*License authorizing Robert Ellis, of Brightwater, Flour-miller, to use Water from the Wairoa River for the Purpose of generating Electricity and to erect Electric Lines within a radius of Six Miles from the Power-house on Section 3, Block X, Waimea District.*

LIVERPOOL, Governor.  
ORDER IN COUNCIL.

At the Government House, at Wellington, this twenty-third day of June, 1913.

Present :

HIS EXCELLENCY THE GOVERNOR IN COUNCIL.

WHEREAS by section five of the Public Works Amendment Act, 1908, it is enacted that the Governor may from time to time by Order in Council grant to any person or body corporate a license to use water from any fall, river, stream, or other source for the purpose of generating electricity for electric light, mechanical power, or other uses, and to exercise in respect of that license any of the powers and authorities specified in that behalf in the said section: And whereas it is further provided by the said section that any such license may confer upon the licensee a right at any time or times during the continuance of the license (but subject to such conditions and restrictions as are expressed in the license) to enter upon any road, railway, or other land, whether vested in or occupied by the Crown or any other person or body corporate, and there to construct, erect, lay down, maintain, renew, or repair all such cables, wires, and other things as are required for the transmission of electricity between the fall, river, stream, or other source aforesaid and any place to which the licensee is authorized to transmit electricity in pursuance of the license:

And whereas John Ellis, of Brightwater, in the Provincial District of Nelson and Dominion of New Zealand, flour-miller (who, his executors, administrators, and assigns, is hereinafter referred to as "the licensee"), has applied for a license under the said section to take and use water from the Wairoa River, in the Provincial District of Nelson (hereinafter referred to as "the said river"), for the purpose of generating electricity as aforesaid, and it is expedient to issue such license accordingly:

Now, therefore, in pursuance and exercise of the powers conferred upon him as aforesaid, and of the powers conferred by section two of the Public Works Amendment, Act, 1911, and of all other powers enabling him in that behalf, His Excellency the Governor of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby grant to the licensee, subject to the terms and conditions hereinafter set forth, a license to take and use from the Wairoa River aforesaid, for the purposes hereinafter set forth, a stream of water (hereinafter referred to as "the said water") not exceeding fifty sluice-heads at any one time: and also to erect and maintain electric lines within a radius of six miles from the power-house hereinafter referred to, for lighting and power purposes as hereinafter described.

TERMS AND CONDITIONS OF LICENSE.

1. In this license—  
 "A sluice-head of water" means a stream of water capable of discharging one cubic foot per second:  
 "Minister" means the Minister of Public Works:  
 "Inspecting Engineer" means the Engineer or other officer appointed by the Minister for the purpose of inspecting the works to be constructed or maintained by the licensee hereunder.
2. The said water shall be used for the purpose of generating electricity for the supply of electric light and power as may be required.
3. The said water shall be taken from the said river at the headworks, situated on the south side of the said river, and on the north-western portion of Section 3, Block X, Waimea District, at a point indicated on the plan marked

P.W.D. 32806, deposited in the office of the Minister of Public Works, at Wellington.

4. From the said headworks the water shall be conducted by a head-race along the left bank of the said river to the power-house, the positions of the said head-race and power-house being more particularly delineated on the plan referred to in the last preceding clause hereof. All water taken from the said river by the licensee in pursuance of this license shall be returned thereto by means of a tail-race from the power-house to the river, also shown on the said plan.

5. The licensee shall in respect of his license pay to the Receiver of Land Revenue at Nelson, or otherwise as the Minister may from time to time require, a yearly rental of 1/20th of a penny per unit for each unit generated for purposes of transmission, and as ascertained by a watt meter or watt meters inserted in the circuit or circuits. Such meter or meters shall not be opened or interfered with by any unauthorized person, and the only person authorized to open, set, read, utilize, and otherwise deal with the same shall be the Resident Engineer for Public Works, Nelson, or such other officer as may be appointed for that purpose by the Minister. Payment shall be made half-yearly in each and every year during the continuance of this license upon the receipt by the licensee of a certificate from the Resident Engineer for Public Works, Nelson, or such other officer as aforesaid, setting forth the number of units so generated, the first of such payments to be made within fourteen days from the date when any certificate as aforesaid has been served on the licensee. In the event of any dispute arising as to the amount of the payment or method of calculation such dispute shall be referred to the Minister, whose decision shall be final.

