Electric energy shall be generated in the form of three-phase currents at a frequency of 50 cycles per second and a pressure of 2,400 volts between phases. This shall be transformed up to 35,000 volts between phases for transmission to the main sub-stations, and there transformed down to 3,300 volts for primary distribution. In the secondary sub-stations or in pole transformers it shall be transformed down to 400 volts between phases, and 230 volts between each phase and the neutral for low-tension supply, and converted to direct current at 500 to 600 volts for tramway and power supply. Single-phase constant-current series circuits up to a pressure of 3,300 volts may also be used for outside lighting.

3. Capacity of Apparatus, &c.

All apparatus and conductors for all pressures shall be sufficient in size and power for the work they are called upon to do, and so constructed, installed, protected, worked, and maintained as to prevent danger so far as is reasonably practicable.

The neutral point of each secondary distributing system shall be earthed at one point and one point only. The earth shall not be utilized as the return for any low-pressure circuits.

5. Regulation of Pressure.

The pressure shall be maintained within 4 per cent. on lighting-distributing circuits above or below the declared pressure at the consumers' terminals. The said Council shall supply suitable recording voltmeters for this service, and on complaint by any consumer that the variations in voltage exceed these limits, or on the instructions of the Inspecting Engineer, the said Council shall connect a recording voltmeter to record the pressure between the lines at their entrance to the consumers' premises and shall supply to the Inspecting Engineer a chart showing the variations in voltage between the lines at this point for a period of seven consecutive days. If the variations thus recorded exceed the above limits the said Council shall take immediate steps to comply with this regulation. If after thirty days a similar chart shows that the above limits of variation in voltage are not complied with, a breach of this license shall be deemed to have been committed. If the accuracy of the said Council's recording voltmeter is questioned by the consumer a standard instrument shall be supplied by the Inspecting Engineer, the reading of which shall be accepted as final.

6. Switchboard.

All switchboards shall be made of and mounted on material that is not inflammable, and no switchboard conductor shall carry electric current at a density exceeding 1,000 amperes per square inch. No conductor at a pressure above 600 volts shall be exposed on the front of any switchboard, and the back of any switchboard carrying exposed conductors at a pressure over 600 volts shall be screened off and accessible only to authorized persons.

All power-house and sub-station switchboards shall be provided with two efficient and independent earth connections connected in parallel, to one of which all frames, instrument-cases, and other metal parts shall be connected. Tests of the efficiency of the earth connection shall be made at least once a month and recorded.

7. Circuit-breakers.

All outgoing feeders and distributors from any transformer-house or sub-station shall be provided with automatic circuit-breakers or fuses set to open at 50 per cent. excess current over the rated full load of such feeder or distributor.

8. Overhead Electric Lines.

Overhead electric lines shall consist of conductors of stranded hard-drawn copper, aluminium, and other material of not less than 0.0129 square inch section, provided that service wires of short span of 100 ft. or less shall be not less than 0.0072 square inch in section.

The stress in overhead conductors shall not exceed 25,000 lb. per square inch for copper and 12,000 lb. per square inch for aluminium, 35,000 lb. per square inch for ordinary iron in the extreme case of a temperature of 20 degrees Fahr. and a wind-pressure of 18 lb. per square foot of diametrical plane occurring simultaneously. The span between supports and the sag shall be determined to conform with the above limiting stresses.

No overhead electric lines shall come within 2 ft. of any other aerial wires or cables except where it may be permitted to pass either set of wires between other wires at a pole or support.

Lines at 400 volts shall be insulated throughout with jute braiding impregnated with waterproof compound, provided that where circumstances permit the lines may, with the consent of the Minister, be bare.

Earthed neutrals may in all cases be bare.

Electric lines at 3,300 volts shall be covered with vulcanized rubber of at least 300 megohm grade, provided that where circumstances permit the lines may, with the consent of the Minister, be bare, subject to any special conditions which may be required by the Minister.

Electric lines at 35,000 volts shall be bare.

Where high- and extra high-pressure lines are supported on the same poles or supports both lines shall be bare, and means shall be provided for effectively earthing the high-pressure line in the event of the extra high-pressure line making contact with the high-pressure line.

Low-pressure and extra high-pressure lines shall not be carried on the same poles or supports except with the consent of the Minister.

9. Supports for Overhead Electric Lines.

All overhead electric lines at 400 volts shall be carried at a minimum height of 18 ft. above the ground.

All overhead lines at a pressure of 3,000 volts shall be carried at a minimum height of 20 ft. above the ground.

