Distribution.

20. The distribution shall be carried out on the two or three-wire system, and may be either by underground or overhead conductors; provided that if at any time it is deemed by the Minister to be detrimental to the public safety for the conductors or any particular class of conductors to be overhead, such conductors shall, on receipt of notification to that effect from the Minister, and within ten months of such notification, be laid underground, and all consequent and necessary alterations made by and at the cost of the Council. The earth shall not be used in place of a return wire.

Overhead Electric Lines.

21. The diameter of any conductor or any electric line laid or erected for the supply of electrical energy shall not be less than 0.104 inches diameter (No. 12 S.W.G.). If the material of the conductor is aluminium the conductor shall be stranded.

Where an aerial wire crosses a street the angle between the line and the direction of the street at the place of crossing shall not be less than 60 degrees, and the spans shall be as short as possible.

The stress in overhead conductors shall not exceed 25,000 lb. per square inch for copper, 12,000 lb. per square inch for aluminium, 34,000 lb. per square inch for steel, and 22,500 lb. per square inch for iron in the extreme case of a temperature of 32° Fahr. and a wind-pressure of 18 lb. per square foot of diametrical plane occurring simultaneously. The span between supports and the sag shall be determined to conform with the above limiting stresses.

No overhead low-pressure electric lines shall come within 3 ft. of any other aerial wires or cables except where it may be permitted to pass either set of wires between other wires at a pole or support.

Electric lines at low pressure shall be insulated throughout with triple braiding impregnated with waterproof compound, provided that where circumstances permit the lines may, with the consent of the Minister, be bare.

Electric lines at high pressure shall be covered with vulcanized rubber at least 600-megohm grade, provided that where circumstances permit the lines may, with the consent of the Minister, be bare.

Electric lines at extra high pressure shall be bare.

High-pressure and extra-high-pressure lines shall not be carried on the same poles or supports, except in special circumstances and with the consent of the Minister.

Low-pressure and extra-high-pressure lines shall not be carried on the same poles or supports, except in special circumstances and with the consent of the Minister.

All overhead electric lines at low pressure shall be carried at a minimum height of 18 ft. above the ground.

All overhead lines at high pressure shall be carried at a minimum height of 20 ft. above the ground.

All overhead lines at extra high pressure shall be carried at a minimum height of 23 ft. above the ground.

Telephone Wires on Transmission-line Poles.

22. The telephone wire or wires shall be of hard-drawn copper, and shall not be less than No. 14 standard wire gauge. The minimum clearance between the lowest point of the span and the ground shall be 18 ft.

The wire shall be suitably guarded against lightning, and shall be fused. Such arrangements shall be made where the telephone is placed as will prevent the possibility of injury resulting to any person using the telephone should a power-wire come into contact with the telephone wire or from leakage or from induction.

Supports for Overhead Lines.

23. All aerial wires shall be attached to suitable insulators, carried on cross-arms or brackets of suitable material and cross-section, and they shall be so attached to the insulators

or guarded that they cannot fall away from the support. Conductors covered with insulating material shall be so attached that their insulation shall not be impaired where they are secured to the insulator.

Every support for an aerial line shall be of durable material and properly strengthened against forces due to wind-pressure, change of direction of line, and unequal length of span. The factor of safety of such supports outside borough limits shall be such that the moment resulting from a wind-pressure of 30 lb. per square foot and 18 lb. per square foot of diametrical plane upon a cylindrical surface upon the lines and supports shall not exceed one-half of the applied moment which is sufficient to cripple the support if of iron, steel, or ferro-concrete, and shall not exceed one-fourth of the breaking stress in the case of wood. The factor of safety of supports within the borough limits shall be four in the case of steel, iron, or ferro-concrete, and five in the case of wood, calculated upon the ultimate strength of material under the same conditions of wind-pressure as hereinbefore mentioned.

The distance between supports where bare conductors are allowed may exceed 200 ft., provided conductor used is not less than 0.0229 square inch section, but no spans within borough limits shall exceed 200 ft. except by approval of the Minister.

Location of Overhead Lines.

24. Except by permission of the Minister of Telegraphs, or subject to an agreement between the Post and Telegraph Department and the Council, all overhead electric lines shall be placed on the opposite side of the street to that on which any telegraph lines exist; and where the erection of the electric lines necessitates the alteration of any telegraph lines, and such alteration is approved by the Minister of Telegraphs, the cost of the alteration shall be borne by the Council.

