*Validating Proceedings in connection with Eastbourne Borough Council's Loan of £11,000: £10,000 for Completion of Loan for Purchase of New Steamer and £1,000 for Protective Works.*

CHARLES FERGUSSON, Governor-General.

ORDER IN COUNCIL.

At the Government House at Wellington, this 1st day of June, 1925.

Present:

HIS EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL.

WHEREAS the Eastbourne Borough Council lately proceeded under the powers conferred by section one hundred and fourteen of the Reserves and other Lands Disposal and Public Bodies Empowering Act, 1924, to borrow by way of special loan under the Local Bodies' Loans Act, 1913, a sum of ten thousand pounds for the purposes referred to in subsection two of the said section and a further sum of one thousand pounds for the purposes set out in subsection four of the said section, making together a loan of eleven thousand pounds (hereinafter referred to as "the said loan") and made a special order in that behalf by resolution passed on the eighth day of January, one thousand nine hundred and twenty-five, and confirmed on the twelfth day of February, one thousand nine hundred and twenty-five:

And whereas by the said special order it was (*inter alia*) provided that part of the security for the said loan should be a special rate secured upon the unimproved value of all rateable property within the Borough of Eastbourne:

And whereas the proceedings in connection with the said loan were irregular in that in the said special order it was (*inter alia*) provided that a sinking fund of one pound (£1) per centum should be established in connection with the said loan, whereas such sinking fund provision should instead have been stated as one pound (£1) per centum per annum:

And whereas it appears that the ratepayers of the said borough have not been misled by such irregularity as aforesaid, and it is expedient to validate the same:

Now, therefore, His Excellency the Governor-General of the Dominion of New Zealand, in pursuance and exercise of the powers and authorities conferred on him by section one hundred and eleven of the Local Bodies' Loans Act, 1913, and acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby order and declare that the proceedings in connection with the said loan shall be valid to all intents and purposes as though the said sinking fund rate had been correctly stated as being one pound per centum per annum, and that the validity of the proceedings in connection with the said loan and of the security for the said loan shall not be called in question by reason only of the irregularity aforesaid.

Clerk of the Executive Council.

*The Rhodes Memorial Convalescent Home (Incorporated) Regulations.*

CHARLES FERGUSSON, Governor-General.

ORDER IN COUNCIL.

At the Government House at Wellington, this 1st day of June, 1925.

HIS EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL.

IN pursuance of and in exercise of the powers conferred upon him by an Act of the General Assembly of New Zealand intituled the Rhodes Memorial Convalescent Home Act, 1924, and of all other powers and authorities enabling him in that behalf, His Excellency the Governor-General of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, and being satisfied that the regulations set out in the Schedule hereto have been duly made by the committee under the powers conferred upon the committee by the said Act, doth hereby approve the said regulations.

SCHEDULE.

REGULATIONS.

1. In these regulations, except where a different intention appears from the context and subject-matter,—

Words importing the masculine gender only, shall include the feminine gender:

Words importing the singular number only, include the plural number, and *vice versa*.

"Act" means the Rhodes Memorial Convalescent Home Act, 1924:

"Committee" means the persons for the time being entrusted with the management and control of the Home, and, until their successors are appointed, refers to the persons named in section 3 of the Act:

"Contributor" means any person or corporation who has donated a sum of not less than fifty guineas (£52 10s.) in one sum at any time to the Home or has subscribed a sum of £5 5s. during the last preceding year or a sum of not less than one guinea (£1 1s.) per annum during the last two years immediately preceding the annual general meeting.

"Home" means the Rhodes Memorial Convalescent Home as defined and incorporated by the Act.

2. The registered office of the Home shall be at Dyer's Pass Road, Cashmere, Christchurch, or at such other place as the Committee shall from time to time decide.

3. The seven persons named in section 3 of the said Act shall form the committee until a special general meeting of the contributors shall have been held (such meeting to be convened within three calendar months of the date hereof) when the said seven persons shall go out of office and the special general meeting shall elect the committee, which shall consist of not less than five nor more than seven members from persons qualified as hereinafter appears.

4. The committee shall have power to appoint any other persons to be members of the committee at any time before the first ordinary general meeting of the contributors, but so that the total number shall not at any time exceed the maximum number fixed as aforesaid.

5. The office of a member of the committee shall be vacated—

(a.) If he be found a mentally defective person within the meaning of the Mental Defectives Act, 1911, or become of unsound mind:

(b.) If he absents himself from the meetings of the committee during a period of three months without special leave from the committee.

(c.) If by notice in writing he resigns his office:

(d.) If he ceases to be a contributor as hereinbefore defined.

6. The committee shall have power to fill a vacancy in the committee occurring through death or through the operation of Regulation 5 hereof.

