IN pursuance and exercise of the powers and authority vested in him under the Land and Income Assessment Act, 1908, and the Land-tax and Income-tax Act, 1914, His Excellency the Governor of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby order and determine that the respective duties leviable under the said Acts by way of land-tax shall be paid in one sum on Thursday, the second day of December, one thousand nine hundred and fourteen; and doth hereby order and determine that the

respective duties leviable under the said Acts by way of income-tax shall be paid in one sum on Friday, the twentieth day of January, one thousand nine hundred and fifteen.

And, in further pursuance and exercise of the powers and authority aforesaid, and with the like advice and consent as aforesaid, His Excellency doth also determine that the place where the said duties of land-tax and of income-tax shall be payable shall be the office of the Commissioner of Taxes, at the Government Buildings, Wellington, and that notice to the foregoing effect shall be given by the said Commissioner accordingly.

J. F. ANDREWS,  
Clerk of the Executive Council.

*License authorizing the Tauranga Borough Council to use Water from the Omanawa River for the Purpose of generating Electricity, and to erect Electric Lines in the Borough of Tauranga and the Tauranga County.*

LIVERPOOL, Governor.

### ORDER IN COUNCIL.

At the Government House at Wellington, this fifth day of October, 1914.

Present :

HIS EXCELLENCY THE GOVERNOR IN COUNCIL.

WHEREAS by section five of the Public Works Amendment Act, 1908, it is enacted that the Governor may from time to time by Order in Council grant to any person or body corporate a license to use water from any fall, river, stream, or other source for the purpose of generating electricity for electric light, mechanical power, or other uses, and to exercise in respect of that license any of the powers and authorities specified in that behalf in the said section: And whereas it is further provided by the said section that any such license may confer upon the licensee a right at any time or times during the continuance of the license (but subject to such conditions and restrictions as are expressed in the license) to enter upon any road, railway, or other land, whether vested in or occupied by the Crown or any other person or body corporate, and there to construct, erect, lay down, maintain, renew, or repair all such cables, wires, and other things as are required for the transmission of electricity between the fall, river, stream, or other source aforesaid, and any place to which the licensee is authorized to transmit electricity in pursuance of the license:

And whereas it is by subsection five of the said section also provided that the license shall be deemed to constitute a contract between the licensee and His Majesty the King, and shall be enforceable by and against either party accordingly:

And whereas the Tauranga Borough Council has applied for a license under the said section to take and use water from the Omanawa River, in Crown Land Block VI, Otanewainuku Survey District, in the Provincial District of Auckland (hereinafter referred to as "the said stream"), for the purpose of generating electricity for the purposes aforesaid, and upon the terms and subject to the conditions hereinafter appearing, and it is expedient to issue such license accordingly:

Now, therefore, in pursuance and exercise of the powers conferred upon him as aforesaid, and of the powers conferred by section two of the Public Works Amendment Act, 1911, and of all other powers enabling him in that behalf, His Excellency the Governor of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby grant to the Tauranga Borough Council, subject to the terms and conditions hereinafter set forth, a license to take, divert, and use from the Omanawa River aforesaid, for the purposes hereinafter set forth, a stream of water (hereinafter referred to as "the said water") not exceeding one hundred and sixty cubic feet of water per second at any one time; and also to erect and maintain electric lines for lighting and power purposes as hereinafter described.

#### TERMS AND CONDITIONS.

1. In this license the following words and phrases shall have the meaning hereby attached to them respectively:—

"Consumer's wires" means any electric line on the consumer's premises connected with the Council's electric-supply lines:

"Council" means the Tauranga Borough Council:

"Earthed," as applied to any conductor, means that such conductor shall be so connected to the general mass of earth as to ensure at all times an immediate and safe discharge to earth of electrical energy:

"Electric line" means any wire, wires, conductor, or other means used for conveying, transmitting, or distributing electricity for power, lighting, or heating purposes, and includes any instrument, insulator, casing, tubing, pipe, covering, tower, or post enclosing or supporting an electric line or anything connected therewith:

"Extra high pressure" means pressures over 3,300 volts:

"High pressure" means pressures over 650 volts and up to 3,300 volts:

"Inspecting Engineer" means and includes any inspecting engineer appointed by the Minister to inspect works to be constructed or maintained by virtue of electric-line licenses, or any water-power licenses, or any combined water-power and electric-line licenses, issued under the Public Works Act, 1908, and any or all of its amendments, or under any one or more of such amendments only, or any Act or Acts passed in amendment thereof or substitution thereof:

"Low pressure" means pressures up to 650 volts:

"Minister" means the Minister of Public Works:

"Pressure" means difference of electric potential:

"Public works" means any public work as defined in the Public Works Act, 1908, and its amendments, and includes any work authorized, constructed, or maintained under Division 2 of the Post and Telegraph Act, 1908:

"Public Works Engineer" means the Engineer in charge of the Public Works district in which the area of supply is situated:

"Street" includes road:

"Telegraph" includes telephone.

#### Utilization of the Water.

2. The said water shall be used solely for the purpose of generating electricity.

3. The Council shall install, construct, maintain, and use the following works for the purposes of this license:—

(a.) Headworks consisting of a diverting weir, and such dam or dams as may be required, and necessary intake.

(b.) A water-race and or a pipe-line leading from such diverting weir or dam to the power-house hereinafter referred to.

(c.) A power-house with all necessary equipment, including water-turbines, transformers, lightning-arresters, switchboards, switches, exciters, and other appliances for generating and transforming electricity.

(d.) Such transmission and other lines, together with such transforming and converting apparatus as may be required to serve the purpose of this license.