In running the lines authorized by this license through or along any street where no telegraph line exists the Council shall keep to one side of the street, and in running wires to the opposite side of the street the Council shall arrange so as to interfere as little as possible with the route on that side of any future telegraph lines.

Lines not in Use.

25. An aerial line shall not be permitted to remain erected after it has ceased to be used for the supply of energy unless the Council intends within a reasonable time again to take it into use.

Post and Telegraph.

26. Where electric lines are permitted to be supported on telegraph poles all details of the supports and of the insulation shall be approved by the Minister of Telegraphs, who may, on giving to the Council reasonable notice in that behalf, require the Council to remove such electric lines at any time from such telegraph poles, and without payment of any compensation to the Council; provided that where a special agreement is come to for the erection and maintenance of a joint line of poles, the use of such joint line shall be subject only to such conditions as may be specified in the special agreement aforesaid.

At telegraph crossings the electric lines shall pass over or under the telegraph wires or cables as may be decided by the Minister of Telegraphs, and shall be at least 2 ft. distant. Where it is impracticable to cross above or below, the electric lines may be taken through, but when permitted to be taken through the crossing shall be made at a pole in a manner to be approved by the Minister of Telegraphs.

Where the electric lines intersect telegraph lines the latter shall be suitably insulated if deemed necessary, and when the crossing is above and near a pole the spans on each side of the pole may be insulated. This insulation shall be effected at the expense of the Council in cases where the telegraph lines existed previously to the erection of the electric lines.

Where high-pressure electric lines intersect telegraph lines, the former shall be insulated with not less than 600-megohms grade of vulcanized rubber, and the low-pressure wires with weatherproofed insulation as prescribed in clause 21.

Where deemed necessary efficient guard-wires, effectively earthed, or other approved protective devices, shall be erected in a manner to meet with the approval of the Minister of Telegraphs at all crossings or places where electric lines intersect telegraph lines, or at any place where such protection may be considered necessary.

The Council shall bear the expense of such guard-wires or other devices in all cases where an electric line intersects any telegraph line previously existing.

Where overhead electric lines at extra high pressure cross telegraph lines, the electric lines shall be subject to special conditions as may be required by the Minister of Telegraphs in each case of such crossing.

Where the transmission-line runs parallel and adjacent to the telegraph line, suitable and approved transpositions of the electric power lines shall be effected if so required by the Minister of Telegraphs, the expense of such transpositions to be borne by the Council.

The cost of all necessary guard-wires or other devices and special provisions required to comply with this clause shall be borne by the Council, when the telegraph lines are erected before the electric lines. In other cases the Council, on receipt of notice from the local officer of the Telegraph Department that it is proposed to run a telegraph line along the route, shall forthwith make the necessary changes required to comply with this clause at any point at which electric lines already cross such routes.

Earth-wires.

27. Earth-wires, where led down poles, shall be protected by a casing for a distance of 8 ft. from the ground. A test shall be made every three months, and oftener if required, of all earths, to ensure that the earth-wire is intact and that the earth is effective.

Railway Crossings.

28. No work of any nature shall be erected or constructed in pursuance of this license upon, over, or under any part of the Government railways until the Council has obtained the consent of the Minister of Railways thereto, as required by section 4 of the Government Railways Amendment Act, 1910 (No. 2).

Service Connections.

29. Service connections from aerial lines shall be taken direct from insulators, and shall not be tapped off between insulators. They shall be led as directly as possible to insulators firmly attached to some portion of the consumer's premises which is not accessible to any person without the use of a ladder or other special appliance.

Every portion of any aerial line which is outside a building, and is within 7 ft. from any part of the building, shall be rubber-insulated.

Where an aerial line crosses or is in proximity to any metallic substance precautions shall be taken by the Council against the possibility of the line coming into contact with the metallic substance by breakage or otherwise.

Facilities for Service Connections.

30. Where electric lines are on one side of the street and telegraph lines on the other, and service is required to be given from either to the other side of the street, the Council and the Minister of Telegraphs shall give to each other reasonable facilities as far as possible to effect supply.

Arc Lamps.

31. All arc lamps shall be so guarded as to prevent pieces of ignited carbon or broken glass falling from them, and shall not be used in situations where there is any danger of the presence of explosive dust or gas.

Arc lamps used in any street for public lighting shall be so fixed as not to be in any part at a less height than 10 ft. from the ground.