7. The continuing members of the committee may act, notwithstanding any vacancy in their body, but so that if the number falls below the minimum fixed by these regulations the committee shall not, except for the purpose of filling vacancies, act so long as the number is below the minimum.

8. At the first ordinary annual general meeting to be held and at every succeeding ordinary annual general meeting two members of the committee shall retire from office. A member of the committee so retiring shall retain office until the dissolution or adjournment of the meeting at which his successor is appointed.

9. The two members of the committee first to retire shall, unless the committee agree among themselves, be decided by lot. In every subsequent year the two members of the com-

mittee who have been longest in office shall retire. As between two or more who have been in office an equal length of time the member to retire shall, in default of agreement between them, be determined by lot. The length of time a member has been in office shall be computed from his last election or appointment when he has previously vacated office.

10. A retiring member of the committee shall be eligible for re-election.

11. The contributors at any ordinary annual general meeting at which any members of the committee retire in manner aforesaid shall fill up the vacated offices by electing a like number of qualified persons to be members of the committee, and without notice in that behalf may fill up any other vacancies.

12. If at any ordinary annual general meeting at which an election of members of the committee ought to take place the places of the retiring members are not filled up, the retiring members or such of them as have not had their places filled up shall, if willing, continue in office until the ordinary meeting in the next year and so on from year to year until their places are filled up.

13. The contributors may by a resolution passed by a three-fourths majority of those present at a special general meeting of contributors called as hereinafter provided remove any member of the committee before the expiration of his period of office, and appoint another person in his stead. The person so appointed shall hold office during such time only as the member in whose place he is appointed would have held the same if he had not been removed. Any casual vacancy occurring among members of the committee may be filled up by the committee, but any person so chosen shall retain his office so long only as the vacating member would have retained the same if no vacancy had occurred.

14. No person not being a retiring member of the Committee shall, unless recommended by the committee for election, be eligible for election to the office of a member of the committee at any general meeting of the contributors unless he or some other contributor intending to propose or nominate him has at least seven clear days before the meeting left at the registered office of the Home a notice in writing under his hand signifying his candidature for the office or the intention of such contributor to propose or nominate him. And no person, unless recommended by the committee, shall be eligible for election to the office of a member of the committee unless he has been a contributor during the last three preceding years, or has at some previous time given a donation of at least fifty guineas in one sum to the Home.

15. The committee may meet together for the despatch of business, adjourn, or otherwise regulate their meetings and proceedings as they may think fit, and may determine the quorum necessary for the transaction of business. Until otherwise determined three members shall be a quorum.

16. The committee may from time to time appoint a secretary, who shall hold office during their pleasure and at such remuneration as they may from time to time fix.

17. A member of the committee may at any time, and the secretary upon the request of a member shall, summon a meeting of the committee.

18. Questions arising at any meeting of the committee shall be determined by a majority of votes, and in case of an equality of votes the chairman shall have a second or casting vote.

19. A resolution in writing signed by all members of the committee shall be as valid and effectual as if it had been passed at a meeting of the committee duly called and constituted.

20. The committee may elect a chairman of their meetings and determine the period for which he is to hold office, but if no such chairman is elected or if at any meeting the chairman is not present at the time appointed for holding the same, the members present shall choose some one of their number to be the chairman of such meeting.

21. A meeting of the committee at which a quorum is present shall be competent to exercise all or any of the authorities, powers, and discretions vested in or exercisable by the committee generally.

22. The committee may delegate any of their powers to subcommittees consisting of such number of members of their body as they think fit. Any subcommittee so formed shall in the exercise of the powers so delegated conform to any regulation that may from time to time be imposed on it by the committee.

23. The meetings and proceedings of any such subcommittee consisting of two or more members shall be governed by the provisions herein contained for regulating the meetings and proceedings of the committee so far as the same are applicable thereto.

24. All acts done at any meeting of the members of the committee, or of a subcommittee, or by any person acting as a member of the committee, shall, notwithstanding that it shall afterwards be discovered that there was some defect in

the appointment of such members or persons acting as aforesaid, or that they or any of them or he were disqualified, be as valid as if every person had been duly appointed and was qualified to be a member of the committee.

25. The management and control of the business of the Home shall be vested in the committee, who, in addition to the powers and authorities by these regulations and the said Act or otherwise expressly conferred upon them, may exercise all such powers and do all such acts and things as may be exercised or done by the Home and are not hereby expressly directed or required to be exercised or done by the Home in general meeting of the contributors.

26. Until otherwise determined by the committee, the by-laws in existence at the time of the incorporation of the Home shall remain in full force and effect so far as the same are applicable. The committee shall have power from time to time to alter and make new by-laws for regulating and carrying out the affairs of the Home, and, in particular, for the nomination of patients to occupy beds free of charge and for the future endowment of free beds: Provided that no by-law shall be altered or new by-law made, save and except the committee pass a resolution accordingly by at least a four-fifths majority of the members for the time being in office; and provided also that nothing in any by-law shall prejudicially affect the endowment of the free beds in existence at the time of the incorporation of the Home.

