- (c.) When, in the opinion of the Minister of Telegraphs, it is considered necessary that such bare electric lines at any crossing should be replaced by electric lines insulated in the manner prescribed in the first part of this clause, the licensee shall, at his own expense, insulate such bare electric lines when requested to do so by the Minister of Telegraphs.
- (d.) When, in the opinion of the Minister, it is necessary in the interests of the public safety that the use of bare electric lines should be discontinued, the licensee shall, upon receiving notice from the Minister, substitute therefor electric lines covered in the manner prescribed by the first part of this clause.
- (e.) Low-pressure wires, whether braided or bare, which at any portion of their length are carried on the same poles or supports as bare high-pressure lines or extra-high-pressure lines shall be deemed to be "infected" throughout their entire length by such high-pressure

or extra-high-pressure lines, and shall be subject to the regulations governing high-pressure and extra-high-pressure lines respectively.

- (f.) In the event of any dispute as to whether or not telegraph lines are menaced by the electric lines, the decision of the Minister of Telegraphs shall be final.

7. WIRING CONSUMERS' PREMISES.—MONOPOLY FORBIDDEN.

The licensee shall not grant or agree to grant any company, firm, or person the sole right to supply or erect the electric wiring on any consumer's premises, nor shall any consumer be required to purchase from the licensee or his assigns any material or apparatus for installing the electric wiring on such premises, or to have the work carried out by the licensee or his assigns, as a condition precedent to a supply of electrical energy being given by the licensee to the consumer.

8. DURATION OF LICENSE.

This license shall, unless sooner determined in accordance with the provisions hereinafter expressed, continue in force for a period of forty-two years from the date hereof. Upon the expiry of the said term, or upon the sooner determination of this license by revocation or otherwise, all rights hereby granted to the licensee shall thereupon cease and determine; but such expiration or determination shall not relieve the licensee of any liability theretofore incurred under this license.

Customs Department,
Wellington, 11th June, 1919.

W. B. MONTGOMERY,
Comptroller of Customs.

Notice to Mariners.—No. 30 of 1919.

Marine Department,
Wellington, N.Z., 10th June, 1919.

THE following Notices to Mariners, which have been received from the Hydrographic Office, London; the Hydrographic Office, Washington; the Presidency Port Officer, Madras; and the Department of Trade and Customs, Melbourne, are published for general information.

GEORGE ALLPORT,
Secretary.

GENERAL INFORMATION WITH REGARD TO WIRELESS TIME-SIGNALS.

THE accompanying list of wireless time-signals is intended to provide, in a form suitable to give all information required by the wireless operator, a complete and up-to-date list of all time-signals issued by wireless stations throughout the world. The details showing the method of transmission of any given time-signal, will be found in the "Admiralty List of Lights and Time-signals" or in the "International List of Radio Telegraph Stations" (The Berne List).

The times given in the 4th column of the list are expressed in the 4-figure notation employed for signalling during the

war. The term "G.M.T." here means the civil mean time of the meridian of Greenwich, with the day commencing at midnight and the hours reckoned from 00 to 23. Where two times are joined by a hyphen, the times denote respectively the beginning and end of the signal.

Most of the wireless time-signals at present transmitted are sent by means of an automatic arrangement operated by the pendulum of a chronometer situated at some observatory. In such cases absolute reliance may be placed upon the accuracy of the signal. There are, however, many stations in the world which are very suitably situated for transmitting time-signals to ships which could otherwise not receive them, where it would be difficult or impossible to establish an automatic system. In such cases "hand" signals may be provided; but in general these signals should not be trusted to be accurate within closer limits than about two seconds.

It is hoped that all wireless time-signals will eventually be standardized, so that there shall be only two kinds of signals transmitted, the automatic signals being all alike and quite distinctive from the hand signals. It is further expected that arrangements will be made for all time-signals to be transmitted at times so selected that a ship with only one wireless operator will be able to read them. A similar scheme for wireless weather bulletins is being evolved.

NOTE.—This notice will be subject to revision from time to time.

WEST COAST.—BOMBAY HARBOUR APPROACH.—LIGHT-VESSEL
ESTABLISHED.

An unwatched light-vessel showing an *occulting white* light every 15 seconds—thus, light 10·5 seconds, eclipse 4·5 seconds—has been established in the approach to Bombay Harbour, in (approximately) 19° 6' N., 72° 23' E. The light has a luminous power of 1,000 candles, is exhibited 32 ft. above the water, and visible 11 miles.

The hull of the vessel is painted red with "BOMBAY FLOATING LIGHT" on the sides. She carries a tower with ball.