6. This license may be assigned by the licensee with the express consent in writing of the Governor in Council.

7. The licensee is hereby authorized to construct, maintain, and use the following works for the purposes of this license, the position of the said works being indicated on the plan marked P.W.D. 32806 hereinbefore referred to:—

- (a.) Head-race with intake from the Wairoa River to the power-house, and tail-race from the said power-house to the said river.
- (b.) A power-house with all necessary equipment, including water-motors, generators, transformers, lightning-arresters, switchboards, switches, exciters, and other appliances for generating electricity. Such equipment shall be suitable for and capable of generating electrical energy equal to 50 brake horse-power.
- (c.) Transmission and other lines over the routes shown by means of red and blue lines on the said plan.

8. The licensee shall have the right at any time or times during the continuance of this license, with the consent of the Minister, to enter upon any road or other land, whether vested in or occupied by the Crown or any other person or body corporate, and there to construct, erect, lay down, maintain, renew, or repair all such transmission-lines, poles, or other things as are required for the transmission of electricity between the generating-station and any of the substations to which this license applies.

9. Notwithstanding anything in the last preceding clause, no work of any nature shall be erected or constructed in pursuance of this license upon, over, or under any part of the Government railways until the licensee has obtained the consent of the Minister of Railways thereto, as required by section 4 of the Government Railways Amendment Act, 1910 (No. 2).

10. The licensee shall, within six months from the date of this license, make a substantial commencement of the works to which this license refers, and shall proceed continuously and energetically with the construction of all such works until they are completed, and such works shall be completed within twelve months from the date hereof, or within such further extension of time as may from time to time be determined by the Minister.

11. The Inspecting Engineer, both during and after the construction of the works, shall have free access to and liberty at any time to inspect the same, so as to ensure that the provisions of this license are given due effect to.

12. After the said works, or any portion thereof, have been completed, the licensee shall maintain the same in proper working-order during the continuance of this license.

13. The licensee is hereby empowered to take, under the Public Works Act, 1908, as for a public work, such land as may, in the opinion of the Governor, be necessary to enable the licensee to construct and maintain the various works authorized by this license.

14. Nothing herein shall prevent the Governor in Council from granting to any person or body corporate other than the licensee a license to take water from any portion of the said stream except at the place where the licensee is by this license empowered to take it; provided that no such license

shall so operate as to reduce the volume of the water which the licensee is by this license authorized to take from the said stream.

15. If the licensee fails or neglects—

- (a.) Substantially to commence the construction of the works hereinbefore described within the time limited in that behalf, or with businesslike speed to carry on the work of such construction; or
- (b.) To complete the said works within the time limited in that behalf; or
- (c.) To use or maintain the said works after completion so as to secure the full benefit of the undertaking; or
- (d.) To observe any of the conditions or obligations herein imposed,—

then and in any such case the licensee shall be liable to a fine of £50 for every week or part of a week during which such default or neglect continues, or the Governor may by Order in Council revoke this license.

16. Notwithstanding anything in the last preceding clause, this license shall not be revoked, and no proceedings shall be taken for the recovery of a fine in respect of the breach thereof, unless and until notice in writing of the intention so to revoke the license or to take such proceedings has been served upon the licensee or placed upon some principal or conspicuous part of the works, and default has been made by the licensee in repairing or remedying the breach or breaches specified in the said notice for the following periods:—

- (a.) For any breach which in the opinion of the Governor can be met by a fine, for thirty days after the service of such notice.
- (b.) For any breach which in the opinion of the Governor is of such a nature as to require the revocation of this license, for ninety days after the service of such notice.

17. Nothing herein contained shall be deemed in any way to limit any rights or powers vested in His Majesty the King, or in the Governor on his behalf, or otherwise under any Act of the General Assembly authorizing the construction, management, or working of any public works. Nor shall His Majesty, or the Governor or any person on his behalf, be liable to pay to the licensee any compensation for injury done to the works herein authorized by the construction, management, or working of any such public work as aforesaid, or for the loss occasioned thereby, or for the exercise of any such right or power as aforesaid.

18. The licensee may at any time, with the consent of the Minister, surrender this license, and shall thereupon, if so required by the Minister, remove from the ground all removable equipment, machinery, buildings, poles, transmission-lines, and other plant herein authorized to be installed or provided. If the licensee neglects or fails so to remove the said plant within twelve months after being required so to do, such equipment, machinery, buildings, poles, lines, and other plant shall, without payment of compensation, vest in and become the property of the Crown.