Arc lamps used in any street for private lighting shall be so fixed as not to be in any part at a less height than 8 ft. from the ground, and shall be so screened as to prevent risk of contact with persons.

Arc lamps must be insulated from earth and be fixed so that they cannot swing into contact with any substance, metallic or otherwise, that might connect them to earth. They may be run in series, and at any available voltage up to 400 volts. Resistances for the regulation of arc lamps, if exterior to the lamp, shall be mounted on incombustible bases, shall be so placed that they cannot by conduction or radiation set fire to any contiguous materials, and shall be of ample size to safely carry the maximum current that will normally flow through them. Each arc-lamp circuit shall be provided with a fuse on each pole. Interior arc lamps shall also be provided with a switch on each circuit.

Maintenance.

32. Every aerial line, including its supports, its conductors, and their insulating covering, and all structural parts and electric appliances and devices belonging to or connected with the line, shall be duly and efficiently maintained by the Council as regards both electrical and mechanical conditions.

High-pressure Transformers.

33. Where high-pressure transformers are attached to poles they shall be placed so as to be inaccessible except by the use of a ladder or other special appliance. Where high-pressure transformers are placed in sub-stations all high-tension conductors shall be thoroughly insulated or protected from accidental contact, and the sub-station shall be entirely

inaccessible to unauthorized persons. Where high-pressure transformers are placed on consumers' premises the whole of the apparatus shall be enclosed or rendered inaccessible except to authorized persons. The cases of all transformers shall be earthed by means of a copper conductor at least 0.022 square inch in section.

Where cables are led to and from transformer enclosures they shall be protected on the poles by being run in iron pipes, which shall be effectively earthed.

Lightning-arresters.

34. Where any portion of any electric line or support for an electric line is exposed to such a position as to be liable to injury from lightning it shall be efficiently protected against such liability.

Underground Conductors.

35. Underground conductors shall be thoroughly insulated, and shall be protected from mechanical damage by steel armouring, or by wooden boxing, or earthenware, stoneware, concrete, iron, or fibre conduits or pipes. They shall be laid wherever possible under the footpaths, and with a cover of at least 12 in. from the surface of the pavement. Where laid under any other part of the road this cover shall be increased to 2 ft.

All conduits, pipes, casings, and street boxes used as receptacles for electric lines shall be constructed of durable material, and they shall be of ample strength to prevent damage from heavy traffic, and reasonable means shall be taken to prevent the accumulation of gas in such receptacles.

Where any underground line crosses or is in proximity to any metallic substance special precaution shall be taken against the possibility of any electrical charging of the metallic substance from the line or from any metallic conduit, pipe, or casing enclosing the line.

Earthing Conduits.

36. All metallic conduits, pipes, or casings containing an electric line shall be efficiently earthed, and shall be so jointed and connected across all street boxes and other openings as to make good electrical contact throughout their whole length.

Street Boxes.

37. The covers of street cable-boxes shall be so secured that they cannot be opened except by means of a special appliance. Street boxes shall be either filled solid with cable compound or oil, or if not so filled shall be inspected from time to time for the presence of gas, and suitable action shall be taken to check its influx and accumulation.

Insulation of Electric Mains.

38. Every main, either overhead or underground, shall be tested for insulation after having been placed in position and before it is used for the purposes of supply, the testing pressure being at least 500 volts, and the Council shall duly record the results of the tests of each main or section of a main and forthwith forward a report thereon to the Public Works Engineer at present stationed at Stratford.

The insulation of every complete circuit used for the supply of energy, including all machinery, apparatus, and devices forming part of or in connection with such circuit, shall be so maintained that the leakage current shall not under any conditions exceed one-thousandth part of the maximum supply current. Every leakage shall be remedied by the Council without delay. Every such circuit shall be tested for insulation at least once in every month, and the Council shall duly record the results of the tests and forward a report thereof at the end of each month to the Public Works Engineer at present stationed at Stratford.

Continuity of Supply.

39. From and after the time when the Council commences to supply energy in pursuance of this license it shall maintain continuously sufficient power for the use of all the consumers for the time being entitled to be supplied; provided also that, for any purposes connected with the efficient working of the undertaking, the Minister may give permission to the Council to discontinue the supply at such intervals of time and for such periods as he may think expedient. When the supply is so discontinued public notice shall be given, when practicable, of such discontinuance and of the probable duration thereof.

Supply to Consumers.