All overhead lines at a pressure of 35,000 volts shall be carried at a minimum height of 22 ft. above the ground.

All steel poles or supports of extra high-pressure lines shall be effectively earthed.

At road crossings the above minimum heights shall be increased in each case by 2 ft.

At electric tramway crossings all electric lines shall be carried at such a height as to be out of reach of the trolley-pole of the tram-car when in a vertical position.

All aerial wires shall be attached to suitable insulators carried on cross-arms of suitable material and cross-section, and they shall be so attached to the insulators or guarded that they cannot fall away from the support. Conductors covered with insulating material shall be so attached that their insulation shall not be impaired where they are secured to the insulator.

Electric lines may be carried on brackets on buildings provided they are at least 18 ft. from the ground, insulated with 600 megohm grade vulcanized indiarubber, are kept at least one foot clear from the building, and are inaccessible from any window, balcony, parapet, or other portion of the building without the use of a ladder or other special appliance.

Electric lines carried on poles shall be at least 18 ft. from the ground, and not less than 5 ft. measured horizontally nor 7 ft. measured vertically from any part of any building or

erection other than a support for the wire, except where led to transformers or brought into a building for the purpose of supply.

Every support for an aerial line shall be of durable material and properly strengthened against forces due to wind-pressure, change of direction of line, and unequal length of span. The factor of safety of such supports, if carrying 35,000-volt lines only, shall be such that the moment resulting from a wind-pressure of 30 lb. per square foot of plane surface and 18 lb. per square foot of diametrical plane upon a cylindrical surface upon the lines and supports shall not exceed one-half of the applied moment which is sufficient to cripple the support if of iron, steel, or ferro-concrete, and shall not exceed one-fourth of the breaking-stress in the case of wood. The factor of safety of supports carrying distribution-lines shall be four in the case of steel, iron, or ferro-concrete, and five in the case of wood, calculated upon the ultimate strength of material under the same conditions of wind-pressure as hereinbefore mentioned.

The distance between supports carrying distribution-lines shall not exceed 200 ft. except by approval of the Minister.

10. Location of Overhead Lines.

Except by permission of the Minister of Telegraphs, or subject to an agreement between the Post and Telegraph Department and the said Council, all overhead electric-light pole lines shall be placed on the opposite side of the street to that on which any telegraph lines exist, and where the erection of the electric-light wires necessitates the alteration of any existing lines, and such alteration is approved by the Minister of Telegraphs, the expense of the alteration shall be borne by the said Council.

Where electric lines are on one side of the street and electric-telegraph lines on the other, and service is required to be given from either to the other side of the street, the said Council and the Minister of Telegraphs shall give to each other reasonable facilities as far as possible to effect supply.

In running the lines authorized by this license through the streets where no telegraph line exists the said Council shall keep to the one side of the street, and in running wires to the opposite side of the street the said Council shall arrange so as to interfere as little as possible with the route on that side of any future telegraph line.

An aerial line shall not be permitted to remain erected after it has ceased to be used for the supply of energy unless the Council intend within a reasonable time again to take it into use.

Where an aerial line crosses a street the angle between the line and the direction of the street at the place of crossing shall not be less than 60 degrees, and the span shall be as short as possible.

11. Telegraph and Telephone Lines.

Where electric lines are permitted to be supported on telegraph poles all details of the supports and of the insulation shall be approved by the Minister of Telegraphs, who may require such electric lines at any time to be removed from such telegraph poles on reasonable notice and without compensation of any description.

Throughout the whole area of supply the permission to place electric-light and power wires on the Telegraph Department's poles shall be restricted as far as possible, and in no case shall such wires be attached to the Telegraph Department's poles without the approval of the Minister of Telegraphs being first obtained.

At telegraph crossings the electric lines shall pass over or under the telegraph wires as may be decided by the Minister of Telegraphs. At such crossings high-pressure wires, and low-pressure wires over 400 volts, shall be insulated with not less than 600 megohm grade V.I.R., low-pressure wires of 400 volts and under with triple weatherproof covering, and extra high-pressure wires shall be subject to special conditions to be imposed by the Minister of Telegraphs in each case of crossing. Where the electric lines other than extra high-pressure lines cross telegraph wires, or if any telegraph wire is hereafter installed so as to cross the electric lines, and at such other points as may be deemed necessary by the Minister of Telegraphs, approved guard-wires effectively earthed or other protective devices shall be erected. Such guard-wires shall be carried on substantial supports at a height of 2 ft. above the electric lines if the telegraph wires pass over the electric lines, or 2 ft. above the telegraph wires if they pass under the electric lines. In addition to the above precautions telegraph wires may be insulated if deemed necessary by the Minister of Telegraphs.

