(2.) Where any of the said moneys have (whether before or after the commencement of this Act) been invested by the Public Trustee but the investments have not been kept separate from other investments of the Public Trustee, the Native Trustee shall arrange with the Public Trustee to take over such securities as may be mutually agreed on, and those securities shall thereafter be deemed to be in respect of investments of the said moneys referred to in section 18, and all moneys thereafter payable by way of interest on or for the redemption of such securities or otherwise in respect thereof shall be paid into the Native Trustee's Account.

(3.) The Public Trustee shall be entitled to receive from the Native Trustee such commission, on all revenues received by him by way of interest on the securities above referred to as may be arranged between them.

(2.) The manager of the bank shall make up daily at the close of the business the pass-book of the Native Trustee, and at the same time send to the Controller and Auditor-General a statement showing the total receipts into and payments out of and the balance of such account at the close of each day.

17. The Native Trustee may from time to time cause branch accounts of the Native Trustee's Account to be kept with the bank in any town where a branch of the Native Trust Office is established, and all such accounts shall be operated on as directed by section 16 of the principal Act.

18. (1.) The Native Trustee shall keep a cash-book, which shall be made up daily, and in which shall be entered the

receipts and payments made by or reported to the Native Trustee at the Head Office.

21. (1.) Moneys payable within the Dominion out of the Native Trustee's Account may be forwarded by the Native Trustee to any of his local Deputies, District Managers, or agents, who shall pay the same in accordance with the Native Trustee's directions.

(2.) The attestation shall state that the receipt was read over and explained to the person making his mark.

(3.) It shall not be necessary for the Native Trustee, unless he thinks proper, to inquire whether such person is an adult or not, and, notwithstanding that such person may afterwards be discovered not to be an adult, the receipt shall be valid.

25. (1.) A claimant may authorize by a special or general order, in such form as is from time to time approved of by the Native Trustee, that any payment may be made to any other person.

(2.) The special order shall be on or attached to the claim.

(3.) In the case of a general order it shall be sufficient if it is sent to and received by the Native Trustee.

(5.) The provisions of clause 24 hereof as to attestation of receipts shall, *mutatis mutandis*, apply to all such orders.

26. (1.) Where a Native gives a special or general order it shall purport to be attested by a licensed Native interpreter, who shall certify in attesting that he has explained the order to the Native, and that the Native understood it; provided that the Native Trustee may dispense with any such attestation.

(2.) It shall not be necessary for the Native Trustee, unless he thinks proper, to ascertain whether the person so attesting is a licensed Native interpreter or not, and, notwithstanding that it may afterwards be discovered that the person attesting was not a licensed interpreter, the order, and all acts and things done thereunder, shall be valid.

(3.) This clause shall be construed subject to any statutory provision dealing with the matter.

27. The officer or agent authorized to pay a claim on the Native Trustee must be satisfied before paying it that the applicant for payment is entitled to receive the amount, and that all necessary documents have been produced.

28. No claim on the Native Trustee shall be paid until it has been, to the satisfaction of the Native Trustee or the paying agent, proved and certified to be correct, as may be required by the Native Trustee, and received by the claimant or by the claimant's duly authorized agent, nor until the signature of the payee has been attested when such attestation is required by the Native Trustee.

29. The officers and agents of the Native Trustee will be held responsible for all errors in calculation in the accounts or claims which they certify to be correct, and for any loss

due to their neglect of these regulations or of the instructions given by the Native Trustee.

(b.) For any portion of a day he shall receive one twenty-fourth of the full daily rate for each hour's absence.

(c.) In computing the time of absence a fraction of an hour if less than half an hour shall not be taken into account, but half an hour or more shall be reckoned as one hour.

(d.) He shall also be repaid all reasonable sums properly expended by him for fares by railway, coach, or steamer in travelling for the said purposes.

(e.) Each member of the Board who is not otherwise employed in any Department of the Public Service shall also be paid such fee as the Minister may from time to time authorize for each examination held or for each paper set by him.

Regulation 22 is amended by adding the words "from working as a coal-miner" after the words "permanently disabled."

Regulation 29 (1) is amended by adding the words "from working as a coal-miner" after the words "permanently disabled."

Regulation 56 (c) is amended by adding the following words "In the foregoing paragraph 'face' shall mean the point of commencement of the most advanced holing or side cutting, or, if none exists, the most advanced point of the place."

Regulation 127 (d) is amended by the deletion of the words "(except in the case of nitro-glycerine compounds, when the distance below the hole shall not be less than three feet)."