40. The owner or occupier of any premises within the area of supply included in the license shall be entitled to a supply of electrical energy on the following conditions:—

- (a.) If within 60 ft. of an electric line belonging to the Council service shall be made free of cost.
- (b.) If more than 60 ft. distant to any electric line belonging to the Council, the Council shall run the necessary lines

for a distance of 60 ft. free of charge, and the consumer shall pay the cost of the service wires for the balance of the distance.

(c.) If the plant or mains of the Council are insufficient to supply the applicant with electrical energy the service may, with the consent of the Minister, be postponed for a period not exceeding twelve months; otherwise services shall be made within twenty-eight days of the application.

(d.) Every consumer within any part of the area included in the license shall be entitled to a supply of electrical energy on the same terms on which any other consumer in such part of the area is entitled under similar circumstances to a corresponding supply.

(e.) If the nature of the proposed consumption of energy by any applicant is such as is likely to seriously interfere with the maintenance of the constant pressure on the line in accordance with clause 17, the Council may, with the approval of the Minister, require the consumer to instal such apparatus as shall enable the conditions of clause 17 to be complied with.

(f.) The Council may require services to be wired or installed by competent tradesmen, but no preference shall be given to services wired or installed by any individual contractor or firm of contractors.

(g.) If payment by any consumer is delayed more than thirty days after the date of rendering a correct account the supply of electricity to such premises may be cut off without notice, and need not be restored until all arrears are paid.

Service Connections.

41. The Council shall be responsible for all electric lines or wires, fittings, and apparatus belonging to it or under its control which may be upon a consumer's premises being maintained in a safe condition and in all respects fit for supplying energy.

In delivering the energy to a consumer's terminals the Council shall exercise all due precautions so as to avoid risk of causing fire on the premises.

A suitable safety-fuse or other automatic circuit-breaker shall be inserted in each service line within a consumer's premises as close as possible to the point of entry, and contained within a suitable locked or sealed receptacle of fire-proof construction.

All electric wires and apparatus on a consumer's premises, except such parts as require to be earthed, shall be highly insulated and suitable for the voltage at which the supply is given. They shall be thoroughly protected against injury to the insulation or access of moisture. All electric wires shall be so fixed and protected as to prevent the possibility of electrical discharge to any adjacent metallic substance.

The maximum working current in any conductor shall not exceed the values as specified in clause 4.

Installation on Consumers' Premises.

42. The Council shall not connect the wires and fittings on a consumer's premises with its mains, or in the case of premises already connected continue the supply from its mains, unless it is reasonably satisfied that the requirements of this license are complied with, that the wiring and fittings are suitable for the voltage at which supply is given, that the installation is generally in accordance with the requirements of good practice, and that the connection or continuance of supply would not cause a leakage from those wires and fittings exceeding one ten-thousandth part of the maximum supply current to the premises.

For the purpose of satisfying itself that the requirements of this license are being observed in so far as they apply to wires on a consumer's premises, the Council may require that notice must be served upon it of the intention to instal wires, fittings, lamps, motors, or other apparatus on any such premises, and may inspect and test the same during any reasonable hours while the installation of such is in progress.

Testing Consumer's Installation.

43. If the Council is reasonably satisfied, after making all proper examination on the completion of the installation, by testing or otherwise, that the wiring and fittings are not suitable for the voltage being employed, or that a leakage exists at some part of a circuit of such extent as to be a source of danger, and that such leakage does not exist at any part of the circuit belonging to the Council, or that any other requirements of this license are not being complied with, then and in such case any officer of the Council duly authorized by it in writing may, for the purpose of discovering whether the leakage exists at any part of a circuit within or upon any consumer's premises, or whether the wiring is suitable and the general requirements of the license are complied with, by notice require the consumer, at some reasonable time after the service of a notice, to permit him to inspect and to test the wires and fittings belonging to the consumer and forming part of the circuit.

If on such testing and inspection the officer discovers a leakage from the consumer's wires exceeding one ten-thousandth part of the maximum supply current to the premises, or that the requirements of this license are not properly conformed to, or if the consumer does not give all due facilities for inspecting and testing, the Council shall either not commence the supply or shall forthwith discontinue the supply of energy to the premises in question, giving immediate notice to the consumer of its reasons for not commencing or for discontinuing the supply, and in either case supply shall not be given until the Council is reasonably satisfied that the installation is in conformity with the requirements of this license.

