8. (a.) "Income" shall be deemed to mean the sum total to which the account is entitled in respect of the financial year to which such statement of income applies, whether the same has been actually received or not during such financial year. "Income" shall not include receipts in respect of previous or subsequent financial years: Provided that where any amount received in respect of a previous year has not been taken into that year's account such amount shall be shown as "miscellaneous income."

(b.) "Expenditure" shall be deemed to mean the sum total chargeable in respect of a financial year to which such statement of expenditure relates, whether such is actually paid within such financial year or not, and shall not include payments in respect of previous or subsequent financial years: Provided that where payments in respect of a previous year have not been taken into that year's account such payments shall be shown as "miscellaneous expenditure."

9. Receipts or revenue on account of capital, and payments or expenditure on account of capital, shall not be included in the Income and Expenditure Account.

10. (a.) Receipts or revenue on account of capital shall be deemed to mean moneys or other value received or receivable, which—

(i.) Are for the purpose of or may be lawfully and properly appropriated for capital expenditure;

(ii.) Form the proceeds of the disposal of any permanent fixed and capital assets of a Board; or

(iii.) Are for the purpose of repaying the principal of any loan for capital expenditure.

(b.) "Capital expenditure" shall be deemed to mean any expenditure upon the acquisition of land, the erection of buildings (including structural alterations), the initial purchase of equipment, and any permanent improvements to such existing assets, including legal and other expenses, and architects' fees and, generally, all expenditure resulting in the addition to the fixed assets of a Board; but shall not include expenditure for the purpose of maintaining such assets in a state of efficiency:

Provided that replacements of an article of equipment exceeding £100 in value and of buildings shall be treated as capital expenditure in respect of the difference in the value previously appearing in the Board's books and the cost of replacement, and the asset shall be increased accordingly in the next ensuing balance-sheet. The remainder of such cost shall not be treated as capital expenditure, but shall appear as "miscellaneous expenditure" in the Income and Expenditure Account.

Provided also that for the purpose only of making levy on contributory local authorities and obtaining subsidy thereon, the following shall be treated as capital expenditure:—

- (i.) The whole cost of replacements of buildings or of an article of equipment exceeding £100 in value.
- (ii.) Repayment of the principal of loans current for capital purposes.
- (iii.) The amount to be placed to the credit of a building fund created under section 12 of the Hospitals and Charitable Institutions Amendment Act, 1913, provided such fund shall be duly invested as provided in the section aforesaid.

11. 12. The accounts representing the fixed assets of the Board shall be credited and Capital Account, or the account of the special fund in respect of which such assets are held, as the case may be, debited with the amount of any loss arising out of the sale or other disposal of such assets, and with the amount of depreciation estimated to have taken place.

13. Where the amount of the proceeds receivable in respect of the disposal of any of the fixed assets of the Board exceeds the value as shown in the books the amount of such excess shall be debited to the asset account concerned and credited to Capital Account, or to the account of the special fund in respect of which such assets are held.

14. Every account kept of fees payable by persons assisted shall be debited with the full amount of the maintenance fee fixed by the Board's by-laws in respect of ordinary patients: Provided that such accounts shall be credited separately with—

- (a.) The amounts allowed as a reduction in the scale of fees to be paid on account of such patient in accordance with any agreement or rule made by the Board and applicable to a particular class of patient; and
- (b.) The amounts allowed by resolution of the Board to be written off as irrecoverable.

15. (a.) The Board shall prepare a schedule setting forth, in respect of each amount owing to the Board at the close of each financial year in respect of persons assisted—

- (ii.) The name of patient;
- (iii.) The name and address of person or party responsible for fees;
- (iv.) The amount owing on the 31st March of such financial year.

(b.) At a meeting to be held during the month of April succeeding the date above referred to the Board shall review the schedule and, after due and proper inquiry, decide and cause to be stated, in respect of the book debts therein shown, the amount of each that is in their opinion recoverable and irrecoverable respectively.

The amounts indicated as irrecoverable shall forthwith, by resolution of the Board, be written off, and be deemed for the purpose of the annual accounts to have been written off in respect of the financial year to which the schedule relates and shall be deducted, from the amount owing.

(c.) From the total amount then owing the total amount of the debts deemed to be of doubtful value shall be deducted, and such amount shall be shown clearly in the balance-sheet together with the amount owing and deemed to be recoverable.

(d.) The total amount of fees written off as irrecoverable and allowed as a reduction in the scale of fees as provided in Regulation 14 shall be debited separately to an account termed "Hospital Relief Account."

(e.) Notwithstanding anything hereinbefore contained the Board may also, if it thinks fit, from time to time during any financial year carry out any of the provisions of this regulation in respect of any portion of such year, and the annual schedule may then be prepared in accordance therewith.

16. Each Board shall, not later than the 1st day of May in each year, forward to the Director-General of Health a copy of such statement of income and expenditure and balance-sheet in the form set out in the First Schedule hereto, whether the same shall have been audited or not, and a copy in duplicate thereof shall be forwarded to the Director-General of Health as soon as may be after it has been duly audited.

CAUSES OF DISTRESS.—DEFINITION OF CLASSES, ETC.

"Head of family" means—

The father, if he usually resides with his family :

The mother, if the father is deceased or permanently absent :

Adult applicants of either sex without dependants, such as bachelors, spinsters, widowers, or married persons living apart from their families.

"Number of applicants" represents the number of cases which came before the Board; and "Persons affected" represents the persons on whose behalf the applicant applies—e.g., ten widows apply for relief with an aggregate of thirty children dependent on them—the number of applicants would be ten and the number of persons affected forty.

Selection of "Effective Causes."—The scale of values of effective causes is deemed to correspond to the order observed in the subjoined list—that is to say, taking the classes in the order given, the first on the list which will apply is to be deemed the effective cause, and all subsequently named classes are thereby eliminated.

Classification.

1. *Insanity.*—Includes all cases where the head of the family has been adjudged insane. Merely suspected of alleged insanity or mental infirmity is not included.

2. *Imprisonment.*—Includes all cases where the head of the family is serving a term of imprisonment at the time of the application.

3. *Old Age.*—Includes all cases where the head of the family, if a male, is sixty-five years of age and upwards, and, if female, of sixty years and upwards, irrespective of any other circumstance except those of Classes 1 and 2.

