Clerk of the Executive Council.

Authorizing the Wairoa Borough Council to erect Electric Lines within the Borough of Wairoa.

ISLINGTON, Governor.

ORDER IN COUNCIL.

At the Government Buildings, at Wellington, this fourth day of November, 1912.

Present :

THE HONOURABLE J. ALLEN PRESIDING IN COUNCIL.

WHEREAS by section two of the Public Works Amendment Act, 1911, it is provided that no person shall lay, construct, put up, place, or use any electric line except under the authority of a license issued to him by the Governor in Council under that Act :

And whereas the Wairoa Borough Council (hereinafter referred to as "the said Council") desires to erect electric lines in the Borough of Wairoa, and it is expedient accordingly to issue a license in respect thereof under the said section :

Now, therefore, in pursuance and exercise of the powers conferred on him by the said section, and of all other powers in anywise enabling him in this behalf, His Excellency the Governor of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth, subject to the conditions set forth in the Schedule hereto, hereby authorize the said Council to erect and maintain electric lines for lighting and power purposes within the Borough of Wairoa, along the routes shown by means of red lines on the plan marked P.W.D. 31269, deposited in the office of the Minister of Public Works, at Wellington, in the Wellington Provincial District.

SCHEDULE.

In the following conditions—

- "Consumer's wires" means any electric lines on a consumer's premises which are connected to the service lines of the said Council at the consumer's terminals.
- "Inspecting Engineer" means the Engineer or other officer appointed by the Minister of Public Works for the purpose of inspecting the works to be constructed or maintained by the said Council.
- "Pressure" means the difference of electrical potential between any two conductors through which a supply of energy is given, or between any part of either conductor and the earth.
- "Minister" means the Minister of Public Works.
- "Telegraph" includes telephone.

Any metallic body, to be "efficiently connected with earth," shall be connected with the general mass of the earth in such manner as will insure at all times an immediate and safe discharge of electrical energy.

1. The supply of electrical energy shall be given by the continuous-current three-wire system.
2. Continuous current shall be generated at about 220 volts between each outer and the neutral conductor, and at about 440 volts between the outers of the system, the declared pressure at the consumers' terminals being 220 and 440 volts respectively.
3. The main switchboard shall be made of and be mounted on material that is not inflammable.
4. All overhead conductors shall be of hard-drawn copper, and where they cross over or under open telegraph or any other aerial wires they shall be insulated throughout the entire length of every crossing-span with not less than 300-megohms-per-mile grade of vulcanized rubber, except that where it may be impracticable or undesirable to so insulate the electric-light wires over spans at such crossing-places the insulation of the electric-light wires may be triple weatherproof, provided that all other aerial wires referred to are insulated at those crossing-spans with not less than 300-megohms-per-mile grade of vulcanized rubber, or are otherwise satisfactorily insulated. In cases where telegraph or other aerial wires already exist and are required to be insulated, their insulation shall be effected at the expense of the said Council, and shall be to the satisfaction of the Minister of Telegraphs.
5. Except where otherwise provided, the overhead conductors may be bare. If at any time it is found detrimental to the public safety to have these wires bare, they shall be insulated when deemed necessary. No electric-light wire shall come within 3 ft. of any other class of aerial wires or of cables except where it may be permitted to pass the electric-light wires through these other wires or cables at a pole.
6. Where lead-covered telephone cables are crossed above by the electric-light wires the latter wires shall be insulated with not less than 300-megohms-per-mile grade of

vulcanized rubber throughout the crossing-span, and over every such span they shall, if the Minister of Telegraphs so requires, be suitably suspended from effectively earthed steel bearer-wires.

7. Lead-covered telephone cables may be crossed under by the electric-light wires, if the height and other circumstances permit—and of this the Minister of Telegraphs shall be the judge—and in such case the latter wires shall be insulated as required by clause 6, and suspended if deemed necessary.

