## ORDER IN COUNCIL.

At the Government House at Wellington, this fifth day of August, 1919.

Present :

HIS EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL.

WHEREAS by section two of the Public Works Amendment Act, 1911, it is provided that no person shall lay, construct, place, put up, or use any electric line except under the authority of a license issued by the Governor-General in Council under that Act :

And whereas on the twenty-second day of July, one thousand nine hundred and twelve, a license was issued to the Frankton Town Board authorizing it to erect electric lines in the Frankton Town District, and on the thirtieth day of October, one thousand nine hundred and sixteen, a license was issued to the Hamilton Borough Council authorizing it to erect electric lines in the Borough of Hamilton, and on the thirteenth day of August, one thousand nine hundred and seventeen, a further license was issued to the Hamilton Borough Council authorizing it to erect electric lines in portion of the County of Waipa :

And whereas on the first day of April, one thousand nine hundred and seventeen, the Boroughs of Frankton (formerly the Frankton Town District) and Hamilton were constituted one united borough, under the name of Hamilton, and the liabilities and engagements of those boroughs became the liabilities and engagements of the united borough :

And whereas the terms of the aforesaid licenses issued on the twenty-second day of July, one thousand nine hundred and twelve, the thirtieth day of October, one thousand nine hundred and sixteen, and the thirteenth day of August, one thousand nine hundred and seventeen, were not identical, and it is considered expedient to revoke the said licenses and to issue a new license for the whole area of supply :

Now, therefore, in pursuance and exercise of the powers conferred upon him by the said section, and of all other powers in anywise enabling him in that behalf, His Excellency the Governor-General of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby revoke the licenses issued to the Frankton Town Board on the twenty-second day of July, one thousand nine hundred and twelve, and to the Hamilton Borough Council on the thirtieth day of October, one thousand nine hundred and sixteen, and the thirteenth day of August, one thousand nine hundred and seventeen, and doth, subject to the conditions set forth in the Schedule hereto, and to the regulations (except clause seventeen thereof, which is replaced by clause three of the Schedule hereto, to which references in the regulations to clause seventeen shall apply) made under section two of the aforesaid Act, and published in the *New Zealand Gazette* dated the twenty-ninth day of April, one thousand nine hundred and fifteen, or any regulations hereafter made in substitution thereof, and hereinafter collectively referred to as "the regulations," hereby authorize the Hamilton Borough Council (hereinafter referred to as the "licensee") to erect and maintain electric lines for lighting, power, and heating purposes within the area of supply hereinafter described; and the lines already erected in the said area of supply shall be deemed to be erected under this license, and the provisions hereof shall apply as fully and effectively as if this were the license originally issued.

## SCHEDULE.

## 1. AREA OF SUPPLY.

THE area of supply comprises the Borough of Hamilton as at present constituted, and all that portion of the Waipa County within a five-mile radius of Trig. Station A in the Borough of Hamilton. As the said area of supply is more particularly delineated on the plan marked P.W.D. 42539, deposited in the office of the Minister of Public Works, Wellington, in the Land District of Wellington.

## 2. SYSTEM OF SUPPLY.

The system of supply shall be as described in paragraph 1 (b) of clause 2 of the regulations.

The generating voltage shall be approximately from 460 to 500 volts between the terminals.

## 3. COVERING OF OVERHEAD LINES.

Electric lines at low pressure shall be covered throughout with triple braiding, thoroughly impregnated with weather-proof compound; provided that where circumstances permit the lines may, with the written consent of the Minister obtained before the work is commenced, be bare. Electric lines at high pressure shall be insulated with vulcanized rubber of at least 600 megohm grade; provided that where circumstances permit the lines may, with the written consent of the Minister obtained before the work is commenced, be bare.

Electric lines at extra high pressure shall be bare.

Earthed neutral or intermediate conductors may in all cases be bare.

Every pole or support carrying extra-high-pressure lines or high-pressure lines the conductors of which are bare shall have attached to it a plate marked "Danger—Live Wires."

