will be formed by the Board. This land also is of good quality, and well adapted for dairying; while the access to be provided will place it within easy distance of Te Kuiti.

The areas of these blocks may be subject to slight alteration.

The lands are described for the general information of intending selectors, who are recommended, nevertheless, to make a personal inspection, as the Board is not responsible for the absolute accuracy of any description.

SPECIAL ORDER.

AT a special meeting of the Auckland and Suburban Drainage Board, held on Friday, the 6th day of January, 1911, a resolution was passed confirming the special order made at a special meeting of the Board held on 30th November, 1910, as follows:—

That the Auckland and Suburban Drainage Board, in pursuance of the powers conferred on it by the Auckland and Suburban Drainage Act, 1908, doth hereby by special order make the following by-laws to be known as "The Auckland and Suburban Drainage Board's By-laws No. 2."

AUCKLAND AND SUBURBAN DRAINAGE BOARD.

By-laws governing the Connection of Sewers and Drains with the Main Sewers or Drains belonging to the Board.

IN these by-laws, if not inconsistent with the context,—

"The Drainage Board" means the Board as constituted by the Auckland and Suburban Drainage Act, 1908:

"Contributing bodies" means every local authority of every city, borough, or road district the whole or any part whereof is for the time being comprised in or forming part of the drainage district:

"The Engineer" means the officer for the time being acting as the Drainage Engineer duly appointed by the Board:

"The Secretary" means the Secretary for the time being of the Drainage Board, and includes any person for the time being appointed by the Drainage

Board to perform the duties of the Secretary, whether designated as Acting-Secretary or not :

"Main sewer" means the main sewer now being or about to be constructed by the Board, and extending from the storage-tanks at Orakei to Oakley Creek, and any other main sewer connected therewith belonging to the Drainage Board :

"Local sewer" or sewers means any sewer or sewers constructed by or vested in one or more of the contributing bodies, but not being a main sewer constructed by or vested in the Drainage Board.

1. Every contributing body desiring to connect any of its sewers or drains with the main sewer shall send notice in writing of such intention to the Drainage Board, and shall attach to such notice complete plans and specifications of any sewer or sewers to be connected.

2. Such notice, plans, and specifications shall give full particulars of every local sewer or drain which by such proposed connection would convey sewage to the main sewer, and shall show the area and ultimate population such local sewers are intended to serve.

3. All plans shall include a general plan showing the line and direction of the local sewers to a scale of 200 ft. to an inch, a longitudinal section to a horizontal scale of 200 ft. to an inch, and a vertical scale of 20 ft. to an inch, on which shall be shown the surface of the ground, the invert levels of all local sewers at every change of grade, and the gradients of such sewers. All levels are to be indicated with reference to the Board's datum, accurate information as to which can be obtained from the Engineer. Detail plans and sections of the manholes, lamp-holes, cesspits, and overflow-chambers, to a scale of not less than 4 ft. to an inch.

4. The specifications shall state clearly the materials to be used, and the method in which the work of constructing such sewers is proposed to be carried out.

5. No water-closet shall be connected to any sewer draining into any of the Board's sewers, unless such closet is provided with a proper supply of water and adequate flushing-cistern of not less than 3 gallons capacity; but no water-closet shall be connected to any local sewer discharging into a main sewer until such time as the Drainage Board shall have notified the contributing body having control of such sewer that the Board is prepared to allow the contents of water-closets to be discharged from such local sewer into the Board's sewers. This shall not apply to the sewers already connected with the Hobson Bay main sewer.

6. All openings in local sewers used for the admission of storm, surface, or subsoil water from streets, open places, private premises, &c., shall be provided with a proper cesspit and grating so designed as to effectually prevent the passage to the sewer of any rubbish, sand, grit, detritus, or other organic matter that would be likely to cause settlement and deposit in or injury to the Board's sewers, tanks, appliances, &c.; and all such inlets or openings must be constructed and maintained by the contributing body to the approval of the Board's Engineer. Such cesspits must be kept properly clean, and, failing this being done, it shall be lawful for the Engineer, after twenty-four hours' written notice to the contributing body, to have the same properly cleaned, and to recover the cost of so doing from the contributing body.