4. *Widowhood.*—Includes all cases of widows, with or without dependants, subject to Class 3.

5. *Illegitimate Maternity.*—Includes all cases of unmarried women having one or more illegitimate children dependent.

6. *Desertion.*—Includes all cases of married women not coming under Class 3 whose husbands have deserted them or are judicially or mutually separated from them on their initiative.

7. *Sickness.*—Includes all cases, not being eligible for a preceding class, where the head of the family is disabled from adequately maintaining the dependants (who, in certain cases, will be solely the applicant) through sickness, whether temporary or chronic, and whether the result of accident or otherwise. Mental infirmity is included in this class.

8. *Physical Defects.*—Includes all cases, not being eligible for a preceding class, where the head of the family is prevented from earning adequate maintenance for the dependants through the loss of one or more limbs, permanent defects of sight or hearing, and deformity, whether congenital or acquired (e.g., as the result of accident or disease).

9. *Physical Inefficiency.*—Includes all cases, not being eligible for a preceding class, where the head of the family, without exhibiting definite symptoms of acute disease, is physically incapable of competing on equal terms with his fellows in his customary or other employment.

10. *Unemployment (Involuntary).*—Includes all cases, not being eligible for a preceding class, where the able-bodied head of family is unemployed through *bona fide* scarcity of work and not through personal deficiency.

11. *Unemployment (Voluntary).*—Includes all cases, not being eligible for a preceding class, where the able-bodied head of the family is unemployed through habitual or sporadic intemperance, disinclination to work, lack of initiative, love of amusement, or general inefficiency, such as carelessness, irregularity, laziness, or other misconduct when in employ.

12. *Indeterminate.*—Includes all cases not coming within any of the preceding classes.

Amended Regulations under the Education Act, 1914, relating to the Organization, Examination, and Inspection of Public Schools, and the Syllabus of Instruction.

JELlicoe, Governor-General.

ORDER IN COUNCIL.

At the Government Buildings at Wellington, this 25th day of March, 1922.

Present :

THE RIGHT HONOURABLE W. F. MASSEY, P.C., PRESIDING IN COUNCIL.

IN pursuance and exercise of the powers and authorities vested in him by the Education Act, 1914, and the amendments of that Act, and all other powers and authorities enabling him in this behalf, His Excellency the Governor-General of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby make the amendments set out in the Schedule hereto in the regulations relating to the organization, examination, and inspection of public schools, and the syllabus of instruction, made by Order in Council dated the fifteenth day of September, one thousand nine hundred and nineteen, and subsequently amended, and in the regulations for physical education and military drill made by Order in Council dated the twenty-third day of October, one thousand nine hundred and thirteen; and doth prescribe that this Order shall come into force on the date of the first publication thereof in the *New Zealand Gazette*.

SCHEDULE.

1. CLAUSES 7, 8, and 9 of the regulations for the organization, examination, and inspection of public schools, and syllabus of instruction, are hereby revoked, and the following clauses substituted therefor:—

7. (1.) Every public school shall, as a general rule, be visited annually by an Inspector of Schools. No notice of any visit shall in general be given unless the Inspector deems it advisable to hold a more or less detailed examination of the pupils, in which case ten days' notice shall be given. After one of his visits in each year the Inspector shall present an "Inspection Report," but a special report may be presented after any visit.

(2.) Where the Senior Inspector decides that a school of Grade I or higher grade need not be visited during the year either for the purpose of grading the teachers or for the general purposes of inspection, he shall report the matter to the Board, and shall file the explanation along with the Inspection Reports.

8. (1.) The Inspection Report shall consist of a statement in general terms regarding the efficiency of the school as a whole, and shall relate to the organization and management of the school; the order, discipline, and tone; the regularity of the attendance; the general efficiency of the teaching; the instruction and training of the pupil-teachers and probationers; the accommodation; the state of the buildings, grounds, and fences; the provision made for ventilation, warming, and cleaning; special circumstances affecting the efficiency of the school; and any other matters which, in the opinion of the Inspector, should be brought under the notice of the Board and the School Committee.

(2.) After each visit the Inspector shall furnish the teacher in charge with a brief confidential criticism of the details of the work of the school, and with notes for his guidance. Such detailed notes shall relate to any or all of the following matters:—

(a.) The organization of the school as arranged by the head teacher with respect to—

(i.) The manner in which the staff has been distributed in accordance with the accommodation, the size of the different classes, the abilities of the teachers, and the salaries they are receiving:

(ii.) The general scheme of instruction:

(iii.) The arrangement of the time-tables:

(iv.) The instruction and training of the pupil-teachers and probationers:

(v.) The arrangements for playground supervision, for keeping the grounds tidy and attractive, and for physical instruction, organized games, and the like.

(b.) The head teacher's management of the school with respect to his direction of the work of his staff, and the extent and manner in which he makes his influence felt throughout the school, particularly in the development of a good tone, of corporate life

and of the patriotic sentiment, his relations with his staff and with the parents of his pupils, and the discretion he displays in the determination of the promotion of pupils from class to class.

(c.) The efficiency of each assistant teacher with respect to his development of the scheme of work outlined by the head teacher, his method and power of imparting instruction, his influence over his pupils as shown by his ability to secure their co-operation in the work of instruction, in class government, in keeping their class-room tidy and attractive, and in organizing playground activities.

(d.) Any other matter the Inspector may see fit to comment on.

It shall be the duty of the head teacher to show his assistants and allow them to copy those portions of the confidential notes that relate to their work, and such notes shall be the personal property of the teacher; but, so long as the teacher remains in charge, the notes shall always be available for the Inspector. A copy of the confidential criticism and notes shall be filed by the Inspectors along with the copy of the Inspection Report that is retained for the use of the Education Department (*vide* clause 10 hereof).

(3.) In estimating the effectiveness of the instruction the Inspector should give due weight to the extent to which the pupils are being trained to be careful and accurate in their work, and he should, where either care or accuracy is wanting, show the teacher how it may be secured. Inspectors will, however, be expected to reduce the formal examination of the pupils to a minimum. As a rule, an investigation of this kind is necessary only when the efficiency of a teacher is in doubt. At both visits of inspection the Inspector should see the teacher at work, and should by example as well as by precept endeavour to remedy any faults that may appear. He should, as a rule, allow the lessons to be taken in the order and in the manner prepared by the teacher; but he may, where necessary, arrange differently, taking lessons himself or directing the teacher to substitute lessons in other subjects.