27. The committee shall provide a common seal for the Home, and they shall have power from time to time to destroy the same and substitute a new seal in lieu thereof. Every instrument required by law to be executed under the common seal of the Home shall be signed by at least two members of the committee, or by one member of the committee and the secretary.

28. No member of the committee shall thereby be disqualified from accepting remuneration for services rendered, whether of a strictly professional character or not, but shall be entitled to receive payment by way of salary, emoluments, or honorarium as the committee shall determine.

29. The committee shall cause minutes to be duly entered in the books provided for the purpose—

- (a.) Of all appointments of permanent officers;
- (b.) Of the names of the members of the committee present at each meeting of the committee;
- (c.) Of all resolutions and proceedings of general meetings and meetings of the committee:

And all such minutes of any meeting of the committee or general meeting of the contributors, if purporting to be signed by the chairman of such meeting or by the chairman of the next succeeding meeting, shall be receivable as *prima facie* evidence of the matters stated in such minutes.

30. The committee shall cause true accounts to be kept of the sums of money received and expended by the Home and the matters in respect of which such receipts and expenditure take place and of the assets, credits, and liabilities of the Home.

31. The books of account shall be kept at the office of the Home or at such other place or places as the committee think fit.

32. The committee shall from time to time determine whether and to what extent, and at what times and places and under what conditions or regulations, the accounts and books of the Home or any of them shall be open to the inspection of contributors, and no contributor or other person shall have any right of inspecting any book or document of the Home, except as conferred by statute or authorized by the committee or by a resolution of the contributors in general meeting.

33. At the ordinary general meeting in every year the committee shall lay before the contributors a statement of the income and expenditure and a balance-sheet containing a summary of the property and liabilities of the Home made up to a date not more than three months before the meeting from the time when the last preceding statement and balance-sheet were made and in the case of the first statement and balance-sheet from the incorporation of the Home.

34. Every such statement shall be accompanied by a report of the committee as to the state and condition of the Home and the amounts standing to special endowment, building, sinking reserve, and other funds and trusts, distinguishing the amount (if any) they have added to such funds and trusts during the preceding year; and the statement, report, and balance-sheet shall be signed by the chairman or, in his absence, by at least one member of the committee and countersigned by the secretary.

35. Once at least in every year the accounts of the Home shall be examined and the correctness of the statement and balance-sheet ascertained by one or more auditor or auditors as required by the Companies Act, 1908, and to be appointed annually by the contributors at the annual general meeting.

36. Every member of the committee shall be indemnified by the Home against all costs, losses, and expenses which he may incur or become liable to by reason of any contract entered into or Act or thing done by him as such member in the discharge of and within the scope of his duties.

37. The chairman or the secretary shall have power at all times to convene meetings of the contributors. At least seven days' notice of such meetings shall be given by circular sent to the last known address of each contributor, and shall be held at such times and at such places as may be considered necessary for the due transaction of the business of the Home. Unless otherwise determined by the committee, the annual general meeting shall be held in the month of April or May in each year.

38. The committee may at any time, and shall on the requisition signed by not less than five contributors stating the object of such requisition, summon a special general meeting to be held not less than fourteen days and not later than one calendar month after the receipt of such requisition. The notice convening the meeting shall specify the particular matter or matters to be discussed, and shall be signed by the contributors making the same, and shall be deposited at the office of the Home. The meeting must be convened for the purposes specified in the requisition and, if convened otherwise than by the committee, for those purposes only. In case the committee after such deposit fail to convene a special general meeting within the time hereinbefore specified, the requisitionists or a majority of them may themselves convene a meeting to be held not later than three calendar months after the date of such deposit.

39. The mode of voting at all general meetings shall be open, except that any contributor may demand that a ballot be taken on any motion submitted to the meeting. The chairman of the meeting shall have a casting vote in addition to the vote to which he is entitled as a contributor. Corporations and firms may from time to time, by writing, signed in the case of a Corporation by its secretary or other executive officers, and in the case of a firm by a partner, appoint a person, whether a contributor or not, to vote at general meetings on their respective behalfs: Provided that no person so appointed shall as such be qualified to be elected a member of the committee.

40. The decision of the committee on the interpretation of the by-laws or any matter or thing not contained in these regulations, but appertaining to the management of the Home, shall be final and binding.

*Notice to Mariners No. 45 of 1925.*

NEW ZEALAND.—NORTH ISLAND.—WEST COAST.

Marine Department,  
Wellington, N.Z., 1st June, 1925.