(2.) At all other mines all mechanical ventilation appliances shall be started and continuously run to their usual running-capacity for not less than two hours before any person enters

the mine, and continuing during the whole of the time any person is in the mine.

PRECAUTIONS AGAINST COALDUST.

Regulation 155 of the principal regulations is hereby amended by deleting paragraph (3), and substituting the following paragraphs:—

(3.) The incombustible dust used for the purpose of the preceding regulation shall contain not less than 50 per cent. by weight of fine material capable, when dry, of passing a sieve with 200 meshes to the linear inch (40,000 to the square inch); provided that if a larger proportion of incombustible dust is used than is required under the foregoing regulation, the percentage of fine material aforesaid contained in the incombustible dust may be reduced proportionately, but shall not fall below 25.

(4.) For the purposes of testing the composition of the dust mixture in any part of a road, the following procedure shall be adopted:—

(a.) Representative samples of the dust shall be collected from the floor, roof, and sides over an area of road not less than fifty yards in length.

(b.) The samples collected shall be well mixed, and a portion of the mixture shall be sieved through a piece of metallic gauze having a mesh of 28 to the linear inch.

(c.) A weighed quantity of the dust which has passed through the sieve shall be dried at 212° F., and the weight lost shall be reckoned as moisture. The sample shall then be brought to a red heat in an open vessel until it no longer loses weight. The weight so lost by incineration shall be reckoned as combustible matter for the purposes of the test:

Provided that in the case of dusts to which the foregoing test would not be applicable, the test shall be such as may be approved by the Minister of Mines.

If any dispute arises as to the test which should be applied, it shall be determined by the Chief Inspector.

Representative tests shall be made by the management at intervals of not less than six months, and the results shall be posted at the mine-mouth or pit-head.

(5.) No dust shall be used for the purpose of complying with these regulations of a kind which may be prohibited by the Minister of Mines on the ground that it would be injurious to the health of persons working in the mine; provided that if any dispute arises as to whether the dust is injurious it shall be determined by the Chief Inspector.

(6.) This part of the regulations shall not come into force until the 30th September, 1921; provided that if it is shown to the satisfaction of the Inspector of Mines of the district, in regard to any mine, that it has not been practicable by that date to obtain the necessary plant for carrying out the regulations, the Inspector may, subject to such conditions as he thinks fit, allow such extension of time as shall appear to him to be reasonably required.

PRECAUTIONS AGAINST SPONTANEOUS COMBUSTION OF COAL.

179. The following provisions shall apply to any mine or part of a mine in which safety-lamps are required by section 40, paragraph (46), of the Coal-mines Act, as amended, to be used, and to any other mine where the Minister of Mines directs that they shall apply in view of the conditions existing in that mine.

(1.) On the appearance in any part of the mine of smoke or other sign indicating that a fire has or may have broken out below ground, every workman other than those necessarily engaged in dealing with the emergency shall be withdrawn from the ventilating district or districts affected, and before any workman is readmitted into the district or districts affected the manager or underviewer, accompanied by the fireman-deputy, shall examine the district or districts, and shall make a full and accurate report of the condition of the district or districts, and no workman shall be readmitted unless the manager or underviewer making the examination report the mine to be safe. Every such report shall be signed by the persons making the examination, and shall indicate, if possible, by means of a plan, the situation of the fire. The report shall be kept at the office of the mine. The reports made by the responsible official appointed to supervise the affected area shall be posted up at the mine-mouth or pit-head at the end of each shift for the information of the workmen.

(2.) When the existence of a fire has been definitely ascertained, every workman, except those engaged in combating the fire, shall be withdrawn from the seam in which the fire exists and from every other seam communicating with the shaft on the same level, and shall not be readmitted until an examination has been made and the seam or seams reported to be safe in the manner indicated above:

Provided that—

(a.) It shall not be necessary to withdraw the workmen on the intake side of the fire if the seam or, in cases to which proviso (b) applies, the ventilating district in which the fire exists is naturally wet throughout,

and it is reported after examination made in the manner indicated above that it is safe for such men to remain :

- (b.) It shall not be necessary to withdraw the workmen from the ventilating district or districts in which the fire exists if each ventilating district in the seam is adequately protected against the spread of an explosion of coaldust from any other district by some means approved by the Minister of Mines :
- (c.) It shall not be necessary to withdraw the workmen from any seam communicating with the shaft on the same level if such seam is naturally wet throughout or is adequately protected against the spread of an explosion of coaldust from the seam in which the fire exists by some means approved by the Minister of Mines.