19. The terms and conditions of this license may at any time or from time to time, at the request or with the consent in writing of the licensee, be altered by the Governor by Order in Council.

20. With respect to the transmission and other lines authorized to be erected by this license, and to the transmission and supply of electricity in pursuance thereof, the following special provisions shall apply.

21. Single-phase alternating current shall be used in the transmission of electrical energy between the generating-station and the transformer sub-stations and in its distribution within the area of supply.

22. Current shall be generated at the power-station at a frequency of 50 cycles per second, and at a pressure not exceeding 2,500 volts.

23. At the generating-station a properly equipped non-inflammable switchboard mounted upon a substantial iron frame shall be provided. All conductors must be so guarded that no unauthorized person can under any circumstances come in contact therewith.

24. Transmission-lines shall consist of bare stranded cable of an area which shall not be less than the equivalent of No. 7/18 S.W.G., and shall be carried at a minimum height of 23 ft. above the ground, and shall be spaced at a minimum distance of 18 in. apart.

- (a.) The stress in the aerial conductors used for transmission purposes shall not exceed 25,000 lb. per square inch for copper and 12,500 lb. per square inch for aluminium in the extreme case of a temperature of 22° F. and a wind-pressure of 18 lb. per square foot of diametrical plane occurring simultaneously.
- (b.) Every support for the transmission-line shall be of durable material, and properly strengthened against forces due to wind-pressure, change of direction of the line, and unequal length of span. The factor of

safety of such supports, if of iron, steel, or ferro-concrete, taking into consideration all possible stresses, including wind-pressure at 30 lb. per square foot on plane surfaces and 18 lb. per square foot of diametrical plane for cylindrical surfaces, shall be such that the moment resulting from these stresses shall not exceed one-half the applied moment which will cripple the supporting structure. The factor of safety of the support, if of wood, shall be four, reckoned upon the ultimate strength of the material.

25. Along the transmission-wire route a wire or wires of hard-drawn copper not smaller than No. 12 standard wire gauge may be run for service telephone purposes. This wire shall be bound throughout to double-shed porcelain insulators.

26. At the generating and transformer stations the transmission-wires shall be securely and safely led in; and protection against lightning shall be provided at each end of the lines. The telephone wire or wires shall be suitably guarded against lightning, shall be fused, and such arrangements shall be made where the telephone is placed as will prevent the possibility of injury resulting to any person using the telephone should a power-wire come into contact with the telephone wire.

27. Where conductors cross telegraph or telephone lines they shall be insulated and protected by the licensee to the satisfaction of the Minister of Telegraphs.

28. The transmission-line shall be on the opposite side of the road or street to that on which the telegraph and telephone lines are run, and where there are no telegraph or telephone wires the licensee shall erect his lines on one side of the road or street only. It shall be patrolled throughout its whole length at least once a week, and its insulation shall be so maintained that the maximum leakage shall not exceed one-thousandth part of the maximum supply current. Suitable means shall be provided for indicating leakage on the line. Every leakage shall be remedied without delay. Tests shall be made weekly, and recorded by the licensee.

29. Transformers shall have easily removable fuses for the primary circuit, and shall, as far as possible, be installed in small enclosures accessible only to the licensee's officers or servants. Transformers for use outside shall be fitted with watertight cast-iron cases, and shall be affixed to poles so as to be inaccessible except by the use of a ladder or other special appliance. Every transformer shall have its iron case effectively connected with earth.

30. Conductors used for making the lightning-guard and transformer-case earth connections shall be of copper, and shall have an area of at least 0.023 square inches. They shall be properly stapled or fastened to the supports, and shall be protected by a batten for a distance of 8 ft. from the ground. They shall be run as straight as possible, and be properly connected to an earth-plate. A test shall be made every three months, and oftener if required, of all earths, to ensure that the earth-wire is intact and that the earth is effective.

31. Where poles are carrying low-tension wires, the spans shall not exceed 200 ft. where the direction of the line is straight, or 150 ft. where the direction is curved or where the wires make a horizontal angle at the point of support.

32. Low-tension distribution shall be carried out on the single-phase system at a pressure of 230 to 250 volts. The supply to street lamps, incandescent lamps, and to private consumers shall be at a pressure of 230 volts.