#### Location of Headworks, &c.

4. The said water shall be taken by the Council from the point in the said stream marked "Headworks," and shown on the plans marked P.W.D. 34825, Plan B, deposited in the office of the Minister of Public Works at Wellington and hereinafter referred to as the said plans, and such water shall be conducted by a race, pipe, or tunnel, over or along the route shown on the said plans to the generating-station to be erected on the bank of the said stream at the side marked "Power-house" on the said plans, and all water diverted from the said stream shall be returned by the licensee to the said stream at or near the power-house. Nothing herein shall prevent the Governor in Council from granting to any person or body corporate other than the Council a license to take water from any portion of the said stream except at the place where the Council is by this license empowered to take it; provided that no such license shall so operate as to reduce the natural fall of 108 ft. between headworks and tail-water, or the volume of water which the Council is by this license authorized to take from the said stream.

#### Annual Rental.

5. The Council shall in respect of this license pay to the Receiver of Land Revenue at Wellington, or otherwise as the Minister may from time to time require, a fee of one peppercorn per annum, if demanded.

#### Duration of Term of License.

6. The term for which this license is granted is a period of forty-two years, commencing as from the 1st day of October, 1914, unless such term is sooner revoked, determined, or surrendered in accordance with or in pursuance of the provisions hereinafter contained; and upon the expiry of the term of the license hereby granted, or upon the sooner revocation, determination, or surrender of the same, all rights granted to the Council shall thereupon absolutely cease and determine; but such revocation, determination, or surrender shall not relieve the Council of any burden, condition, or liability contracted under this license.

*Area of Supply.*

7. The area of supply shall consist of the Borough of Tauranga as at present constituted, together with the Waimapu and Te Puke Ridings of the Tauranga County as at present constituted, such area of supply being indicated within a pink border on P.W.D. 34825, plan A, deposited in the office of the Minister of Public Works at Wellington, in the Provincial District of Wellington.

*System of Supply.*

8. Electrical energy shall be generated in the form of three-phase alternating current at a frequency of 50 cycles per second, and pressure not exceeding 400 volts between phases. This shall be transformed up to 11,000 volts for transmission from the generating-station to the transformer sub-stations.

In the sub-stations it shall be transformed down to 400 volts between phases, and 230 volts between each phase and the neutral for low-tension distribution.

The low-tension distribution shall be on the three-phase four-wire system, one phase wire and the neutral being used for single-phase service.

The supply to street-lighting incandescent lamps and to private consumers for lighting purposes shall be at 230 volts.

*Neutral to be earthed.*

9. The neutral point of one or more of the generators in service shall be earthed.

The neutral point of each secondary distributing system shall be earthed at the transformer.

*Regulation of Pressure.*

10. The pressure shall be maintained within 4 per cent. on lighting-distributing circuits above or below the declared pressure at the consumers' terminals. The Council shall supply a suitable recording voltmeter for this service, and on complaint by any consumer that the variations in voltage exceed these limits, or on the instructions of the Inspecting Engineer, the Council shall connect a recording voltmeter to record the pressure between the lines at their entrance to the consumers' premises, and shall supply to the Inspecting Engineer a chart showing the variations in voltage between the lines at this point for a period of seven consecutive days. If the variations thus recorded exceed the above limits the Council shall take immediate steps to comply with this regulation. If after thirty days a similar chart shows that the above limits of variation in voltage are not complied with a breach of these regulations shall have been deemed to have been committed. If the accuracy of the Council's recording voltmeter is questioned by the consumer a standard instrument shall be supplied by the Inspecting Engineer, the reading of which shall be accepted as final.

*Switchboards.*

11. All switchboards shall be made of and mounted on material that is not inflammable, and no switchboard conductor shall carry electric current at a density exceeding 1,000 amperes per square inch. No conductor at a pressure above 650 volts shall be exposed on the front of any switchboard, and the back of any switchboard carrying exposed conductors at a pressure over 650 volts shall be screened off and accessible only to authorized persons.

All power-house and sub-station switchboards shall be provided with two efficient and independent earth connections connected in parallel, to one of which all frames, instrument-cases, and other metal parts shall be connected. Means shall be provided for testing the resistance between these two connections through the earth. Such tests shall be made at least once a month and recorded.

*Circuit-breakers.*

12. All outgoing feeders and distributors from any transformer house or sub-station shall be provided with automatic circuit-breakers or fuses set to open at 50 per cent. excess current over the rated full load of such feeder or distributor, with a time-limit not exceeding ten seconds.

*Distribution.*

13. The distribution may be carried out either by underground or overhead conductors. Provided that if at any time it is deemed by the Minister to be detrimental to the public safety for the conductors or any particular class of conductors to be overhead, they shall, on receipt of notification to that effect from the Minister and within ten months of such notification, be laid underground, and all consequent and necessary alterations made by and at the cost of the Council.

*Overhead Electric Lines.*

14. Overhead electric lines shall consist of conductors of hard-drawn copper, aluminium, or other material of not less than 0.02 square inch section in spans exceeding 200 ft.,

nor less than 0.0129 square inch section in spans exceeding 100 ft., and not less than 0.0072 square inch section in spans under 100 ft.

The stress in overhead conductors shall not exceed 25,000 lb. per square inch for copper, 12,000 lb. per square inch for aluminium, 34,000 lb. per square inch for steel, and 22,500 lb. per square inch for iron in the extreme case of a temperature of 32° Fahr. and a wind-pressure of 18 lb. per square foot of diametral plane occurring simultaneously. The span between supports and the sag shall be determined to conform with the above limiting stresses.

