I. HANDWORK IN PUBLIC SCHOOLS.

1. (i.) HANDWORK shall be regularly taught, in close correlation with other subjects of the syllabus, throughout the public schools of the Dominion, by the permanent public-school staffs.

(ii.) The necessary materials for such handwork exercises will be supplied by the Department to the several Education Boards, for distribution to the schools.

(iii.) Including stocks in hand at the beginning of the previous year, the rate of supply of each kind of material to each Education Board shall be proportional to the total number of children in average attendance throughout the district in standards or classes using such material.

(iv.) The actual cost of distribution, apart from salaries, will be paid by the Department on presentation of the necessary vouchers by the Education Boards concerned.

(v.) The Education Board of each district shall—

(a.) Ascertain in December of each year from the head teachers in all the public schools of the district the quantities of each kind of material remaining at the end of the school year, and shall supply to each school the difference between the amount allowed by the Department and the unused balance from the previous year.

(b.) Report to the Department before the 31st day of March in each year the total amount of each kind of material left on hand in the district at the end of the previous year, and such stocks shall be taken into account when supplies for the next succeeding year are being furnished by the Department.

2. (i.) Where there is no female teacher on the staff of a school below Grade III a payment of 15s. per annum will be made for each unit of the average attendance of the pupils on the roll of such school who receive instruction in needlework (as defined in the Standard Regulations) for not less than two hours weekly regularly throughout the school year: Provided that in the case of a school of Grade I or Grade II the total payments for such instruction in needlework shall not be less than £10 per annum where the instruction is given regularly throughout the school year.

(ii.) In cases where, in accordance with subclause (i) hereof, needlework classes are conducted by special teachers not on the permanent staff of the school, the presence of such special teacher shall be attested by her dated signature placed in the margin of the primary-school register, opposite the attendance entries of the class or classes taught by her, on each several occasion of her visit to the school for the purpose of giving such instruction.

3. Special manual-training classes for pupils of public schools in woodwork, metalwork, cookery, and housewifery, conducted by instructors classified under the regulations for the classification of teachers in technical

- (c.) That no pupils are admitted who are doing work in other subjects lower than that of Standard V:
- (d.) Provided that the headmaster may, subject to the approval of an Inspector previously obtained, send to such classes other pupils of his school not under twelve years of age, on the sole ground that such attendance is necessary for their normal development, provided that the attendance of such pupils does not involve the exclusion of pupils in Standards V or VI:
- (e.) That approved programmes of work and syllabuses of instruction are followed in each subject:
- (f.) That at least half the total time shall be devoted to individual practice by the pupils themselves.

4. When classes in manual training are taught at a specially equipped manual-training centre attendance must be recorded in the special attendance registers. 7. The time-table, which must show the subjects and hours of instruction and the names of the instructors, must be exhibited in a conspicuous place wherever classes are held.

Such supervision must include periodical visits, not less than once in each month during the school session, by the managers or a committee appointed by the managers, or, where the classes are administered directly by the controlling authority, by a committee appointed by the controlling authority.

9. The attendance of pupils in a technical high school shall be recorded in the public-school register of daily attendance, every morning and every afternoon: Provided that in no case shall the register be marked later

than one hour and a half before the close of morning or afternoon school, as the case may be. The register shall be marked and kept in accordance with the directions printed thereon.

No person shall be appointed as a full-time student teacher until he has been examined by a School Medical Officer and reported by him to be of sound health and good constitution, and free from all such physical defects as are incompatible with full efficiency in teaching: Provided that in special circumstances an examination by a private medical practitioner may, with the approval of the Director, be accepted in lieu of an examination by a School Medical Officer.

55. The term of service of a full-time student teacher shall be two years, each year beginning with the 1st day of February and ending with the 31st day of January following: Provided that the service of a student teacher appointed on or after the 1st day of July in any year shall be deemed to begin on the 1st day of February in the following year; provided further that the term of service of a student teacher may, with the approval of the Director, be extended for a third year. In no case, however, shall the total term of service of a student teacher exceed three years.