The cost of all necessary guard-wires and special provisions required to comply with this clause shall be borne by the said Council in all cases where the telegraph wires exist prior to the erection of electric lines.

12. Earth Wires.

Earth wires where led down poles shall be protected with substantial casing for a distance of 8 ft. from the ground.

13. Railway Crossings.

No work of any nature shall be erected or constructed upon, over, or under any part of the New Zealand Government Railways until the said Council has obtained the consent of the Minister of Railways thereto, as required by section 4 of the Government Railways Amendment Act, 1910 (No. 2).

14. Service Connections to Overhead Lines.

Service lines shall be taken from insulators to insulators supported and firmly attached to a pole or to some portion of the consumer's premises which is not accessible to any person without the use of a ladder or other special appliance. Every portion of any service line which is outside a building and accessible therefrom shall be rubber insulated except the neutral.

15. Maintenance.

Every aerial line, including its supports, its conductors, and their insulating covering, and all structural parts and electric appliances and devices belonging to or connected with the line, shall be duly and efficiently maintained as regards both electrical and mechanical conditions. All extra high-pressure main transmission lines shall be patrolled at least tri-weekly, and all trees in their vicinity shall be kept well cut back. The extra high-pressure branch transmission lines shall be patrolled at least bi-weekly.

16. Transformers.

Transformers shall be placed either on poles or in substations. Where transformers are placed on poles they shall be fitted with watertight cases and attached to the poles at such a height as to make them inaccessible except by means of a ladder or other special appliance. Where transformers are placed within substations, the substations shall be inaccessible except to authorized persons. All high-pressure conductors therein shall be thoroughly insulated or protected from accidental contact. A substantial insulating rubber mat or insulated wooden platform and rubber gloves shall be supplied. The cases of all transformers, whether within or without a sub-station, shall be earthed by means of a copper conductor at least 0.022 square inch in section.

17. Lightning-arresters.

Where any portion of any electric line or support for an electric line is exposed in such a position as to be liable to injury from lightning it shall be efficiently protected against such liability.

18. Underground Conductors.

Underground conductors shall be thoroughly insulated, and shall be protected from mechanical damage by wooden boxing or earthenware, stoneware, concrete, iron, or fibre conduits or pipes. They shall be laid, wherever possible, under the foot-paths and with a cover of at least 12 in. from the surface of the pavement. Where laid under the roadway this cover shall be increased to 2 ft.

All conduits, pipes, casings, and street boxes used as receptacles for electric lines shall be constructed of durable material and shall be of ample strength to prevent damage from heavy traffic, and reasonable means shall be taken to prevent the accumulation of gas in such receptacles.

Where any underground line crosses or is in proximity to any metallic substance, special precaution shall be taken against the possibility of any electrical charging of the metallic substance from the line, or from any metallic conduit, pipe, or casing enclosing the line.

19. Earthing Conduits.

All underground metallic conduits, pipes, or casings containing an electric line shall be efficiently earthed, and shall be so jointed and connected across all street boxes and other openings as to make good electrical contact throughout their whole length.

20. Street Boxes.

The covers of street boxes shall be so secured that they cannot be opened except by means of a special appliance. Street boxes shall be either filled solid with cable compound or oil, or if not so filled shall be inspected from time to time for the presence of gas, and suitable action shall be taken to check its influx and accumulation.

21. Insulation of Electric Mains.

Every main, either overhead or underground, shall be tested for insulation after having been placed in position and before it is used for the purposes of supply, the testing-pressures being at least 500 volts, and the said Council shall

duly record the results of the tests of each main or section of a main and forthwith forward a report thereof to the District Engineer of the Public Works Department at Dunedin.

A high-pressure underground circuit shall not be brought into use unless the insulation of every part thereof has withstood the continuous application, during half an hour of a pressure twice the maximum working pressure, to which it is intended to be subjected in use. The result of such tests shall be recorded.

The insulation of every complete circuit used for the supply of energy, including all machinery, apparatus, and devices forming part of or in connection with such circuit, shall be so maintained that the leakage current shall not under any conditions exceed one-thousandth part of the maximum supply current. Provided that when any part of an electric circuit is normally connected with earth the provision of this regulation shall not apply to that circuit so long as the connection with earth exists. Every leakage shall be remedied without delay. Every such circuit shall be tested for insulation at least once in every month, and the said Council shall duly record the results of the tests.

