23. Every charge imposed by these by-laws for an extraordinary supply shall be in addition to the charge from time to time made for the ordinary supply.

24. No consumer shall use or permit to be used upon or in connection with his premises for purposes defined as extraordinary supply any water supplied as and for ordinary supply.

25. The Board may by ordinary resolution from time to time vary or alter, increase or reduce, the water rates and charges payable under and by virtue of these by-laws.

26. The provisions of the Municipal Corporations Act, 1908, in relation to water-supply rates and waterworks shall, where not inconsistent herewith, be read with and be deemed to be embodied and implied in these by-laws.

34. In addition to the stop-cock at the junction of the main in each service, a second stop-cock shall be placed in a strong box at and outside of the boundary of the property supplied, at the expense of the consumer.

35. In no case will the use of instantaneous closing taps, valves, or cocks be permitted. Galvanized-iron piping of an approved quality only will be allowed for external services, and of the requisite sizes suitable to the requirements of the tenements, as shall be determined by the Engineer or other officer appointed by the Board.

36. No direct connection shall be made with any steam boiler or water-engine except by special consent of the Board, nor under any circumstances shall any connection be made whereby any water may be conveyed from any pipe to any water-closet.

Waste of Water.

39. No person shall cause or permit or wilfully or negligently allow any waste, or permit any unnecessary use of the water to take place, either by allowing any cistern or other vessel to overflow, or the water to run from any tap, cock, valve, pipe, work, or engine, or in any other manner cause or permit waste of water.

DISTRIBUTION OF METEOROLOGICAL INFORMATION BY RADIO SERVICE.

It is announced by the U.S. Weather Bureau that beginning 15th July, 1913, a daily weather bulletin will be distributed broadcast by the naval radio stations at Radio, Va., and Key West, Fla., a few minutes after 10 p.m. each day. The broadcast distribution will be exclusively by the naval radio stations above named, but all other naval radio stations will continue to distribute meteorological information and forecasts as at present.

The daily bulletin will consist of two parts. The first part will contain code letters and figures which will express the actual weather conditions at 8 p.m., 75th meridian time, on the day of distribution at certain points along the eastern coast of North America, one point along the coast of the Gulf of Mexico, and one point at Bermuda. The second part of the bulletin will contain a special forecast of the probable winds to be experienced a hundred miles or so offshore, made by the U.S. Weather Bureau for distribution to shipmasters by naval radio as above. The second part of the bulletin will also contain warnings of severe storms along the coast as occasion may arise.

The points for which weather conditions will be furnished will be designated respectively by their initial letter, except in the case of Nantucket, for which the letter T will be used; accordingly, S = Sydney, T = Nantucket, A = Atlantic City, H = Hatteras, C = Charleston, K = Key West, P = Pensacola, and B = Bermuda.

The bulletin will begin with the letters USWB for U.S. Weather Bureau, and the weather conditions will follow. The first three figures of a report will represent the barometric pressure in inches (0.02=30.02); the next figure, the fourth in sequence, will represent the direction of the wind to eight points of the compass: 1 = north, 2 = north-east, 3 = east, 4 = south-east, 5 = south, 6 = south-west, 7 = west, 8 = north-west, 0 = calm. The fifth figure will represent the force of the wind on the Beaufort scale.

Beaufort Scale of Wind Force.

Number and Designation.	Statute Miles per Hour.	Nautical Miles per Hour.
0—Calm	0 to 3	0 to 2.6
1—Light air	8	6.9
2—Light breeze	13	11.3
3—Gentle breeze	18	15.6
4—Moderate breeze	23	20.0
5—Fresh breeze	28	24.3
6—Strong breeze	34	29.5
7—Moderate gale	40	34.7
8—Fresh gale	48	41.6
9—Strong gale	56	48.6
10—Whole gale	65	56.4
11—Storm	75	65.1
12—Hurricane	90 and over.	78.1 and over.

In order to simplify the code no provision has been made for wind-force greater than 9, strong gale on the Beaufort scale. Whenever winds of force greater than 9 occur the number representing them will be given in words instead of figures, thus : Ten, eleven, &c.

The entire group of stations will be transmitted from Radio, Va., but the group transmitted from Key West will not for the present contain Sydney. If the weather conditions from any station cannot be supplied, the initial of the station will be given followed by the word "missing," and if any portion of the report cannot be furnished, such portion will be replaced by an equivalent number of letters, x.