(4.) At each of his visits the Inspector should make such notes on the quality of the teaching, the discipline, environment, tone, and organization as will enable him to grade the teacher with confidence. The work of the Inspector is not, however, to be subordinated to the grading of the teachers; his chief duty is to endeavour to raise the efficiency of the schools in his charge.

(5.) The Inspector's investigation should be made on the broadest lines possible, and he should guard against estimating the efficiency of a school or a teacher solely in accordance with measurable results, irrespective both of the manner in which these results have been produced and the effect the production of such results may have had on the mental and spiritual development of the pupil as evidenced by his intelligence, his spontaneity, his interest in his work, and his general alacrity. In every case more credit should be given to a teacher who relies with success on some system of auto-education than to one who relies on the more rigid drill methods of instruction. Every encouragement should be given to teachers to investigate and experiment with the newer methods of imparting instruction and to modify their methods in accordance therewith.

(6.) After consultation with the head teacher the Inspector may, where he thinks fit, alter the organization of a school and the classification of the pupils, and such modified organization or classification shall remain in operation for whatever period the Inspector deems to be necessary.

(7.) Any neglect of rooms or premises, or any want of tidiness in the school rooms and grounds, should be brought under the notice of those concerned, while special commendation should be given to teachers who so affect the environment of the children as to cultivate their taste for order and beauty and to create pride in their school.

(8.) In any case where a pupil-teacher or probationer does not secure a pass in at least Group I of Class D in the Teachers' Certificate Examination at the end of his course, or where his examination status at the end of his course does not show a satisfactory advance on that reached at the beginning of such course, an explanation of such failure should be required from the head teacher by the Inspector.

(9.) One copy of the Inspection Report shall be filed by the Senior Inspector for the use of the Department, one shall be submitted to the Education Board, and one sent by the Board to the head teacher, by whom it shall be placed among the school records.

(10.) No portion of an Inspection Report shall be published.

9. The Senior Inspector, in collaboration with his colleagues, shall submit to the Director at the close of each year a report on the public

schools of the district, dealing, for the schools generally, with such of the topics named in clause 8 hereof as it may seem expedient to include, and giving, in addition, a statement showing, with respect to public and private registered schools separately, the number of pupils on the roll of Standard VI, the number of Proficiency, Competency, and Endorsed Competency Certificates issued, with the corresponding percentage of the number of candidates on the roll. The report should also indicate the efficiency of the teaching staff, the means taken to improve the examination status of uncertificated teachers, the condition particularly of the more remote schools, the methods of inspection, the steps taken by the inspection staff to modernize the methods of teaching and to encourage the teachers to study educational literature, the nature and results of any investigations teachers or Inspectors have made into school problems, the manner and extent of the instruction in the principles of temperance, and the success which has attended the teachers' efforts to foster the civic spirit and to inculcate patriotism and loyalty to duty.

2. Clause 23 thereof is hereby amended by the addition of the following words: "Physical drill shall be given to all boys and girls for a period of not less than fifteen minutes daily during school hours, and shall consist of the exercises contained in the syllabus of physical training for schools issued by the Education Department and in any appendices or notes thereto that may be issued from time to time with the authority of the Minister of Education; provided that any boy or girl may, on the certificate of a medical practitioner or a school medical officer, be exempted from attendance at such instruction."

19. No person shall within the road district erect upon any piece of land any building used or intended to be used as a dwellinghouse, or for human habitation or employment, or any place used for the manufacture or storage of food for human consumption, in such manner that any portion of such building is within the space of 25 ft. from any stable or building used or intended to be used as a stable already erected upon such piece of land, or within the space of 30 ft. from any cow-shed or building used or intended to be used as a cow-shed already erected upon such piece of land.

20. It shall be lawful for the Board to refuse the issue of a permit for the execution of any repairs to any building situated in any part or parts of the road district if it should be of the opinion that the age or state or general condition of such building is such that in the interests of the health of the public a permit should not be issued.

21. No person shall remove a building from one area to another, or from one part of an area to another part of the same area, or re-erect the same wholly or in part, or remove the same entire or in sections from one part of an allotment to another part thereof with the same intention, unless such person shall have made written application to the Inspector for permission so to do in the same manner and submitting the same particulars as if the erection were a new one, specifying, in addition, that so much of the old material as was sound and of good quality and in accordance with this part of this by-law would be used in the erection, and that in all respects the erection or re-erection would be in accordance with such requirements, and shall have satisfied the Inspector that the material proposed to be reused is fit for the purpose and in accordance with this part of this by-law, and shall have obtained from the Inspector permission for such removal or re-erection. No materials shall be used in the construction of any house or building which has previously formed part of any house or building condemned as being in a condition dangerous to public health, and any materials which the Inspector may so declare unsuitable shall within twenty-four hours be removed by the person in charge of the works from the site of the proposed building.

22. If during the progress of the work of erecting, adding to, altering, repairing, or renewing any buildings for which a permit shall have been issued it shall be found on inspection or examination thereof by the Inspector, or other authorized inspecting officer of the Road Board, that some work, materials, drawing, matter, or thing connected therewith, and which does not comply with or is in contravention of any of the provisions of this part of the by-law, or of any such other by-laws and Act of Parliament as aforesaid, had been overlooked on the examination of the plans and documents prior to the issue of such permit, then and in any such case, and notwithstanding the issue of such permit for such works, the person applying for and obtaining such permit shall nevertheless be bound to in all respects comply with and conform to the requirements of any notice under the hand of the Inspector served upon him respecting any such non-compliance, irregularity, or contravention; and in any proceedings instituted against such person for any non-compliance with this notice, or otherwise with the provisions of this or such other by-laws or Act of Parliament, such person shall not be entitled to plead the issue of such permit as a bar to any such proceedings.

23. Except as herein provided, no person shall erect a new dwellinghouse in the district upon a site of a less area than one-eighth of an acre, and unless such site shall have a frontage of at least 20 ft. to a public road: Provided that in the event of a person subdividing or cutting up any property in such manner that the sections fronting the road comply with the foregoing provision, leaving an area at the back of such sections, then the Board may, in its discretion, permit such back area to be built upon if the frontage is of at least 15 ft. in width to a public road: Provided, however,

that no such back section shall be of a less area than one-eighth of an acre, and that not more than one single dwelling-house shall be erected upon such back section.