22. Service Connections.

The said Council shall be responsible for all electric lines or wires, fittings, and apparatus belonging to it or under its control which may be upon a consumer's premises being maintained in a safe condition and in all respects fit for supplying energy.

In delivering the energy to a consumer's terminals the said Council shall exercise all due precautions so as to avoid risk of causing fire on the premises.

A suitable safety-fuse or other automatic circuit-breaker shall be inserted in each service line within a consumer's premises as close as possible to the point of entry, and contained within a suitable locked or sealed receptacle of fireproof construction.

All electric wires and apparatus on a consumer's premises, except such parts as require to be earthed, shall be highly insulated and suitable for the voltage at which the supply is given. They shall be thoroughly protected against injury to the insulation or access of moisture. All electric wires shall be so fixed and protected as to prevent the possibility of electrical discharge to any adjacent metallic substance.

23. Installation on Consumer's Premises.

The said Council shall not connect the wires and fittings on a consumer's premises with its mains or, in the case of premises already connected, continue the supply from its mains unless it is reasonably satisfied that the requirements of this license are complied with, that the wiring and fittings are suitable for the voltage at which supply is given, that the installation is generally in accordance with the requirements of good practice, and that the connection or continuance of supply would not cause a leakage from those wires dangerous to life or property or deleterious to the rendering of good service.

For the purpose of satisfying itself that the requirements of this license are being observed in so far as they apply to wires on a consumer's premises, the said Council may require that notice must be served upon it of the intention to instal wires, fittings, lamps, motors, or other apparatus on any such premises, and may inspect and test the same during any reasonable hours while the installation of such is in progress.

24. Testing Consumer's Installation.

If the said Council is reasonably satisfied, after making all proper examination on the completion of the installation by testing or otherwise, that the wirings and fittings are not suitable for the voltage being employed, or that a leakage exists at some part of a circuit of such extent as to be a source of danger, and that such leakage does not exist at any part of the circuit belonging to the said Council, or that any other requirements of this license are not being complied with, then and in such case any officer of the said Council duly authorized by it in writing may, for the purpose of discovering whether the leakage exists at any part of a circuit within or upon any consumer's premises, or whether the wiring is suitable and the general requirements of the license are complied with, by notice require the consumer, at some reasonable time after the service of a notice, to permit him to inspect and to test the wires and fittings belonging to the consumer forming part of the circuit.

If on such testing and inspection the officer discovers a leakage from the consumer's wires exceeding one ten-thousandth part of the maximum supply current to the premises, or that the requirements of this license are not properly conformed to, or if the consumer does not give all due facilities for inspecting and testing, the said Council shall either not commence the supply or shall forthwith discontinue the supply

of energy to the premises in question, giving immediate notice to the consumer of its reasons for not commencing or for discontinuing the supply, and in either case supply shall not be given until the said Council is reasonably satisfied that the installation is in conformity with the requirements of this license.

If any consumer is dissatisfied with the action of the said Council in refusing to give, or in discontinuing, or in not recommencing the supply of energy to his premises, the wires and fittings of that consumer may, on his application to the Minister and on payment of the cost, be inspected and tested by the Inspecting Engineer. This provision shall be endorsed on every notice given under the provisions of either of the two preceding paragraphs.

25. Continuity of Supply.

From and after the time when the said Council commences to supply energy in pursuance of this license it shall maintain continuously sufficient power for the use of all the consumers for the time being entitled to be supplied, provided the said Council shall be entitled to discontinue the supply between the hours of eight a.m. and one p.m. on each and every Sunday; provided also that, for any purposes connected with the efficient working of the undertaking, the Minister may give permission to the said Council to discontinue the supply at such intervals of time and for such periods as he may think expedient. When the supply is so discontinued public notice shall be given, when practicable, of such discontinuance and of the probable duration thereof.

26. Inspection of Works.

The Minister may at any time order an inspection to be made of the works, lines, and wires of the said Council used for electric lighting and power purposes. If any defect is found to exist it must be remedied forthwith, and if in the opinion of the officer or person inspecting such default is serious the Minister may, on receipt of the report, direct the said Council to at once cease transmitting energy either over the whole of the said Council's line and wires or over any specified part thereof until such defect is repaired or remedied. The cost of such inspection shall be borne by the said Council.

27. Supply to Consumers.

The owner or occupier of any premises within the area of supply included in the license, except those in the Taieri County, shall be entitled to a supply of electrical energy on the following conditions:—

(a.) If within 25 ft. of the boundary of any street in which an electric distribution-line belonging to the said Council exists the service shall be made free of cost.

