HIS EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL.

WHEREAS, there being no Harbour Board empowered to grant the license hereinafter mentioned, John Christie Edmondston, of Moeraki (hereinafter called "the licensee"), has applied to the Governor-General for a license under the Harbours Act, 1908 (hereinafter called "the said Act"), to occupy a part of the foreshore of Moeraki, in order to erect thereon a fish-shed and boat-slip in accordance with the plan marked M.D. 5415, sheet 1, and in the position shown on plan bearing the same number, marked sheet 2, and deposited in the office of the Marine Department at Wellington:

And whereas it has been made to appear to the Governor-General in Council that the proposed works will not be or tend to the injury of navigation, and it is desirable that a license should be granted and issued to the licensee under the said Act for the purpose aforesaid:

Now, therefore, His Excellency the Governor-General of the Dominion of New Zealand, in pursuance and exercise of

the said power and authority conferred upon him by the said Act, and of all other powers and authorities enabling him in that behalf, and acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby approve of the purpose or object for which the said license is required by the licensee as aforesaid; and, in further pursuance and exercise of the said power and authority, and with the like advice and consent as aforesaid, doth hereby license and permit the licensee to use and occupy that part of the foreshore on which the said fish-shed and boat-slip are erected, as shown on the aforesaid plan so deposited as aforesaid, for the purpose of maintaining the said structures thereon; such license to be held and enjoyed by the licensee upon and subject to the terms and conditions set forth in the Schedule hereto.

SCHEDULE.

1. In these conditions the term "Minister" means the Minister of Marine as defined by the Shipping and Seamen Act, 1908, and includes any officer, person, or authority acting by or under the authority of such Minister.

In consideration of the concessions and privileges granted by this Order in Council the licensee shall, on being supplied with a copy thereof, pay to the Minister the sum of £2 10s., and thereafter an annual sum of £1 in advance, dating from the date of this Order in Council, the first of such annual payments to be made on the licensee being supplied with a copy of this Order in Council.

4. His Majesty or the Governor-General, and all officers in the Government service acting in the execution of their duty, shall at all times have free ingress, passage, and egress into, through, and out of the said fish-shed and boat-slip without payment.

Regulations under the Stone-quarries Act, 1910.

JELlicoe, Governor-General.

ORDER IN COUNCIL.

At the Government House at Wellington, this 30th day of January, 1922.

Present :

His EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL.

IN pursuance and exercise of the powers and authorities conferred upon him by the Stone-quarries Act, 1910, and its amendments (hereinafter collectively referred to as "the said Act"), His Excellency the Governor-General of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby revoke the regulations made under the said Act on the eighteenth day of March, one thousand nine hundred and eighteen, and in lieu thereof doth hereby make the following regulations, which shall come into force on the date of the publication hereof in the *New Zealand Gazette*.

REGULATIONS.

I. SAFETY OF THE QUARRY.

1. THE working of the face and sides, tops, or overburden of the quarry shall be carried on so as to prevent dangerous falls.
2. The overburden or "tops" of the quarry, and all loose ground or material, shall be cleared far enough back from the edge of the quarry to prevent danger to the persons employed.
3. When it is necessary for safety that any quarry shall be worked in steps or "galleries," the breadth of everyone of these shall be at least one-half its height, but in no case shall the breadth thereof be less than 12 ft. When the quarry is worked without steps or galleries, sufficient support to the face and sides shall be left to ensure safety to all persons employed.
4. There shall be a clear space between the outside rails of tramways and the edges of galleries sufficient to prevent both the falling of stones from the wagons and the falling of the men themselves to galleries below. Where such a space is impracticable the edges shall be securely fenced.
5. The top of the quarry, if dangerous, and the top of every shaft shall be securely fenced to the satisfaction of the Inspector.
6. All bridges shall be provided with secure hand and guard rails and a planked footway, and if used for passage of trucks shall be of such width as will provide a clear space of 3 ft. between the handrails and the sides of the trucks.
7. If work is carried on at night it shall be under the personal and constant supervision of a competent foreman appointed by the manager, and adequate light shall be provided.