24. The site of any dwellinghouse, whether such dwellinghouse be erected before the coming into force of these by-laws or thereafter, shall not be reduced in area if such site be or if it become by such reduction less than one-eighth of an acre in area.

25. No person who makes any alteration in or addition to, or who builds, any erection shall diminish thereby the aggregate area of the open space provided in connection with any dwellinghouse if the open space shall be of the same extent as or of less extent than is required by these by-laws; or, if such open space shall be of greater extent than is required in the case of the erection of a new dwellinghouse, shall by any such alteration, addition, or erection diminish such open space to such an extent as to leave and provide in connection with such house less open space than is required by section 26 of these by-laws.

26. *Air-spaces.*—No person shall erect a new dwellinghouse in the district unless he provide at the side or in the rear thereof an open space exclusively belonging to such house and of an aggregate area of not less than 300 square feet: Provided that such open space shall extend throughout the entire width, or, in the alternative, throughout the entire depth, of the site, and shall be free from any erection thereon above the level of the ground, and shall be so maintained while the site is occupied by the house: Provided also that the minimum distance across such open space from every part of any dwellinghouse, or from every part of any washhouse, shed, convenience, or other erection belonging thereto shall be as follows: (a.) If the height of the house does not exceed 15 ft., 15 ft.; (b.) if the height exceeds 15 ft. but does not exceed 25 ft., 20 ft.; (c.) if the height exceeds 25 ft. but does not exceed 35 ft., 25 ft.; (d.) if the height exceeds 35 ft., 30 ft. For the purposes of these by-laws, where the side boundaries of any site are not of the same length, the mean length of such side boundaries shall be taken as the depth of site for the purpose of defining the distance across such open space, and the height of a dwellinghouse shall for the purposes of these by-laws be measured from the average level of the ground immediately adjoining the side or rear of such dwellinghouse, as the case may be, to the level of half the vertical height of the roof or to the top of the parapet, whichever is the higher.

27. *Preventing Reduction of Space.*—No person shall make any alteration or addition to any dwellinghouse (whether erected before the coming into operation of these by-laws or not) whereby the open space attached to such dwellinghouse shall be diminished by such alteration or addition so as to leave a less open space than is required by these by-laws to be provided.

28. No person shall erect or cause to be erected any building if the effect of erecting such building results in reducing the frontage or area of the parcel of land on which any dwellinghouse is already erected to less than that required by these by-laws in the case of a dwellinghouse erected after the coming into operation of this by-law.

29. It shall be deemed an offence under these by-laws if the owner of any dwellinghouse coming within the provisions of these by-laws, which shall not have in connection with it the open space required by these by-laws, occupies or permits such dwellinghouse to be occupied.

30. No person shall use or occupy as a dwellinghouse any building erected after the coming into operation of this by-law, unless the land upon which the same is erected and exclusively belonging to such building, and used or occupied or intended to be and capable of being used or occupied therewith as a separate holding, has a frontage sufficient to comply with these by-laws.

31. *Insanitary Material.*—No person shall use any material in the erection, re-erection, or repair of any dwellinghouse which is, in the opinion of the Inspector, unsound, insanitary, or improper to be used for their intended purpose. Any such materials shall, within twenty-four hours of their condemnation by the Inspector, be removed from the site of the proposed house, and shall not again be brought thereon.

32. *Walls of Living-rooms.*—No room in any house (other than a bathroom, closet, or storeroom) shall have a less average height than 9 ft. between the floor and the ceiling throughout an area equal to at least two-thirds of the floor-space.

33. *Covering for Walls and Ceilings.*—The internal walls and ceilings of all buildings used or intended to be used for human habitation, or where persons are employed, shall be covered with plaster, T. & G. lining, or other material approved by the Inspector.

34. *Ventilation and Lighting.*—Every room (other than a storeroom) shall be provided with at least one window other than a skylight opening direct to the external air. Such window shall be movable or made to open, and the opening must extend to the top of the window, and the total glazed surface of such window or windows provided shall be equal in area to at least one-tenth of the floor-space of such room.

35. *Air-space and Ventilation of Rooms.*—No occupier of any dwelling shall allow any room to be occupied as a sleeping-room by any person or persons which shall contain less than 400 cubic feet of air-space for each such person.

36. *Walls of Water-closet.*—Every water-closet and bathroom in a building shall be constructed and maintained in such a position that one of its sides at least shall be an external wall of such building. No water-closet shall be constructed or maintained so that it may be entered directly from any room used for the purpose of human habitation, or for the manufacture, preparation, or storage of human food. Such water-closet shall be constructed and maintained so that on any side on which it would abut on a room intended for human habitation, or the preparation or storage of human food, it shall be enclosed by airtight walls or partitions of material approved by the Inspector.

37. Any and every building now used or hereafter erected for the purpose of being used as a dwellinghouse shall be provided with a privy.

38. If any building, dwellinghouse, or part of a dwellinghouse be erected, altered, or repaired contrary to the provisions of this by-law, it shall be lawful for the Board to give notice in writing to the owner of such dwellinghouse, within a time to be mentioned in such notice, to take down, remove, or alter such dwellinghouse or part of such dwellinghouse in such manner that the provision of this by-law shall be accurately fulfilled. 40. No person shall erect, add to, or alter any dwellinghouse in such manner that the outer side of any external wall thereof shall be situate within 5 ft. of any boundary of the site—except the boundary forming the main frontage to the road—upon which such building shall be erected, added to, or altered.

41. No person shall commence the erection of any building upon any site not having natural or artificial subsoil drainage sufficient to prevent such site being damp, or upon any site having matter thereon which may prove dangerous to the health of the occupants of such building, until such matter has been removed to the approval of the officer appointed by the local authority for the purpose of such approval. The ground underlying and for a distance of 3 ft. from any part of such building shall be so formed and graded that no water can flow or lodge thereon or under any part of such building; and the local authority may, if they consider it necessary, require the portion of the site covered by any building to be properly asphalted or covered with a layer of reinforced cement concrete at least 2 in. thick.

42. Every person who shall erect any building within the district shall construct every external wall thereof which may be composed wholly or partly of wood so that there shall be at least 3 ft. between the outer surface of the wall and any portion of the site which may rise above the level of the bottom plates of such building.