(3.) While a fire is being dammed off, every workman in the mine, except the men engaged in the work of damming off the fire, shall be withdrawn from the mine, and shall not be readmitted after the completion of the work until an examination has been made, and the mine reported to be safe, in the manner indicated above. There shall be available during the whole time at or near the place two suits of breathing-apparatus or two smoke-helmets, and persons competent to use them.

(4.) Such means as may be approved by the Minister of Mines for the purpose shall be taken to render harmless the coaldust in all accessible parts of the mine immediately contiguous to the seat of the fire.

(5.) The Minister of Mines may, by regulation, modify the requirements of this regulation in respect of any mine to such extent and subject to such conditions as he may think fit, if he is satisfied that this can be done without danger in view of the special character of the mine.

180. Where in any mine or part of a mine to which the foregoing regulation does not apply the existence of a fire has been definitely ascertained, an examination of the place in which the fire exists shall be made in the manner indicated above, and if any part is reported to be dangerous the workmen, except those engaged in combating the fire, shall be withdrawn from such part.

When the workmen have been withdrawn from any part of the mine in pursuance of this regulation they shall not be readmitted until a further examination has been made and such part reported to be safe in the manner indicated above.

Clerk of the Executive Council.

PRESS TELEGRAMS.

Press telegrams may contain only information of general public interest, and the whole text must be intended for publication as news in the newspapers to which the telegrams are addressed. Advertisements, letters intended for publication in the open or other columns of newspapers, or telegrams that are mere "puffs" of theatrical or travelling business companies, and not of general public interest, cannot be transmitted at Press rates. Such matter must be paid for at the rate of 1d. per word.

Provided the offices are open, all newspapers are entitled to receive Press news at night at evening rates, no matter whether sent in the evening prior to publication or not. The evening rates on day telegrams for evening papers are restricted to the day of publication, except in the case of papers published daily, twice weekly, or thrice weekly.

The tariff for ordinary telegrams is applicable to and will be collected from the addressee of every Press telegram of which use is made for some other purpose than or besides that of insertion in the columns of the newspaper to which it is addressed, viz. :—

- Telegrams which are not published by the receiving newspaper (failing a satisfactory explanation), or which the latter has communicated before publication to private individuals, or to establishments such as clubs, cafés, hotels, exchanges, &c.
- Telegrams which the receiving newspaper before publishing them itself has sold, distributed, or communicated to another newspaper for publication in its columns.
- Telegrams, addressed to agencies, which are not published in a newspaper (failing a satisfactory explanation), or which are communicated to third persons before being published by the Press.

The following rates are chargeable for the transmission of Press telegrams from or to any office in New Zealand during the prescribed hours for such business. (See "List of Telegraph-offices," also table of "Additional Attendance for Press Work," in the Post and Telegraph Guide, March, 1919, pages 355-421 and 422 respectively.)

Clyde pilots are also stationed at Glasgow to take vessels down the river to the Tail of the Bank, Kempock Point, or to Cumbrae. Pilotage is compulsory between Glasgow and Kempock Point for merchant vessels over 100 tons gross register, and is compulsory between Glasgow and the Cumbraes Islands for all vessels carrying passengers. Pilots are taken to and from vessels off Kempock Point and at the Tail of the Bank and Dumbrae by a steam pilot-boat and auxiliary motor-boats which carry the pilot flag at the masthead by day and the regulation lights for a steam pilot-vessel by night.

TRANS-ATLANTIC STEAMSHIP ROUTES.—ICE PATROL SERVICE.

1. In connection with the International Ice Observation and Ice Patrol Service the U.S.S. "Seneca" will leave New York on 15th February, 1921, or as soon thereafter as practicable, and proceed to the Grand Banks of Newfoundland and locate the ice fields and icebergs, thereafter keeping in touch with the ice situation, making such observations as practicable on the quantity of ice, its kind, extent, and drift, and obtaining such information as may seem to be of value.

2. The service to be performed is primarily the ascertainment of the locations and the progressive movement of the limiting lines of the regions in which icebergs and field ice exist in the vicinity of the Grand Banks of Newfoundland, and the dissemination of the information so ascertained for

the guidance and warnings of navigators; and, co-ordinately with these primary duties, the making of such oceanographical and meteorological observations as will form a contribution toward the knowledge of the reasons why the limiting lines assume their observed locations.

3. Experience of previous years has shown that a continuous ice patrol should be established about 1st April and continued throughout the season of dangerous ice conditions. It is the intention to detail an additional vessel for that purpose and to have the ice patrol commence on 1st April next, unless information be received indicating that the constant patrol should commence on an earlier date. Instructions for the ice patrol will be issued when the additional vessel shall be detailed to that duty.