Bare low-pressure and bare high-pressure electric lines erected with the written consent of the Minister shall be subject to the following conditions:—

- (a) The electric lines upon which workmen are engaged shall be disconnected from the source of supply, but if a suitable raised platform is used the electric lines need not be so disconnected.
- (b) Where telegraph lines intersect or are menaced by the licensee's bare electric lines the licensee shall bear the cost of insulating, protecting, and maintaining the insulation and protection of all telegraph lines, whether erected before or after the bare electric lines, and also the cost of all special work, and the maintenance thereof, which the Minister of Telegraphs deems it necessary to carry out in consequence of the licensee's electric lines being bare.
- (c) When, in the opinion of the Minister of Telegraphs, it is considered necessary that such bare electric lines at any crossing should be replaced by electric lines insulated in the manner prescribed in the first part of this clause, the licensee, at his own expense, shall insulate such bare electric lines when requested to do so by the Minister of Telegraphs.
- (d) When, in the opinion of the Minister, it is necessary in the interests of the public safety that the use of bare electric lines should be discontinued, the licensee shall, upon receiving notice from the Minis-

ter, substitute therefor electric lines covered in the manner prescribed by the first part of this clause.

- (e.) Low-pressure wires, whether braided or bare, which at any portion of their length are carried on the same poles or supports as bare high-pressure lines or extra-high-pressure lines shall be deemed to be "infected" throughout their entire length by such high-pressure or extra-high-pressure lines, and shall be subject to the regulations governing high-pressure and extra-high-pressure lines respectively.
- (f.) In the event of any dispute as to whether or not telegraph lines are menaced by the electric lines the decision of the Minister of Telegraphs shall be final.

#### 4. DATUM TEMPERATURE.

For the purpose of calculating the stresses as provided in clause 12 of the regulations the datum temperature shall be taken as 12 degrees Fahrenheit.

#### 5. NOTICES, *re* EXTENSIONS, ETC.

Records of results of tests (Regulation 37), and notices *re* commencement of work (Regulation 44) and *re* extensions and alterations (Regulation 49), shall be sent to the Under-Secretary, Public Works Department, Wellington, and to the Telegraph Engineer of the district, or his deputy, at present stationed at Hamilton.

#### 6. CHARGES FOR ELECTRIC ENERGY.

The charge for electrical energy shall not exceed 10d. per unit for lighting purposes, and 5d. per unit for motor-power, heating, or cooking purposes, provided that "lighting purposes" shall include the operation of motor generators for lighting purposes.

#### 7. WIRING CONSUMERS' PREMISES.—MONOPOLY FORBIDDEN.

The licensee shall not grant or agree to grant any company, firm, or person the sole right to supply or erect the electric wiring on any consumer's premises, nor shall any consumer be required to purchase from the licensee or its assigns any material or apparatus for installing the electric wiring on such premises, or to have the work carried out by the licensee or its assigns, as a condition precedent to a supply of electrical energy being given by the licensee to the consumer.

#### 8. DURATION OF LICENSE.

This license shall, unless sooner determined in accordance with the provisions of the regulations, continue in force for a period of forty-two years from the date hereof. Upon the expiry of the said term, or upon the sooner determination of this license by revocation or otherwise, all rights hereby granted to the licensee shall thereupon cease and determine; but such expiration or determination shall not relieve the licensee of any liability theretofore incurred under this license.

#### 9. REQUIREMENTS OF THE WAIPA COUNTY COUNCIL.

Notwithstanding anything hereinbefore contained, the licensee shall not be entitled to erect, maintain, or use any electric lines within the Waipa County, except subject to such conditions, not inconsistent with the provisions of this license and the regulations relating thereto, or any variation of this license or the regulations, as may from time to time be agreed upon between the licensee and the Waipa County Council.

W. D. S. MACDONALD, Minister of Agriculture.

Census and Statistics Office, Wellington, 6th August, 1919.

THE collection of agricultural and pastoral statistics for the season 1918-19 is now sufficiently advanced to enable preliminary figures to be given for the Dominion. Complete returns have so far been received for 117 counties out of the 126 which comprise the Dominion. Estimates have been made for the incomplete portions of the remaining nine counties. The tables appended hereto are consequently liable to revision on the complete returns coming to hand.

MALCOLM FRASER, Government Statistician.

THE commanding officer of the U.S.S. "Westerdyk" reports that Raza Island light has been changed to show *alternating flashing red and white every 5 seconds*; total period, 10 seconds. Approx. position: 23° 3' 40" S., 43° 8' 45" W.

HAWAIIAN ISLANDS.