56. Full-time student teachers who have completed their term of service and have satisfied conditions of entrance shall be eligible to enter a training college in accordance with the regulations pertaining thereto: Provided that in special cases approved by the Director such student teachers who have completed not less than one year of service may be admitted to a training college if otherwise eligible.

57. (i.) The allowances payable to full-time student teachers in technical schools shall be equal to those payable in similar circumstances to probationers in public schools as prescribed by regulations for the time being in force.

(ii.) Full-time student teachers' allowances shall be paid in monthly instalments as from the date of entry upon the duties of their position.

(iii.) Free railway tickets will be granted where necessary to enable part-time or full-time student-teachers to attend classes for purposes of teaching or training or other instruction.

58. (i.) The appointment of every student teacher shall for the first year be regarded as provisional. If during this period the Principal of the school and an Inspector report favourably on the work of such student teacher, the appointment shall be confirmed, and the year of probation reckoned as a year of service.

(ii.) If a student teacher (a) shows little promise of suitability for the teaching profession, or (b) is unsatisfactory as regards diligence or behaviour, or (c) fails to pass any examination prescribed, or (d) is the subject of an unfavourable report by an Inspector, the managers may terminate his engagement on one month's notice. For gross negligence, incompetence, disobedience, or immoral conduct a student teacher shall be liable to summary dismissal without claim on the managers.

(iii.) No student teacher shall be at liberty to relinquish his engagement without giving the managers at least one month's notice in writing of his intention to do so.

59. (1.) The Principal of the school shall be responsible for the training in teaching and class-management and for the direction of the studies of the student teachers attached to his school: Provided that he may delegate such duties to the head of the department concerned, where such head

has been recognized by the Director, or to such other teacher as may be approved for that purpose by the Director, and so far as such duties relate to the specific subjects supervised by such head of a department or other teacher. In every case the course of study shall be so directed in continuation of previous studies as to form, as far as circumstances permit, a preparation for entrance into the training college on completion of service as a student teacher.

Provision must be made for the specific technical training of the student teacher in one or other of the courses offered in the technical school, as well as in the general subjects of the Teachers' Class D Examination.

(ii.) As part of the training given the Principal of the school shall make provision for frequent observation by student teachers of lessons given by classified teachers on the school staff, and for lessons to be given by student teachers in his own presence or in that of an approved assistant.

60. (i.) Student teachers shall receive instruction in their special subjects for at least four hours weekly before or after day school hours.

(ii.) Such instruction shall be given by the Principal of the school, or in approved classes conducted by the managers.

(iii.) A time-table showing the hours and subjects of instruction must be drawn up by the Principal of the school and submitted by him for the approval of the Inspector on his first visit in the year.

61. (i.) Student teachers who have qualified for entrance to a training college shall not be compelled to take any further examinations during their student-teachership except in subjects pertaining to the special course in which they are being trained to teach.

(ii.) When a student teacher obtains any exemption from examination under these regulations the Principal of the school shall draw up a scheme of work with a view to the preparation of the student teacher for higher examination in his special subjects, and shall draw up also a time-table showing a distribution of the work. The scheme of work and the time-table shall be submitted in duplicate to the Inspector for his approval.

62. It shall be the duty of the Principal of the school to cause every student teacher attached to his school—

(i.) To keep a journal or log-book in which the amount and character of each day's instruction, apart from teaching, shall be entered, which shall be certified weekly by the signatures of the student teacher and the Principal of the school:

(ii.) To keep a record of "special lessons" which he has taught under the direction and supervision of the Principal of the school or of an approved assistant. This record shall be the property of the student teacher, and shall show for each such lesson—

(a.) The class to which the lesson was given;

(b.) The title and the aim of the lesson;

(c.) The time occupied in teaching the lesson;

(d.) The teacher's criticism of the notes of the lesson and of the student teacher's handling of it;

(e.) The teacher's signature or initials at the end of the above entries; and

(f.) The date on which the lesson was given and the records made.