Where an aerial line crosses a street, the angle between the line and the direction of the street at the place of crossing shall not be less than 60 degrees, and the spans shall be as short as possible. The minimum height of the line shall be 20 ft. above the street-level.

Where an aerial line crosses or is in proximity to any metallic substance, precautions shall be taken against the possibility of the line coming into contact with the metallic substance, or of the metallic substance coming into contact with the line by breakage or otherwise.

No overhead low-pressure electric lines shall come within 2 ft. of any aerial wires or cables belonging to another authority except where it may be permitted to pass either set of wires between other wires at a pole or support.

Electric lines at low pressure shall be insulated throughout with triple braiding impregnated with waterproof compound, provided that where circumstances permit the lines may, with the consent of the Minister, be bare.

Earthed neutrals may in all low-pressure circuits be bare.

Electric lines at high pressure shall be covered with vulcanized rubber at least 600-megohm grade, provided that where circumstances permit the lines may, with the consent of the Minister, be bare.

Electric lines at extra high pressure shall be bare.

High-pressure and extra-high-pressure lines shall not be carried on the same poles or supports, except in special circumstances and with the consent of the Minister.

Low-pressure and extra-high-pressure lines shall not be carried on the same poles or supports, except in special circumstances and with the consent of the Minister.

All overhead electric lines at low pressure shall be carried at a minimum height of 18 ft. above the ground.

All overhead lines at high pressure shall be carried at a minimum height of 20 ft. above the ground.

All overhead lines at extra high pressure shall be carried at a minimum height of 23 ft. above the ground.

At road crossings the above minimum heights shall be increased in each case by 2 ft.

*Telephone Wires on Transmission-line Poles.*

15. The telephone wire or wires shall be of hard-drawn copper or other material, and shall not be less than No. 12 standard wire gauge. The minimum clearance between the lowest point of the span and the ground shall be 18 ft.

The wire shall be suitably guarded against lightning, and shall be fused. Such arrangements shall be made where the telephone is placed as will prevent the possibility of injury resulting to any person using the telephone should a power-wire come into contact with the telephone wire or from leakage.

*Supports for Overhead Lines.*

16. All aerial wires shall be attached to suitable insulators, carried on cross-arms of suitable material and cross-section, and they shall be so attached to the insulators or guarded that they cannot fall away from the support. Conductors covered with insulating material shall be so attached that their insulation shall not be impaired where they are secured to the insulator.

Every support for an aerial line shall be of durable material and properly strengthened against forces due to wind-pressure, change of direction of line, and unequal length of span. The factor of safety of such supports outside borough limits shall be such that the moment resulting from a wind-pressure of 30 lb. per square foot and 18 lb. per square foot of diametral plane upon a cylindrical surface upon the lines and supports shall not exceed one-half of the applied moment which is sufficient to cripple the support if of iron, steel, or ferro-concrete, and shall not exceed one-fourth of the breaking stress in the case of wood. The factor of safety of supports within the borough limits shall be four in the case of steel, iron, or ferro-concrete, and five in the case of wood, calculated upon the ultimate strength of material under the same conditions of wind-pressure as hereinbefore mentioned.

The distance between supports within borough limits shall not exceed 200 ft. except by approval of the Minister.

*Location of Overhead Lines.*

17. Except by permission of the Minister of Telegraphs, or subject to an agreement between the Post and Telegraph Department and the Council, all overhead electric lines shall

be placed on the opposite side of the road or street to that on which any telegraph lines exist; and where the erection of the electric lines necessitates the alteration of any telegraph lines, and such alteration is approved by the Minister of Telegraphs, the cost of the alteration shall be borne by the Council.

In running the lines authorized by this license through or along any road where no telegraph line exists the Council shall keep to one side of the road, and in running wires to the opposite side of the road the Council shall arrange so as to interfere as little as possible with the route of any future telegraph lines.

#### *Lines not in Use.*

18. An aerial line shall not be permitted to remain erected after it has ceased to be used for the supply of energy unless the Council intends within a reasonable time again to take it into use.

#### *Post and Telegraph Crossings.*

19. Where electric lines are permitted to be supported on telegraph poles all details of the supports and of the insulation shall be approved by the Minister of Telegraphs, who may, on giving to the Council reasonable notice in that behalf, require the Council to remove such electric lines at any time from such telegraph poles, and without payment of any compensation to the Council.

At telegraph crossings the electric lines shall pass over or under the telegraph wires or cables as may be decided by the Minister of Telegraphs, and shall be at least 2 ft. distant. Where it is impracticable to cross above the electric lines may be taken under or through, but when permitted to be taken through the crossing shall be made at a pole in a manner to be approved by the Minister of Telegraphs.

Where the electric lines intersect telegraph lines the latter shall be suitably insulated if deemed necessary, and when the crossing is above and near a pole the spans on each side of the pole may be insulated. This insulation shall be effected at the expense of the Council in cases where the telegraph lines existed previously to the erection of the electric lines.

Where high-pressure electric lines intersect telegraph lines the former shall be insulated with not less than 600-megohms grade of vulcanized rubber, and the low-pressure wires with weatherproofed insulation as prescribed in section 14.

Where deemed necessary efficient guard-wires, effectively earthed, or other approved protective devices, shall be erected in a manner to meet with the approval of the Minister of Telegraphs at all crossings or places where electric lines intersect telegraph lines, or at any place where such protection may be considered necessary.

The Council shall bear the expense of such guard-wires in all cases where an electric line intersects any telegraph line previously existing.

Where overhead electric lines at extra high pressure cross telegraph lines the electric lines shall be subject to special conditions as may be required by the Minister of Telegraphs in each of such crossing.