PEARL HARBOUR.—RADIO TIME-SIGNAL.—FURTHER INFORMATION.

The high-power radio station at Pearl Harbour, in longitude 157° 58' west, will, on 16th June, 1919, begin unofficially to send a daily time-signal at Greenwich midnight (1.28 p.m. local time). The signals will be sent out simultaneously by high-power arc at 11,200 meters, and 5 K.W. spark system at 600 meters.

On and after 1st July, 1919, the signals will be considered official.

NORTH PACIFIC OCEAN.

SHOAL REPORTED.

Captain William Olson, of the schooner "S. G. Wilder," reports that on 6th March, 1919, in latitude 8° 17' N., longitude 173° 25' W., he passed close to a shoal approximately 100 ft. in diameter. The depth of water on the shoal,

as close as soundings could be gotten, was approximately 3 fathoms.

NOTE.—This is in a portion of the ocean not well sounded, where other dangers whose existence is doubtful are charted.

EASTERN ARCHIPELAGO.

NETHERLANDS EAST INDIES.—DISTRESS-SIGNALS WITH REGARD TO HYDRO-AEROPLANES.

Netherlands hydro-aeroplanes in the East Indies when in distress will make the following signals by means of pyrotechnic lights:—

Signal.	Signification.

WIRELESS DIRECTION-FINDING STATIONS.

1. Wireless direction-finding (D.F.) stations are stations set up ashore equipped with receiving apparatus which enables them to ascertain the direction from which wireless signals transmitted by another station emanate.

2. The accuracy with which bearings can be taken depends on the conditions outlined below; but, although in general the bearings taken by a station within the sector over which it is designed to work can generally be considered accurate to within two degrees, the administrations controlling these stations cannot accept any responsibility for the consequences of a bearing being inaccurate.

3. It is, however, pointed out that if at least three D.F. stations can be employed, and if they are so situated as to give intersecting bearings, considerable reliance can be placed upon the result of three simultaneous bearings thus obtained, provided that the "triangle of error" (sometimes called the "cocked hat") formed by the intersection of the bearings is small.

4. In order to obtain the greatest possible degree of accuracy, it is important that the ship should not transmit with too much power. Signals should, however, be fairly strong and clear; great care must be taken to keep the note and strength steady, and to pay strict attention to spacing.

5. It must be borne in mind that it is impossible for the majority of existing D.F. stations to distinguish between a bearing and its reciprocal (*i.e.*, there is always a possible error of 180°), and that bearings are often unreliable at night and in very bad weather, also when the direction runs roughly parallel with the coast-line.

6. The methods of asking for and giving bearings and the waves to be used will shortly be standardized by International

agreement; and the particulars of the D.F. stations will eventually appear in the International list of radio-telegraph stations. Meanwhile, each country is publishing regulations governing the use of its own D.F. stations as set out below.

7. It should be noted that there are two principal systems of D.F. stations at present in use, viz. :—

- (a.) Where each D.F. station is fitted with transmitting and receiving gear and works independently of others :
- (b.) Where several D.F. stations (all of them usually near a harbour entrance or difficult passage) are linked together by special land telegraph lines, being thus controlled by one station which alone is fitted with transmitting apparatus. The controlling-station in such cases is not necessarily a D.F. station, but may be an ordinary coast station.

REGULATIONS FOR CANADIAN AND NEWFOUNDLAND D.F. STATIONS.

8. The following independent D.F. stations are established :—

Station.	Call Signal.	Range (Miles)	Lat. N.	Long. W.
Chebucto Head ..	VAV	250	44 30 1	63 31 20
Canso ..	VAX	100	45 19 24	60 58 25
Cape Race ..	VAZ	250	46 39 10	53 5 5

9. These stations keep watch and take bearings on the 600-metre wave.

10. A ship requiring a bearing should call the D.F. station required, and transmit a government message requesting the bearing.

Example.—A ship s.s. "Nonsuch," call sign XYZ, calls up Chebucto Head in the ordinary way and, on receiving "K" (go on), makes the message as follows :—

"Call" S Radio Nonsuch 1, 5, 10 (day of month) 10.50 M (time) = Officer in Charge Chebucto Head = Request bearing = Master + XYZ.

11. The D.F. station will then acknowledge receipt of the message, and, if not ready to take the bearing at once, will direct the ship to wait.