*Dargaville Bridge.—Lighting and Flag Systems for Controlling the Passage of Vessels through Bridge-passage.*

INFORMATION is hereby given that the undermentioned lighting and flag systems will be established at the northern and southern entrances to the lifting bridge-span passage of the recently constructed bridge which crosses the Northern Wairoa River at about three-quarters of a mile above Dargaville, and will come into operation during June, 1925, after the lifting bridge-span has been completed.

2. *Lighting System.*—Between sunset and sunrise the undermentioned fixed lights, so screened and placed that they can be seen only on their respective sides of the bridge-passage, will be exhibited at a height of 18 ft. above M.H.W.S.

At each side of the northern entrance—one green light.  
At each side of the southern entrance—one red light.

3. *Signal to denote the Bridge-span is about to be lifted.*—About thirty minutes prior to the time at which it is intended the bridge-span shall be lifted, a fixed white light will be exhibited at a position 3 ft. above each of the green lights at the northern entrance, and at a position 3 ft. above each of the red lights at the southern entrance. These four white lights will be removed immediately the vessel for which they were intended has passed through the bridge and the span has been lowered down.

4. *Signal to denote the Bridge-span has been lifted and that the Passage through the Bridge in one Direction may be undertaken.*—A white light will be waved from either corner of the entrance at that side of the bridge on which the vessel is approaching.

5. *Flag System: Between Sunrise and Sunset.*—When the bridge-span has been lifted and the bridge-passage is clear for navigation, a white flag will be waved to denote that passage through the bridge in one direction may be undertaken by a vessel approaching that side of the bridge from which the flag has been waved.

6. Vessels which are unable to use the bridge-passage without the bridge-span being lifted must not attempt to enter the bridge-passage unless the white light (by night) or the white flag (by day) is waved at that side on which they are approaching the bridge.

7. Vessels which are able to use the bridge-passage without the bridge-span being lifted are permitted to do so when the bridge-span is down; but such vessels, unless they are signalled to do so, shall not use the bridge-passage when the bridge-span has been lifted for the purpose of enabling another vessel to pass through.

8. *"Blocking" Signal.*—If on any occasion it is desired to stop all traffic through the bridge-passage, a red flag will be shown by day, or by night one each of the red and green lights will be removed, upon which any vessel shall not attempt to pass through the bridge-passage.

9. Owing to the restricted width of the bridge-passage great care must be exercised by vessels when passing through the bridge.

*Amending the Regulations under the Surveyors' Institute and Board of Examiners Act, 1908; and the Surveyors' Institute and Board of Examiners Amendment Act, 1922.*

IN pursuance and exercise of the powers and authorities conferred by section seventeen of the Surveyors' Institute and Board of Examiners Act, 1908, and section four of the Surveyors' Institute and Board of Examiners Amendment Act, 1922, and of every other power and authority in anywise enabling it in that behalf, the Surveyors' Board doth hereby amend the regulations for survey dated the twentieth day of March, one thousand nine hundred and twenty-three, and published in the *New Zealand Gazette* of twenty-eighth June, one thousand nine hundred and twenty-three, as follows:—

Regulation No. 1 is amended, and shall read—

1. In these regulations, if not inconsistent with the context,—
  - “Surveyor-General” and “Chief Surveyor” mean the persons holding such official positions respectively, or the persons for the time being acting for either of these officers, in the Department of Lands and Survey;
  - “Surveyor” means a person holding a license from the Surveyors' Board to execute surveys within the Dominion of New Zealand, and, in respect of Land Transfer surveys, licensed also by the Surveyor-General in that behalf;
  - “Board” means the Surveyors' Board constituted under the Surveyors' Institute and Board of Examiners Act, 1908;
  - “Survey” means any survey required under any Act relating to or affecting surveys of land, except surveys carried out by or under the direction of the Surveyor-General;
  - “Plan” includes all plans in connection with any survey;
  - “Regulations” includes the above-mentioned regulations dated the 20th day of March, 1923, and their amendments. Where these regulations relate to plans and surveys required under the Public Works Act, 1908, and its amendments, the Land Transfer Act, 1915, the Land Act, 1924, or any other Act relating to or affecting surveys of land, the expressions used in these regulations shall have the same meanings as in the Act under which such plans and surveys are required.

Regulation No. 3 is amended, and shall read—

3. A surveyor effecting any survey under the regulations shall comply with all departmental rules and directions issued by the Surveyor-General supplementary to these regulations, and not contrary thereto.

Regulation No. 15 is amended, and shall read—

15. Field-books shall contain a statement by the surveyor that the tapes used on the survey have been compared with one of the authorized standard bands, and that they are correct under a (specified) tension and temperature.

Regulation No. 25 is amended, and shall read—

25. Field measurements shall be made with a steel or invar band or tape, tested at frequent intervals with the surveyor's standard band. Tension shall be applied by means of a spring balance, carefully tested for index error, and the measurements corrected for the difference of temperature above or below the temperature at which the band is standard length.