(b.) If more than 25 ft. distant from the building line the said Council shall run the necessary service lines for a distance of 25 ft. free of charge, and the consumer shall pay the cost of the service lines for the balance of the distance.

(c.) If the plant or mains of the said Council are insufficient to supply the applicant with electrical energy the service may, with the consent of the Minister, be postponed for a period not exceeding twelve months. Otherwise service shall be made within twenty-eight days of application.

(d.) Every consumer within any part of the area included in the license shall be entitled to a supply of electrical energy on the same terms of payment on which any other consumer in such part of the area is entitled under similar circumstances to a corresponding supply.

(e.) If the nature of the proposed consumption of energy by any applicant is such as is likely to seriously interfere with the maintenance of a constant pressure on the lines in accordance with clause 5, the said Council may, with the approval of the Minister, require the consumer to instal such apparatus as shall enable the conditions of clause 5 to be complied with.

(f.) The said Council may require services to be wired or installed by competent tradesmen, but no preference shall be given to services wired or installed by any individual contractor or firm of contractors.

(g.) The charge for electrical energy, if paid within fourteen days of the rendering of a correct account, shall not exceed £20 per kilowatt per annum.

28. Notice to be given before commencing Work.

Before commencing any part of the work herein authorized the said Council shall give fourteen days' notice in writing to the District Engineer of the Public Works Department at Dunedin and to the District Engineer of the Post and Telegraph Department, Dunedin, of its intention so to do. Such notice shall be accompanied with a plan showing the location of the proposed electric lines. If such works include any extension to the extra high-pressure overhead or underground lines, special approval must be obtained from the Minister before the work is commenced.

29. Commencement of Supply.

The said Council shall not use the said electric lines or permit the same to be used for any purposes until the Minister has given notice in writing to the Council that he has received from the Inspecting Engineer a certificate that the works have been satisfactorily carried out.

30. By-laws.

By-laws for controlling consumers' installations shall be made by the said Council, but such by-laws shall not be enforceable until submitted to and approved by the Minister.

31. Assignment.

This license and the benefits and obligations hereunder shall not be assigned by the said Council without the express consent in writing of the Governor in Council first had and obtained, but such consent shall not be withheld if it is proved to the satisfaction of the Governor that the transferee is financially and otherwise able to carry out the obligations specified in this license.

32. Default and Penalty.

- (a.) If the said Council fails or neglects to use and maintain the said works after completion thereof so as to secure to the area of supply the full benefit of the undertaking; or
- (b.) If the said Council fails to observe, perform, fulfil, or keep any of the requirements, conditions, and provisions of the Public Works Amendment Act, 1911, or its amendments, to the full intent of the same or of any part thereof; or
- (c.) If the said Council shall fail to observe any of the conditions or obligations herein imposed upon the said Council, then in any such case it shall be lawful for the Governor, by Order in Council, either to revoke this license or to impose upon the said Council a fine not exceeding £20 for the breach of any such condition or obligation, such fine to be recovered in any Court of competent jurisdiction by any person appointed by the Governor to recover the same.

33. Revocation, &c.

The powers of revocation or infliction of fines by this license vested in the Governor shall not be exercised unless and until the Governor has first caused to be given to the said Council, or left at the office of the Town Clerk, or placed upon some principal or conspicuous part of the works, a notice in writing of the intention to exercise the same, and of the specific breach or breaches in respect of which the aforesaid powers are intended to be exercised, and default has been made by the said Council (after the giving or leaving of such notice) in repairing or remedying the breach complained of for the following spaces of time:—

- (a.) For any breach of the conditions of this license which, in the opinion of the Governor, can be met by a fine, thirty days after the giving or leaving of such notice.
- (b.) For any breach of the conditions of this license which, in the opinion of the Governor, is of such a nature as to require the revocation of this license, ninety days after the giving or leaving of such notice.

34. Governor's Decision final.

The Governor shall be the sole judge of the fact whether the requirements of this license have been complied with, and he may from time to time cause inquiry to be made into any matter connected therewith or arising hereunder in such manner as he thinks fit, and his decision shall be final. Provided always that this clause shall not affect the rights of any person, corporate body, or local authority in cases of damage or injury for which an action by such person, corporate body, or local authority may lie against the said Council.