12. When ready to take the bearing, the D.F. station will make "K" (go on), whereupon the ship will make the figure "2" thirty times, commencing with the "Call" and ending with the "Cross" and her own call signal.

13. If the D.F. station is not satisfied with the bearing, it will make the "repeat" sign (?) and the ship will again make the figure "2" as above, but only twenty times.

14. In default of such request for a repetition, the D.F. station does not transmit until it is ready to give the bearing. To do so, the station calls the ship and sends (as a government message) the TRUE bearing of the ship from the station in degrees from 0° to 359°, the angles being measured from true north (0°) clockwise through true east (90°), true south (180°), and true west (270°).

REGULATIONS FOR D.F. STATIONS IN THE UNITED STATES.

15. The following independent D.F. stations are established :—

Cape Cod ..	NAE	42 2 58	70 4 32
Cape May ..	NSD	38 56 41	74 53 10

16. The above independent stations are available for use at ranges within 100 miles; and they keep watch and take bearings on 600-metre wave.

17. The controlled D.F. stations established are as follow :—

Controlling Station.		D.F. Stations controlled.		
Name.	Call Signal.	Name.	Position.	
			Lat. N.	Long. W.
New York	NAH	Fire Island ..	40 38 7	73 12 32

Boston ..	NAD	Deer Island ..	42 21 15	70 57 30
		Fourth Cliff ..	42 9 40	70 42 22

18. These stations are available for use at about thirty miles range from the harbour entrance. They keep watch and take bearings on the 600-metre wave.

19. The ship calls up the station or stations required and requests her bearing or position by means of the abbreviations shown below :—

Signal.	Meaning.
QTE ?	What is my true bearing ?
QTE	Your true bearing is — degrees from — D.F. station.
QTF ?	What is my position ?
QTF	Your position is latitude —, longitude —.

20. The station will, if necessary, direct the ship to wait, and, when ready for taking the bearing, will make "K" (go on).

21. The ship will then transmit—
- (i.) Her own call signal repeated for 30 seconds.
  - (ii.) A "dash" 5 seconds long.
  - (iii.) Her own call signal thrice.
  - (iv.) A "dash" 5 seconds long.
  - (v.) Her own call signal thrice, then a "dash," and so on for one complete minute (i.e., for 1½ minutes in all), finishing with "K" (go on).

22. The station then calls the ship, and makes "QTE" followed by the true bearing in degrees (0° to 359°) as in para. 14, and the name of the D.F. station which obtained the bearing, or else "QTF" and the position in latitude and longitude. All numbers will be spelt out in words.

23. The ship acknowledges receipt by repeating back, in figures, the bearing or bearings or the position, as the case may be.

24. When working with independent stations ships should always ask for bearings. Controlling-stations may be requested to give bearings or positions as the master may elect.

REGULATIONS FOR D.F. STATIONS IN THE UNITED KINGDOM.

25. The following D.F. stations will be opened for use by merchant vessels on 1st June, 1919 :—

Station.	Call Signal.	Lat. N.	Long. W.
Peterhead (1) ..	BVL	57 33 30	1 49 5
Berwick (1) ..	BVG	55 41 48	1 53 40
Flamborough (1) ..	BVN	54 7 5	0 4 58

Larne ..	BXJ	54 51 15	5 48 15
Seaview (3) ..	BXK	55 22 0	7 19 25

NOTES.—(1.) Peterhead, Berwick, and Flamborough are linked by a special land line enabling any one to control the other two if required.

(2.) Rhyl is not fitted with transmitting apparatus, and is controlled by Amlwch.

(3.) Seaview is not fitted with transmitting apparatus, and is controlled by Malin Head (GMH), which keeps watch on 600 metres.

26. All the above D.F. stations keep watch and take bearings on the 450-metre wave (see note). Except as shown in the notes they all work as independent stations, and can transmit as well as receive on 450 metres.

Note.—Ships with Marconi apparatus can adjust their transmitting gear very nearly to this wave (using reduced power) by cutting out half the primary transmitting condenser and adjusting the A.T.I. till the earth lamp shows maximum current in the aerial. The primary slider should be "all in."