The cost of all necessary guard-wires and special provisions required to comply with this clause shall be borne by the Council when the telegraph lines are erected before the electric lines. In other case the Council, on receipt of notice from the local officer of the Telegraph Department that it is proposed to run a telegraph line along the route, shall forthwith make the necessary changes required to comply with this clause at any points at which electric lines already cross such routes.

#### *Earth-wires.*

20. Earth-wires, where led down poles, shall be protected by a casing for a distance of 8 ft. from the ground. A test shall be made every three months, and oftener if required, of all earths, to ensure that the earth-wire is intact and that the earth is effective.

#### *Railway Crossings.*

21. No work of any nature shall be erected or constructed in pursuance of this license upon, over, or under any part of the Government railways until the Council has obtained the consent of the Minister of Railways thereto, as required by section 4 of the Government Railways Amendment Act, 1910 (No. 2).

#### *Service Connections.*

22. Service connections from aerial lines shall be taken direct from insulators, and shall not be tapped off between insulators. They shall be led as directly as possible to insulators firmly attached to some portion of the consumer's premises which is not accessible to any person without the use of a ladder or other special appliance.

Every portion of any aerial line which is outside a building, and is within 7 ft. from any part of the building, shall be rubber-insulated.

#### *Facilities for Service Connections.*

23. Where electric lines are on one side of the road and electric-telegraph lines on the other, and service is required to be given from either to the other side of the road, the Council and the Minister of Telegraphs shall give to each other reasonable facilities as far as possible to effect supply.

#### *Arc Lamps.*

24. All arc lamps shall be so guarded as to prevent pieces of ignited carbon or broken glass falling from them, and shall not be used in situations where there is any danger of the presence of explosive dust or gas.

Arc lamps used in any street for public lighting shall be so fixed as not to be in any part at a less height than 10 ft. from the ground.

Arc lamps used in any street for private lighting shall be so fixed as not to be in any part at a less height than 8 ft. from the ground, and shall be so screened as to prevent risk of contact with persons.

Arc lamps must be insulated from earth and be fixed so that they cannot swing into contact with any substance, metallic or otherwise, that might connect them to earth. They may be run in series, and at any available voltage up to 400 volts. Resistances for the regulation of arc lamps, if exterior to the lamp, shall be mounted on incombustible bases, shall be so placed that they cannot by conduction or radiation set fire to any contiguous materials, and shall be of ample size to safely carry the maximum current that will normally flow through them. Each arc-lamp circuit shall be provided with a fuse on each pole. Interior arc lamps shall also be provided with a switch on each circuit.

#### *Maintenance.*

25. Every aerial line, including its supports, its conductors, and their insulating covering, and all structural parts and electric appliances and devices belonging to or connected with the line, shall be duly and efficiently maintained as regards both electrical and mechanical conditions.

#### *High-pressure Transformers.*

26. Where high-pressure transformers are attached to poles they shall be placed so as to be inaccessible except by the use of a ladder or other special appliance. Where high-pressure transformers are placed in sub-stations all high-tension conductors shall be thoroughly insulated or protected from accidental contact, and the sub-station shall be entirely inaccessible to unauthorized persons. Where high-pressure transformers are placed on consumers' premises the whole of the apparatus shall be enclosed or rendered inaccessible except to authorized persons. The cases of all transformers shall be earthed by means of a copper conductor at least 0.022 square inch in section.

Where cables are led to and from transformer-enclosures they shall be protected on the poles by being run in iron pipes, which shall be effectively earthed.

#### *Lightning-arresters.*

27. Where any portion of any electric line or support for an electric line is exposed to such a position as to be liable to injury from lightning it shall be efficiently protected against such liability.

#### *Underground Conductors.*

28. Underground conductors shall be thoroughly insulated, and shall be protected from mechanical damage by steel armouring, or by wooden boxing, or earthenware, stoneware, concrete, iron, or fibre conduits or pipes. They shall be laid wherever possible under the footpaths, and with a cover of at least 12 in. from the surface of the pavement. Where laid under any other part of the road such cover shall be increased to 2 ft.

All conduits, pipes, casings, and street boxes used as receptacles for electric lines shall be constructed of durable material, and they shall be of ample strength to prevent damage from heavy traffic, and reasonable means shall be taken to prevent the accumulation of gas in such receptacles.

Where any underground line crosses or is in proximity to any metallic substance special precaution shall be taken against the possibility of any electrical charging of the metallic substance from the line or from any metallic conduit, pipe, or casing enclosing the line.

#### *Earthing Conduits.*

29. All metallic conduits, pipes, or casings containing an electric line shall be efficiently earthed, and shall be so jointed and connected across all street boxes and other openings as to make good electrical contact throughout their whole length.

*Street Boxes.*

30. The covers of street cable-boxes shall be so secured that they cannot be opened except by means of a special appliance. Street boxes shall be either filled solid with cable compound or oil, or if not so filled shall be inspected from time to time for the presence of gas, and suitable action shall be taken to check its influx and accumulation.

*Insulation of Electric Wires.*

31. Every main, either overhead or underground, shall be tested for insulation after having been placed in position and before it is used for the purposes of supply, the testing pressure being at least 500 volts, and the Council shall duly record the results of the tests of each main or section of a main and forthwith forward a report thereon to the Public Works Engineer at present stationed at Tauranga.

The insulation of every complete circuit used for the supply of energy, including all machinery, apparatus, and devices forming part of or in connection with such circuit, shall be so maintained that the leakage current shall not under any conditions exceed one-thousandth part of the maximum supply current. Every leakage shall be remedied without delay. Every such circuit shall be tested for insulation at least once in every month, and the Council shall duly record the results of the tests and forward a report thereof at the end of each month to the Public Works Engineer at present stationed at Tauranga.