7. No local sewers shall be connected to the main sewer until the Engineer has certified that such local sewer is in good order and condition, and is fit to be so connected; and in the case of a connection having been made prior to the completion of the local sewer, twenty-eight clear days' notice shall be given by the contributing body to the Drainage Board before house connections are made, or any sewage, storm, surface, or subsoil water is allowed to run therein.

8. The actual connection between any local sewer and the main sewer shall be controlled by a proper overflow-chamber so constructed as to insure that the quantity of sewage or liquid passing into the main sewer shall not exceed six times the maximum dry-weather flow as estimated by the Engineer, and that the overflow-water shall be discharged into a proper stormwater sewer or watercourse so as not to cause a nuisance.

9. In all areas where, owing to the level of any portion of the drainage district, it is necessary for the sewage from such portion to be pumped into the main sewer, such area shall be sewered strictly on the separate system, and no connection from rainwater-pipes, surface-water gullies, or subsoil-water drains shall be permitted.

10. Polluted water from a stable, dairy, or paved yard, or from the floor of a building used for manufacturing or business purposes, shall not be conveyed or discharged into a local sewer or drain connected directly or indirectly with a main sewer unless such local sewer or drain shall have in connection with such premises a silt-trap of dimensions and material to be determined by the Engineer.

11. No person shall deposit, or cause, permit, or suffer to be deposited, in any water-closet, pan, trap, or yard gully connected with a drain, or into any drain, any ashes, house refuse, or other solid matter not being ordinary household sewage.

12. No person shall discharge, or cause, permit, or suffer to be discharged, or to flow into any sewer or into any drain connected directly or indirectly with a main sewer any chemicals (whether gaseous, liquid, or solid) or anything of an explosive nature (whether gaseous, liquid, or solid).

13. No person shall discharge, or cause, permit, or suffer to be discharged or to flow into any sewer or into any drain connected directly or indirectly with a main sewer any waste liquids or refuse products of any manufacturing process, without the express sanction of the Board having been first obtained in writing, and then only for and during such period or periods and subject to the observance of such conditions (including a power of cancellation of such sanction) as the Board may think fit to impose; and in particular such waste liquids or products shall, if required by the Board, be first passed through the strainers sufficient to prevent the passage of any solid matter into the sewer.

14. No person shall discharge, or cause, permit, or suffer to be discharged or to flow directly into a sewer or into a drain connected directly or indirectly with a main sewer any hot liquids or steam, but shall retain the same in a cooling apparatus until the temperature is reduced to below 100° Fahr.

15. No person shall discharge or empty into, or cause, permit, or suffer to be discharged or emptied into, any sewer or into any drain connected with a main sewer (whether directly or in such a manner as to reach such sewer or drain) from any hospital institution or other private or public building any solid or liquid matter from patients suffering from any infectious or contagious disease, without first thoroughly disinfecting such discharge.

16. No person shall sweep, rake, or place any dust, earth, or rubbish into or in any sewer or any drain connected directly or indirectly with a main sewer, or any sanitary convenience or sanitary appliance directly or indirectly connected with a main sewer.

17. No person shall sweep or rake or place into or in an inlet chamber or appliance (including a grid) giving access to a main sewer, or permit or suffer anything to enter a main sewer by means of any such opening or appliance, save such matter as may be carried in with the water entering by a local sewer in the course of the legitimate use of such sewer.

18. No person shall destroy or injure any drain, or covered or open watercourse, or any building, erection, structure, method of ventilation, machinery, dam, tank, reservoir, or other work or thing being part of or connected with any drainage-works vested in or under the control of the Board, or in any way stop or obstruct or otherwise interfere with any drain or watercourse or other drainage-work.

19. No contributing body shall fail or neglect to give the statutory notice of its intention to connect a local sewer to a main sewer as provided by section 58 of the Auckland and Suburban Drainage Act, 1908, nor shall by itself, its officers, or its workmen make on a main sewer any connection which has not been approved by the Drainage Board.

20. Every local authority having control of local sewers or drains which are directly or indirectly connected to a main sewer shall maintain such local sewer or drains, together with all chambers, traps, appliances, or other thing pertaining thereto, in good order and repair to the satisfaction of the Engineer.

The common seal of the Auckland and Suburban Drainage Board was hereto affixed in the presence of—

L. J. BAGNALL,
Chairman.
W. A. THOMPSON,
M. J. COYLE,
Members.
