LIVERPOOL, Governor.

ORDER IN COUNCIL.

At the Government House, at Wellington, this twenty-fifth day of August, 1913.

Present :

HIS EXCELLENCY THE GOVERNOR IN COUNCIL.

IN pursuance and exercise of the power and authority conferred upon him by section six of the Fisheries Amendment Act, 1912 (hereinafter referred to as "the said Act"), and of all other powers and authorities enabling him in that behalf, His Excellency the Governor of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby make the following regulations for the purposes of the said Act.

REGULATIONS.

Licenses for Whaling-vessels.

1. THE forms to be used in respect of the licensing of vessels engaged in whaling shall be those set forth in the First Schedule hereto.

2. The registered tonnage of whaling-vessels not registered under the Imperial Merchant Shipping Act or the Shipping and Seamen Act, 1908, shall, for the purposes of the said Act, be determined as follows :—

$$\frac{L \times B \times D \times 0.45}{100} = \text{approximate tonnage under deck.}$$

L = Length : Measure the length from fore part of head of stem to after part of head of stern-post, or after part of transom or tuck in case of a transom or tuck stern without post on same at upper part.

B = Breadth : Measure extreme breadth of boat outside.

D = Depth : Measure depth amidships.

In the case of decked vessels the measurement shall be from the under side of deck to the upper side of floor-timbers at side of keelson, deducting thickness of ceiling. If this depth cannot be taken owing to fixed ballast, measure depth down the pump-well and deduct 1 in. per foot from same on account of depth of floors and thickness of ceiling.

In the case of a break or breaks above the line of deck, multiply together the length, breadth, and height of the space or spaces, divide each product by 100, and add to the tonnage under deck. All measurements are to be taken in feet and tenths of a foot. From the tonnage so ascertained a deduction of 25 per cent. is to be made for engine-space in the case of vessels propelled by steam or other mechanical power than steam.

3. The Collector of Customs at each port shall, immediately after the 31st day of December in each year, forward to the Marine Department a list of whaling-vessels to which licenses have been issued during the year.

4. Within one month after the end of December in any year the master or owner of every licensed whaling-vessel shall furnish to the Collector of Customs at the port at which the vessel's license was issued a return, in the form prescribed in the Second Schedule hereto, of all whales taken by that vessel during that year. A printed form for the purpose will be supplied by the Collector with the license for the year. The Collector may withhold the renewal of the license for the following year until such return is supplied.

Floating Whale-factories.

5. Every license issued by the Collector of Customs for the establishment and use of a floating whale-factory shall be in the form prescribed in the Third Schedule hereto. Every application for such license shall be in the form prescribed in the said Third Schedule.

Occupation of Foreshore.

6. Every person licensed to use or occupy any part of any foreshore or other Crown land adjacent thereto as a site for

a shore factory shall take all reasonable precautions, to the satisfaction of the Minister or of any person appointed by the Minister for that purpose, to prevent any nuisance arising from the drying of the blubber or from any other operation of such factory. A breach of this regulation will render the licensee liable to the cancellation of his license.

On the terrace above the river-flat there are large clumps of young totara-trees, affording good shelter for stock. The Waihi Stream, inclined to be gorgy, runs through the eastern corner adjacent to the road. About 30 per cent. ploughable. Distant from Norsewood about four miles, and from Takapau five miles and a half.

Section 202, Block V.—This section has a frontage of 50 chains to the Manawatu River, and about 15 chains on the north-east corner to proposed new road. The east boundary is fenced for about 40 chains. The soil is light and shingly, and the frontage is somewhat broken on the Waihi Stream. The river-flat consists of about 50 acres, which carries a very good sole of grass. There is heavy scrub along the Waihi Stream, over which a crossing could be made without much expense. Distant from Takapau about five miles and a half, and from Norsewood four miles.

GENERAL DESCRIPTION.

The block is situated between Norsewood and Takapau Township and Railway-station. Norsewood is distant a mile and three-quarters from the south-west boundary, and Takapau lies about two miles from the north-eastern corner. Access to both is by good metalled dray-roads. At the present time Norsewood is the centre of a thriving dairying industry. Some of the sections are well watered, but in some cases water will have to be obtained by sinking. The country was originally covered with more or less heavy milling-timber, which has been cut out, and the land is now carrying native and exotic grasses. A considerable area recently swept by bush-fires has been resown in English grasses. The altitude above sea-level ranges from 800 ft. to 900 ft. The country generally is level and undulating, with good loamy soil mixed with shingle, on a clay subsoil.