Example of Code.

The forecasts and warnings will be in ordinary language, and will cover a period of 48 hours from time of issue. At the end of the forecasts a statement will be made in reference to the location and movement of any barometric depression that may be likely to affect the winds over the ocean.

CHANGES IN RADIO RATES APPLICABLE TO U.S. NAVAL RADIO STATIONS OPENED TO PUBLIC BUSINESS.

The Superintendent, U.S. Naval Radio Service, furnishes the following information :—

Beginning 1st August, 1913, the shore station rate of all Naval coast stations opened to public business, with the exception of stations in Alaska and Guam, is, for plain ship to shore work, or *vice versa*, 6 cents per word, cable count, with a minimum charge for a radiogram of 10 words.

The stations North Head (Washington) and Eureka (California) have the same rate of 6 cents per word for plain ship to shore or shore to ship work, but retain their present rates on messages to and from Alaskan stations or waters.

The ship rate on all messages destined for Naval vessels at sea is 4 cents per word, thus making a flat rate of 10 cents per word, cable count, with a minimum charge for a radiogram of 10 words, on all radiograms through Naval coast stations opened to public business and destined for Naval vessels at sea.

The Naval coast stations opened to public business are—

Balboa, Panama, Canal Zone.	North Head, Wash.
Cape Blanco, Oreg.	Pensacola, Fla.
Charleston, S.C.	Point Arguello, Cal.
Colon, Canal Zone.	St. Augustine, Fla.
Cordova, Alaska.	St. George, Alaska.
Dutch Harbour, Alaska.	St. Paul, Alaska.
Eureka, Cal.	San Juan, P.R.
Guam.	San Diego, Cal.
Guantanamo Bay, Cuba.	Sitka, Alaska.
Jupiter, Fla.	Tatoosh, Wash.
Key West, Fla.	Unalga, Alaska.
Kodiak, Alaska.	

All vessels of the U.S. Navy fitted with radio installations are opened to public business for the benefit of their officers and crews. These include practically every vessel of the Navy that goes to sea.

SOUTH AMERICAN RADIO STATIONS.

Following are some of the South American radio stations under governmental control and open to the public :—

Name of Station.	Call Letter.	Kilowatt.	Wave-length.	Range by Day.
Babylonia	B Y N	2	Meters. 600	Miles. 50

Bahia Blanca	W P M
Darsena Norte	W B A	5	500	About 250

The stations of Darsena Norte and Mar Del Plata will accept commercial messages if positively necessary, but they do not like to do so. The W B A station is efficient. The proper station to call for commercial work is M B L at the city of Buenos Aires.

All the stations of Brazil come directly under the supervision of the Government, but are placed there for commercial work.

Ships coming from north can work Trinidad (N P G), 300 miles by day. Ships leaving Barbadoes can work Tobago (T O G), 300 miles by day. The Tobago Station is not open after 6 p.m. The radio stations at Para and at Manaus do not accept business. The station at Pernambuco (O L D) works 250 or 300 miles by day. The station at Bahia works 300 miles by day. The station at Babylonia (B Y N) can work about 60 miles north. Ships bound south absolutely cannot work with Babylonia until past Cape Frio. The station at Demerara, British Guiana, is open from 8 a.m. to 12 m. and from 2 p.m. to 5 p.m. This station is good for 300 miles in the daytime.

GENERAL DESCRIPTION.

The Ohauti Settlement, formerly the property of Messrs Revell and Rowe, is situated near the Town of Tauranga, in the Bay of Plenty, the nearest portion of the property being seven miles from Tauranga Post-office. Tauranga may be reached either by steamer from Auckland direct or by rail and road via Rotorua or Waihi. A branch road from the main Rotorua-Tauranga Road runs through the estate, and is known as the Ohauti-Tauranga Road.

The land on the settlement lends itself to close cultivation, as a rule, and is of fair to good quality, comprising terraces, easy slopes, and flats, the latter being very suitable for such crops as turnips, oats, and maize. The climate being mild, cattle do well, and there are large and regular stock sales both at Tauranga and Te Puke. Each of the sections has a considerable area of grass fit for immediate stocking. The settlement is throughout well watered by streams running into the Waimapu River, and also by springs.

The sections at the southern end of the estate are within two miles of the Oropi sawmill, and ample areas of bush are at hand for fencing and other purposes.