II. ACCESS TO THE QUARRY.

8. Secure means of access shall be provided by which workmen can go to and from their working-places.
9. A ladder permanently used for the ascent and descent of persons in the quarry shall not be fixed in a vertical or overhanging position, and shall be inclined at the most convenient angle; and every such ladder shall have substantial platforms at intervals of not more than 10 yards. Ladders shall project at least 2 ft. above any platform or landing-place. The rungs of any ladder shall not be less than 4 in. away from the rock-face or other obstruction against which it may be fixed.
10. All tunnels used as a regular means of access to working-places shall be sufficiently drained, and where the space between the side of the truck and the side of the tunnel is less than 3 ft. places of refuge shall be provided at intervals not exceeding 50 yards. Every manhole and space for a place of refuge shall be constantly kept clear, and no person shall place anything in such manhole or space so as to prevent access thereto.
11. Persons shall not be raised or lowered in cages, trucks, buckets, or wagons unprovided with guides, except in sinking shafts; and no timber, tools, rails, sprags, or other material, except for repairing the shaft, shall be placed in the same cage in which men are being lowered or raised. In any shaft exceeding 20 ft. in depth, in which cages are not used, no person shall descend or ascend by the aid of machinery unless (in addition to the use of the loop, cross-bar, or other appliance) he is securely stayed to the rope employed for lowering or raising in such shaft by a strap or other fastening passing round the body under the arms, and such method of staying shall be used by every person who finds it necessary, in the execution of his duty, to descend or ascend a shaft on top of the cage-covers.
12. The top and all entrances between the top and bottom of every working or pumping shaft shall be properly and securely fenced or securely covered, but this provision shall not be taken to forbid the temporary removal of any fence or cover for the purpose of repairs or other operations if proper precautions are used.
13. Every abandoned or disused shaft shall be fenced or securely covered in, and its position indicated on the surface

by a post or cairn of stones, or such other permanent distinguishing-mark as an Inspector thinks sufficient.

14. Where a fence or cover has been temporarily removed from any entrance to a shaft to admit of the performance of ordinary quarrying operations, a strong horizontal bar shall be securely fixed across such entrance, not less than 3 ft. nor more than 4 ft. from the floor of the brace chamber or drive, as the case may be.

15. Where, in the opinion of the Inspector, the natural strata are not safe, every working or pumping shaft shall be securely cased, lined, or otherwise made secure; for which purpose an ample supply of sound good timber shall be kept on the ground ready for immediate use.

16. Every drive and every excavation of any kind in connection with the working of a quarry shall be securely protected and made safe for persons employed therein.

17. Where one portion of the shaft is used for the ascent and descent of persons by ladders, and another portion of the same shaft is used for raising material, the first-mentioned portion shall be cased or otherwise securely fenced off separate from the last-mentioned portion.

18. Every person employed in a quarry shall make himself acquainted with the system of signals used in such quarry, and a line or some other appliance shall be provided in each shaft to admit of danger-signals being communicated to the engine-driver from any portion of such shaft.

19. A clear view shall be kept for the engine-driver between his station and the shaft at the surface brace.

20. Every brace shall be properly covered to protect the workmen from the inclemency of the weather.

21. In every shaft in which a whim, whip, or windlass is used a proper ladder or footway shall be provided for the use of persons employed therein.

22. Before any winding-rope is used for raising or lowering persons in a quarry a full and accurate description of the rope shall be supplied to the Inspector, and his authority in writing to use the rope for the said purpose shall be obtained.

23. There shall be attached to every machine worked by steam, water, electrical or mechanical power, and used for lowering or raising persons, an adequate brake, which shall be maintained to the satisfaction of the Inspector at all times while the machine is in use.

24. All machinery in which steam, water, electricity, or air, or any two or more of them, are used as motive power shall be subject to the provisions of the Inspection of Machinery Act, 1908, so far as the same reasonably apply; and no such machinery, erected or fitted up, shall be employed until it has been examined by an Inspector appointed under that Act, and certified by him to be in proper and fit working-condition.

25. All boilers, compressors, engines, gearing, and all other parts of machinery, when used for any quarrying purpose, shall be kept in a safe state and condition.

26. Every fly-wheel, and all exposed or dangerous parts of the machinery, and every tramway constructed on an elevated platform other than a tramway worked by ropes, shall be kept securely and safely fenced.

III. BLASTING.

27. The charging, tamping, and firing of all drilled holes shall be done by the manager or foreman or by a competent person appointed in writing by him.

28. Tamping shall be of clay or other suitable material to the approval of the Inspector.

29. In any tunnel or drive where the number of holes to be fired exceeds six electrical firing apparatus shall be used. If the number of holes to be fired does not exceed six they may be spitted.

30. In any tunnel or drive, as soon as possible after shot-firing all places where shot-holes have been shall be hosed with water, and a thorough search shall be made for any unexploded portion of a charge.

31. If a charge misses fire—

(a.) A second charge shall not be placed in the same hole.
(b.) If the charge was fired electrically, the person firing the charge shall, before approaching the hole, disconnect the cable and the removable handle from the firing apparatus, and shall examine the cable and connections for any defect.