Where cables are led to and from transformer enclosures they shall be protected on the poles by being run in iron pipe, which shall be effectively earthed.

Low-tension wires or cables shall be covered with a triple braiding impregnated with waterproof compound, except where otherwise provided for.

33. Where the erection of the electric lines or wires necessitates the alteration of existing telegraph or telephone lines or wires, the expense of such alteration shall be borne by the licensee.

34. The sectional area of the conductor in any electric line for distribution purposes laid or erected in any street shall not be less than the area of a No. 10 S.W.G. wire.

35. All material used for insulating electric lines or apparatus shall be of the best quality, and thoroughly durable and efficient, having regard to the conditions of its use. Suitable provision shall be made where necessary for the protection of the insulating material against injury or removal. If the protection so provided is wholly or partly metallic it shall be efficiently connected with earth.

36. Any metallic body to be "efficiently connected with earth" shall be connected with the general mass of the earth in such manner as will ensure at all times an immediate and safe discharge of electrical energy.

37. Every support for an aerial line for distribution purposes shall be properly stayed against forces due to wind-pressure, change of direction of the line, or unequal lengths of span. The factor of safety shall be for all aerial lines and

for all other parts of the structure at least 6, and for aerial wires at least 4, taking the maximum possible wind-pressure at 30 lb. per square foot.

38. The low-tension wires shall be attached to double-shed porcelain insulators carried on cross-arms of suitable material and cross-section, and they shall be so attached to the insulators or guarded that they cannot fall away from the support.

39. Any aerial wire used for low-tension distribution or for telephone service shall not in any part thereof be at a less height from the ground than 18 ft., or within 5 ft. measured horizontally or vertically from any building or erection other than a support for the line, except where brought in to a building for the purpose of supply.

40. Service lines from aerial lines shall be led as directly as possible to insulators firmly attached to some portion of the consumer's premises which is not accessible to any person without the use of a ladder or other special appliance. Every portion of any service line which is outside a building but is within 7 ft. from any part of the building shall be rubber-insulated.

41. Where an aerial wire crosses a street, the angle between the line and the direction of the street at the place of crossing shall not be less than 60°, and the spans shall be as short as possible.

42. Where an aerial line crosses or is in proximity to any metallic substance, precautions shall be taken by the licensee against the possibility of the line coming into contact with the metallic substance by breakage or otherwise.

43. Where telegraph or telephone wires are crossed either over or under by the low-pressure electric-light wires, there shall be a distance of at least 2 ft. between the telephone and the electric-light wires, and the former shall, if deemed necessary, be insulated throughout the whole length of the span intersected, and when the crossing is at a telegraph or telephone pole the spans on each side of the pole shall be insulated by the licensee, if required by the Minister of Telegraphs. The low-pressure wires shall, where deemed necessary, be rubber-insulated at such crossings either over the whole span or over such portion of it as will ensure that uninsulated portions of the telegraph or telephone and of the low-tension electric-light wires shall not come into contact with each other. In cases where it may be deemed not necessary to insulate both classes of wires, either the telegraph and telephone or the electric-light wires shall be insulated as may be considered most suitable by the Minister of Telegraphs. Where it may be required to cross through telegraph or telephone wires with low-tension distribution-wires, the latter shall be affixed to porcelain insulators mounted on iron brackets suitably attached to the arms on each side of the line being passed through, and then taken through bell-mouthed iron pipes secured to the arms. The iron pipe and brackets shall be efficiently earthed. The low-pressure wires shall be insulated with vulcanized rubber of 600-megohms-per-mile grade, and the insulation shall extend as is indicated in the preceding part of this clause. The cost of insulating the telegraph and telephone wires shall be borne by the licensee.

Due notice in writing shall be given to the Telegraph Engineer of the district or his deputy of all works involving the crossing or intersection of telegraph or telephone wires.

No attempt shall be made to utilize telegraph or telephone poles as supports for low tension wires until the consent of the Telegraph Engineer of the district or his deputy shall first have been obtained, and such applications shall be confined strictly to those cases where no other practicable means of overcoming the difficulty are available.

44. Efficient guard-wires or other suitable protection shall, if required by the Minister of Telegraphs, be erected in a manner to meet with the approval of the said Minister at all crossings and places where either transmission or distribution electric-lighting wires intersect telegraph or telephone wires. The licensee shall bear the expense of such guard-wires or other protective devices in all cases where an electric-lighting wire intersects a telegraph or telephone wire previously existing.