8. In places where it may be required to cross with the electric-light wires through any other aerial wires or through cables because of the impracticability of crossing above or below (and crossing shall be effected above or below if possible), all such through crossings, if permitted, shall be effected at a pole. In every case of a through crossing, no matter whose property the lines crossed through may be, the method of carrying the electric-light wires across the pole, of protecting them thereon, of preventing other wires from coming into contact with them, and of protecting persons working on the poles from danger of shock, shall be to the satisfaction of the Minister of Telegraphs. The electric-light wires shall be insulated with not less than 300-megohms-per-mile grade of vulcanized rubber where they pass through on the poles, and over the whole length of the span on each side of the pole crossed through. Where the insulated wires cross through on the pole they shall be encased in some hard protecting substance for the entire length of the arms on such pole. If metal pipe is used to encase the wires it shall be effectively earthed.

9. In running the lines authorized by this license through streets where no telegraph lines exist the said Council shall keep to one side of the street, and in running service wires to the opposite side of the street to that on which its line of poles is placed the Council shall interfere as little as possible with the route on that side of the street.

10. Except by permission of the Minister of Telegraphs, all overhead electric-light pole lines shall be placed on the opposite side of the street to that on which any telegraph pole lines exist, and where the erection of the electric-light wires necessitates the alteration of any existing telegraph wires, the expense of the alteration shall be borne by the said Council. No such alteration shall be effected except with the permission of the Minister of Telegraphs.

11. Where the electric-light wires are on one side of a street and the telegraph wires are on the other, and service is required to be given from each to the other side of the street, each party shall give the other reasonable facilities as far as possible to effect supply.

12. Where it cannot be arranged otherwise, and there is room on the telegraph poles, and other circumstances do not render it unsafe or impracticable, the electric-light wires may be run along on the telegraph poles, subject to their insulation being not less than 300-megohms-per-mile grade of vulcanized rubber, and to any special conditions that it may be found necessary to impose at the time that the placing of such electric-light wires on the telegraph poles is being considered.

13. If, in the opinion of the Minister, the erection or existence overhead of wires authorized by this license constitutes a danger to the public owing to the number of wires, whether electric or other wires, already carried overhead, or to the congestion of buildings in the vicinity of such wires, or to any other cause, he may notify the said Council to that effect, and upon receipt of such notice the Council shall, within six months thereof, place such first-mentioned wires underground, or erect them by another overhead route with and subject to the approval of the Minister.

14. Telegraph wires shall not be run along or placed on the said Council's poles, nor shall the Council's wires be run along or placed on telegraph poles, without a special understanding as to requirements and precautions to be observed being arrived at in each case between a responsible officer of the Council and an officer appointed by the Minister of Telegraphs. Rental at a rate to be agreed upon may be charged for the use of poles, but nothing in this license shall be construed to give any party a right to the use of poles other than its own.

15. Every main shall be tested for insulation after having been placed in position and before it is used for the purposes of supply, the testing pressure being at least 500 volts, and the said Council shall duly record the results of the tests of each main or section of a main, and forthwith forward copies of such record to the District Engineer, Gisborne.

16. The insulation of every complete aerial and underground circuit used for the supply of energy, including all machinery, apparatus, and devices forming part of or in connection with such circuit, shall be so maintained that the leakage current shall not under any conditions exceed one-thousandth part of the maximum supply current. Every leakage shall be remedied without delay. Every

such circuit shall be tested for insulation at least once in every week, and the said Council shall duly record the results of the tests, and forward copies of such records at the end of each week to the District Engineer, Gisborne.

17. The sectional area of the conductor in any electric line laid or erected in any street shall be not less than that of a strand of seven wires, each of which is of No. 20 standard wire gauge, and the sectional area of every wire in a strand forming any such conductor shall be not less than that gauge.

18. All material used for insulating electric lines or apparatus shall be of the best quality, and thoroughly durable and efficient, having regard to the conditions of its use. Suitable provision shall be made for the protection of the insulating material against injury or removal.

If the protection so provided is wholly or partly metallic, it shall be efficiently connected with earth.

19. All metal pipes or coverings containing any electric wire shall be efficiently connected with earth, and shall be so jointed as to make good electrical connection throughout their whole length.

20. Arc lamps used in any street for public lighting shall be so fixed as not to be in any part at a less height than 10 ft. from the ground.