43. There shall be paid to the Road Board Clerk in respect of every permit issued as aforesaid, and before the same is issued, the following fees:—

- (a.) For alterations and additions or buildings of a value exceeding £5 but not exceeding £100, 5s.

45. When, in the opinion of the local authority or the Inspector, any building, whether erected before the coming into force of this by-law or hereafter, is in an insanitary condition due to any of the following causes, namely—

- (a.) Dampness from any earth resting against any part of such building or contiguous to any wall thereof; water flowing beneath such building; leaking roofs; defective spouting or downpiping; defective walls or foundations; defective water-pipes, soil-pipes, or waste-pipes, and their connections appertaining to such building;

- (c.) The non-provision or insufficient provision of window area for the admission of sunlight to such building :
- (d.) Any dirty, foul-smelling, or dilapidated covering or coating on the interior walls or ceilings of such building :
- (e.) Any structural defect in the floors, walls, or ceilings, or any decayed timber existing in the floor, walls, or ceilings, of such building :
- (f.) By reason of any other sanitary defect whatsoever—then and in every case it shall be the duty of the owner of any such building, upon being served with a notice by the local authority or the Inspector so to do, to execute and do all necessary works and repairs, within the time limited as may be specified in such notice, to restore such occupied building to a proper state of repair and habitable condition to the satisfaction of the person by whom the said notice was issued.

46. It shall be the duty of every person on whose premises any building or erection may have been or shall be erected, added to, or altered, or repaired, to cause the provisions of these by-laws to be complied with as regards such buildings, erection, addition, alteration, or repair, and also as regards every drain, gutter, spout, downpipe, trap, waste-pipe, gully-grating, ventilation-shaft, and other sanitary or other convenience or appliance of or appertaining to such building, erection, addition, alteration, or repair; and every failure on the part of any such person as aforesaid to cause any such provision to be complied with as aforesaid shall be deemed to be an offence by such person, notwithstanding that under this or any other by-law any builder, licensed drain-connector, plumber, or any other person may also be liable to a penalty in respect to the same matter.

47. No owner of any building erected, re-erected, or altered after the coming into force of this by-law shall permit such building to be used until and unless the Inspector shall give a certificate stating that this by-law has been complied with in every particular and detail of such building.

Wooden Buildings.

48. Every building to be hereafter erected within the district, and all additions or alterations to buildings already or hereafter to be erected, shall be constructed or made only in the manner and of the materials specified in the following schedules:—

If blocks are used the shall have not less than 36 in. sectional area, be bedded at least 18 in. in solid ground, and under all wall and sleeper plates shall be placed so that the centre of each block is not more than 4 ft. 6 in. from the centre of each next adjacent block. Piles shall in no case be carried to a greater height than 4 ft. 6 in. above the ground-level; and where, owing to the configuration of the ground, the lowest or ground-floor joists require to be set at a greater height than the above, then a dwarf wall for their support must be constructed with studs and plates as hereinafter directed for outer walls. Bottom and sleeper plates shall be laid on an approved brick, stone, concrete, or pile foundation. Plates shall in all cases be the full width of studs by a minimum depth of 2 in. for bottom and intermediate plates and 2 in. for top plates. Sleeper-plates and bearer-plates shall in no case have less than 12 in. sectional area.

50. No person shall, unless by consent of the Inspector, hereafter construct, erect, or put up any wall of brick or concrete unless the same shall have a proper damp-course of either sheet lead of not less than 4 lb. per superficial foot, asphalt $\frac{1}{2}$ in. thick, or slates laid in cement, or other approved damp-proof material, beneath the level of the lowest timbers, and above the level of the surface of the ground adjoining such wall, as shall be determined by the Inspector.

51. Every external wall and every party wall hereafter erected must be built wholly of bricks or stone, or bricks and stone together, laid in with mortar or cement, in such manner as to produce substantial work, or of substantial concrete. No part of such wall shall overhang any part beneath it; and every such wall must be carried up from the ground the full thickness specified in the schedule following:—

53. The walls and piers of all buildings being erected in brick shall be properly and solidly bonded together with close joints filled with cement or lime mortar, and shall have stout galvanized hoop-iron of not less than 18-gauge and $1\frac{1}{4}$ in. in width, or woven-wire bonding, built in every 36 in. in height, one strand of hoop-iron or wire bonding for every $4\frac{1}{2}$ in. in thickness of walls, the hoop-iron being fastened together and being as continuous as possible. In the laying of the bricks not more than three rows of stretchers shall be laid to one row of headers, and all walls and piers shall be built to a line and be carried up plumb and straight.

54. No person shall build any hollow, external, or party wall having an interior space between the inner and outer thickness of the brick, stone, or concrete work except such thickness shall be thoroughly tied with metal or other suitable ties placed at such distances apart as shall be approved by the Inspector; but in the event of any person building such a wall, then the width of the cavity in the same shall not be reckoned as part of the thickness required in the foregoing schedule; and any such hollow wall not more than two stories nor exceeding 30 ft. in height may be erected at a total width of 12 in. for the full height, instead of width required by the said schedule.

55. All external walls shall, if required by the Inspector, be rendered with cement mortar or other approved water-proofing-material.

56. Sizes of plates, joists, and roods to be as for wooden buildings.

57. The following provisions shall apply to the quality, making, and use, as the case may be, of the several materials hereinafter set out in this subclause when such materials are used in or for any work affected by these by-laws, that is to say:—

Sand shall be sharp, coarse, and free from all impurities and dirt.

Gravel for concrete shall be clean, and free from soil, clay, dust, or other impurities; none shall be used larger than will pass in any direction through a ring $2\frac{1}{2}$ in. in diameter for foundations, or $1\frac{1}{2}$ in. in diameter for work above ground.

Timber: All timber shall be of good quality and suitable in all respects for the purposes for which it is intended to be used. No board or scantling shall contain more than one-third of sap, and no timber of the kind known as white-pine shall be used in the construction of any buildings.

58. *Water-supplies.*—The owner of any premises on which any person lives or is employed, or on which any food or drink for sale for human consumption is prepared, kept, or stored, shall, to the satisfaction of the Inspector, provide, keep, and maintain on such premises a pure, wholesome, and adequate supply of water for the use of persons living or employed on such premises, and for the due and cleanly performance of the work done on the same.