45. Every aerial line, including its supports, its conductors, and their insulating covering, and all the structural parts and electrical appliances and devices belonging to or connected with the line shall be duly and efficiently supervised and maintained by the licensee as regards both electrical and mechanical conditions.

46. An aerial line shall be removed so soon as it has ceased to be used for the transmission of electricity, unless the licensee intends within a reasonable time again to take it into use.

47. All metal pipes or coverings containing any electric line or wire shall be efficiently connected with earth, and shall be so jointed as to make good electrical connection throughout their whole length.

48. The licensee shall be responsible for all electric lines, fittings, and apparatus belonging to him, or under his control

which may be upon a consumer's premises, being maintained in a safe condition and in all respects fit for supplying energy.

49. In delivering the energy to a consumer's terminals the licensee shall exercise all due precautions so as to avoid risk of causing fire on the premises.

50. The maximum working-current in any conductor shall not exceed 1,000 amperes per square inch of section.

51. All electric lines and apparatus on a consumer's premises, excepting such parts as are required to be connected to earth, shall be highly insulated, and be suitable for the voltage at which supply is being given. They shall be thoroughly protected against injury to the insulation and against the access of moisture, and any metal forming part of the electric circuit shall not, unless efficiently connected with earth, be exposed so that it can be touched. All electric lines shall be so fixed and protected as to prevent the possibility of electrical discharge to any adjacent metallic substance.

52. The licensee shall fix, where the service mains terminate on any premises, double-pole well-protected fuses of at least 2 in. clear break. The consumer shall also place, as near to the entrance-fuses as may be practicable, double-pole main switches of ample carrying-capacity, well insulated, with quick break of sufficient clearance to prevent arcing.

53. The wiring shall be done from distributing-boards, which shall be of incombustible material. Suitable fuses on each pole fitted to engage in spring clips shall be placed on these boards, so that it shall be possible to disconnect any or all circuits from the supply. If double-pole switches are used on the distributing-board circuits, fuses need not then be of the type to engage in spring clips.

54. The covers of fuses, switches, and plugs should be of efficient porcelain or other incombustible non-conducting material, or of rigid metal lined with vitreous enamel or such-like substance. All metal parts liable to be touched must be effectively insulated from the electrical circuit.

55. There must be an approved porcelain bridge or other efficient insulation between the terminals of lamp-holders, and where lamp-holders are liable to be handled by persons making good earth contact they shall be provided with non-conducting covers. Not more than three amperes shall be controlled by each sub-switch.

56. The insulation of conductors used for interior wiring shall be of vulcanized rubber of not less than 600-megohms-per-mile grade, or of other approved material suitably protected. Concentric conductors may be used, and their insulation resistance shall not be less than that required for separate conductors.

57. All arc lamps shall be so guarded as to prevent pieces of ignited carbon or broken glass falling from them, and shall not be used in situations where there is any danger of the presence of explosive dust or gas.

58. Arc lamps used in any street for public lighting shall be so fixed as not to be in any part at a less height than 10 ft. from the ground.

59. Arc lamps used in any street for private lighting shall be so fixed as not to be in any part at a less height than 8 ft. from the ground, and shall be so screened as to prevent risk of contact with persons.

60. Arc lamps must be insulated from earth and be fixed so that they cannot swing into contact with any substance, metallic or otherwise, that might connect them to earth. Resistances for the regulation of arc lamps, if exterior to the lamp, shall be mounted on incombustible bases, shall be so placed that they cannot by conduction or radiation set fire to any contiguous materials, and shall be of ample size to safely carry the maximum current that will normally flow through them. Each arc-lamp circuit shall be provided with a fuse on each pole. Interior arc lamps shall also be provided with a switch on each circuit.

61. The frame of all motors shall be connected to an efficient earth by a copper conductor, which shall not be less than 0.023 square inches in sectional area. All metal casings of switches, resistances, fuses, cables, and wires shall be efficiently earthed in a similar manner.

62. Every motor must be controlled by an efficient double-pole quick-break switch, suitable to prevent arcing, and conveniently placed so that the person in charge of the motor can cut off wholly the supply from the motor, and all devices in connection therewith.