SUMMARY FOR JULY.

Owing to the predominance of moderate westerly winds the east coast districts between East Cape and Oamaru were favoured with exceptionally fair weather and a rainfall considerably below the average. The vicinity of Cook Strait also returned a remarkably low rainfall, and besides experienced very fair and mild conditions, which were most favourable to early vegetable growth. The Wanganui District was the only portion of the North Island where an excess of the normal rainfall occurred, but in the South Island the whole of the west coast and southern districts suffered in this respect, and were subject to unsettled weather.

There were no serious atmospheric disturbances during the month, the westerly low-pressure area ruling between the 19th and 23rd having the most effect on weather conditions. At this time many parts of the country recorded moderately heavy rains.

Meteorological Office Wellington, 27th August, 1913.

* These remaining suburbs do not lie within borough boundaries, and particulars respecting them have not been obtained for the Vital Statistics. Closely correct annual statements of population outside boroughs are not obtainable.

In the above table are given the deaths and death-rates for each of the four cities, for the suburban boroughs severally, and for each city with its suburban towns.

Deaths occurring at hospitals, of persons not residents of the borough wherein the hospital is situated, have been allotted in each case to the borough where the disease was contracted, and not to that in which the death actually took place.

The inclusion of the suburban boroughs tends to lower the rate at Wellington and Dunedin, but raises it at Auckland.

	Death-rates per 1,000 of Population.	
Auckland City	0.90	
and seven suburban boroughs		1.00
Wellington City	0.86	
and four suburban boroughs		0.85
Christchurch City	0.96	
and five suburban boroughs		0.96
Dunedin City	1.08	
and five suburban boroughs		1.05

Including the suburbs, the rate at Dunedin is the highest, and at Wellington the lowest.

Compared with July, 1912, the results are,—

	1912.	1913.
Auckland and suburbs	0.73	1.00
Wellington and suburbs	1.08	0.85
Christchurch and suburbs	1.14	0.96
Dunedin and suburbs	0.90	1.05

The total births in the four chief cities and their suburban boroughs amounted to 577, against 570 in June—an increase of 7. The deaths in July were 283—an increase of 41 as compared with last month. Of the total deaths, males contributed 141, females 142. Fifty-seven of the deaths were of children under five years of age, being 20.14 per cent. of the whole number; 40 of these were under one year of age.

There were 124 deaths of persons of 65 years and upwards in the four chief cities and their suburban boroughs, as against 92 in June. The following table shows the classification:—

SCHOOL FOR THE DEAF, NEAR SUMNER, CHRISTCHURCH.

UNDER THE CONTROL AND SUPERVISION OF THE EDUCATION DEPARTMENT.

Director: MR. J. E. STEVENS.

FOR Deaf Children of sound intellect. The pupils are taught to understand and use ordinary speech. The full charge for board and education is £40 a year, but less is accepted from parents who cannot afford to pay this amount. In case of necessity admission is free.

By the Education Act it is compulsory for deaf children to come under instruction at the age of six, and to continue until the age of twenty-one unless the Education Department previously grants exemption. Though a child is, as a rule, best fitted to begin the school course at the age of six, advice should be obtained as soon as any sign of deafness is observed.

The following classes of deaf children are admitted to the School for the Deaf (sound intellect being always a necessity):—

1. Children born deaf, or who have lost their hearing before learning to speak.
2. Children who can hear a little, but are too deaf to be taught in a public school.
3. Children who have lost their hearing after having learned to speak.

The Act imposes upon every parent, teacher of a school (either public or private), constable, or officer of a charitable or kindred institution who is aware of the place of residence (either temporary or permanent) of a deaf child, and the householder in whose house any such child resides, an obligation to send notification of the fact to the Minister of Education, giving the name, age, and address of the child; and any neglect or failure to comply with this provision involves liability to a fine.

Information and advice may be obtained from the Director, or from

THE SECRETARY FOR EDUCATION,
Wellington.
