INFORMATION WITH REGARD TO DISTRESS SIGNALS BY DAY AND NIGHT.

MARINERS and others are notified that when any aircraft is in distress and requires assistance, the following shall be the signals displayed by her, either together or separately:—

- I. The International signal "S.O.S." by means of visual or wireless telegraphy.
- II. The International Code signal of distress indicated by N.C.
- III. The distant signal consisting of a square flag having above or below it a ball or anything resembling a ball.
- IV. A continuous sounding with any sound apparatus.
- V. A signal consisting of a succession of white Very's lights, fired at short intervals.

*Note.*—The above signals are subject to such modification as shall be published from time to time.

NORTH ATLANTIC ROUTE.—INSTRUCTIONS TO VESSELS WITH REGARD TO AIRCRAFT.

Notice No. 709 of 1919 hereby cancelled.

The following instructions, which are promulgated with a view to assisting aircraft attempting trans-Atlantic flights when out of sight of land, should be observed by all vessels employed on the North Atlantic route, until further notice:—

- (1.) Should a vessel receive a request from aircraft for her position, the reply should be sent at a Morse speed of not greater than 12 words per minute.
- (2.) Should a vessel sight an aircraft and no wireless signals be received from it, the vessel should transmit her position by wireless three or four times, without waiting to be requested to do so, as the aircraft wireless transmitter may have broken down. The position is to be transmitted in words and not in figures, thus: Latitude fifty thirty, longitude thirty twenty.
- (3.) British commercial aircraft on trans-Atlantic flights will, for the present, use call signs of three letters (DKA to DMZ). The usual international procedure should be employed for inter-communication.
- (4.) Should an "S.O.S." call from aircraft be received, or aircraft be seen in difficulties, every endeavour possible should be made to rescue the occupants.
- (5.) Great assistance will be given to aircraft in sighting ships at night if ships on hearing aircraft overhead will fire any form of pyrotechnic light to attract attention. This will, if possible, be replied to by the aircraft firing one coloured Very's light or on her wireless.
- (6.) An aircraft in distress will fire a series of white Very's lights at short intervals. Any ship in the vicinity should then indicate her presence and endeavour to rescue the occupants.

*Note.*—Aircraft attempting trans-Atlantic flight will be equipped with wireless-telegraph apparatus capable of transmitting and receiving on a 600 metre wave (spark).

No charges will be made by the Marconi Company for intercommunication between ships and aircraft for the attempts on the trans-Atlantic flight; they, however, reserve the right to make a charge for this inter-communication should the trans-Atlantic flight become a commercial undertaking.

AFRICA.

SOUTH COAST.—SPECIAL WARNING TO MARINERS.—CAUTION.

Mariners should remember that off all parts of the S. coast of Africa, and especially off salient points, sunken wrecks or uncharted dangers may exist close to the shore; and that it is not advisable to approach this surf-beaten shore, even in full-power steam-vessels, within 3 or 4 miles. Sailing-vessels should give Cape Agulhas a berth of 7 or 8 miles. When a strong adverse current prevails, the temptation to approach the shore is great, but wrd. of Algoa Bay there is nothing to be gained by so doing, and in case of a breakdown of the machinery or any temp. error in the course a risk is run of total wreck before there is time or room to avoid such a catastrophe. "Africa Pilot," Part III, S. and E. coasts, 7th edition, 1905, pages 39, 94, and 95.