63. Efficient fuses or other automatic cut-out must be provided to efficiently protect the conductors on each pole from excess of current.

64. Every precaution shall be taken in choosing positions for and in the wiring and setting-up of motors, and the necessary devices in connection therewith, so that there shall be no danger of fire being caused by their normal or abnormal action, or of shock being sustained in the ordinary handling thereof.

65. Terminals of motors supplied must be so guarded that they cannot be accidentally touched or short-circuited.

66. The insulation resistance of each motor-circuit, including all devices necessary for the working of the motor, shall be not less than 1 megohm to earth when all metal parts that are required to be connected to earth are so connected.

67. A printed notice shall be fixed in a conspicuous position at every motor and switchboard forbidding unauthorized persons to touch the motors or apparatus.

68. The licensee shall not connect the wires and fittings on a consumer's premises with its mains, or, in the case of premises already connected, continue the supply from its mains, unless it is reasonably satisfied that the requirements of this license, so far as applicable, are being complied with, that the wiring and fittings are suitable for the voltage at which supply is being given, and that the connection or continuance of supply would not cause a leakage from those wires and fittings exceeding one ten-thousandth part of the maximum supply current to the premises; and where the licensee declines to make such connection or to continue supply it shall serve upon the consumer a notice stating its reasons for so declining.

69. If the licensee is reasonably satisfied, after making all proper examination by testing or otherwise, that the wiring and fittings are not suitable for the voltage being employed, that a leakage exists at some part of a circuit of such extent as to be a source of danger, and that such leakage does not exist at any part of the circuit belonging to the licensee, or that any other requirements of this license, so far as they apply to the consumer's premises, are not being complied with, then and in such case any officer of the licensee duly authorized by him in writing may, for the purpose of discovering whether the leakage exists at any part of a circuit within or upon any consumer's premises, or whether the wiring is suitable and the general requirements of this license are complied with, by notice require the consumer, at some reasonable time after the service of the notice, to permit him to inspect and test the wires and fittings belonging to the consumer and forming part of the circuit.

If on such testing and inspection the officer discovers a leakage from the consumer's wires exceeding one ten-thousandth part of the maximum supply current to the premises, or that the requirements of this license are not properly conformed to, or if the consumer does not give all due facilities for inspection and testing, the licensee shall forthwith discontinue the supply of energy to the premises in question, giving immediate notice of the discontinuance to the consumer, and shall not recommence the supply until he is reasonably satisfied that the cause of leakage has been remedied and that the installation is in conformity with these conditions.

70. If any consumer is dissatisfied with the action of the licensee in refusing to give, or in discontinuing, or in not recommencing the supply of energy to his premises, the wires and fittings of that consumer may, on his application to the Minister, and on payment of the cost of such inspection, be inspected and be tested for the existence of leakage by the Inspecting Engineer.

This provision shall be indorsed on every notice given under the provisions of either of the two last preceding clauses hereof.

71. From the time when the licensee commences to supply energy through any distributing-main, and during the continuance of this license, he shall maintain during such portion of each day as he from time to time determines, sufficient power for the use of all the consumers for the time being entitled to be supplied from such main; provided that, for any purposes connected with the efficient working of the undertaking, the Minister may give permission to the licensee to discontinue the supply at such intervals and for such periods as he thinks expedient. When the supply is so discontinued, public notice shall be given, when practicable, of such discontinuance, and of the probable duration thereof.

72. The variation of pressure at any consumer's terminals shall not under any conditions exceed 4 per cent. above or below the normal pressure at which he is being supplied.

73. The licensee shall not use the said electric lines, or permit the same to be used, for any purpose until the Minister has given him notice in writing that he has received from the Inspecting Engineer a certificate that the works hereby authorized have been satisfactorily carried out.

74. The Minister may at any time order an inspection to be made of the lines and wires of the licensee. If any defect is found to exist it must be remedied forthwith; and if serious in the opinion of the Inspecting Engineer the Minister may, on receipt of the report, direct the licensee to at once cease transmitting energy either over the whole of the lines and wires, or over any part thereof, as to him may seem fit, until such defect is repaired or remedied. The cost of such inspections shall be borne by the licensee.

75. After the supply of energy has begun, not less than fourteen days' notice in writing shall be given to the Resi-

dent Engineer of Public Works at Nelson, or such other officer as the Minister from time to time directs, of each further extension that the licensee is about to make.