Regulation No. 37 is amended, and shall read—

37. Rural surveys: 2 links per mile in level and undulating country; 4 links per mile in rough and hilly country, provided that one extra link of error per mile shall be allowed on adopted work.  
City and town surveys: 1 link per mile in level and undulating country; 2 links per mile in rough and hilly country.

Should the work of a surveyor exceed the above-mentioned limits such survey must be revised. As accurate surveys and a high standard of work should be the first object of surveyors, they will be expected to obtain as nearly as possible a true closure, and the accumulated error shall not exceed 10 links.

Regulation 44 is amended, and shall read—

44. Areas of portions or subdivisions shall be accurately computed. The form, Appendix F, is recommended for areas by double longitudes.

Regulation 46 is amended, and shall read—

46. The areas of figures bounded by watercourses, or irregular curved lines fixed by offsets from the traverse-lines should be obtained by computing the portion of the area within the closed traverse-lines by double longitudes and using a planimeter to determine the portion of the area between the traverse-lines and the boundary; and in rural surveys where the boundary-lines exceed twenty in number, the use of the planimeter will be permitted to determine a portion of the area of which the greater portion is computed mathematically.

Regulation 47 is amended, and shall read—

47. All plans shall be drawn on mounted drawing-paper of the best quality and according to regulation size. (See Appendix G.)

Regulation 55 is amended, and shall read—

55. All boundaries shall be ruled in firm lines. Measured lines are to be drawn in red, calculated lines in black, with figures in red and black respectively. Bush-lines cut but not chained are to be drawn in red, the linkages in black. Ranged lines not chained are to be drawn in blue. Observed bearings to be written in blue, and those calculated in black.

Regulation 57 is amended, and shall read—

57. Traverse stations shall be numbered and shown as follows:—

- (g.) Peg and spike together, by a red circle enclosing a blue circle.
- (h.) Posts by solid black squares.
- (i.) Concrete pegs, by a small yellow circle.
- (j.) Old iron tube adopted, by two concentric black circles.
- (k.) Old tube when found, by two blue circles, inner one filled solid.

(See Appendix H.)

When it is impossible to insert a peg or spike on account of some obstruction of a permanent nature, the station shall be shown by a small red circle with particulars of the ground-marking.

Regulation 70 is amended, and shall read—

70. As surveys are completed, the plans thereof and all other documents relative thereto, if for deposit by the surveyor, either with the Chief Surveyor or the District Land Registrar, are to be forwarded promptly. The forwarding letter should be sent under separate cover, so that inquiry may be made for mislaid or delayed plan packets.

Regulation 71 is amended, and shall read—

71. Plans must not be folded. They should be transmitted to the place of lodgment on stout wooden rollers, or within plan cases, securely fastened and legibly addressed. It is preferable that they be sent by "Fragile" post.

Regulation 74 is amended, and shall read—

74. Surveys pertaining to title shall be executed by a licensed surveyor, and plans shall bear his signature.

Regulation 81 is amended, and shall read—

81. Pegs shall be placed on all section-lines at the point of intersection with road, railway, stream, or watercourse traverses, or as close as possible thereto.

In the case of any such pegs placed not actually at the point of intersection, such pegs shall be properly connected to adjacent traverse pegs.

In the case of section-lines intersecting a road, the measured or calculated distance to the adjacent angle pegs on the same side shall be given, and the boundary of a section intersecting a road shall in all cases be pegged on the traverse-line as well as on both sides of the road.

Such traverse intersection-pegs, however, shall be driven flush to avoid confusion.

Regulation 95 is amended, and shall read—

95. The positions of the terminals of all chained lines, excepting range pegs, all corners of blocks of sections or of isolated sections, whether

chained to or not, and all intersections of section boundaries with traverses, shall be calculated and tabulated.

Regulation 136 is amended, and shall read—

136. Any plan purporting to be a survey, resurvey, or subdivision of any land shall bear a statutory declaration made by the surveyor who actually made the measurements in the field, in the form given in Appendix N hereof.

Regulation 137 is amended, and shall read—

137. Such plan may be lodged with the District Land Registrar, and sent by him to the Chief Surveyor for approval, and only when so approved shall be deemed to be accurate for all purposes of the Land Transfer Act.

Regulation 138 is amended, and shall read—

138. Surveys within an area covered by a standard traverse shall be connected to the stations of the standard survey. The surveyor shall use the standard blocks as his initial for bearing, and in all cases he shall start his work from one standard block, continue to a second, and also check the bearing on a third block.

Regulation 139 is amended, and shall read—

139. In districts where there is no standard survey, but a triangulation is available, all surveys of sections or allotments shall provide at least two permanent marks which shall be connected with a trig. station or other reliable mark.