27. The actual procedure to be adopted by ships requiring bearings will depend upon what stations are concerned. It should be observed that if the stations to be called do not all keep watch on the same wave (e.g., Malin Head and Larne), bearings should be asked for separately. If, on the other hand, the stations to be called all keep watch on the same wave (e.g., Lizard and Carnsore), they should be called up together and the bearings taken in one operation. If, however, two or more stations are linked by special land lines (e.g., Peterhead and Berwick), only one of them should be called up (i.e., the nearest of them which is fitted with transmitting apparatus). In such cases, however, the ship must specify in the preliminary signal the D.F. stations which are required to supply bearings.

28. The following abbreviations are to be used :—

Signal.	Meaning.
QTE ?	"What is my true bearing from you (or from —)?"
QTE	"Your true bearing from me (or from —) was — degrees."

29. The ship calls the station or stations on the appropriate wave, making "QTE?" in conjunction, if necessary, with the

call signals of the stations from which bearings are required, and also (if the call is not made on 450 metres) by the figures "450," signifying that the ship will shift to 450 metres for the taking of the bearing. The ship then awaits instructions.

*Example 1.*

A ship whose call signal is XYZ requires bearings from Peterhead (BVL) and Berwick (BVG), and thinks that the latter is nearest.

The ship, having first shifted to 450 metres, calls Berwick thus:—

"Call" BVG BVG de XYZ QTE BVL BVG ?

She then awaits instructions.

*Example 2.*

The ship requires a bearing from Seaview (BVK). The ship has to use 600 metres to call Malin Head (GMH). She calls on 600 metres, thus:—

"Call" GMH GMH de XYZ QTE BVK ? 450.

She then gets ready to shift to 450 metres and awaits instructions.

30. The station or stations called then make the necessary arrangements and, when ready, answer in alphabetical order of their call signals (if more than one was originally called) and make "K" (go on) preceded by "450" if 450 had been made in the original call.

*Example 1.*

Berwick, in Example 1 above, warns Peterhead by land line and, when both are ready, makes on 450 metres:—

"Call" XYZ de BVG K.

*Example 2.*

Malin Head, in Example 2 above, warns Seaview by land line and then makes on 600 metres:—

"Call" XYZ de GMH 450 K.

Malin Head then shifts to 450 metres so as to be ready to give the result when received by wire from Seaview.

31. On receiving "K," the ship, having shifted transmitting wave to 450 metres (if not already done), then makes her own call signal for 45 seconds and awaits the result.

*Example 1.*

The ship, in Example 1 above, makes on 450 metres:—

"Call" BVG de XYZ XYZ XYZ, &c. (for 45 seconds) XYZ.

*Example 2.*

The same as Example 1, reading GMH for BVG.

32. The station or stations then reply (in alphabetical order, if more than one) either asking the ship to repeat (?) or giving the result. The result is given by the signal QTE followed as necessary by the call signal and by a group of three figures (000 to 359) indicating the true bearing from 0° to 359°, reckoned as in paragraph 14, of the ship from the station. Several bearings can be combined into one message, each bearing immediately following the call signal of the station which took it. The time of handing in is always expressed in Greenwich mean time for all messages giving bearings to merchant ships.

*Example 1.*

Peterhead, in Example 1 above, is not satisfied with the bearing and informs Berwick. Berwick makes on 450 metres:—

"Call" XYZ de BVG ?

The ship at once complies by making on 450 metres:—

"Call" BVG de XYZ XYZ XYZ, &c. (for 45 seconds) XYZ.

Peterhead is then satisfied that the bearing is 130° and informs Berwick, while Berwick finds that its own result is 37°. Berwick therefore makes 450 metres:—

"Call" XYZ XYZ de BVG 1 9.45 M (time) = QTE BVL 130 BVG 037 + BVG.

*Example 2.*

Seaview, in Example 2 above, gets a satisfactory bearing of 329° and informs Malin Head. The latter makes on 450 metres:—

"Call" XYZ XYZ de GMH 2 10.46 S (time) = QTE BVK 329 + GMH.

*Example 3.*

Had the ship merely asked Lizard (BVY) for a bearing, Lizard, finding it to be 246°, would make on 450 metres:—

"Call" XYZ XYZ de BVY 1 7.6 M (time) = QTE 246 + BVY.