All arc lamps shall be so guarded as to prevent pieces of ignited carbon or broken glass falling from them, and shall not be used in situations where there is any danger of the presence of explosive dust or gas.

21. The variation of pressure at any consumer's terminals shall not, under any conditions of the supply which the consumer is entitled to receive, exceed 4 per cent. from the normal pressure at which he is being supplied.

22. Every support for an aerial line shall be of durable material, and properly strengthened against forces due to wind-pressure, change of direction of the line, and unequal length of span. The factor of safety of such supports, taking into consideration all possible stresses, including wind-pressure at 30 lb. per square foot on plane surfaces and 18 lb. per square foot of diametrical plane for cylindrical surfaces, shall be at least 4 if those supports are of iron, steel, or ferro-concrete, and at least 6 if the supports are of wood. The stress in the aerial conductors shall not exceed 28,000 lb. per square inch for copper and 15,000 lb. per square inch for aluminium in the extreme case of a temperature of 120° F. and a wind-pressure of 18 lb. per square foot of diametrical plane occurring simultaneously.

23. Earth wires, where led down poles, shall be protected by casing for a distance of 8 ft. from the ground.

24. All aerial wires shall be attached to suitable insulators carried on cross-arms of suitable material and cross-section, and they shall be so attached to the insulators or guarded that they cannot fall away from the support. Conductors covered with insulating material shall be so attached that their insulation will not be impaired where they are secured to the insulator.

25. Any aerial wire shall not in any part thereof be at a less height from the ground than 18 ft., or within 5 ft. measured horizontally or 7 ft. measured vertically from any part of any building or erection other than a support for the line, except where brought into a building for the purpose of supply. No work of any nature shall be erected or constructed upon, over, or under any part of the Government railway until the said Council has obtained the consent of the Minister of Railways thereto, as required by section 4 of the Government Railways Amendment Act, 1910 (No. 2).

26. Service lines from aerial lines shall be led as directly as possible to insulators firmly attached to some portion of the consumer's premises which is not accessible to any person without the use of a ladder or other special appliance. Every portion of any service line which is outside a building and is within 7 ft. from any part of the building shall be rubber-insulated.

27. Where an aerial line crosses a street, the angle between the line and the direction of the street at the place of crossing shall be not less than 60 degrees, and the spans shall be as short as possible.

28. Where an aerial line crosses or is in proximity to any metallic substance, precautions shall be taken against the possibility of the line coming into contact with the metallic substance by breakage or otherwise.

29. Efficient guard-wires shall be erected in a manner to meet with the approval of the Minister of Telegraphs at all such crossings and places where electric-light wires intersect telegraph or telephone wires, as may be required by the said Minister to be so protected. The said Council shall bear the expense of such guard-wires in all cases where an electric-light wire intersects a telegraph or other wire previously existing.

30. Every aerial line, including its supports, its conductors, and their insulating covering, and all the structural parts and electrical appliances and devices belonging

to or connected with the line, shall be duly and efficiently supervised and maintained as regards both electrical and mechanical conditions.

31. An aerial line shall not be permitted to remain erected after it has ceased to be used for the supply of energy unless the said Council intends within a reasonable time again to take it into use for that purpose.

32. All underground electric cables shall be laid as far as possible under the pavements and near the kerb-line.

33. All conduits, pipes, casings, and street boxes used as receptacles for electric lines shall be constructed of durable material, and shall be of ample strength to prevent damage from heavy traffic, and reasonable means shall be taken to prevent the accumulation of gas in such receptacles.

34. All underground cables shall be thoroughly insulated, and carefully laid and jointed, and protected by permanent material in such a way that it shall be impossible for the conductor or its sheath to come into contact with any external metallic or other substance, or for a pick or other tool to come accidentally into contact with the conductor or its sheath.

35. All underground metal conduits, pipes, or casings containing an electric line shall be efficiently earthed, and shall be so jointed and connected across all street-boxes and other openings as to make good electrical contact throughout their whole length.