Regulation 141 is amended by the addition of the words “(See Appendix R)” at the end thereof.

Regulation 143 is amended, and shall read—

143. The position of all fences, walls, buildings, eaves, ditches, hedges, streams, or other features on or near the boundary must be clearly shown relatively to the actual boundary-line. Where a wall is claimed as a party wall, it must be noted as “claimed as a party wall.” Swamps, terraces, or irregular fences are inadmissible as boundaries, except if so made by the Crown grant, in which case the consent in writing of the adjoining owners should be asked, and these boundaries, with such consent, be reduced to right lines with defined bearings and distances, and the adjoining owners should sign the plan. Any consent in writing so given shall be lodged with the relative survey documents as provided in Regulation 70. Where the reduction to right lines deviates from the title boundary the District Land Registrar should be consulted as to whether he will accept these lines as the original boundary, or will require the alteration to be given effect to by the registration of cross transfers.

Regulation 147 is amended, and shall read—

147. Roads, streets, and public right-of-ways are to be coloured in burnt sienna; railways, red; edge of land to be dealt with green; natural features (when boundaries), sepia; newly created roads or streets, pink. Private right-of-ways, and other differentiations are to be coloured in accord with Plate IV. Where the land forms a part of two or more original sections the boundaries and numbers of such sections shall be shown by a distinguishing colour, and should the boundaries on the ground differ materially from the Crown-grant boundaries, such Crown-grant boundaries shall be shown by dotted black lines.

Regulation 152 is amended, and shall read—

152. In every case where lots of sections or blocks of land outside of a borough or town district are to be sold or advertised for sale as a town, whether public or private, a plan of such town, signed by the owner or his authorized agent, to the sizes and scales given in Appendix G hereto, showing the proposed arrangement of lots and streets, and accompanied by a detailed report, shall be submitted by the surveyor to the Chief Surveyor, and by him referred, with his report, for the approval of the Minister of Lands prior to sale.

Regulation 161 is amended, and shall read—

161. In the case of a subdivision of land as a town by a private owner, present procedure requires that not less than 5 per cent. of the area of the lots shall be reserved for public purposes. On the plan these areas shall have their specific purpose written on each. In cases where the area subdivided is small, the reservation may be wholly or partially dispensed with, with the consent of the Minister of Lands.

Regulation 164 is amended, and shall read—

164. Reserves for public purposes suitable to all towns, such as are enumerated in section 359 of the Land Act, 1924, are to be recommended. On the plans these areas to have their specific purposes written on each, either in full or in abbreviated form. The undermentioned reserves shall be laid off as directed hereunder :—

Regulation 170 is amended, and shall read—

170. The forms and appendices hereinafter set forth shall be used for the purpose of the foregoing regulations in the several cases to which they are applicable, and shall be deemed to be part of the said regulations, and may be modified in each case as the circumstances require. In the interpretation of these regulations whenever the plans, plates, or diagrams attached thereto are referred to, the reference shall be construed as being to the originals deposited in the office of the Surveyor-General under No. 2111.

Appendix O is amended, and shall read—

#### APPENDIX O.

[Regulation 125.]

##### LAND PLANS.

In preparing land plans for the Public Works Department, the following instructions must be strictly adhered to :—

1. In the case of railway surveys the uniform scale of 3 chains is to be used, except for necessary enlargements showing details. The work is to be plotted lengthways of paper, irrespective of north point, from left to right, and advancing in accordance with the engineering survey chainage. Each sheet is to commence and end, if possible, at a mile peg, thus containing an even mile.

2. The engineering-survey chainage is to be shown on each sheet in red, each chain-peg to be marked and every tenth peg numbered, the original marks to be adhered to, and any discrepancies to be shown as long or short chains. Where on account of defective original survey or of deviations subsequently decided on the length of the engineering survey is incorrect, there shall also be shown on each sheet, in black or blue, at every 10 chains, the correct through mileage from the commencing-point. The exact relationship between the land-plan survey chainage and the engineering-survey chainage shall be clearly indicated at intervals of not more than half a mile. The surveyor will require, to the extent necessary for the

completion of the land-plan survey, to restore the original centre-line pegs of the railway survey, including the tangent and intersection or tie-line pegs. Where necessary the curves are to be computed in the same manner as for the engineering survey. If iron tubes have not been put in during the engineering survey, or if they have been made inaccessible during construction, the surveyor shall put in iron tubes of standard pattern at intersection pegs at half mile intervals. Where the land-plan survey is carried out before construction is commenced, and iron tubes have not been put in during the engineering survey, the surveyor should not put in tubes where they are likely to be made inaccessible during construction. If necessary, instead of a tube at the intersection peg, two tubes should be put in as extension pegs or tie-line pegs.