76. The licensee shall, upon receipt of an application from the occupier of any premises within 60 ft. of any of the licensee's public supply lines, furnish such premises with electric energy upon the same terms and conditions on which any other consumer is entitled under similar circumstances to a corresponding supply.

77. The licensee shall, before erection or construction of any part of the work hereby authorized is begun, submit for the approval of the Minister such plans and other information showing and describing such work as he may require.

78. The charge to be made by the licensee for the sale or supply of electricity in pursuance of this license shall not exceed 9d. per unit.

79. Subject to the general provisions of this Order, and subject to such conditions as the Minister thinks fit to impose, the licensee may, with the previous consent in writing of the Minister, after plans have been approved by him, from time to time, and at any time or times, extend or alter the work within a radius of six miles from the power-house hereinafter referred to, shown on the plan marked P.W.D. 32806 hereby authorized.

80. Notwithstanding anything hereinbefore contained, the licensee shall not be entitled to erect, maintain, or use any electric line within the Richmond Borough or the Waimea County except subject to such conditions, not inconsistent with the provisions of this license, as may from time to time be agreed on between the licensee and the Richmond Borough Council, and between the licensee and the Waimea County Council.

RECOMMENDATION.

*Hours of Work.*

1. THE hours of work shall be forty-eight in each week. On Saturday in each week the hours of work shall expire not later than 1 p.m., except in districts where the statutory half-holiday is on any other day in the week, when the hours of work shall expire not later than 1 p.m. on that day. All time worked beyond the hours mentioned in this clause shall be considered overtime, and shall be paid for at the rate of time and a quarter for the first three hours, and time and a half after, and double time after midnight until the ordinary hour of starting work. Any time lost through the worker's own default shall be made up before overtime rates are paid.

*Classes of Workers.*

2. Only four classes of workers shall be recognized or employed—viz., journeymen (which expression shall include journeymen and journeywomen), apprentices, female stitchers, and female machinists. Female stitchers shall be employed only in the bridle-cutting and saddle-making branches, and female machinists only in the bagmaking and legging branches. Female machinists may be employed to paste the strawboard for portmanteau and gladstone bags, and to do other work in the bag and legging branches.

*Wages.*

3. Every journeyman working at any branch of the trade shall be paid not less than 1s. 2d. per hour.

All wages shall be paid weekly, and one week's notice to be given on either side.

*Under-rate Workers.*

4. Any worker who considers himself incapable of earning the minimum wage prescribed by clause 3 hereof may be paid such wage as from time to time be agreed upon in writing between the employer and the secretary or president of the union, and in default of such agreement within twenty-four hours after such workman shall have applied in writing to the secretary of the union stating his desire that such wage shall be agreed upon, as shall be fixed by the Inspector of Awards upon the application of such worker: Provided that in every case of reference to the Inspector of Awards the workman making such application shall give twenty-four hours' notice in writing to the secretary of the union. Any workman whose wage shall have been fixed as in manner provided by this clause may work and be employed by such employer for such less rate of wages for a period not exceeding six calendar months thereafter. It shall be the duty of any employer who employs an under-rate worker to inspect the permit or agreement.

*Apprentices.*

5. (a.) Any employer taking an apprentice to learn the trade shall be deemed to undertake the duties which he agrees to perform as a duty enforceable under this award, and shall pay such apprentice not less than the undermentioned rate of wages: For the first year, 8s. per week; for the second year, 12s. per week; for the third year, 16s. per week; for the fourth year, £1 1s. per week; for the fifth year, £1 10s. per week.

(b.) The period of apprenticeship shall be five years, but three months' probation shall be allowed the first employer of any apprentice to determine his fitness; such three months shall be included in the period of apprenticeship.

(c.) At the end of the period of apprenticeship the employer shall give the apprentice a certificate to show that he has served his apprenticeship. Should the employer at any time before the termination of the apprenticeship wish for any reason to dispense with the services of the apprentice he shall give him a certificate for the time served, and procure him another employer carrying on business within a reasonable distance of the original employer's place of business, who will continue to teach the apprentice, to pay him the wages prescribed by this award according to the total length of time he has served, and generally to perform the obligation of the original employer: Provided that it shall not be obligatory on an employer to find the apprentice another employer if he shall so misconduct himself as to entitle the employer to discharge him, but he shall give him a certificate for the time actually served.