36. The covers of street-boxes shall be so secured that they cannot be opened except by means of a special appliance. Street-boxes shall be inspected from time to time for the presence of gas, and suitable action shall be taken to check its influx and accumulation.

37. The said Council shall be responsible for all electric lines or wires, fittings, and apparatus belonging to it, or under its control, which may be upon a consumer's premises, being maintained in a safe condition and in all respects fit for supplying energy.

38. In delivering the energy to a consumer's terminals, the said Council shall exercise all due precautions, so as to avoid risk of causing fire on the premises.

39. Where supply is given to a consumer at 440 volts for power purposes—

- (a.) The frame of every electric motor shall be efficiently connected with earth.
- (b.) The consumer's wires forming the connections to motors, or otherwise in connection with the supply, shall be, as far as practicable, completely enclosed in strong metal casing efficiently connected with earth, or they shall be fixed in such a manner that there shall be no danger of any shock.
- (c.) The supply to every motor shall be controlled by means of an efficient cut-off switch, placed in such a position as to be easily handled by the person in charge of the motor, and connected so that by its means all pressure can be cut off from the motor itself, and from any regulating switch, resistance, or other device in connection therewith.
- (d.) Switches, efficient fuses, or other automatic circuit-breakers shall be provided, so as to protect the circuits from excess of current, and all switches and cut-outs shall be so enclosed and protected that there shall be no danger of any shock being obtained in the ordinary handling thereof, or of any fire being caused by their normal or abnormal action.
- (e.) A notice shall be fixed in a conspicuous position, at every motor and switchboard in connection with the supply, forbidding unauthorized persons to touch the motors or apparatus.

40. Where supply is given at 440 volts for arc lamps in series—

- (a.) The consumer's wires forming the connections to the arc lamps, or otherwise in connection with the supply, shall be, as far as practicable, completely enclosed in strong metal casing efficiently connected with earth, or they shall be fixed in such a manner that there shall be no danger of any shock.
- (b.) The supply to every arc lamp shall be controlled by means of an efficient cut-off switch, placed in such a position as to be easily handled by the person in charge of the arc lighting, and connected so that by its means all pressure can be cut off from the arc lamp itself, and from any regulating switch, resistance, or other device in connection therewith. Provided that where the arc lamps are connected in series across the outer conductors of a three-wire system, it shall be sufficient if one such switch is provided for each series of arc lamps.
- (c.) Switches, efficient fuses, or other automatic cut-outs shall be provided, so as to protect the circuits from excess of current, and all switches and cut-outs shall be so enclosed and protected that there

shall be no danger of any shock being obtained in the ordinary handling thereof, or of any fire being caused by their normal or abnormal action.

41. Where the three wires of the system are brought into a consumer's premises for lighting purposes the supply shall be given to two pairs of terminals, arranged in such a manner that there shall be no danger of any shock to persons, and the wiring from those terminals shall be kept distinct.

42. Where any portion of any electric line or any support for an electric line is exposed in such a position as to be liable to injury from lightning, it shall be efficiently protected against such liability.

43. A suitable safety fuse or other automatic circuit-breaker shall be inserted in each service line within a consumer's premises as close as possible to the point of entry, and contained within a suitable locked or sealed receptacle of fireproof construction.

44. All electric wires placed on a consumer's premises shall be highly insulated, and shall be thoroughly protected against injury to the insulation or access of moisture. All electric wires shall be so fixed and protected as to prevent the possibility of electrical discharge to any adjacent metallic substance.

45. The said Council shall not connect the wires and fittings on a consumer's premises with its mains, or, in the case of premises already connected, continue the supply from its mains, unless it is reasonably satisfied that the requirements of this license in so far as it affects those premises are complied with, that the wiring and fittings are suitable for the voltage at which supply is being given, that the installation generally is in accordance with the requirements of good practice, and that the connection or continuance of supply would not cause a leakage from those wires and fittings exceeding one ten-thousandth part of the maximum supply current to the premises.

For the purpose of satisfying itself that the requirements of this license are observed, the said Council may require that notice be served upon it of the intention to instal wires, fittings, lamps, motors, or other apparatus on any premises, and may inspect the same during any reasonable hours while the installation of the same is in progress.