3. Lands to be taken are to be coloured in different shades or colours for each adjoining property.

4. Where land is taken from two or more sections or subdivisions belonging to one owner, the area taken from each section or subdivision must be stated and each section coloured distinctively.

5. The name of the survey district and the number of the block in such survey district must be given on each sheet, and the block or survey district boundary must be indicated by the respective conventional dotted lines adopted for that purpose by the Lands and Survey Department, and marked "Block" or "Survey district boundary," as the case may be. The name of the local body in whose district the land lies is also to be stated, and the boundaries of such districts are to be shown if coming within the plan.

6. When Crown land is taken for a railway or a ballast-pit, &c., such land should be described as "Crown land" and not "Railway reserve," "Ballast reserve," &c., unless it has been actually reserved for such purpose by *Gazette* notice.

7. All existing roads that are to be left open for the use of the public, whether crossed by railway or not, must be coloured burnt sienna.

8. If any part of a road crossed by a railway is to be closed to the use of the public and occupied exclusively by the railway, the portion to be closed must be coloured green and the area must be stated.

9. Land required to be taken for new roads, such as approach roads to railway-stations or road-deviations rendered necessary by existing roads being closed by railway-works, are to be coloured sepia or orange, or if portions of such new road or deviation are taken from adjoining sections then such area so taken from each section shall be coloured alternately sepia or orange.

10. The use of burnt sienna, sepia, orange, and green must be restricted to the cases mentioned above.

11. No private crossing on railways to be distinctively coloured or shown in any way.

12. Plans to be in duplicate, one copy to be prepared on mounted drawing-paper, and one copy to be on mounted tracing-cloth.

13. The regulations of the Lands and Survey Department to be observed except where herein varied.

14. Land plans, or portions thereof, with all necessary explanatory data when completed, should be forwarded to the Head Office, through the local office of the Department, before being submitted to the Chief Surveyor for approval. On receipt of the plans, or any portion of same at this office, a progress payment of 50 per cent. of the value of the work done will be made; and after the whole of the plans have been approved by the Department and the Chief Surveyor, the final payment will be made.

#### APPENDIX R.

##### DETERMINATION OF MEAN HIGH-WATER MARK AND MEAN SEA-LEVEL.

Land abutting on tidal waters is bounded by the line of ordinary high-water mark, or, more precisely, the line of mean high water taken over a period of 370 days. On the open seashore mean high-water mark is a contour-line which can be easily determined by a series of tidal observations extending over the above-mentioned period. In the case of tidal estuaries and rivers mean high-water mark usually departs from a level line, and usually requires for its exact determination that similar tidal observations at the extremities and at suitably placed intermediate stations of the boundary to be fixed are available.

*Mean sea-level* is now used exclusively as the datum for all surveys on land by the Lands and Survey Department. It may be established within a small fraction of a foot by continuous tidal observations for a period of 370 days, and is that surface which the water of the ocean would form if it were not disturbed by the attraction of the sun and moon and the force of the wind. Information regarding the bench-marks connected with the automatic tide-gauges from which the mean sea-level was determined at

Auckland, Wellington, Lyttelton, Port Chalmers, Nelson, and Westport, is published in the annual report on the survey operations, 1908-9, by T. Humphries, Surveyor-General.

PRACTICAL DETERMINATION OF MEAN HIGH-WATER MARK.

Where a standard tidal station has been in operation so long that the reading of the mean high tide on the tide-gauge is accurately known, the height of the mean high tide at other places in the vicinity can be deduced sufficiently accurately for the practical determination of high-water mark by reference to the standard station.

On any day if high water of a particular tide agrees with the mean high tide at the standard station, then high water of that tide indicates mean high-water mark along the foreshore at all other localities in the vicinity.

As, however, the above agreement is a rare occurrence the high water of a tide at the standard station falls above or below the gauge reading of mean high tide by an amount which can be ascertained by observation. At any other place of observation the difference between high water of the above tide and mean high-water mark can be obtained by the following rule: As the range of the tide at the standard station is to the range of the same tide at place of observation, so is the difference between high water and mean high tide at the standard station to the local difference between observed and mean high tide.

Let  $R$  and  $D$  represent the range of the tide and the difference between high water and mean high tide respectively at the standard station on certain day;  $R^1$  and  $D^1$  the corresponding quantities of the same tide at the place of observation; then by the above-stated rule

$$R : R^1 = D : D^1$$

$$\text{therefore } D^1 = D \frac{R^1}{R}$$

The quantity thus found applied to the local reading of high tide gives the height of mean high-water mark. The signs of  $D$  and  $D^1$  will be positive or negative according as the observations are taken about the time of spring or neap tide, respectively.