If any consumer is dissatisfied with the action of the Council in refusing to give, or in discontinuing, or in not recommending the supply of energy to his premises, the wires and fittings of that consumer may, on his application to the Minister and on payment of the cost, be inspected and tested by the Inspecting Engineer. This provision shall be endorsed on every notice given under the provisions of either of the two preceding paragraphs.

Motor Installations.

44. The frame of all motors shall be connected to an efficient earth by a copper conductor, which shall be equal in area to one of the conductors leading to the motor, but need not exceed 0.022 square inch in sectional area. All metal casings of switches, resistances, fuses, cables, and wires shall be efficiently earthed in a similar manner.

Every motor must be controlled by an efficient quick-break ironclad switch suitable to prevent arcing, and conveniently placed so that the person in charge of the motor can cut off wholly the supply from the motor and all devices in connection therewith.

Efficient fuses or other automatic cut-out must be provided to efficiently protect the conductors on each circuit from excess of current.

Every precaution shall be taken in choosing positions for and in the wiring and setting-up of motors and the necessary devices in connection therewith, so that there shall be no danger of fire being caused by their normal or abnormal action or of shock being sustained in the ordinary handling thereof.

Terminals of motors supplied at 230 or 400 volts must be so guarded that they cannot be accidentally touched or short-circuited.

The insulation resistance of each motor-circuit, including all devices necessary for the working of the motor, shall be not less than 1 megohm to earth when all metal parts that are required to be connected to earth are so connected.

A printed notice shall be fixed in a conspicuous position at every motor and switchboard forbidding unauthorized persons to touch the motors or apparatus.

Notice regarding Extensions.

45. Before commencing the erection of any part of the lines hereby authorized, or the extension or alteration of any line already erected, the Council shall give at least seven days' notice in writing to the Public Works Engineer at present stationed at Stratford, and also to the District Engineer of the Post and Telegraph Department at Wellington, or his deputy, of its intention to carry out the work, and shall forward to the Minister a locality plan showing the route of any extension.

Notice of Completion.

46. The Council shall, prior to the completion of the said works or any separate portion thereof, give to the Minister at least one month's notice in writing of the estimated date of each completion.

Commencement of Supply.

47. The Council shall not use any portion of the electric lines authorized by this license, or permit the same to be used, for any purpose until the Minister has given notice in writing to the Council that he has received from the Inspecting Engineer a certificate that the said work or any portion thereof has been satisfactorily carried out.

Consent of Taranaki County Council.

48. Notwithstanding anything hereinbefore contained the Council shall not be entitled to erect, maintain, or use any electric line within the County of Taranaki except subject to such conditions, not inconsistent with the provisions of this license, as may from time to time be agreed upon between the Council and the Taranaki County Council.

By-laws.

49. By-laws for controlling consumers' installations and applications may be made by the Council, but such by-laws shall not be enforceable until approved by the Minister,

Inspection of Works.

50. The Minister may at any time order an inspection to be made of the lines and wires of the Council. If any defect is found to exist it must be remedied forthwith, and if serious in the opinion of the Inspecting Engineer the Minister may, on receipt of the report, direct the Council to at once cease transmitting energy either over the whole of the lines and wires or over any part thereof as to him may seem fit until such defect is repaired or remedied. The cost of such inspection shall be borne by the Council.

Compliance with Conditions.

51. For the purpose of ascertaining whether the conditions of this license are being faithfully complied with by the Council, the Minister, or any person appointed by him in that behalf, may at all reasonable times enter on the land and works and inspect the same.

Assignment.

52. This license and the benefits and obligations hereunder shall not be assigned by the Council without the express consent in writing of the Minister first had and obtained but such consent shall not be withheld if it is proved to the satisfaction of the Minister that the transferee is financially and otherwise able to carry out the obligations specified in this license.

Default and Penalty.

53. If the Council fails to comply with any of the conditions of this license the Minister may, by notice in writing, require the Council within thirty days to remedy the default specified in that notice; but it shall not be held to have committed default for any failure to maintain power continuously if such failure is due to the breakdown of machinery or other accident, unless such breakdown or accident is proved to be due to negligence on the part of the Council; and if the Council fails to comply with the terms of the notice within the said period it shall be liable to a penalty of £20, to be recoverable by or on behalf of the Minister as a debt due to the Crown. The recovery of a penalty under this license shall not affect the liability (if any) of the Council to pay or make compensation in respect of any damage or injury which may be caused by reason of the default.