33. The ship, on receiving the result, acknowledges receipt in the ordinary way, and makes the "end of work" sign. This sign is then repeated by the station or stations concerned. It is important that the "end of work" sign should not be

omitted, since it not only indicates that the operation is finished, but it also shows that all concerned are about to resume watch on their normal wave.

*Note.*—This notice will be subject to revision from time to time.

RADIO COMPASS-STATIONS.

Cape Henry, Va.	Lat. 36° 55' 16" N.	Lon. 75° 59' 51" W.	

The following independent radio compass-stations operate individually, and furnish bearings only to vessels within 100 miles:—

Radio Compass station.	Radio Call.	Lat.	Position.	Lon.
Cape Cod, Mass.	.. NAE	Lat. 42° 2' 58" N.	Lon. 70° 4' 32" W.

Cape Hatteras, N.C.	NDW	Lat. 35° 14' 30" N.	Lon. 75° 31' 40" W.	

Vessels desiring to obtain a bearing from compass-stations which operate independently should call the station from which the bearing is desired, and request bearings by means of a conventional signal given below. Simultaneous bearings from two or more compass-stations can be obtained by making the call include the other compass-stations desired.

Vessels desiring to obtain their positions from harbour-entrance compass-stations should carry out the same procedure, with the exception that they call the compass-control station instead of the compass-station.

When bearings are requested simultaneously from two or more independent compass-stations, the compass-station which is farthest north will supply the ship with its bearing first; the others will then follow in the order of their north to south or east to west geographical location.

The following abbreviated signals will be used until further notice:—

Signal.	Meaning.
QTE ?	What is my true bearing ?
QTE	Your true bearing is — degrees from — Radio Compass-station.
QTF ?	What is my position ?
QTF	Your position is latitude — longitude —.

The radio compass-station (or compass-control station for harbour-entrance compass-stations) will answer requests for bearings and positions in the customary manner of answering calls and follow their call letters with "K" if they desire to take the bearing at that time, "QRX" if they desire the vessel to stand by, or other abbreviated signal authorized by International Regulations.

On being told to "K," vessels desiring bearings or positions will transmit their radio call letters for 30 seconds and then

make dashes 5 seconds long for one minute, making their call letters three times between each 5-second dash, and terminating with the conventional signal "K" (go ahead).

At the expiration of the direction-determining signals the radio compass-station (or compass-control station) will call the vessel, make "QTE," and send the bearing in degrees (0 to 359) and the name of the compass-station which obtained the bearing, or "QTF," and the position in latitude and longitude. Bearings and positions will always be transmitted to the vessel in words, to avoid error.

The vessel acknowledges receipt of bearings and positions by making the call letters of the station transmitting the bearing or position once, "DE," vessel's radio call letters, and then repeats the bearing or position received, using numerals.

Independent radio compass-stations keep watch on 600 metres, and this wave-length should always be used to call these stations; but as soon as they answer naval vessels will shift to tune "M" (952 metres), all transmission from the vessel being carried out thereafter on this wave-length.

The control stations for harbour-entrance radio compass-stations keep watch on 600 and 952 metres. Naval vessels will call these stations on 952 metres and carry out all tests and communication with them thereafter on 952 metres.

Merchant vessels will call all radio compass and compass-control stations on 600 metres and carry out all tests and communication with them thereafter on this wave-length.

Vessels should note that shore radio compass-stations can not distinguish between the bearing of a ship and its reciprocal unless the reciprocal bears inland. There is, therefore, a possibility of an error of 180 degrees; in such cases the decision is left to the ship as to which is her correct bearing.

Subject to the foregoing, bearings should be accurate within 1 degree of arc. When bearings from three or more compass-stations are not over 1 degree of arc in error but do not meet at a fixed point, the centre of an area enclosed by the bearings can generally be taken as the approximate position of the vessel.

The primary object of these radio compass-stations is to assist in the navigation of vessels during atmosphere of low visibility. They are operated by the Navy Department, and there is no charge for the service.

There follows a complete list of shore radio compass-stations on the Atlantic and Gulf coasts and their corrected positions. All of these stations are not, however, in operation as yet.

The Matuku Settlement, formerly the property of E. S. Smith, Esq., is situated in the Rangitaiki Swamp, about five miles from Te Teko, to which there is a good road. The land was originally swamp, but there is a ridge of higher land running through the block from north to south. The soil is of very good quality, with the exception of about 200 acres near the north-eastern end of the settlement, which is of lighter nature. A dairy factory is situated close to the settlement.

