* These remaining suburbs do not lie within borough boundaries, and particulars respecting them have not been obtained for the Vital Statistics. Closely correct annual statements of population outside boroughs are not obtainable.

In the above table are given the deaths and death-rates for each of the four cities, for the suburban boroughs severally and for each city with its suburban towns.

Deaths occurring at hospitals, of persons not residents of the borough wherein the hospital is situated, have been allotted in each case to the borough where the disease was contracted, and not to that in which the death actually took place.

The inclusion of the suburban boroughs tends to lower the rate at Auckland, Wellington, and Christchurch, but raise it at Dunedin.

	Death-rates per 1,000 of Population.	
Auckland City	0.83	
and seven suburban boroughs		0.79
Wellington City	0.89	
and four suburban boroughs		0.88
Christchurch City	0.64	
and five suburban boroughs		0.61
Dunedin City	0.75	
and five suburban boroughs		0.76

Including the suburbs, the rate at Wellington is the highest, and at Christchurch the lowest.

Compared with February, 1913, the results are,—

Auckland and suburbs	1913.	1914.
Wellington and suburbs	0.89	0.79
Christchurch and suburbs	0.78	0.88
Dunedin and suburbs	0.80	0.61
	1.04	0.76

The total births in the four chief cities and their suburban boroughs amounted to 575, against 624 in January—a decrease of 49. The deaths in February were 233—an increase of 19 as compared with the previous month. Of the total deaths males contributed 123, females 110. Fifty-three of the deaths were of children under five years of age, being 22.75 per cent. of the whole number; 43 of these were under one year of age.

There were 75 deaths of persons of 65 years and upwards in the four chief cities and their suburban boroughs, as against 55 in January. The following table shows the classification:—

Weighted with £1 10s., valuation for improvements, consisting of bushfelling.

The land, although steep and broken in places, would afford good grazing after being cleared. It contains a good deal of heavy bush, and also a fair proportion that would not be difficult to clear. The road leading to the section has been formed and partly metalled as far as the eastern boundary of Section 16, and from there to the south-west corner of Section 36 it has been felled and logged up. Distant about two miles from Kahuika School and Post-office, and about three miles from Puketiro Railway-siding.

Full particulars may be ascertained and plans obtained at this office.