(c.) Except where the missfire is due to a faulty cable connection, and the charge is fired within one hour and a half after the defect is remedied, another charge shall be fired in a fresh hole, which shall be drilled not less than 12 in. away from the hole in which the charge has missed fire, and shall as far as practicable be parallel with the drilled hole. If, however, the hole was bulged, the distance of the fresh hole shall not be less than 24 in. from the miss-fired hole.

(d.) If the miss-fired charge contained a detonator, the person firing the second charge shall, before doing so, attach a string to the electric lead or the fuse of the miss-fired charge, and secure it by attaching it to the cable or otherwise.

(e.) After the second charge has been fired, no person shall work in proximity thereto until the person firing the charge or an official of the quarry has made a careful search for the detonator and charge of the miss-fired charge. If these are not found the stone shall be loaded in a specially marked truck under the supervision of the person firing the charge or an official. The search for the detonator and charge,

and the loading of any stone which may contain a detonator, shall be carried out as far as possible without the use of tools.

(f.) Should the miss-fired charge not be dislodged by the second charge, further holes must be drilled and the same precautions taken as aforesaid.

32. No drill shall be used for the boring of a hole for a charge unless it allows at least a clearance of $\frac{1}{4}$ in. over the diameter of the cartridge which is intended to be used in the hole, and no person shall attempt to charge a hole unless such clearance exists.

33. No explosive shall be forcibly pressed into a hole; and when a hole has been charged the explosive shall not be unrammed, nor shall any part of the stemming be removed, nor shall the detonator leads be pulled out.

34. The fuse known as instantaneous fuse shall not be used at or in any quarry.

35. After a hole has been bulled, all loose material shall be removed therefrom, and no charge shall be placed therein within one hour unless the hole has been swabbed with water before the second charge is inserted.

36. Explosives other than blasting-powder shall not be dropped into holes exceeding 6 ft. in depth, but shall be lowered therein by some suitable device.

IV. MACHINERY AND PLANT.

37. No person shall remain under the rope or chain of an aerial incline whilst a wagon or load is ascending. Whilst a load is being moved on the landing-table no person shall remain immediately beneath it; and no person shall be allowed, without special permission from the manager or other official, to ascend or descend by means of an aerial incline.

38. A competent person appointed for the purpose shall daily inspect the external parts of the plant, machinery, and appliances installed in or about a quarry, and shall forthwith make or cause to be made a true report (signed by himself) of the condition thereof, in a book to be kept at the quarry for such purpose.

39. The rails on the tops of all inclines and on all landing-tables shall be provided with proper stops or other appliances for preventing the wagons from running away, except when the rope or chain is not detached from the wagon.

40. Every crane shall be provided with an efficient catch or an efficient brake.

41. Machinery other than that used in connection with stone-crushing shall not be oiled while in motion.

42. The machinery, appliances, and permanent-ways shall be kept in an efficient state of repair.

43. Only wire ropes shall be used for haulage purposes on self-acting inclines, except on the advancing top section of jigs where chains may be used.

44. All underground haulage inclines and self-acting inclines exceeding 100 ft. in length shall be fitted with bells or other adequate signalling appliances.

45. On every inclined haulage road where mechanical haulage other than endless rope or chain is used provision shall be made, to the satisfaction of the Inspector, to arrest the runaway trucks before reaching the bottom of the incline, and where direct haulage is in use a backstay or trailer shall be attached to each ascending truck or set of trucks if required by the Inspector.

46. No person shall ride upon any truck without permission of the manager or foreman.

V. AMBULANCE AND WATER-SUPPLY.

47. (1.) At every quarry where more than five persons are employed there shall be provided and kept in good condition and ready for immediate use at a convenient spot—

(a.) A suitably constructed stretcher.

(b.) A box containing a sufficient supply of suitable splints and bandages, adhesive plaster, boric vaseline, cotton-wool, and tincture of iodine or other suitable antiseptic solution.

(2.) The manager or foreman shall personally inspect the appliances so provided, at least once in every month, and satisfy himself that they are in conformity with the above requirements.

48. A sufficient supply of fresh drinking-water shall be provided for the free use of all persons employed at all quarries.

VI. DUTIES OF INSPECTOR.

49. (a.) It shall be the duty of the Inspector generally to see that the provisions of the said Act and these regulations are complied with, and from time to time to visit and inspect quarries and all machinery used in or about such quarries other than steam-engines and boilers.