*Continuity of Supply.*

32. From and after the time when the Council commences to supply energy in pursuance of this license it shall maintain continuously sufficient power for the use of all the consumers for the time being entitled to be supplied; provided also that, for any purposes connected with the efficient working of the undertaking, the Minister may give permission to the Council to discontinue the supply at such intervals of time and for such periods as he (the Minister) may think expedient. When the supply is so discontinued public notice shall be given, when practicable, of such discontinuance and of the probable duration thereof.

*Supply to Consumers.*

33. The owner or occupier of any premises within the area of supply included in the license shall be entitled to a supply of electrical energy on the following conditions:—

(a.) If within 60 ft. of an electric line belonging to the Council service shall be made free of cost.

(b.) If more than 60 ft. distant to any electric line belonging to the Council, the Council shall run the necessary lines for a distance of 60 ft. free of charge, and the consumer shall pay the cost of the service wires for the balance of the distance.

(c.) If the plant or mains of the Council are insufficient to supply the applicant with electrical energy the service may, with the consent of the Minister, be postponed for a period not exceeding twelve months; otherwise services shall be made within twenty-eight days of the application.

(d.) Every consumer within any part of the area included in the license shall be entitled to a supply of electrical energy on the same terms on which any other consumer in such part of the area is entitled under similar circumstances to a corresponding supply.

(e.) If the nature of the proposed consumption of energy by any applicant is such as is likely to seriously interfere with the maintenance of the constant pressure on the line in accordance with clause 10 the Council may, with the approval of the Minister, require the consumer to install such apparatus as shall enable the conditions of clause 10 to be complied with.

(f.) The Council may require services to be wired or installed by competent tradesmen, but no preference shall be given to services wired or installed by any individual contractor or firm of contractors.

(g.) The charge for electrical energy, if paid within fourteen days of the rendering of a correct account, shall not exceed an average rate of 9d. per unit for lighting purposes and an average rate of 4½d. per unit for motor-power, heating, or cooking purposes, provided that "lighting purposes" shall include the operation of motor generators for lighting purposes. If not paid within the said period of fourteen days the charges shall not exceed 1s. and 6d. per unit respectively.

(h.) No meter rent shall be charged, but a minimum charge may be made monthly, independent of the consumption, not exceeding 2s. 6d. per K.W. or part of a K.W. of maximum capacity of each service. Where more than one meter is required to be installed in one building each meter shall, for the purpose of this clause, be considered an independent service.

(i.) If payment by any consumer is delayed more than thirty days after the date of rendering a correct account

the supply of electricity to such premises may be cut off without notice, and need not be restored until all arrears are paid.

*Service Connections.*

34. The Council shall be responsible for all electric lines or wires, fittings, and apparatus belonging to it or under its control which may be upon a consumer's premises being maintained in a safe condition and in all respects fit for supplying energy.

In delivering the energy to a consumer's terminals the Council shall exercise all due precautions so as to avoid risk of causing fire on the premises.

A suitable safety-fuse or other automatic circuit-breaker shall be inserted in each service line within a consumer's premises as close as possible to the point of entry, and contained within a suitable locked or sealed receptacle of fire-proof construction.

All electric wires and apparatus on a consumer's premises, except such parts as require to be earthed, shall be highly insulated and suitable for the voltage at which the supply is given. They shall be thoroughly protected against injury to the insulation or access of moisture. All electric wires shall be so fixed and protected as to prevent the possibility of electrical discharge to any adjacent metallic substance.

The maximum working current in any conductor shall not exceed the values permitted under the rules of the Institution of Electrical Engineers.

*Insulation on Consumers' Premises.*

35. The Council shall not connect the wires and fittings on a consumer's premises with its mains, or in the case of premises already connected continue the supply from its mains, unless it is reasonably satisfied that the requirements of this license are complied with, that the wiring and fittings are suitable for the voltage at which supply is given, that the installation is generally in accordance with the requirements of good practice, and that the connection or continuance of supply would not cause a leakage from those mains and fittings exceeding one ten-thousandth part of the maximum supply current to the premises.

For the purpose of satisfying itself that the requirements of this license are being observed in so far as they apply to wires on consumers' premises, the Council may require that notice must be served upon it of the intention to install wires, fittings, lamps, motors, or other apparatus on any such premises, and may inspect and test the same during any reasonable hours while the installation of such is in progress.

*Testing Consumer's Installation.*

36. If the Council is reasonably satisfied, after making all proper examination on the completion of the installation, by testing or otherwise, that the wiring and fittings are not suitable for the voltage being employed, or that a leakage exists at some part of a circuit of such extent as to be a source of danger, and that such leakage does not exist at any part of the circuit belonging to the Council, or that any other requirements of this license are not being complied with, then and in such case any officer of the Council duly authorized by it in writing may, for the purpose of discovering whether the leakage exists at any part of a circuit within or upon any consumer's premises, or whether the wiring is suitable and the general requirements of the license are complied with, by notice require the consumer, at some reasonable time after the service of a notice, to permit him to inspect and to test the wires and fittings belonging to the consumer forming part of the circuit.

If on such testing and inspection the officer discovers a leakage from the consumer's wires exceeding one ten-thousandth part of the maximum supply current to the premises, or that the requirements of this license are not properly conformed to, or if the consumer does not give all due facilities for inspecting and testing, the Council shall either not commence the supply or shall forthwith discontinue the supply of energy to the premises in question, giving immediate notice to the consumer of its reasons for not commencing or for discontinuing the supply, and in either case supply shall not be given until the Council is reasonably satisfied that the installation is in conformity with the requirements of this license.