59. The owner of every water-tank or cistern shall cause an easily removable plug, pipe, or access-cap to be fixed into the bottom of such tank in order that it may be cleaned out easily from time to time.

60. It shall be the duty of every person in charge of any premises on which a water-tank stands to clean out and empty such tank once every six months at least; and the proof of such work having been done shall devolve upon such person.

61. No overflow-pipe from any water-tank shall be connected, or allowed to remain connected, to any drain or into the ground in any manner whatsoever. Every such pipe shall discharge into the open air or over a trapped gully, or on to a cement channel.

62. *Drainage.*—All buildings and land shall be provided and maintained by the owner with suitable and sufficient means of disposal of the whole of the surface, sewage, and waste water as shall be approved by the Board or the Inspector.

63. All buildings shall be provided and maintained by the owner with suitable and sufficient gutters, spouts, downpipes, and drains for conveying the rain-water from the roof of such building to such means of disposal as may in each case be approved by the Board or the Inspector.

64. It shall be the duty of any person on whose behalf any water-closet, urinal, bath, sink, lavatory, drain, or other sanitary appliance shall be established, erected, set up, or altered to cause all the provisions of these by-laws in every way affecting the same to be complied with, and in default thereof such person shall be guilty of an offence.

(a.) It shall not be lawful for any person hereafter to erect, make, or establish a water-closet, a drain or drain-connection, or to construct or alter any sanitary appliance or work, without having first obtained a permit from the Board; application for such permit to be accompanied by a plan of the proposed work if so directed by the Clerk of the Board.

(b.) Every person to whom a permit has been granted shall give twenty-four hours' notice in writing to the Inspector or officer of the Board appointed for the purpose that the underground work in connection with the laying, alteration, opening-up, cleansing, or removal of drains will be open and ready for inspection; and no such work shall be covered up until it shall have been inspected, tested, and approved by such Inspector or other officer as aforesaid.

(c.) No person shall allow any sewage or household waste, or impure waters, or any noxious matters, to flow from any building or land in his occupation on to a road, or into any ditch or drain declared to be a public drain, or upon any adjacent land, without the permission in writing of the Board.

(d.) All underground drains used or intended to be used to carry away sewage or household waste waters from any house or dwelling, and all sanitary connections therewith, shall in every case be constructed, adapted, and maintained to the satisfaction of the Inspector in such manner as to sufficiently and efficiently carry away such sewage or household waste waters; and the joints of earthenware drains shall be made of cement, and in every case joints shall be made watertight.

(e.) No drain or portion of a drain may be laid or allowed to remain so as to pass under any building, and no inlet to a drain, except such inlet as may be necessary for any water-closet, shall be placed or remain within or under a building. For every house where drainage is provided a gully-trap connected to the drain must be placed where most convenient for the receipt of waste waters.

(f.) For household slops and discharges from the waste-pipes of baths, sinks, and lavatories approved gully-traps shall be used; such traps to be not less than 6 in. in diameter at the inlet and 4 in. at the outlet, and fitted with dished tops and with gratings. The dish must be joined to the trap by a socket-and-spigot joint, properly finished with cement, or may be of one piece with the trap, and the depth of the dish to the top of the grating must not be less than 3 in. Gratings to gully-traps must be movable, and be provided with openings of suitable outlet capacity. Gully-traps must have a water-seal of not less than 2 in. in depth.

(g.) All sink, lavatory, bath, wash-tub, rain-water, or other waste-pipes shall discharge into the open air, either directly over a trapped gully at a height of not less than 3 in. nor more than 6 in. above the water-seal thereof, or over and at a height of 3 in. above a properly graded watertight concrete or earthenware channel led to a gully-trap. The waste-pipes from the kitchen and scullery sinks of hotels, boardinghouses, clubs, and restaurants shall discharge over a grease-trap of approved pattern and material.

(h.) In no case shall the outlet-hole from any appliance have a less area than the waste-pipe leading therefrom.

(i.) No wash-basin or water-closet basin or bath, nor, except where unavoidable, any sink, shall be closed in, but shall be left entirely open in order that all fittings may be easily inspected and cleansed underneath.

(j.) Every sink, lavatory-basin, closet, urinal, or bath shall be placed so that the outlet thereof is as near as possible to the external wall of the room containing such sanitary fitting, and the gully-traps over which the waste-pipes from such fittings discharge shall be so placed as to enable such waste-pipes to be of the shortest possible length.

(k.) The waste-pipes of baths, lavatories, and sinks shall be trapped directly under their intakes with approved siphon traps, having a seal of not less than 2 in. and provided with an access-cap.

(l.) Every kitchen-sink shall be constructed of impervious material. (N.B.—The following will be considered impervious materials: Lead, copper, enamelled iron or steel, glazed fireclay, or earthenware.)

(m.) No waste matters from any water-closet may be discharged into any drain or sewer not being a brick, concrete, ferro-concrete, iron, or earthenware-pipe drain or sewer. No person shall erect any water-closet unless all the drains and sewers through which the waste matters from such water-closet would pass are closed drains and sewers connected to

or with an approved outfall, or cesspit, or sewage-tank, so constructed and maintained as when in use shall not be a nuisance or dangerous to health: Provided that for the distance which such drain or sewer may traverse any foreshore below high-water mark a wooden chute, properly constructed and maintained, may be permitted, upon the written approval of the Board.

(n.) Where a drain is used to make a connection to a sewer or sewage-tank, or where a water-closet is connected to a drain, such drain shall be provided at such point as may be directed by the Board (or officer appointed for the purpose) with a ventilation-shaft of at least 3 in. in diameter, and constructed of such material and carried to such height above all eaves and windows as may be approved by the local authority: Provided that for at least 12 in. above the surface of the ground such shaft shall be constructed of earthenware or cast or screwed wrought-iron piping.

(o.) When for any reason any sanitary convenience, or any portion of a drain, or any fittings in connection therewith, are no longer required for use, such sanitary convenience or portion of any drain or fittings shall be disconnected and removed, and any openings or connections with an existing drain or sewer shall be efficiently closed.