(b.) In the performance of his duties and functions under the said Act the Inspector, or any person appointed by the Inspector in writing, shall at all convenient times have full and free access to any such quarry or machinery, or to any tramways used in connection with any such quarry, and may use all convenient means and appliances belonging thereto

or connected therewith; and it shall be the duty of the owner of such quarry, machinery, or tramway, and all persons in any way employed in or about the same, to afford such assistance as is reasonably required for facilitating such inspection.

(c.) Every person commits an offence who refuses to permit the use of such means and appliances, or to render such assistance, or who obstructs the Inspector or the person so appointed by him as aforesaid in making any such visit or inspection.

VII. DUTIES OF OFFICIALS AND WORKMEN.

50. The quarry manager or foreman shall see that the provisions of the said Act and these regulations are carried out.

51. The quarry manager or foreman shall daily and within two hours immediately before the time for commencing work in any part of the quarry inspect every working-place and travelling-road, and all adjacent places from which danger might arise, and shall forthwith make a true report of his inspection in a book kept for the purpose at the quarry, which book shall be accessible to the Inspector and the workmen employed; and should danger be apprehended, steps shall at once be taken to remove the source of it. He shall also satisfy himself as to the safety of any rope and other appliances used by the workmen.

52. The quarry manager or foreman shall once at least in every twenty-four hours examine the state of all safety appliances or gear connected with the working of the quarrying operations; and he shall once in each week carefully examine the buildings, machinery, shafts, levels, planes, and all places used in the working of such quarrying operations; and every such manager and person forthwith after every such examination shall record in writing, in a book to be kept for that purpose, his opinion as to their condition and safety, and as to any alterations or repairs required to ensure greater safety to the persons employed in the working of such quarry.

53. The quarry manager and foreman shall cause to be provided proper sanitary arrangements for the use of the workmen in the locality of the quarry to the satisfaction at all times of the Inspector.

54. All workmen shall comply with the provisions of the said Act and these regulations, and with such directions concerning safety and discipline as may be given to them by the officials.

55. Each workman working on the face of the quarry, or standing on a narrow ledge shall, when requisite, use a rope or other appliance; and every workman shall, before commencing work, satisfy himself as to the safety of any rope and other appliances for his personal use, and shall not use anything that he finds unsafe.

56. Each workman shall, before commencing work, and during the course of it, and especially after blasting, make a careful examination of his working-place, and remove any loose rocks, stones, or earth which might be dangerous.

57. No workman shall throw down rock, stones, earth, or other material which might endanger other persons, without giving them warning and seeing that they have retired to a safe place.

58. Every workman who notices anything that appears unsafe or likely to produce danger shall forthwith report it to the owner, agent, or person in charge.

59. Every person howsoever employed in or about the quarry shall be subject to the provisions of the said Act and regulations thereunder, and shall obey the commands or instructions of the manager or foreman.

60. No person shall use threatening or abusive language towards the manager or foreman, nor shall the manager or foreman use threatening or abusive language towards any person employed at or about a quarry.

61. No person shall enter or remain in or about the quarry or works while in a state of intoxication. No intoxicating liquor, on any pretence whatever, except in cases of necessity and with the consent of the manager, shall be taken into a quarry.

62. A copy of these regulations and of the general rules under the said Act shall at all times be posted in a conspicuous place in every quarry, and it shall be the duty of every quarry-manager to see that such copies are renewed as often as they may become torn or defaced.

VIII. PREVENTION OF DUST, AND VENTILATION.

63. When rock is crushed in a dry state there shall, if required by the Minister of Mines, be provided an adequate jet or spray of water, or a suction fan, which in the opinion of the Inspector will effectually keep the air pure and prevent the circulation of dust.

64. No rock-drills operated by compressed air, steam, or electrical power shall be used in any tunnel other than axial water-feed rock-drills, unless a certificate under the hand of the Inspector is in force to the effect that there is sufficient water in the ground to prevent the formation of dust or that the dust is innocuous.

65. There shall be constantly maintained in every working-face of a tunnel or drive exceeding 300 ft. in length adequate ventilation to the extent of not less than 150 cubic feet of air per minute for every person and 600 cubic feet of air per minute for every horse working therein.

Where the site of an erected dwellinghouse is considered injurious to the health of the occupants, the Council may order the owner or occupier to remove such building to a more healthy site.

12. In the case of houses already erected the Council may require the owner or occupier of any dwellinghouse which does not comply with Section B, clauses 10 and 11, to make such alterations or additions as may be deemed necessary.

13. The Council may, or shall if the Medical Officer of Health or Director of Maori Hygiene so directs, order the removal or destruction of any building in a dirty and unwholesome state, if in its opinion it is unsuitable for human habitation, or if the owner or occupier thereof fails after due notice to clean, renovate, or himself remove or destroy the same.