CAUTION.—Owing to the mechanism of the light being out of order, the flashes are not regular or of such long duration; they are cut off and may become obscured by the rolling of the vessel.

EAST COAST.—BAY OF BENGAL.—MADRAS HARBOUR.—
RE-EXHIBITION OF TEMPORARY LIGHT.

The temporary fixed red light referred to in former Notice to Mariners of 1918 has been replaced, and will be exhibited from to-day, the 8th March, 1919.

UNITED STATES.

ATLANTIC AND GULF COASTS.

Former Notice hereby cancelled.

ATLANTIC COAST.

Nets and Defensive Sea Areas.

Vessels approaching a port of the United States may expect to find patrol vessels some distance off shore as well as close to the harbour entrance.

All incoming vessels must be identified before being permitted to proceed.

Upon approaching a port or defensive sea area where vessels are stationed the incoming vessel should obtain from the patrol a pilot or information that will enable said vessel to proceed. No vessel should proceed until identity has been established and permission has been given by the patrol.

Harbour entrance patrol vessels, in addition to the regular commission pennant, fly the jack forward during the day, and may show three lights—*white, red, white*—in a vertical hoist at night.

Directions from these boats must be obeyed, as they are in possession of the latest information regarding the nets, mines, and channels.

Speed limit in defensive sea areas is five knots.

Merchant vessels must show their national colours, and the International Code signal designating their names. They will receive pilots or instructions from the patrol vessels.

An incoming naval vessel must exchange recognition signals, and after having passed the outer limits of a defensive sea area shall proceed as directed. Should the shore defences make the demand signal, or other inquiry regarding the identity of the vessel, the proper answer must be given.

No vessels are permitted to pass through defensive sea areas except those which have been given authority to do so.

Recognition signals need not be exchanged with vessels on the inner side of defensive sea areas.

When demand is made by any fort, shore station, or patrol vessel a naval vessel approaching from seaward shall immediately answer the demand by making the prescribed recognition signal.

When the identity of the vessel is already known to the fort, shore station, or patrol vessel the demand may be omitted. Coast-defence commanders will consider as hostile any vessels attempting to enter without making recognition signals when demanded.

I. BOSTON HARBOUR.

The following regulations have been published for the information and guidance of all persons having control of vessels, other than naval vessels, entering the defensive sea area of the Port of Boston.

The designated entrance to the defensive sea area of the Port of Boston is the Boston light-vessel. The outer limit of the defensive sea area of the Port of Boston is a line drawn from Strawberry Point to Spouting Horn.

Vessels desiring to enter the Port of Boston will, on approaching the designated entrance, fly their national colours together with their International Code number and speak the official pilot-boat stationed between the Graves light-and-whistle buoy and Boston light-vessel, and there obtain permission to cross the defensive sea area, which will be given in the nature of a password or pass letters. Vessels speaking the pilot-boat will slow down to such speed as will give ample time to answer routine inquiries from the pilot-boat. Vessels receiving permission to cross the defensive sea area will proceed to the vicinity of Finns Ledge buoy and speak the patrol-boat stationed at that point, giving the password or letters received from the pilot-boat, and receive instructions, if necessary, before passing in through the gate in the submarine net. In case the pilot-boat is not on her station, or if by reason of thick weather she cannot be seen by the approaching vessel, the latter may proceed to the patrol-boat stationed in the vicinity of Finns Ledge buoy. At that point the authority of the vessel to proceed, or to go outside and anchor, will be decided by the station patrol-boat.

Vessels will answer hails from patrol-boats within the defensive sea area by giving the password or letters obtained from the pilot-boat and answering any routine questions that may be asked, slowing down if necessary.

No vessel will attempt to pass in through the gate in the submarine net without first speaking the patrol-boat stationed in the vicinity of Finns Ledge buoy. After passing in through the gate in the submarine net all vessels will proceed to the station vessel on the inner limits of the defensive sea area—*i.e.*, half a mile west of Deer Island light—and receive permission to proceed, or to anchor, and any other instructions that may be necessary.

Vessels desiring to cross the defensive sea area outward bound will speak the station-boat at the inner limits—*i.e.*, half-a-mile west from Deer Island light—and there obtain permission and the necessary password or letters and instructions as may be necessary.

Vessels crossing the defensive sea area without the password or letters may be required to return to the station-boat—*i.e.*, inbound, the pilot-boat stationed between the Graves light-and-whistle buoy and Boston light-vessel; outward bound, to the station-boat half a mile west of Deer Island light.

Speed of vessels within the limits of the defensive sea area is limited to 5 knots.

Naval vessels will use such force as may be necessary to insure compliance with the above regulations.