Revocation of License.

54. Notwithstanding anything in the last preceding clause of these conditions, if the Council fails to comply with the terms of any such notice for ninety days after the receipt thereof the Governor in Council may thereupon revoke this license without further notice.

Public Works Compensation.

55. Nothing herein contained shall be deemed in any way to interfere with, affect, or abridge any rights or powers vested in His Majesty the King, or in the Governor on his behalf, or the Minister, or any other person under any Act of the General Assembly authorizing the construction, management, or working of any public works, nor shall His Majesty, or the Governor, or the Minister, or any other person be liable to pay to the Council any compensation for injury done to the works herein authorized by the construction, management, or working of any such public work as aforesaid, or for the loss occasioned thereby, or for the exercise of any such right or power as aforesaid.

Commencement of License.

56. This license shall come into force on and after the publication thereof in the *New Zealand Gazette*.

Now, therefore, His Excellency the Governor of the Dominion of New Zealand, in pursuance and exercise of the power and authority vested in him by the said Act, and of all other powers and authorities enabling him in that behalf, and by and with the advice and consent of the Executive Council of the said Dominion, doth hereby approve of the purpose or object for which the said license is required by the licensee as aforesaid; and, in further pursuance and exercise of the said power and authority, and with the like advice and consent as aforesaid, doth hereby license and permit the licensee to use and occupy that part of the foreshore and land below low-water mark which are particularly shown and delineated on the plans marked M.D. 4320 so deposited as aforesaid, for the purpose of constructing or erecting thereon a wharf, such license to be held and enjoyed by the licensee upon and subject to the terms and conditions set forth in the Schedule hereto.

SCHEDULE.

1. In these conditions the term "Minister" means the Minister of Marine as defined by the Shipping and Seamen Act, 1908, and includes any officer, person, or authority acting by or under the direction of such Minister.

2. The concessions and privileges conferred by this Order in Council shall extend and apply only to the part of the foreshore, and land below low-water mark necessary for the erection of such wharf, which are shown on the plans marked M.D. 4320, and deposited in the office of the Marine Department as aforesaid.

3. In consideration of the concessions and privileges granted by this Order in Council, the licensee shall pay to the Minister the sum of £1, and thereafter an annual sum of 5s., in advance, dating from the date hereof, the first of such annual payments to be made on the licensee being supplied with a copy of this Order in Council.

4. His Majesty, or the Governor, and all officers in the Government service acting in the execution of their duty, shall at all times have free ingress, passage, and egress into, through, over, and out of the said wharf without payment.

5. All persons shall at all reasonable times, and upon payment of the proper dues, have free and full liberty to use the said wharf, and all rights of ingress and egress thereon and therefrom.

6. The licensee shall maintain the above-mentioned wharf in good order and repair, and shall at all times exhibit therefrom, and maintain at his own cost, suitable and necessary lights for the guidance of vessels; provided that no light shall be exhibited until after it has been approved of by the Minister.

7. Any person authorized by the Minister may, at all reasonable times, enter upon the said wharf and view the state of repair thereof; and upon the Minister leaving at or posting to the last known address of the licensee a notice in writing of any defect or want of repair in such wharf, requiring him, within a reasonable time, to be therein prescribed, to make good the same, he shall with all convenient speed cause such defect to be removed or such repairs to be made, as the case may be.

8. Nothing herein contained shall authorize the licensee to do or cause to be done anything repugnant to or inconsistent with any law relating to the Customs, or with any regulation of the Minister of Customs, or with any provisions of the Harbours Act, 1908, or its amendments, or any regulation made thereunder, and that are now or may hereafter be in force.

9. The rights, powers, and privileges conferred by or under this Order in Council shall continue in force for fourteen years from the date hereof, unless in the meantime such rights, powers, and privileges shall be altered, modified, or revoked by competent authority; and the licensee shall not assign, charge, or part with any such right, power, or privilege without the written consent of the Minister first obtained.

10. The said rights, powers, and privileges may be at any time resumed by the Governor, without payment of any compensation whatever, on giving to the licensee three calendar months' previous notice in writing. Any such notice shall be sufficient if given by the Minister and delivered at or posted to the last known address of the licensee.

11. The licensee shall be liable for any injury which the said wharf may cause any vessel or boat to sustain through any default or neglect on his part.