46. If the said Council is reasonably satisfied, after making all proper examination by testing or otherwise, that the wiring and fittings are not suitable for the voltage being employed, that a leakage exists at some part of a circuit of such extent as to be a source of danger, and that such leakage does not exist at any part of the circuit under the control of the said Council, or that any other requirements of this license are not complied with, then and in such case any officer of the Council, duly authorized by it in writing, may, for the purpose of discovering whether the leakage exists at any part of a circuit within or upon any consumer's premises, or whether the wiring is suitable and the general requirements of the license are complied with, by notice require the consumer, at some reasonable time after the service of the notice, to permit him to inspect and to test the wires and fittings belonging to the consumer and forming part of the circuit.

If on such testing and inspection the officer discovers a leakage from the consumer's wires exceeding one ten-thousandth part of the maximum supply current to the premises, or that the requirements of this license are not properly conformed to, or if the consumer does not give all due facilities for inspection and testing, the said Council shall either not commence the supply or shall forthwith discontinue the supply of energy to the premises in question, giving immediate notice to the consumer of its reasons for not commencing or for discontinuing the supply, and in either case supply shall not be given until it is reasonably satisfied that the installation is in conformity with the requirements of this license.

If any consumer is dissatisfied with the action of the said Council in refusing to give, or in discontinuing, or in not recommencing the supply of energy to his premises, the wires and fittings of that consumer may, on his application to the Minister, and on payment of the cost, be inspected and be tested for the existence of leakage by an Inspecting Engineer.

This provision shall be indorsed on every notice given under the provisions of either of the first two paragraphs of this clause.

47. The said Council shall, upon receipt of an application from the occupier of any premises within 60 ft. of any of the Council's public supply electric lines, furnish such premises with electrical energy upon the same terms and conditions on which any other consumer is entitled under similar circumstances to a corresponding supply, provided that the Council's plant is of sufficient power to supply the electrical energy required by such occupier as well as the requirements of other consumers.

48. The Council shall, prior to the completion of the said works, give to the Minister at least one month's notice in writing of the estimated date of such completion.

49. The Council shall not use the said electric lines, or permit the same to be used, for any purpose until the Minister has given notice in writing to the said Council that he has received from the Inspecting Engineer a certificate that they have been satisfactorily carried out.

50. This license, and the benefits and obligations hereunder, shall not be assigned without the express consent in writing of the Minister first had and obtained; but such consent shall not be withheld if it is proved to the satisfaction of the Minister that the transferee is financially and otherwise able to carry out the obligations specified in this license.

51. For the purpose of ascertaining whether the conditions of this license are being faithfully complied with by the said Council, the Minister, or any person appointed by him in that behalf, may at all reasonable times enter on the lands and works and inspect the same.

52. From and after the time when the said Council commences to supply energy it shall maintain continuously sufficient power for the use of all the consumers for the time being entitled to be supplied: Provided that, for any purposes connected with the efficient working of the undertaking, the Minister may give permission to the Council to discontinue the supply at such intervals of time and for such periods as he may think expedient. When the supply is so discontinued, public notice shall be given, when practicable, of such discontinuance and of the probable duration thereof.

53. The Minister may at any time order an inspection to be made of the works, lines, and wires of the said Council used for electric lighting and power purposes. If any defect is found to exist it must be remedied forthwith, and if, in the opinion of the Inspecting Engineer, such defect is serious the Minister may, on receipt of the report, direct the said Council to at once cease transmitting energy either over the whole of its lines and wires, or over any part thereof, as to him may seem fit, until such defect is repaired or remedied. The cost of such inspection shall be borne by the said Council.

54. After the supply of energy has begun, particulars shall be given to the Under-Secretary for Public Works at Wellington of each further proposed extension or alteration of lines or wires.

55. If the said Council makes default in complying with any of the provisions of this license the Minister may, by notice in writing, require the said Council within thirty days to remedy the default specified in that notice; and if it fails to comply with the terms of the notice within the said period it shall be liable to a penalty of £10, to be recoverable by or on behalf of the Minister as a debt due to the Crown; but the Council shall not be held to have committed default for any failure to maintain power continuously if such failure is due to the breakdown of machinery or other accident, unless such breakdown or accident is proved to be due to negligence on the part of the said Council.