II. NEW YORK AND APPROACHES.

Vessels bound to New York from Chesapeake Bay, after reaching the parallel of lat. 40° 14' N., should keep to the eastward of a line drawn in a 0° (N. 10° E. mag.) direction through Ambrose light-vessel until Scotland light-vessel bears 293° (N. 57° W. mag.), when course may be shaped for the entrance.

The area to the southward and westward of the lines mentioned above is entirely prohibited to vessels from sunrise to sunset; at night this area is not restricted.

Net N 31 is across The Narrows in New York Bay at Fort Hamilton, where the U.S.S. "Amphitrite" is moored as station-ship. The gate is at the western end. All vessels must have a regular licensed pilot, except public vessels and such coastwise shipping as may be authorized by law not to take local pilots.

Vessels must comply with the regulations for crossing defensive sea areas while in these waters. Vessels inward bound or outward bound approaching The Narrows must proceed at a moderate speed and keep close to the western side of the channel, passing to the westward of the light-buoy off Quarantine. They must be identified and receive instructions from the station-ship before proceeding.

There is also a patrol vessel off White Stone at which vessels passing that point will be required to stop upon signal.

Variation.—10° W.

III. DELAWARE RIVER.

Net A 41 closes the channel of the Delaware River at Fort Delaware.

Vessels desiring to pass in either direction must obtain permission from the patrol-boats, which will be stationed as follows:—

For incoming vessels, in the channel below Reedy Island.

For outgoing vessels, in the channel off New Castle.

Vessels approaching the patrol-boats must slow or stop until identified, and must show their colours and the International Code letters designating the name.

At night the signal to stop will be a red star fired by the patrol-boat.

When the channel is clear for passage the station-ship off Fort Delaware will show by day the signal T X B, and at night a white light over a red light. This must not be taken as a signal to proceed unless permission has first been given by the patrol-boat.

Vessels must not steam at a speed greater than five knots while passing between the patrol-boat stations as given above, and while in the defensive sea area must steer an accurate course well on New Castle range.

Masters of all vessels outward bound must, before sailing, report to the District Intelligence Officer, Building No. 7, Navy Yard, Philadelphia, for final instructions and permission to proceed.

When reporting masters must bring with them all secret or confidential publications for the purpose of checking the list of the same.

They will be given a special recognition signal, which must be flown from the time of getting under way until outside of Delaware Bay.

IV. CHESAPEAKE BAY.

All defensive nets in Lower Chesapeake Bay have been removed.

PANAMA.

PANAMA CANAL.—MIRAFLORES APPROACH.—BEACONS TEMPORARILY DISCONTINUED.—GAS-BUOY ESTABLISHED.

On account of dredging operations beacons 9 and 11, in the approach to Miraflores Locks, have been temporarily discontinued.

A gas-buoy with pyramidal superstructure, painted black, showing an occulting white light every 2 seconds—thus, light 1 second, eclipse 1 second—will be maintained to mark the edge of the navigable channel.

The channel will be permanently marked when dredging operations are completed.

GAS-BUOY ESTABLISHED.

On 11th February, 1919, a gas-buoy was established to mark the edge of the navigable channel in the southern approach to the Miraflores Locks. The gas-buoy is moored in 36 ft. at mean low water at the intersection of the range formed by beacons 5 and 7 in line and the prolongation of the centre line, west wing wall, Miraflores Locks.

CAUTION.—Mariners are cautioned to give this buoy a berth of at least 75 ft. at low water or when the ranges westward cannot be seen. Owing to the rise and fall of the tide and the current produced by the tide, spilling of the lower chamber, and the opening of the gates at Miraflores Locks, the moorings of this buoy were made of sufficient length to overcome these conditions.

BRAZIL.

RIO DE JANEIRO.—NATIONAL OBSERVATORY.—RADIO TIME-SIGNALS.

In the radio time-signals sent out by the National Observatory of Rio de Janeiro at 11 h. and 21 h. legal time, by means of the Governador Radio Station (call letters SOH) will be observed the following conventions:—

At 10 h. 55 m. is made three times the signal of call (— . — . —) followed by the words "Sinaes horarios Rio de Janeiro," and directly afterwards, three times, the signal of attention (. — — .).

At 10 h. 55 m. 55 s. begins a series of preliminary signals consisting of the letter O of the Morse alphabet—that is, consisting of groups of three dashes—these signals, entirely technical, will terminate at 10 h. 56 m. 50 s.; they are designed for the special use of the observatory, and may, however, be omitted.

At 10 h. 57 m. will begin the time-signals, which will last exactly three minutes and will be as follows:—

D

1. From 10 h. 57 m. 00 s. to 10 h. 57 m. 50 s. signals of warning consisting of a series of the letter X (— . . —). Three long dashes, each of a second's duration, will terminate the minute.