14. The Chairman of the Committee, or any person duly authorized by the Committee in that behalf, may by notice in writing direct the owner or occupier of any house or other building in a dirty and unwholesome state to clean or cause the same to be cleaned within a time to be specified in such notice.

15. Any person refusing or neglecting to comply with notice for removals, alterations, or cleaning under clauses 8, 10, 11, 12, 13, and 14 shall be liable to a fine not exceeding £1 for the first offence and £5 for every subsequent offence, and in the case of persistent refusal or neglect to comply, the Committee may order the work to be done. Any costs incurred by the Committee in and about such removals, alterations, or cleanings shall be a debt due to the Committee, recoverable as liquidated damages by process in a Magistrate's Court.

16. The Committee may, in its discretion, ease or modify the application of the foregoing clauses 8, 12, 13, and 14 in the case of any old, ill, or feeble person occupying any such buildings as aforesaid, so that such clauses shall not press heavily on such person. The Chairman of the Committee shall report the case and all the circumstances to the Chairman of the Council, whereupon the Council shall consider such case and decide whether it shall devote part of its funds towards cleaning and otherwise improving the dwellings of such sick, old, or feeble persons.

17. The owner or occupier of a dwellinghouse shall be held responsible for preventing more persons sleeping in any room thereof than are allowed by the floor-space laid down in clause 10. Failure to comply with this shall render him liable to a penalty not exceeding 5s. for a first offence and not exceeding 10s. for every subsequent offence.

Movable and Temporary Dwellings.

18. Every person who shall own or occupy temporarily a tent, shed, whare, or similar structure shall be responsible that the same is clean, dry, weatherproof, and ventilated. Each adult and every two children under ten years of age shall be provided with 16 square feet of floor-space.

19. Every person who shall own or occupy a tent, shed, whare, or similar structure which is in such a state as to be a nuisance or injurious to health, or which is so overcrowded as to be injurious to the health of the inmates, whether or not members of the same family, shall be deemed guilty of an offence, and shall be liable to a penalty not exceeding £1 for a first offence and not exceeding £5 for every subsequent offence.

No person who is the owner or occupier of any premises within a Maori kainga shall permit or suffer any nightsoil or refuse or any offensive rubbish or matter of any kind whatever to accumulate or remain or be in or upon such premises so as to be injurious or dangerous to health or as to cause an offensive smell.

The seat of a pan privy, the aperture in such seat, and the space beneath such seat shall be of such dimensions as to admit of a movable receptacle for nightsoil of a capacity of not less than 1 cubic foot being placed and fitted beneath such seat in such a manner and such a position as may effectually prevent the deposit upon the floor or sides of the space beneath such seat, or elsewhere than in such receptacle, of any filth which may from time to time fall or be cast through the aperture of such seat.

(c.) The seat of such pan privy shall be so constructed that the whole of such seat or a sufficient part thereof may be readily moved or adjusted in such a manner as to afford adequate access to the space beneath such seat for the purpose of cleansing such space, or removing therefrom or placing or fitting therein the appropriate receptacle.

(b.) The seat of a pan privy, the aperture in such seat, and the space beneath such seat shall be of such dimensions as to admit of a movable receptacle for nightsoil of a capacity of not less than 1 cubic foot being placed and fitted beneath such seat in such a manner and in such a position as may effectually prevent the deposit upon the floor or sides of the space beneath such seat, or elsewhere than in such receptacle, of any filth which may from time to time fall or be passed through the aperture of such seat.

(c.) The seat of such pan privy shall be so constructed that the whole of such seat or a sufficient part thereof may be readily removed or adjusted in such a manner as to afford adequate access to the space beneath such seat for the purpose of cleansing such space, or removing therefrom or placing or fitting therein the appropriate receptacle.

(d.) The receptacle in any pan privy shall be constructed of such material and in such a manner as to prevent any escape by leakage or otherwise of any part of the contents of such receptacle. The aperture of the seat shall be provided with a cover, which must be kept over the aperture when the seat is not in use.

40. The occupier of every house shall cause the pans of all pan privies used in connection with such house to be emptied and properly cleaned at least once in every week, and in any case so frequently as to prevent overflow.

41. It shall not be lawful for any person to bury nightsoil otherwise than in a pit or trench in such a manner and to such a depth as to provide that it shall have a covering of earth of at least 6 in. when the pit or trench is closed.

42. No nightsoil shall be buried within 50 ft. of any dwelling or within 60 ft. of any well. A pit may be used instead of a movable receptacle, provided such pit does not communicate directly with subsoil water. The aperture of the seat shall be provided with a cover, which must be kept over the aperture when the seat is not in use.