The recovery of a penalty under this license shall not affect the liability, if any, of the said Council to make compensation in respect of any damage or injury which may be caused by reason of the default.

56. Notwithstanding anything in the last preceding clause of these conditions, if the Council fails to comply with the terms of any such notice for ninety days after the receipt thereof the Governor in Council may thereupon revoke this license without further notice.

57. Nothing in this license shall be deemed in any way to interfere with, affect, or abridge any rights or powers vested in His Majesty the King, or in the Governor on his behalf, authorizing the construction, management, or working of any public works, nor shall any compensation be payable to or on behalf of the said Council for injury done to the works herein authorized by the construction, management, or working of any such public work as aforesaid, or for the loss occasioned thereby, or for the exercise of any such right or power as aforesaid.

Terms and Conditions of Lease of Village-homestead Allotments in Heriot Village Settlement, Otago Land District.

ISLINGTON, Governor.
ORDER IN COUNCIL.

At the Government Buildings, at Wellington, this fourth day of November, 1912.

Present:

Subsidies to Public Libraries.

Education Department,
Wellington, 14th October, 1912.

NOTICE is hereby given that the sum of £4,000 has been voted by Parliament for distribution to public libraries.

The distribution will take place on the 3rd February, 1913, and no claim will be entitled to consideration that shall not have been sent in in due form and received by the Secretary for Education, Wellington, on or before the 25th January, 1913.

1. A library to be entitled to a subsidy must be public in the sense of belonging to the public, and of not being under the control of an association, society, or club whose membership is composed of a section of the community only, and if within a borough it must be open to the public free of charge. The receipts for the year from subscriptions and donations must not have been less than £2, exclusive of moneys received from endowments, or from Government, or from Borough or County Councils, or for special building purposes, or as rent, hire, or consideration for the use of any room, or building, or land belonging to the institution, in respect of none of which will subsidy be allowed. The net proceeds of concerts, lectures, or other entertainments on behalf of the current expenses of the library will be regarded as voluntary contributions. A subsidy will not be given to more than one library in the same town.

2. In the division of the vote a nominal addition of £25 will be made to the amount of the income of each library derived from subscriptions, donations, and rates, and the vote will be divided according to the amounts thus augmented; but no library will receive credit for a larger income than £75—that is, in no case will the augmented amount on which distribution is based exceed £100.

3. The whole of the subsidy must be expended without delay in the purchase of books for the library.

4. Application to share in the distribution must be by means of a statutory declaration by the Chairman, or Secretary, or Treasurer of the institution on behalf of which it is made, and must be accompanied by a statement of the receipts and expenditure of the institution for the year ending on the 31st day of December, 1912; and such declaration must be on the form provided for the purpose, which form shall be as follows:—

DECLARATION.

I, [Name], of [Place of abode], [Occupation], do solemnly and sincerely declare that I am Chairman [or Secretary, or Treasurer] of the [Name of institution]; that during the year ending on the 31st day of December, 1912, the receipts of the aforesaid institution for the maintenance of the library only were as follows: From rates levied by a local governing body under Part I of the Libraries and Mechanics' Institutes Act, 1908, or the Municipal Corporations Act, 1908, pounds shillings and pence; from the subscriptions of members, pounds shillings and pence; and from voluntary contributions other than members' subscriptions, pounds shillings and pence; that the library is public in the sense of belonging to the public, and is not under the control of an

association, society, or club whose membership is composed of a section of the community only; that the information hereinafter furnished by me in the appendix hereto is correct in every particular; that the abstract of accounts is a true statement of the receipts and expenditure of the institution for the year herein specified; that the whole of the subsidy received during the year was expended in the purchase of books for the library; [and that by the rules of the library it is open to the public free of charge].

And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the Justices of the Peace Act, 1908.

[Signature.]

Declared at _____, this _____ day of _____, 191____, before me— _____, Justice of the Peace [or Solicitor, or Notary Public].