(p.) If any drainpipe, waste-pipe, overflow-pipe, trap, ventilator, urinal, bath, basin, sink, water-flush closet, septic-tank, soakpit, or other fittings or apparatus shall, in the opinion of the Board or the Inspector, be or become of bad or defective quality or construction, or require to be cleansed, repaired, removed, or altered, he may give to the owner or occupier of the building or land to which such drainpipe, waste-pipe, trap, urinal, bath, basin, sink, water-flush closet, septic-tank, soakpit, or any other fittings or apparatus belongs, or in connection with which the same is used, a notice to cleanse, repair, remove, replace, or alter the same in the manner and within a time to be fixed; and if such owner or occupier shall fail to comply with such notice within the time therein mentioned the local authority may cleanse, repair, remove, replace, or alter the said drainpipe, waste-pipe, trap, ventilator, urinal, bath, basin, sink, septic-tank, soakpit, or other fittings or apparatus, and charge such owner or occupier with the cost incurred in so doing.

65. *Septic-tanks or Sewage-tanks.*—After the coming into force of these by-laws it shall be deemed an offence if the owner of any premises shall construct or suffer to be constructed, or suffer to remain thereon, or shall use or suffer to be used, any cesspool or cesspit or hollow in the ground for the reception of human faecal matter or sewage unless same is constructed according to plans approved by the Board and the District Health Officer, except in the case of such septic-tank, sewage-tank, sump, or cesspit as may be properly constructed according to plans approved by the Board and the District Health Officer. Any such septic-tank, sewage-tank, sump, or cesspit not constructed to the satisfaction of the Board and the District Health Officer, or any hollow in the ground into which human faecal matter has been placed, shall after the coming into force of these by-laws be filled up with clean earth as the Inspector or other officer of the Board appointed for the purpose may direct.

66. Any person who shall make or construct any sewage-tank shall be guilty of an offence unless the same is made and constructed and placed, and provided with fittings and appliances, as provided by this by-law.

67. Any occupier shall be guilty of an offence if he permits any sewage-tank to be used upon the premises occupied by him unless such sewage-tank is made, constructed, and placed, and provided with the fittings and appliances, as provided by this by-law.

68. Every sewage-tank shall be well and substantially constructed of concrete, bricks, or stone, faced with cement, and shall be watertight, and so constructed that none of the contents thereof can escape except by the proper channel provided for the effluent.

69. Every sewage-tank shall be provided with a suitable filter bed or beds, or with a suitable subsoil-irrigation system, for the effectual aeration and purification of the effluent from such sewage-tank.

70. No sewage-tank shall be placed within 66 ft. of any house, school, shop, office, factory, workshop, or place of worship, or in any place where the same is likely to be a nuisance or dangerous to health, or where proper drainage cannot be obtained for the disposal of the effluent.

71. No filter-bed or irrigation system intended to be used in connection with any sewage-tank shall be placed within 66 ft. of any house, school, shop, office, factory, workshop, or place of worship.

72. No occupier of any premises shall permit any sewage-tank on such premises, or the fittings or appliances thereof, to become a nuisance or dangerous to health.

Keeping of Animals and Poultry.

73. No person shall erect or permit to be erected any stable nearer than 25 ft. to any dwelling or any place used for the manufacture or storage of food for human consumption,

or nearer than 4 ft. to any boundary of a neighbouring property. For the purpose of this by-law the term "erect" shall include the conversion into use as a stable of any building already existing. The conditions regarding permits shall be observed in regard to the erection of any stable.

74. Every occupier of a building or premises wherein or whereon any horse or other beast of draught or burden, or any cattle, may be kept shall, if required by the Inspector, provide in connection with such building or premises a suitable receptacle with approved cover for dung, manure, soil, filth, or other offensive or noxious matter which may from time to time be produced in the keeping of any such animal in such building or upon such premises. Such receptacle shall be so constructed as to prevent the soakage of the contents into the surrounding soil. Such receptacle shall not be placed within 25 ft. of any dwelling or place in which any person is employed in any manufacture, trade, or business, or in which any food intended for human consumption is prepared or stored. The owner or occupier shall once at least in every week remove or cause to be removed from the receptacle provided in accordance with the requirements of this by-law all dung, manure, soil, filth, or other offensive or noxious matter produced in or upon such building or premises and deposited in such receptacle.

75. The occupier or person in charge of any premises on which any manure-receptacle exists shall place therein all manure made on the premises, and shall keep such receptacle tightly closed at all times except when any manure is being placed within or being removed therefrom.

76. The occupier of any premises shall not keep any cattle or deposit the dung of any cattle in such a situation or in such a manner as to pollute any water supplied for use or likely to be used by man for drinking or domestic purposes, or for manufacturing drinks for the use of man, or any water for use or likely to be used in a dairy.

77. No person shall keep any cow or any horse or other beast of burden or draught in any yard or on any land so as to cause such yard or land to be or become in an offensive condition from accumulations of manure or urine or other offensive matter. The surface of all such yards and land shall from time to time be scraped, and the manure or other offensive matter removed therefrom to the satisfaction of the Inspector.

78. No person shall keep, or allow or suffer or permit to be kept, any swine or pigs on any holding of less than 2 acres in area, nor in any case to keep them so as to be a nuisance or dangerous to health, nor in such a manner as to pollute any water used or likely to be used by man for drinking or domestic purposes or for use in a dairy; nor shall any person after the coming into force of this by-law permit to remain any pigsties at a less distance than 150 ft. from any house or building used as a dwelling, school, or in which any person is employed, or any building within which food intended for human consumption is prepared or stored, or at a less distance than 50 ft. from any road or the boundary of any occupied neighbouring property. The floor of any pigsty shall be of concrete, asphalt, or other impervious material approved by the Sanitary Inspector appointed by the local authority, and shall be so constructed that there shall be no soakage of soil by pig's food, urine, or drainage from the sty.

79. No person shall keep any poultry except in a properly constructed poultry-house, or in a suitable enclosed run so constructed as to confine the poultry within the premises of the owner thereof; and no part of any poultry-house or run shall be less than 15 ft. from any house or building used as a dwelling, school, or in which any person is employed, or any building within which food intended for human consumption is prepared or stored, or less than 4 ft. from any road or boundary of any neighbouring property; and every occupier of premises whereon there is any such poultry-house shall cause it to be kept thoroughly clean and to be lime-washed at least twice in every year. Should any poultry-house or run existing at the date of the coming into force of these by-laws, but not constructed in accordance with the foregoing provisions, cause a nuisance or be injurious to public health owing to its mode of construction or to the absence of any structural convenience therein or thereto, or by reason of the undue proximity of such poultry-house or run to the adjoining premises, or by reason of any matter or thing whatsoever, then in every case it shall be the duty of the owner and the occupier of such poultry-house or run, upon notice being served upon them or either of them by the Inspector or officer appointed by the Board for such purpose so to do, and within a time by such notice limited, to execute and do such work and things as may be necessary to abate such nuisance and in the manner specified in such notice.