## REMUERA SETTLEMENT.

This settlement, containing approximately 3,600 acres, comprises the well-known Remuera Estate and Messrs. Wright and Pitcaithly's Omopere Farm, the former being favourably known throughout the North Island on account of the fine stud Romney Marsh flocks bred from pedigree stock by Mr. Close, and also of his equally well-known Hereford herds of stud cattle.

The estate having carried 4,000 sheep, 1,100 head of cattle, and 60 horses, little need be said as to its quality. The settlement lies between the Ohaeawai-Okaihau and the Ohaeawai-Kaikohe main metalled roads, with its nearest point within a quarter of a mile of the Ohaeawai Post-office, creamery, and school, and its furthest sections are about four miles distant.

The land is mostly of a volcanic nature, and ranges from fair to the very best quality; a large area is flat, while the balance varies from very easy slopes to easy hills, the range in height being from about 500 ft. to 1,200 ft. above sea-level.

A large area has been ploughed and grassed, whilst the remainder has been surface sown. Most of the southern end of the blocks consists of bush land, now grassed, and carrying very good feed.

The sections range in area from 76 to 373 acres, and are in a number of cases nearly ring-fenced, while all have a considerable quantity of fencing which will require very little adding to to make several paddocks on each farm. With the exception of three, all the sections are well watered, and in the case of these three a good and sufficient supply can be maintained by rams at the springs in each section.

The Crown reserves the right up to three months from the date of selection to remove one shed from each section, the above valuations and payments being reduced proportionately if this right is exercised.

GENERAL DESCRIPTION.

The Maungateparu Settlement, formerly the property of Alexander Bell, Esq., is situated between Morrinsville (railway junction, 103 miles from Auckland) and Tahuna, the main road between the two places running through the centre of the property. The site of the proposed township, which is located in the middle of the settlement, is about six miles northward from Morrinsville.

The area now offered consists mainly of the central portion of the settlement, which was not opened when the remainder of the block was offered in March last, the successful applicants at that ballot being now in occupation of their holdings. The land consists of low downs, with soil of a free nature, practically all ploughable and easily worked. Some of the sections have no permanent water, but it is believed that sufficient supplies are obtainable anywhere by sinking. The pasture consists of English grasses, and is generally in good order, but portions will require breaking up and regrassing before dairying can be carried on to the best advantage. Provision has been made for a small township subdivision in the centre of the block, where no doubt the usual country facilities will be established as soon as circumstances permit. In the meantime the Township of Morrinsville, to which there is access by good metalled road, makes all conveniences readily accessible. The new roads through the settlement are being formed.

Sale posters and full particulars may be obtained at this office.

SCHOOL FOR THE DEAF, NEAR SUMNER,  
 CHRISTCHURCH.

UNDER THE CONTROL AND SUPERVISION OF THE EDUCATION DEPARTMENT.

Director: Mr. J. E. STEVENS.

**F**OR Deaf Children of sound intellect. The pupils are taught to understand and use ordinary speech. The full charge for board and education is £40 a year, but less is accepted from parents who cannot afford to pay this amount. In case of necessity admission is free.

By the Education Act it is compulsory for deaf children to come under instruction at the age of six, and to continue until the age of twenty-one unless the Education Department previously grants exemption. Though a child is, as a rule, best fitted to begin the school course at the age of six, advice should be obtained as soon as any sign of deafness is observed.

The following classes of deaf children are admitted to the School for the Deaf (sound intellect being always a necessity):—

1. Children born deaf, or who have lost their hearing before learning to speak.
2. Children who can hear a little, but are too deaf to be taught in a public school.
3. Children who have lost their hearing after having learned to speak.

The Act imposes upon every parent, teacher of a school (either public or private), constable, or officer of a charitable or kindred institution who is aware of the place of residence (either temporary or permanent) of a deaf child, and the householder in whose house any such child resides, an obligation to send notification of the fact to the Minister of Education, giving the name, age, and address of the child; and any neglect or failure to comply with this provision involves liability to a fine.

Information and advice may be obtained from the Director, or from the

SECRETARY TO THE  
 EDUCATION DEPARTMENT.  
 WELLINGTON.