(d.) An employer taking an apprentice shall give notice thereof, and of the name of the apprentice, to the Inspector of Factories within one week after the expiration of the period of probation; and an employer transferring an apprentice to another employer shall similarly within one week thereof give notice of such transfer to the Inspector of Factories, who, if requested to do so by the secretary of the local union, shall furnish such secretary with the information supplied by the employer regarding any particular apprentice or apprentices.

(e.) An employer shall not be deemed to discharge his duty towards his apprentice if he fails to keep him at work owing to slackness of business, but such slackness of business may form a proper ground for transferring him to a master willing to undertake the responsibility of teaching him.

(f.) When an apprentice is discharged for cause the employer shall send notices of the discharge and the cause thereof to the Inspector of Factories.

(g.) An apprentice after serving his apprenticeship may be employed as an improver for a period of six months at a wage of not less than £1 15s. per week, and for a further period of six months at a wage of not less than £2 5s. per week.

*Proportion of Apprentices.*

Bag and trunk makers are to have one apprentice, male or female, to each journeyman. Where there is only one apprentice kept and he has served four years, an additional apprentice may be taken on, so as to enable the former to have a better opportunity of learning the trade.

7. For the purpose of determining the proportion of apprentices and female stitchers to journeymen, in taking any new apprentices or female stitcher the calculation shall be based on a two-thirds full-time payment of competent journeymen employed during the previous three calendar months.

*Female Stitchers.*

8. All female stitchers employed shall be paid a weekly wage: For the first year, 7s. 6d. per week; for the second year, 12s. 6d. per week; for the third year, 17s. 6d. per week; for the fourth year, £1 5s. per week; for the first six months of the fifth year, £1 10s. per week; and thereafter not less than £1 15s. per week.

*Female Machinists.*

9. All female machinists employed in the bag and legging making shall be paid a weekly wage: Not less than 8s. per week for the first year, 12s. per week for the second year, 16s. per week for the third year, £1 per week for the fourth year, £1 5s. per week for the fifth year, and after the fifth year not less than £1 10s. per week.

*Holidays.*

10. (a.) The following days shall be recognized as holidays in all branches of the trade: New Year's Day, 2nd January, Good Friday, Easter Monday, birthday of the reigning Sovereign, Boxing Day, Christmas Day, and Labour Day.

(b.) Any work done on any of these days or on Sunday shall be paid for at the rate of double time.

*Factory Workshops.*

11. All work shall be performed in the factory or workshops, and no worker shall do work of any description at the trade for the purpose of trade after leaving the employer's place of business, provided such worker be fully employed, except when permits to work at home are granted to workers who are physically unfit to attend at their employer's place of business.

*Preference.*

12. If any employer shall hereafter engage any worker who shall not be a member of the union, and who within two weeks after his engagement shall not become a member of the union and remain such member, the employer shall dismiss such worker from his service if requested to do so by the union, provided there is then a member equally qualified to perform the particular work required to be done, and ready and willing to undertake the same.

13. The provisions of the foregoing clause shall operate only if and so long as the rules of the union shall permit any journeyman of good character and sober habits to become a member of the union upon payment of an entrance fee not exceeding 5s., upon a written application, without ballot or other election, and to continue a member upon payment of subsequent contributions not exceeding 6d. per week.

SUMMARY FOR MAY.

Atmospheric conditions were very unsettled until the 23rd of May. During this time barometric pressure was continuously below normal, and cold and boisterous weather prevailed generally. The Bay of Plenty and most parts of the Nelson Province experienced somewhat milder conditions, being less exposed to the cold southerly winds. Anticyclonic conditions prevailed towards the close of the month, and the usual accompanying fine weather with cold and frosty nights were experienced.

Stormy weather was experienced in most parts on the 1st and 11th, and over the South Island generally on the 20th and 21st, when the barometer recorded the very low reading of 28-48 inches at the Bluff, which is only one-hundredth above the lowest ever recorded in the Dominion at mean sea-level.

A cyclonic centre existed off East Cape between the 1st and 4th, and a cyclone passed in sub-antarctic latitudes on the 10th, while another passed through Cook Strait on the 11th. These were the chief causes of the unsettled weather prevailing about these dates. The total rainfall during the month, however, was not excessive, except in the southern portion of the North Island and parts of the east coast and southern districts of the South Island.