If any consumer is dissatisfied with the action of the Council in refusing to give, or in discontinuing, or in not recommencing the supply of energy to his premises, the wires and fittings of that consumer may, on his application to the Minister and on payment of the cost, be inspected and tested by the Inspecting Engineer.

This provision shall be endorsed on every notice given under the provisions of either of the two preceding paragraphs.

*Motor Installations.*

37. The frame of all motors supplied at 230 or 400 volts shall be connected to an efficient earth by a copper conductor, which shall not be less than 0.022 square inch in sectional area. All metal casings of switches, resistances, fuses, cables, and wires shall be efficiently earthed in a similar manner.

Every motor must be controlled by an efficient quick-break ironclad switch suitable to prevent arcing, and conveniently placed so that the person in charge of the motor can cut off wholly the supply from the motor and all devices in connection therewith.

Efficient fuses or other automatic cut-out must be provided to efficiently protect the conductors on each circuit from excess of current.

Every precaution shall be taken in choosing positions for and in the wiring and setting-up of motors, and the necessary devices in connection therewith, so that there shall be no danger of fire being caused by their normal or abnormal action or of shock being sustained in the ordinary handling thereof.

Terminals of motors supplied at 230 or 400 volts must be so guarded that they cannot be accidentally touched or short-circuited.

The insulation resistance of each motor-circuit, including all devices necessary for the working of the motor, shall be not less than 1 megohm to earth when all metal parts that are required to be connected to earth are so connected.

A printed notice shall be fixed in a conspicuous position at every motor and switchboard forbidding unauthorized persons to touch the motors or apparatus.

*Plans.*

38. The Council shall, before erection or construction of any part of the work hereby authorized is begun, submit for the approval of the Minister such plans and other information showing and describing such work as he may require. In the event of the Council at any time desiring to make alterations to the work involving a departure from the type of construction shown on the approved plans, it shall submit for the Minister's approval plans showing such type of construction as it is proposed to adopt, and with such approval the alterations may be carried out.

*Notice regarding Extensions.*

39. Before commencing the erection of any part of the lines hereby authorized, or the extension or alteration of any line already erected, the Council shall give at least seven days' notice in writing to the Public Works Engineer at present stationed at Tauranga, and also to the District Engineer of the Post and Telegraph Department in Auckland, or his deputy, of its intention to carry out the work, and shall forward to the Minister of Public Works a locality plan showing the route of any extension.

*Time of Construction.*

40. The Council shall, within six months from the date of this license, make a substantial commencement of the works to which this license refers, and shall proceed continuously and energetically with the construction of all such works until they are completed.

*Notice of Completion.*

41. The Council shall, prior to the completion of the said works or any separate portion thereof, give to the Minister at least one month's notice in writing of the estimated date of each completion.

*Right to enter Land, &c.*

42. (a.) The Council shall have the right at any time or times during the continuance of this license, with the consent of the Minister, to enter upon any road, railway, or other land, whether vested in or occupied by the Crown or any other person or body corporate, and there to construct, erect, lay down, maintain, renew, or repair all such lines, poles, and other things as are required for the purpose of this license.

(b.) Notwithstanding anything hereinbefore contained the Council shall not be entitled to erect, maintain, or use any electric line within the Waimapu and Te Puke Ridings of the County of Tauranga except subject to such conditions, not inconsistent with the provisions of this license, as may from time to time be agreed upon between the Council and the Tauranga County Council; but this license shall not give to the Council a monopoly for the erection of electric lines within the said ridings.

*Commencement of Supply.*

43. The Council shall not use the said electric lines or permit the same to be used for any purpose until the Minister

has given to it notice in writing that he has received from the Inspecting Engineer a certificate that the works hereby authorized have been satisfactorily carried out.

*Inspection of Works.*

44. The Minister may at any time order an inspection to be made of the lines and wires of the Council. If any defect is found to exist it must be remedied forthwith, and if serious in the opinion of the Inspecting Engineer the Minister may, on receipt of the report, direct the Council to at once cease transmitting energy either over the whole of the lines and wires or over any part thereof as to him may seem fit until such defect is repaired or remedied. The cost of such inspection shall be borne by the Council.

*Compliance with Conditions.*

45. For the purpose of ascertaining whether the conditions of this license are being faithfully complied with by the Council, the Minister, or any person appointed by him on that behalf, may at all reasonable times enter on the land and works, and inspect the same.

*Surrender of License.*

46. The Council may at any time, with the consent of the Minister, surrender this license, and shall thereupon, if so required by the Minister, remove from the ground all removable equipment, machinery, buildings, poles, transmission-lines, and other plant herein authorized to be installed or provided. If the Council neglects or fails so to remove the said plant within twelve months after being required so to do, such equipment, machinery, buildings, poles, lines, and other plant shall, without payment or compensation, vest in and become the property of the Crown.

*Assignment.*

47. This license and the benefits and obligations hereunder shall not be assigned by the Council without the express consent in writing of the Minister first had and obtained, subject to such limitations and conditions as he thinks fit to impose.

*Default and Penalty.*

48. If the Council fails to comply with any of the conditions of this license the Minister may, by notice in writing, require the Council within thirty days to remedy the default specified in that notice; but it shall not be held to have committed default for any failure to maintain power continuously if such failure is due to the breakdown of machinery or other accident, unless such breakdown or accident is proved to be due to negligence on the part of the Council; and if the Council fails to comply with the terms of the notice within the said period it shall be liable to a penalty of £20, to be recoverable by or on behalf of the Minister as a debt due to the Crown. The recovery of a penalty under this license shall not affect the liability (if any) of the Council to pay or make compensation in respect of any damage or injury which may be caused by reason of the default.