2. From 10 h. 58 m. 00 s. to 10 h. 58 m. 50 s. time-signals made by dash and point, the points corresponding with the exact tens of the seconds. Three long dashes will terminate the minute.

3. From 10 h. 59 m. 00 s. to 10 h. 59 m. 50 s. time-signals, made by two dashes and one point, the points coinciding with the exact tens of the second. Three long dashes terminate the minute, as with the former.

In case an accident should disturb or prevent the emission of the signals at 11 h. and 21 h., these will be repeated a half hour later from 27 m. to 30 m., being joined to the call the word "Correcao."

At 20 h. 55 m. will be made the time-signals corresponding to 21 h., following the same rule.

These signals will be in complete agreement with the rules of the international convention which met in Paris in the year 1912.

CHILE.

VALPARAISO RADIO STATION.—WEATHER INFORMATION SENT DAILY.

From 15th January the Valparaiso Radio Station will transmit once a day with the same wave-length as that by which the hour is given, which is 1,100 meters, the meteorologic conditions of certain points of the coast and of the island Juan Fernandez.

In order that these signals may be received without difficulty by all vessels they will be transmitted very slowly.

The hour of transmission will be 12 h. 00 m., local mean time of the meridian 60° W., corresponding with the meteorological conditions of 10 h. 00 m. of the stations indicated, hour of the same meridian.

The stations of the coast will be designated in the bulletin respectively with alphabetical letters, generally the first of its name, as follows: V, Valparaiso; T, Talcahuano; C, Corral; J, Juan Fernandez; M, Mocha; G, Guafu; R, Raper.

The signal will be sent, beginning with the letters O. M. C. (Oficina Meteorologica de Chile). Following will be given the barometric pressure in millimeters, but suppressing the figure of the hundreds—thus, to indicate a pressure of 753 millimeters the figure 7 will be suppressed and the number transmitted will be 53.

In continuation of this number 53 comes another figure which indicates the direction of the wind, from 1 to 8, corresponding to—1 to north, 2 to north-east, 3 to east, 4 to south-east, 5 to south, 6 to south-west, 7 to west, 8 to north-west.

Lastly comes another figure which indicates the force of the wind according to the Beaufort scale; but when strengths greater than 8 are to be indicated they will be given in words, nine, ten, eleven, and twelve.

In case of it not being possible to communicate the meteorologic conditions of any of the stations the word "no" will precede the distinctive letter of that station; and if only a part of the information is given, for the omitted part will be substituted the letter X.

If the weather is not good in the ports indicated by the bulletin there will be added in ordinary language some of the words: Temporal (gale), neblina (fog or mist), lluvia (rain), sol (sun).

To assist understanding the foregoing an example of the bulletin is given, as follows: O.M.C. V5534, T5921, C5172, M5765, &c., which signifies "Valparaiso, barometric pressure 755 mm., wind from east, strength 4; Talcahuano, barometric pressure 759 mm., wind from north-east, strength 1; Corral, barometric pressure 751 mm., wind from west, strength 2; Mocha, barometric pressure 757 mm., wind from south-west, strength 5."

SCHOOL FOR THE DEAF, NEAR SUMNER, CHRISTCHURCH.

UNDER THE CONTROL AND SUPERVISION OF THE EDUCATION DEPARTMENT.

Director: Mr. J. E. STEVENS.

FOR Deaf Children of sound intellect. The pupils are taught to understand and use ordinary speech. The full charge for board and education is £40 a year, but less is accepted from parents who cannot afford to pay this amount. In case of necessity admission is free.

By the Education Act it is compulsory for deaf children to come under instruction at the age of six, and to continue until the age of twenty-one unless the Education Department previously grants exemption. Though a child is, as a rule, best fitted to begin the school course at the age of six, advice should be obtained as soon as any sign of deafness is observed.

The following classes of deaf children are admitted to the School for the Deaf (sound intellect being always a necessity):—

1. Children born deaf, or who have lost their hearing before learning to speak.
2. Children who can hear a little, but are too deaf to be taught in a public school.
3. Children who have lost their hearing after having learned to speak.

The Act imposes upon every parent, teacher of a school (either public or private), constable, or officer of a charitable or kindred institution who is aware of the place of residence (either temporary or permanent) of a deaf child, and the householder in whose house any such child resides, an obligation to send notification of the fact to the Minister of Education, giving the name, age, and address of the child; and any neglect or failure to comply with this provision involves liability to a fine.

Information and advice may be obtained from the Director, or from the

SECRETARY TO THE
EDUCATION DEPARTMENT.