35. Public Works, Compensation, &c.

Nothing herein contained shall be deemed in any way to interfere with, affect, or abridge any rights or powers vested in His Majesty the King, or in the Governor on his behalf, or the Minister, or any other person under any Act of the General Assembly authorizing the construction, management, or working of any public works. Nor shall His Majesty, or the Governor, or the Minister, or any other person be liable to pay to the licensee any compensation for injury done to the works herein authorized by the construction, management, or working of any such public work as aforesaid, or for the loss occasioned thereby, or for the exercise of any such right or power as aforesaid.

36. Commencement of License.

This license shall come into force on and after the publication thereof in the *New Zealand Gazette*.

Clerk of the Executive Council.

Regulations for Control of Ships carrying Wireless-telegraph Apparatus while within Territorial Waters of New Zealand.

LIVERPOOL, Governor.

ORDER IN COUNCIL.

At the Government House at Wellington, this thirteenth day of July, 1914.

Present:

HIS EXCELLENCY THE GOVERNOR IN COUNCIL.

WHEREAS by section nine of the Post and Telegraph Amendment Act, 1913 (hereinafter termed "the said Act"), it is provided that the Governor may from time to time by Order in Council make such regulations as he thinks proper governing the use of wireless-telegraph apparatus on merchant ships, whether foreign ships or British ships not registered in New Zealand, while within the territorial waters of New Zealand, and that such regulations may provide for the detention of any merchant ship on which a breach of the regulations has been made pending the institution and determination of proceedings in respect of such breach and the recovery of any fine imposed in respect thereof:

Now, therefore, His Excellency the Governor of the Dominion of New Zealand, in pursuance and exercise of the power and authority conferred upon him by the said Act, and acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby make the following regulations; and doth hereby order that such regulations shall have effect on and from the date of publication of this Order in Council in the *New Zealand Gazette*.

REGULATIONS.

- In these regulations, if not inconsistent with the context,—
 - "Territorial waters of New Zealand" means and includes all tidal waters included within the Dominion of New Zealand, and all parts of the open sea within one marine league of the coasts of that Dominion measured from low-water mark;
 - "Minister of Telegraphs" means the Minister of Telegraphs for the time being;
 - "Wireless telegraphy" has the same meaning as in section 162 of the Post and Telegraph Act, 1908;
 - "Telegraph" has the same meaning as in section 119 of the Post and Telegraph Act, 1908;
 - "Naval signalling" means signalling by means of any system of wireless telegraphy between two or more ships of His Majesty's Navy, between ships of His Majesty's Navy and naval stations, or between a ship of His Majesty's Navy or a naval station and any other wireless-telegraph station, whether a coast station or a ship station;
 - "The Admiralty" means the Commissioners for executing the office of Lord High Admiral of the United Kingdom of Great Britain and Ireland;
 - "Coast station" means a wireless-telegraph station which is established on land or on board a ship permanently moored, and which is open for the service of correspondence between the land and ships at sea;
 - "Ship station" means a wireless-telegraph station established on board a ship which is not permanently moored.
- These regulations shall apply only to foreign merchant ships and to British merchant ships not registered in New Zealand, while such British or foreign ships are within the territorial waters of New Zealand.
- All apparatus for wireless telegraphy on board a merchant ship while in the territorial waters of New Zealand shall be worked in such a way as not to interfere with Naval signalling, or with the working of any wireless-telegraph station lawfully established, installed, or worked in the Dominion of New Zealand or the territorial waters thereof; and, in particular, the said apparatus shall be so worked as not to interrupt or interfere with the transmission of messages between wireless-telegraph stations established on ships at sea and wireless-telegraph coast stations.
- No apparatus for wireless telegraphy on board a merchant ship shall be worked or used while such ship is in any of the harbours of the Dominion of New Zealand, except with the consent in writing of the Minister of Telegraphs.
- The foregoing regulations shall not apply to the use of wireless telegraphy for the purpose of making or answering signals of distress.
- If and whenever an emergency shall have arisen in which it is expedient in the public interest that His Majesty's Government shall have control over the transmission of messages by the said apparatus, it shall be lawful for any officer of His Majesty's Navy or Army, or for any other person authorized in that behalf by the Admiralty, or by the

Minister of Telegraphs, to take possession of or to cause the said apparatus or any part thereof to be taken possession of in the name and on behalf of His Majesty, and to be used for His Majesty's service and subject thereto for such ordinary services as to the said officer or person may seem fit; and in that event any person authorized by the said officer or person may enter upon any ship on which such apparatus is installed and take possession of the said apparatus and use the same as aforesaid.