*Revocation of the License.*

49. Notwithstanding anything in the last preceding clause of the conditions, if the Council fails to comply with the terms of any such notice for ninety days after the receipt thereof the Governor in Council may thereupon revoke this license without further notice.

*Public Works Compensation.*

50. Nothing herein contained shall be deemed in any way to interfere with, affect, or abridge any rights or powers vested in His Majesty the King, or in the Governor on his behalf, or the Minister, or any other person under any Act of the General Assembly authorizing the construction, management, or working of any public work, nor shall His Majesty, or the Governor, or the Minister, or any other person be liable to pay to the Council any compensation for injury done to the works herein authorized by the construction, management, or working of any such public work as aforesaid, or for the loss occasioned thereby, or for the exercise of any such right or power as aforesaid.

*Electric Lines in Tauranga County*

51. Notwithstanding anything hereinbefore contained, the Council shall not be entitled to erect, maintain, or use any electric line within the Tauranga County, except subject to such conditions, not inconsistent with the provisions of this license and the regulations relating thereto, as may from time to time be agreed upon between the Council and the Tauranga County Council.

*No Monopoly.*

52. Nothing in this license, or otherwise, shall be deemed to give the Council a monopoly or the exclusive right to supply electricity within that portion of the area of supply situated outside the Borough of Tauranga.

*Commencement of License.*

53. This license shall come into force on and after the publication thereof in the *New Zealand Gazette*.

*Recreation Reserve in Auckland Land District brought under Part II of the Public Reserves and Domains Act, 1908.*

LIVERPOOL, Governor.  
ORDER IN COUNCIL.

At the Government House at Wellington, this fifth day of October, 1914.

Present :

HIS EXCELLENCY THE GOVERNOR IN COUNCIL.

BY virtue of the powers and authorities vested in me by the twenty-sixth section of the Public Reserves and Domains Act, 1908, I, Arthur William de Brito Savile, Earl of Liverpool, the Governor of the Dominion of New Zealand, by and with the advice and consent of the Executive Council of the said Dominion, do hereby order and declare that the reserve for recreation in the Auckland Land District described in the Schedule hereto shall be and the same is hereby brought under the operation of and declared to be subject to the provisions of Part II of the said Act; and such reserve shall hereafter be known as Herekino Domain, and be managed, administered, and dealt with as a public domain.

SCHEDULE.

HEREKINO DOMAIN.

ALL that area in the Auckland Land District, containing 6 acres 3 roods, more or less, being Section 76, Block VII, Whangape Survey District. Bounded towards the north by Sections 24 and 75, Block VII, Whangape Survey District, 811.1 links; towards the east by Section 25 of Block VII aforesaid, 506.3 links; towards the south and again towards the east by Section 78 of the aforesaid block, 125 and 234.4 links respectively; towards the south-east by a public road, 740.4 links; and towards the west by Sections 77 and 24 of the aforesaid block, 1117.6 links: be all the aforesaid linkages more or less: as the same is delineated on the plan marked L. and S. 1911/1530A, deposited in the Head Office, Department of Lands and Survey, at Wellington, and thereon edged red. (Auckland Plan 17542, blue.)

J. F. ANDREWS,  
Clerk of the Executive Council.

*Revocation of an Order in Council under Section 296 of the Native Land Act, 1909.*

LIVERPOOL, Governor.  
ORDER IN COUNCIL.

At the Government House at Wellington, this fifth day of October, 1914.

Present :

HIS EXCELLENCY THE GOVERNOR IN COUNCIL.

WHEREAS by section two hundred and ninety-six of the Native Land Act, 1909, it is enacted that any Order in Council made under Part XVI of that Act, or under Part II of the Native Land Settlement Act, 1907, may be at any time revoked, either wholly or as to any part or parts of the land included therein, by the Governor by Order in Council; and thereupon the land so subject to that Part of that Act shall, to the extent of that revocation, cease to be so subject: No land shall by reason of any such order of revocation cease to be subject to that Part of that Act at any time during the continuance of the term of any lease of that land granted by a Maori Land Board under that Part of that Act (including in that term the term of any renewal to which the lease is entitled):

And whereas a parcel of land known as Nuhaka 2D 2B 9 has, by an Order in Council dated the eighteenth day of February, one thousand nine hundred and eight, been brought under the provisions of Part XVI of the Native

Land Act, 1909: And whereas application has been made to revoke the said Order in Council in so far as it affects the said parcel of land:

And whereas the Tairāwhiti District Maori Land Board recommends accordingly: And whereas it is expedient so to do:

Now, therefore, His Excellency the Governor of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby revoke the said Order in Council in so far as it affects Nuhaka 2D 2B 9 Block; and it is hereby declared that this Order in Council is made under the provisions in that behalf of the Native Land Act, 1909, and shall operate accordingly as a consent of the Governor in Council to the proceedings hereby authorized.

J. F. ANDREWS,  
Clerk of the Executive Council.

*Validating Biennial Election of Members of Manguwaka Town Board.*

LIVERPOOL, Governor.  
ORDER IN COUNCIL.

At the Government House at Wellington, this third day of October, 1914.

Present :

HIS EXCELLENCY THE GOVERNOR IN COUNCIL.

WHEREAS, pursuant to section twenty of the Town Boards Act, 1908, a general election of members of the Manguwaka Town Board was to have been held on the sixteenth day of September, one thousand nine hundred and fourteen:

And whereas the Returning Officer gave public notice of such election on the tenth day of September, one thousand nine hundred and fourteen, and in such notice appointed the twelfth day of September, one thousand nine hundred and fourteen, for the nomination of candidates, such notice and appointment not being within the times fixed by section seven of the Local Elections and Polls Act, 1908.