The Structure and Cleansing of Privies.

80. The owner of every house, shop, factory, or other premises wherein any person is employed within the road district shall provide the same with a sufficient number of privies constructed in such manner as the said Board shall herein direct.

81. All privies for the reception of human faecal matter, not being water-closets specially sanctioned by the Board, shall be pan privies with movable metal receptacles for human faecal matter in accordance with the provisions of these by-laws; and if at any time hereafter there shall be upon any premises any closet, privy, or receptacle for human faecal matter not being a pan privy in accordance with the provisions of these by-laws, the owner of such premises, or, if such closet, privy, or receptacle shall have been erected or provided by the occupier, then such occupier, shall be deemed guilty of an offence: Provided always that the Board may, on application in writing, permit the erection of a water-closet and appurtenances in lieu of a pan privy, but subject to the approval of the District Health Officer.

Structure of Privies.

82. Every person who shall erect a pan privy in connection with a building shall construct such pan privy at a distance of 10 ft. at the least from any living-room, or any room where foodstuff is intended to be stored, or from any public building or street, or any room in which any person may or may be intended to be employed in any manufacture, trade, or business; and he shall not erect such privy under any house or part of a house.

83. No person who shall construct a privy in connection with a building shall construct such privy within the distance of 40 ft. from any well, spring, or stream of water used or likely to be used by man for drinking or domestic purposes, or for manufacturing drinks for the use of man, or otherwise in such a position as to render any such water liable to pollution.

84. Every person who shall construct a pan privy in connection with a building shall construct such privy in such a manner and in such a position as to afford ready means of access to such privy for the purpose of cleansing such privy and of removing filth therefrom, and in such a manner and in such a position as to admit of all filth being removed from such privy and from the premises to which such privy may belong without being carried through any dwellinghouse or public building, or any building in which any person may or may be intended to be employed in any manufacture, trade, or business.

85. Every person who shall hereafter erect a pan privy within the district of the Portobello Road Board shall erect such privy only in the manner specified in the following schedule:—

- (a.) Every pan privy shall in all respects be well and substantially erected. It shall be provided with a sufficient opening for ventilation as near the highest point as practicable and communicating directly with the external air. It shall be enclosed on all sides, and be provided with a door placed in the position best adapted to conceal its interior.
- (b.) If the floor of any privy be of wood, it shall be so constructed that the under-surface of the plates or joists supporting such floor shall be at least 3 in. above the level of the ground underlying; or the floor of such privy shall be flagged or paved with hard tiles, concrete, asphalt, or other non-absorbent material, and it shall be constructed so that the surface shall be in every part thereof at a height not less than 3 in. above the level of the surface of the ground adjoining such privy, and so that such floor shall have a fall or inclination towards the door of such privy of $\frac{1}{2}$ in. to the foot. The whole area of the floor below the seat of a pan privy shall be constructed of asphalt, concrete, or such other impervious material as the Board may direct.
- (c.) The seat of every pan privy, the aperture in such seat, and the space beneath such seat shall be of such dimensions as to admit of a movable receptacle for human faecal matter of capacity of not less than 1 cubic foot being placed and fitted beneath such seat in such a manner and such a position as to effectually prevent the deposit upon the floor or sides of the space beneath such seat, or elsewhere than in such receptacle, of any filth which may from time to time fall or be cast through the aperture in such seat. The seat of every pan privy shall be so constructed that the whole of such seat, or a sufficient part thereof, may be readily removed or adjusted in such a manner as to afford adequate access to the space beneath such seat for the purpose of cleansing such space, or removing therefrom or placing and fitting therein the appropriate receptacle. All pan privies shall be provided with a movable watertight metal receptacle of a size and pattern approved by the Board. The receptacle shall be maintained in such a manner as to prevent any absorption by any part of such receptacle of any filth deposited therein, or any escape by leakage or otherwise of any part of the contents of such receptacle.

86. A close-fitting removable cover on hinges made and fixed to automatically fall on to the seat whenever the same is not in use shall be provided and maintained over the aperture of the seat; and every part of the space containing the receptacle shall be so closed in as to effectually prevent rats, mice, or flies from obtaining access to such receptacle.

87. The occupier of the premises on which any earth-closet is situated shall keep such closet, building, and appurtenances in a good state of repair, and in a thoroughly clean and sanitary condition to the satisfaction of the Board. Where premises are unoccupied the owner shall be in all cases liable and responsible for the repair and cleanliness of the closet, building, and appurtenances.

Cleansing of Privies, &c.

88. The owner or occupier of any premises within the district of the Portobello Road Board in connection with which a pan privy has been erected shall, if required so to do by the Inspector, use or cause to be used a sufficiency of dry earth, sawdust, or other deodorizing substance so that the excrement shall be so covered that no nuisance shall arise therefrom.

89. The owner and occupier of every dwellinghouse, shop, factory, workshop, school, or public building shall cause the pans of all pan privies used in connection with such dwellinghouse, shop, factory, workshop, school, or public building to be emptied and properly cleansed at least once in every week, and in any case so frequently as to prevent overflow of the contents thereof.

90. No person shall empty, or cause to be emptied, any privy or cesspool, or load, carry, or remove, or permit or suffer to be removed, any human faecal matter or offal except between the hours of 8 p.m. and 8 a.m., nor at any time otherwise than in a securely covered receptacle.

91. The Inspector, if he finds that the contents of any earth-closet, privy, ashpit, or cesspit upon or about any land or premises has not been properly cleansed and the contents thereof removed, or that any owner or occupier has allowed any human faecal matter, dung, ashes, slops, or refuse of any kind to accumulate in or upon or about any such premises, may cause such privy, ashpit, or cesspit to be emptied and cleansed at the expense of the owner or occupier of any such land or premises.

I hereby certify that the above special order has been duly passed at a special meeting of the Portobello Road Board held on the 3rd day of November, 1921, and confirmed at a special meeting held on the 8th day of December, 1921.