7. Any such officer or person may in such event as aforesaid, instead of taking possession of the said apparatus as aforesaid, direct and authorize such persons as he may think fit to assume the control of the transmission of messages by the said apparatus, either wholly or partly, and in such manner as he may direct, and such persons may enter upon any ship on which the said apparatus is installed accordingly; or the said officer or person may direct the person or persons in charge of the said apparatus to submit to him, or any person authorized by him, all messages tendered for transmission or arriving by the said apparatus, or any class or classes of such messages, to stop or delay the transmission of any messages, or deliver the same to him or his agent, and generally to obey all such directions with reference to the transmission of messages as the said officer or person may prescribe, and the said person or persons in charge of the said apparatus shall obey and conform to all such directions.

8. If any breach of these regulations is committed by any person on board any ship while in the territorial waters of New Zealand, the person so committing the same and the owner and master of the ship shall be severally liable on summary conviction to a fine not exceeding £100.

9. Whenever the Minister of Telegraphs or the Secretary of the Post Office has reasonable cause to believe or suspect that any breach of these regulations has been committed on board any ship while in the territorial waters of New Zealand, he may give notice in writing to the Collector of Customs at any port in New Zealand to detain the ship, under section 9 of the Post and Telegraph Amendment Act, 1913, until the sum of £100, or such smaller sum as may be specified in the notice, has been deposited with the Collector by or on behalf of the owner of the ship.

10. If on the receipt of that notice, or at any time within three months thereafter, the ship is found within such port, the Collector of Customs shall withhold the certificate of clearance of the ship, under section 35 of the Customs Act, 1913, until and unless the aforesaid sum is deposited with him or the aforesaid notice of detention is withdrawn.

11. If within six months after the date of the offence in respect of which the ship has been detained a conviction for that offence is obtained against any person, the sum so deposited shall be available for the satisfaction of any fine and costs imposed or awarded by the conviction, and the residue, if any, shall be returned to the person by whom the deposit was made.

12. If within the period of six months aforesaid no such conviction is obtained, the sum so deposited shall be returned to the person by whom it was deposited.

H. D. BELL,
For Minister of Lands.

Warrant apportioning the Annual Payments in respect of a certain Portion of the Heao and other Bridges Loan between the Wanganui County Council and the Wanganui Borough Council.

LIVERPOOL, Governor.

WHEREAS by section five of the Local Bodies' Loans Amendment Act, 1912, it is, *inter alia*, provided that where part only of any area over which a special rate is made as security for a loan is merged or included within the district of a local authority other than the local authority that made the rate, then the whole of the liability in respect of the loan shall continue to be a liability of the local authority that raised the loan, but the Governor may, upon the written application of that local authority or of the Minister of Finance, by Warrant under his hand, direct that any local authority in whose district part of such area has been merged or included shall pay annually to the first-mentioned local authority during the currency of the loan, on such date as is specified, such amount as he considers a duly proportionate part of the interest and other charges payable in respect of the loan: And whereas it is further provided by the said section that the preceding provisions shall, *mutatis mutandis*, apply in any case where part of any such area is again merged or included in the district of another local authority:

And whereas the Wanganui County Council on or about the first day of February, one thousand nine hundred, raised a loan of two thousand one hundred and ninety-six pounds one shilling and fivepence (£2,196 1s. 5d.), known as "The Heao and other Bridges Loan," in terms of the Government Loans to Local Bodies Act, 1886:

And whereas portion of the district or area forming part of the Wanganui County over which the rate was levied for the repayment of the said loan and the interest and other charges payable in connection therewith was on the first day of December, one thousand nine hundred and seven, severed from the district of the Wanganui County Council, and constituted a borough under the title of the Borough of Eastbrook: And whereas on such severance and constitution of the said Borough of Eastbrook the said loan was apportioned by the Governor in Council in manner following—namely, two hundred and ninety-two pounds sixteen shillings and two pence (£292 16s. 2d.) to the Borough of Eastbrook, and one thousand nine hundred and three pounds five shillings and threepence (£1,903 5s. 3d.) to the Wanganui County Council: And whereas the Borough of Eastbrook subsequently became known as the Borough of Wanganui East:

And whereas by Order in Council dated the ninth day of September, one thousand nine hundred and twelve, published in the *New Zealand Gazette* of the twelfth day of September, one thousand nine hundred and twelve, at page 2700, portion of the area originally severed from the Wanganui County and forming part of the Borough of Eastbrook (Borough of Wanganui East) was excluded from the said Borough of Wanganui East, and by a Proclamation dated the eighteenth day of September, one thousand nine hundred and twelve, published in the *New Zealand Gazette* of the nineteenth day of September, one thousand nine hundred and twelve, at page 2732, was merged in the Wanganui County (being included in the Kaukatea and Mangawhero Ridings of the said county):