12. In case the licensee shall—

- (1.) Commit or suffer a breach of the conditions herein before set forth, or any of them;
- (2.) Cease to use or occupy the said wharf for a period of thirty days;
- (3.) Fail to pay the sum specified in clause 3 of these conditions; or
- (4.) Become bankrupt, or be brought under the operation of any law for the time being in force relating to bankruptcy,—

then and in either of the said cases this Order in Council and every license, right, power, or privilege thereby conferred, may be revoked and determined by the Governor in Council, without any notice to the licensee or other proceeding whatsoever; and publication in the *New Zealand Gazette* of an Order in Council containing such revocation shall be sufficient notice to the licensee, and to all persons concerned or interested, that this Order in Council, and the license, rights, and privileges thereby granted and conferred, have been revoked and determined.

13. The erection of the said wharf shall be sufficient evidence of the acceptance by the licensee of the terms and conditions of this Order in Council.

J. F. ANDREWS,
Clerk of the Executive Council.

Licensing the Hobson County Council to use and occupy a Part of the Foreshore at Scarrots, in Kaipara Harbour, as a Site for a Wharf.

LIVERPOOL, Governor.
ORDER IN COUNCIL.

At the Government House at Wellington, this fourteenth day of September, 1914.

Present :

HIS EXCELLENCY THE GOVERNOR IN COUNCIL.

Now, therefore, His Excellency the Governor of the Dominion of New Zealand, in pursuance and exercise of the power and authority vested in him by the said Act, and of all other powers and authorities enabling him in that behalf, and by and with the advice and consent of the Executive Council of the said Dominion, doth hereby approve of the object for which the said license is required by the Council as aforesaid; and, in further pursuance and exercise of the said power and authority, and with the like advice and consent as aforesaid, doth hereby license and permit the Council to use and occupy that part of the foreshore and land below low-water mark on which the said wharf is to be erected, as shown on the plan M.D. 4279 so deposited as aforesaid, for the purpose of erecting and maintaining the said wharf; such license to be held and enjoyed by the Council upon and subject to the terms and conditions set forth in the Schedule hereto.

SCHEDULE.

1. In these conditions the term "Minister" means the Minister of Marine as defined by the Shipping and Seamen Act, 1908, and includes any officer, person, or authority acting by or under the direction of such Minister.

2. The concessions and privileges conferred by this Order in Council shall extend and apply only to the part of the foreshore, and land below low-water mark adjacent thereto, necessary for the erection of the said wharf, as shown on the plan marked M.D. 4279.

3. All persons shall, at all reasonable times, upon payment of the proper dues, have free and full liberty to use the said wharf, and all rights of ingress and egress thereon and therefrom.

4. His Majesty or the Governor, and all officers in the Government service acting in the execution of their duty, shall at all times have free ingress, passage, and egress into, through, and out of the said wharf without payment.

5. The Council shall maintain the above-mentioned wharf in good order and repair; and shall at all times exhibit from the wharf and maintain at its own cost suitable and necessary lights for the guidance of vessels; provided that no light shall be exhibited until after it has been approved of by the Minister.

6. Any person authorized by the Minister may, at all reasonable times, enter upon the said wharf and view the state of repair thereof; and upon such Minister leaving at or posting to the last known address of the Council in New Zealand a notice in writing of any defect or want of repair in such wharf, requiring it within a reasonable time, to be therein prescribed, to repair the same, it shall with all convenient speed cause such defect to be removed or such repairs to be made.

7. 10. The said rights, powers, and privileges may be at any time resumed by the Governor, without payment of any compensation whatever, on giving to the Council three calendar months' previous notice in writing. Any such notice shall be sufficient if given by the Minister, and delivered at or posted to the last known address of the Council in New Zealand.

11. The Council shall be liable for any injury which the said wharf may cause any vessel or boat to sustain through any default or neglect on its part.

12. In case the Council shall—

- (1.) Commit or suffer a breach of the conditions herein before set forth, or any of them; or
- (2.) Cease to use or occupy the said wharf for a period of thirty days,—

then and in either of the said cases this Order in Council, and every right, power, or privilege, may be revoked and determined by the Governor in Council without any notice to the Council or other proceedings whatever; and publication in the *New Zealand Gazette* of an Order in Council containing such revocation shall be sufficient notice to the Council, and to all persons concerned or interested, that this Order in Council, and the license, rights, and privileges thereby granted and conferred, have been revoked and determined.

