WELLINGTON, FRIDAY, JANUARY 18, 1924.

Further Proroguing the General Assembly.

[L.S.] JELLICOE, Governor-General.

A PROCLAMATION.

To the LEGISLATIVE COUNCILLORS of the Dominion of New Zealand, and the Members elected to serve in the HOUSE of REPRESENTATIVES of the said Dominion, summoned and called to a Meeting of the General Assembly of the said Dominion, at the City of Wellington, on the twenty-fourth day of the month of January, one thousand nine hundred and twenty-four, to have been commenced and held, and to every of you. GREETING:

WHEREAS on the nineteenth day of November, one thousand nine hundred and twenty-three, the General Assembly of New Zealand was prorogued to the twenty-fourth day of the month of January, one thousand nine hundred and twenty-four, at which time you were held constrained to appear: Now KNOW YE that for divers causes and considerations I have thought fit to relieve you and each of you of your attendance at the time aforesaid, hereby convoking and by these presents enjoining you and each of you that on Thursday, the twenty-fourth day of April next, you meet in Parliament, at the City of Wellington, there to take into consideration the state and welfare of the said Dominion of New Zealand, and therein to do as may seem necessary.

Given under the hand of His Excellency the Governor-General of the Dominion of New Zealand, and issued under the Seal of that Dominion, this 17th day of January, 1924.

RICHD. F. BOLLARD,
 Minister of Internal Affairs.

GOD SAVE THE KING!

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both primary and secondary research techniques, as well as statistical analysis to identify trends and patterns.

Methodology and Data Collection

The methodology employed in this study is a combination of qualitative and quantitative approaches. Data was collected through surveys, interviews, and analysis of existing reports.

Results and Discussion

The results of the study indicate a significant correlation between the variables being examined. The data suggests that as one variable increases, the other tends to decrease, which is contrary to the initial hypothesis.

Further analysis of the data reveals several key findings. First, there is a clear trend in the data points, which supports the conclusion that the relationship between the variables is not linear. Second, the data shows that external factors can significantly influence the outcome of the study.

The implications of these findings are far-reaching. They suggest that current models and theories may need to be revised to better account for the observed relationships. Additionally, the study provides valuable insights for practitioners in the field, highlighting areas where further research is needed.

In conclusion, this study has provided a comprehensive analysis of the topic at hand. The findings are both novel and significant, contributing to the existing body of knowledge in this area.

Future research should focus on replicating the study with a larger sample size and exploring the underlying mechanisms that drive the observed trends. This will help to solidify the findings and provide more definitive answers to the research questions.

The author would like to thank the following individuals and organizations for their support and assistance throughout the course of this research.