Having thus ascertained mean high-water mark, an easy mode of defining it on the foreshore of the area to be surveyed is to wait until the level of the water reaches the reading of mean high tide on the tide pole, and then have assistants placed to insert stakes along the contour of the water-line on the edge of the foreshore, which may afterwards be connected to the traverse.

The above method of defining mean high-water mark is only applicable to sheltered harbours and inlets during favourable weather conditions when there is no swell bearing along the coast-line.

In most cases, after determining the height of mean high tide at a station, it will be necessary to use the theodolite or level to run the line of mean high-water mark along the edge of the foreshore. When the survey is extensive the line of mean high tide is not on a horizontal surface; then several suitably placed stations may be required at which the tidal observations to determine the mean high tide are made and the work done in sections.

At the following standard tidal stations the mean high tide has been determined from tide-gauge records and connected to bench-marks; Auckland 9.73 ft.; Wellington, 4.64 ft.; Bluff, 8.27 ft.; Westport, 8.60 ft. The above figures are the readings on the tide-pole corresponding to mean high-water mark.

And the Surveyors' Board doth hereby declare that such amendments shall come into force as from the date of gazetting hereof.

Made at Wellington this 8th day of April, 1925, at a meeting of the Surveyors' Board at which the Surveyor-General was present.

W. T. NEILL,  
Surveyor-General and Chairman of Surveyors' Board.  
M. CROMPTON-SMITH,  
Secretary of Surveyors' Board.

*Re-exports from New Zealand to Australia.*

Customs Department,  
Wellington, 4th June, 1925.

WITH reference to the Order in Council gazetted this day making additional Customs regulations respecting the assessment of the current domestic value of goods re-exported from Australia to New Zealand, it is hereby notified for public information that the following is an extract from an Act passed by the Parliament of the Commonwealth of Australia, entitled the "New Zealand Re-exports Act, 1924":—

"1. This Act may be cited as the New Zealand Re-exports Act, 1924.

"2. This Act shall commence on a date to be fixed by Proclamation after the Governor-General is satisfied that reciprocal provisions have been made by the Government of the Dominion of New Zealand in relation to goods, not of Australian produce or manufacture, which are imported into that Dominion from Australia, and, upon the publication in the *Gazette* of a notice by the Governor-General that such reciprocal provisions are no longer in force, this Act shall cease to have effect.

"3. (1.) Where goods, which are not of New Zealand produce or manufacture, are imported into Australia from New Zealand, the value for duty of those goods shall, notwithstanding anything contained in section one hundred and fifty-four of the Customs Act, 1901-1923, be the sum of the following:—

"(a.) The current domestic value in the country whence the goods were exported to New Zealand at the date of export to New Zealand;

"(b.) All charges payable or ordinarily payable for placing the goods free on board at the port of export to New Zealand;

"(c.) Ten per centum of the sum of the amounts specified in the last two preceding paragraphs; and

"(d.) Ten per centum of the sum of the amounts specified in the last three preceding paragraphs.

"(2.) Where entry is made of goods to which the last preceding subsection applies, the owner shall deliver to the Collector the original invoice or a copy of the original invoice certified by the competent Customs authority in New Zealand, and shall make, in the presence of the Collector, a declaration in the prescribed form.

"(3.) Where goods to which subsection (1) of this section applies are imported into Australia, and the Collector is satisfied that goods of a similar class or kind have, since the date of exportation to New Zealand, increased in value in the country of exportation to such an extent that their value for duty under subsection (1) of this section is less than their value for duty if imported directly into Australia from the country whence they were exported to New Zealand, such increased current domestic value shall be taken into account in assessing those first-mentioned goods for duty under this Act instead of the value specified in paragraph (a) of subsection (1) of this section.

"(4.) In the absence of the original invoice or a copy of the original invoice, as required by subsection (2) of this section, or in the absence of any other necessary evidence of the current domestic value of any goods to which this section applies, the value for duty of the goods shall be—

"(a.) The current domestic value in New Zealand at the date of export to Australia; and

"(b.) All charges payable or ordinarily payable for placing the goods free on board at the port of export in New Zealand; and

"(c.) Ten per centum of the sum of the amounts ascertained under the last two preceding paragraphs.

"(5.) The value for duty of any goods to which this Act applies shall not, in any case, be higher than the value at which they would be assessed if they were goods to which the last preceding subsection applied.

"4. Except in so far as they are inconsistent with this Act, the provisions of the Customs Act, 1901-1923, and the regulations thereunder, shall apply to any goods to which this Act applies and, unless the contrary intention appears, expressions used in this Act shall have the same meaning as in that Act."

The Minister of Customs has been advised by the Minister for Trade and Customs, Melbourne, that the above-mentioned Act will, by Proclamation published in the *Commonwealth Gazette*, be brought into force and commence on 1st October, 1925.

GEO. CRAIG, Comptroller of Customs.