And whereas the number of candidates did not exceed the number of vacancies to be filled, and the Returning Officer did on the day appointed for nomination declare such candidates to be duly elected:

And whereas it is expedient to validate the election of such candidates:

Now, therefore, His Excellency the Governor of the Dominion of New Zealand, in pursuance and exercise of the powers conferred upon him by section twenty-four of the Local Elections and Polls Amendment Act, 1913, and of every other power and authority enabling him in that behalf, and acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby validate the said election of the said candidates so declared to have been elected, and doth declare that the said election shall not be called in question by reason only of the irregularities aforesaid.

J. F. ANDREWS,  
Clerk of the Executive Council.

*Land temporarily reserved for an Agricultural and Pastoral Showground in Block X, Hukerenui Survey District, Auckland Land District.*

LIVERPOOL, Governor.

*Education Reserve in Southland Land District for Lease by Public Auction.*

District Lands and Survey Office,  
Invercargill, 23rd August, 1914.

NOTICE is hereby given that the undermentioned reserve will be offered for lease by public auction, for a term of ten years, at the District Lands and Survey Office, Invercargill, at 11 o'clock a.m. on Wednesday, the 28th day of October, 1914, under the provisions of the Education Reserves Act, 1908, and amendments, and the Public Bodies' Leases Act, 1908.

## SCHEDULE.

## EDUCATION RESERVE.—WALLACE COUNTY.—TAKITIMO SURVEY DISTRICT.

LOTS 5, 6, and 7 of Run 166A: Area, 7,905 acres; upset annual rent, £300; term, 10 years.

Weighted with £1,321, valuation for improvements.

*Description.*

The country lies at an elevation of between 600 ft. and 1,200 ft. above sea-level, and alternates from flat and undulating land to downs and hills.

Much of it can be improved by cultivation and surface sowing, while the flats along Grassy Stream are good agricultural land. With the exception of some 100 acres around the home tead, which have been cultivated, the whole of the area is in its natural state, being mostly silver tussock and flax country, interspersed with areas of fern and manuka; and along the bank of the Waiau River there are some 130 acres of tawhai and totara bush suitable for fencing-material.

The whole of the improvements are in good order, all the buildings having been erected within the last two years and a half.

The whole of the country is well watered, and is very suitable for both sheep and cattle farming. The homestead is distant from Tuatapere Railway-station twenty miles, and from Otautau Railway-station twenty-nine miles, both by good gravelled roads, with the exception of the last eight miles and a half, which are at present only formed. It is proposed to bridge the Wairaki River within the next twelve months.

*Abstract of Conditions.*

1. Rent from 1st April to 30th June, 1915, at rate offered, and lease and registration fees, to be paid on the fall of the hammer. Valuation for improvements to be paid before purchaser gets possession.
2. The term of the lease is ten years from 1st March, 1915, without right of renewal.
3. The tenant to pay all rates and taxes.
4. The Land Board reserves the right to lay off roads through the run where required.
5. The lessee to be allowed (with the consent of the Land Board) to cultivate for station purposes only, but not for sale, a reasonable area; provided that not more than one white crop and one green crop be taken off the land. Such land then to be laid down with good and sound grass and clover seeds of the descriptions and proportions usually sown in the district and most suitable for the land, and to remain in grass for a period of three years, after which period the same process of cultivation may be repeated. All such cultivation to be subject to inspection by the lessor or his agent.
6. Lessee to have the right to the bush for fencing and firewood, but not for sale.
7. Three months before the expiration of the lease a valuation to be made by arbitration of all improvements consisting of necessary buildings and fencing, the amount of such valuation to be payable by the incoming to the outgoing tenant. In the event of the lessee desiring to effect improvements (fencing and buildings) in addition to those already on the ground, it will be necessary to obtain the Land Board's permission, otherwise such improvements will not be made a subject of valuation.
8. Lessee to be liable to forfeiture if conditions violated.
9. Possession will be given on 1st April, 1915.

SCHOOL FOR THE DEAF, NEAR SUMNER,  
CHRISTCHURCH.

UNDER THE CONTROL AND SUPERVISION OF THE EDUCATION  
DEPARTMENT.

Director: Mr. J. E. STEVENS.

**F**OR Deaf Children of sound intellect. The pupils are taught to understand and use ordinary speech. The full charge for board and education is £40 a year, but less is accepted from parents who cannot afford to pay this amount. In case of necessity admission is free.

By the Education Act it is compulsory for deaf children to come under instruction at the age of six, and to continue until the age of twenty-one unless the Education Department previously grants exemption. Though a child is, as a rule, best fitted to begin the school course at the age of six, advice should be obtained as soon as any sign of deafness is observed.

The following classes of deaf children are admitted to the School for the Deaf (sound intellect being always a necessity):—

1. Children born deaf, or who have lost their hearing before learning to speak.
2. Children who can hear a little, but are too deaf to be taught in a public school.
3. Children who have lost their hearing after having learned to speak.

The Act imposes upon every parent, teacher of a school (either public or private), constable, or officer of a charitable or kindred institution who is aware of the place of residence (either temporary or permanent) of a deaf child, and the householder in whose house any such child resides, an obligation to send notification of the fact to the Minister of Education, giving the name, age, and address of the child; and any neglect or failure to comply with this provision involves liability to a fine.

Information and advice may be obtained from the Director, or from

THE SECRETARY FOR EDUCATION,  
Wellington.

THE PATENTS, DESIGNS, AND TRADE-MARKS  
ACT.

PRICE, 2s.

**C**OPIES of the above Act are now procurable from the