* These remaining suburbs do not lie within borough boundaries, and particulars respecting them have not been obtained for the Vital Statistics. Closely correct annual statements of population outside boroughs are not obtainable.

In the above table are given the deaths and death-rates for each of the four cities, for the suburban boroughs severally, and for each city with its suburban towns.

Deaths occurring at hospitals, of persons not residents of the borough wherein the hospital is situated, have been allotted in each case to the borough where the disease was contracted, and not to that in which the death actually took place.

The inclusion of the suburban boroughs tends to lower the rate at Auckland, Christchurch, and Dunedin.

	Death-rates per 1,000 of Population.	
Auckland City	0.86	0.82
and seven suburban boroughs	1.16	1.16
Wellington City	1.00	0.92
and four suburban boroughs	0.97	0.94
Christchurch City		
and five suburban boroughs		
Dunedin City		
and five suburban boroughs		

Including the suburbs, the rate at Wellington is the highest and at Auckland the lowest.

Compared with August, 1913, the results are,—

	1913.	1914.
Auckland and suburbs	0.79	0.82
Wellington and suburbs	0.68	1.16
Christchurch and suburbs	1.12	0.92
Dunedin and suburbs	0.65	0.94

The total births in the four chief cities and their suburban boroughs amounted to 629, against 601 in July—an increase of 28. The deaths in August were 291—a decrease of 13 as compared with the previous month. Of the total deaths males contributed 152, females 139. Fifty-nine of the deaths were of children under five years of age, being 20.27 per cent. of the whole number; 47 of these were under one year of age.

There were 106 deaths of persons of 65 years and upwards in the four chief cities and their suburban boroughs, as against 114 in July. The following table shows the classification:—

CONDITIONS OF SALE.

1. The right to cut and remove the timber will be sold generally in accordance with the provisions of the Land Act, 1908, the Timber Regulations made thereunder, and the following conditions, and may contain such additional conditions as the Commissioner in his discretion considers necessary in the interests of the Crown or of the public.

2. The quantities of the various timbers set forth in the above Schedule are approximate only, and are furnished for the information of intending purchasers, who are expected, previous to the sale, to make their own estimate of the quantity of timber. No contract for purchase shall be voidable, nor shall the licensee be entitled to any abatement in price, by reason of the said timber being of less quantity, quality, and kind than as stated herein; nor shall any extra sum be claimed by the Crown if for any reason the quantity of timber is found to be in excess of that stated herein.

3. The successful bidder shall purchase the whole of the timber, and shall, on the fall of the hammer, pay in cash a deposit of one-fifth of the amount bid, together with £1 ls. license fee, and shall also deposit four promissory notes, each for one-fourth of the balance, each payable on demand and endorsed by two persons to be approved by the Commissioner; such promissory notes shall bear interest at the rate of 5 per centum per annum, as from date of sale, in accordance with clause 86 of the regulations. These promissory notes will be presented—the first at an interval of four months from the date of sale, and the others at subsequent intervals of four months; but they may be presented for payment at earlier dates if more than a due proportion of timber is found to be cut, or should any breach of the conditions occur, or if in the opinion of the Commissioner the interest of the Crown is jeopardized.

4. The purchaser shall have the right to cut all the timber thereon during a period of two years from the date of sale. The license shall only be for the cutting and removal of the timber, and shall give no right to the use of the land.

5. The timber shall be cut in a face, and the Crown reserves the right of following up the mill-workings by felling and grassing such areas as from time to time will have been cleared of milling-timber, or of disposing of the land. Sufficient timber shall be left for fencing and general farming purposes.

6. The licensee shall not put, throw, or place, or allow to be put, thrown, or placed, into any river, stream, or watercourse, or into any place where it may be washed into any river, stream, or watercourse, any sawdust or other sawmill refuse.

7. The licensee shall have the right to haul or shoot timber over Section 4, Block II, Piopotea West, if required, but he will be responsible for any damage to stock or fences.

8. In the event of the above not being disposed of, applications may be received and dealt with at any time within six months from the above date of sale (unless previously formally withdrawn); provided, however, that the amount offered is not less than the upset price stated herein.

9. No compensation will be given nor shall any be claimed for any error, discrepancy, or misdescription whatever in respect of the lot or in these conditions.

10. Any timber not specified milled for sale shall be purchased at the rate of 6d. per 100 sup. ft.

The measurements are quarter girth measurements.

Full particulars may be ascertained and copies of the Timber Regulations obtained at this office.