And whereas by Proclamation of the nineteenth day of December, one thousand nine hundred and twelve, published in the *New Zealand Gazette* of the nineteenth day of December, one thousand nine hundred and twelve, Number 92, at page 3617, the Boroughs of Wanganui and Wanganui East were constituted one united borough under the designation of the Borough of Wanganui:

And whereas the Wanganui Borough Council is desirous that a duly proportionate part of the interest and other charges payable in respect of the said sum of two hundred and ninety-two pounds sixteen shillings and twopence (£292 16s. 2d.) so apportioned to it as aforesaid should be paid by the Wanganui County Council, and has given the notices prescribed by the regulations under the Local Bodies' Loans Act, 1908, and no objection has been received to the proposed apportionment: And whereas the Wanganui Borough Council has made written application for an apportionment accordingly:

Now, therefore, I, Arthur William de Brito Savile, Earl of Liverpool, the Governor of the Dominion of New Zealand, in pursuance and exercise of the power and authority conferred on me by section five of the Local Bodies' Loans Amendment Act, 1912, do hereby direct that the Wanganui County Council shall pay annually to the Wanganui Borough Council, on the twelfth day of September in each and every year during the currency of the said Heao and other Bridges Loan, the sum of one pound sixteen shillings and fourpence (£1 16s. 4d.) as a duly proportionate part of the interest and other charges payable by the Wanganui Borough Council in respect of that part of the said loan (viz., £292 16s. 2d.) so apportioned to it as aforesaid.

As witness the hand of His Excellency the Governor, this thirteenth day of July, one thousand nine hundred and fourteen.

And whereas the Wanganui County Council on or about the first day of February, one thousand nine hundred and five, raised a loan of two thousand five hundred and eighty-one pounds eighteen shillings and fourpence (£2,581 18s. 4d.), known as "The Wanganui and Aberfeldie Bridges Loan," in terms of the Local Bodies' Loans Act, 1901:

Notice to Mariners No. 70 of 1914.

HOKIANGA RIVER ENTRANCE.—BAR SHOALING CONSIDERABLY.

Marine Department,
Wellington, N.Z., 10th July, 1914.

NOTICE is hereby given that recent soundings on the bar at the entrance to Hokianga River show very considerable shoaling, and there is at present no deep-water channel anywhere. Deepest water was found almost in old North Channel, but a flat extends right to bar, across this channel, with 12 ft. and 13 ft. on it at L.W.O.S.T. The best water was with flagstaff bearing E. 1° N. to about E. 4° N. magnetic. The South Channel has a bank right across the entrance inside it, absolutely blocking this channel. The bank has only about 5 ft. of water on it at L.W.S. tides.

The channel is at present in a transitory stage, and a deep-water channel is almost certain to break out somewhere before long. At present the scour appears to be finding no proper outlet, but as the deepest water is to be found towards the North Channel probably the scour will wash this channel out first.

SCHOOL FOR THE DEAF, NEAR SUMNER, CHRISTCHURCH.

UNDER THE CONTROL AND SUPERVISION OF THE EDUCATION DEPARTMENT.

Director: Mr. J. E. STEVENS.

FOR Deaf Children of sound intellect. The pupils are taught to understand and use ordinary speech. The full charge for board and education is £40 a year, but less is accepted from parents who cannot afford to pay this amount. In case of necessity admission is free.

By the Education Act it is compulsory for deaf children to come under instruction at the age of six, and to continue until the age of twenty-one unless the Education Department previously grants exemption. Though a child is, as a rule, best fitted to begin the school course at the age of six, advice should be obtained as soon as any sign of deafness is observed.

The following classes of deaf children are admitted to the School for the Deaf (sound intellect being always a necessity):—

1. Children born deaf, or who have lost their hearing before learning to speak.
2. Children who can hear a little, but are too deaf to be taught in a public school.
3. Children who have lost their hearing after having learned to speak.

The Act imposes upon every parent, teacher of a school (either public or private), constable, or officer of a charitable or kindred institution who is aware of the place of residence (either temporary or permanent) of a deaf child, and the householder in whose house any such child resides, an obligation to send notification of the fact to the Minister of Education, giving the name, age, and address of the child; and any neglect or failure to comply with this provision involves liability to a fine.

Information and advice may be obtained from the Director, or from

THE SECRETARY FOR EDUCATION,
Wellington.