(iii.) Such "special lessons" should be given at least once in each fortnight throughout the school year, and in preparing notes the student teacher should be given access to reliable authorities on the matter to be prepared and on the best methods to be adopted in giving the lesson.

63. (i.) No student teacher shall be required permanently to teach or do school duty other than occasional supervision of school games in the playground for more than twenty hours weekly.

(ii.) No student teacher shall be placed in sole charge of a class or department.

(iii.) No student teacher shall be kept employed in teaching on one class of work in any given course for more than one year, except in cases where the approval of the Director has been specially sought and obtained.

64. The Principal of the school shall report when necessary, and at least once in each term, to the managers on the conduct, diligence, and progress in the art of teaching and in studies of all student teachers attached to his school, and copies of such reports shall be forwarded to the Director.

65. The Inspector shall, on each visit of inspection to a technical school where student teachers are employed, inquire into and report upon the character, scope, and suitability of the instruction given to student teachers, and observe and report on the general work of each student teacher and on the "special lesson" which each student teacher shall give in his presence.

66. Student teachers shall be required to conform to such rules and by-laws of the managers as are observed by other teachers on the staff, and such additional rules as may be made for their guidance by the managers and approved by the Director, and on appointment must sign a copy of these regulations to signify their adherence thereto.

IVB. CLASSIFICATION OF TEACHERS IN TECHNICAL SCHOOLS AND CLASSES.

67. The Director shall, by and through the Superintendent of Technical Education and such of the Inspectors of the Education Department as are concerned with the inspection of technical schools and manual-training classes (hereinafter referred to as the "classifying officers"), proceed annually to classify according to the regulations herein contained the teachers employed full time in any year in technical schools or classes or in manual-training classes.

(i.) Classified teachers who are not employed in such schools or classes at the time of the annual classification may be classified only on application to the Director. Any such application must reach the Director not later than the 1st day of December in any year.

(ii.) Any person appointed as a full-time instructor in such schools or classes after the classification-list is complete shall, if he is not already classified, be entitled to be provisionally classified forthwith as from the date of his appointment; but any such classification may be revised or confirmed after the work of the teacher has been inspected by a classifying officer.

(iii.) Any person who is seeking employment in such schools may, on application to the Director, be provisionally classified under these regulations, but any such classification may be revised or confirmed after the work of the teacher has been inspected by a classifying officer.

The classifying officers acting together shall, in accordance with these regulations, in the month of December of each year, classify all full-time teachers employed in such schools or classes, and shall report such classification to the Director.

68. For the purpose of classification the teachers to be classified shall in the first instance be grouped in two divisions, namely: Division I, Professional; Division II, General.

The teachers in each division shall be classified, men and women separately, into not less than six classes, numbered consecutively, of which Class I is the lowest.

69. For the purpose of classification the following qualifications shall be taken into account:—

- (a.) Ability in teaching.
- (b.) Academic attainments.
- (c.) Professional or trade attainments.
- (d.) Professional or trade service and teaching service.

70. (i.) To be classified in Division I a teacher must, *inter alia*, be the holder of a University degree or equivalent qualification approved for this purpose by the Director.

(ii.) Any teacher in Division II who becomes eligible under subclause (i) hereof for classification in Division I may on application to the Director be reclassified.

71. (i.) From the classification reported to the Director by the classifying officers shall be compiled annually a general classification-list of full-time teachers in technical schools, technical classes, and manual-training classes, which shall be published in the *New Zealand Gazette* before the 31st day of December in each year.

(ii.) Every such list shall contain separate lists for men and women, showing—

- (a.) The names of all teachers classified as herein provided, arranged in alphabetical order in each class under each division:
- (b.) The name of the school or education district in which the teacher is employed.

72. The classification-list as published in December of any year shall, subject to any provisions herein contained, determine for the succeeding year the classification of each teacher whose name appears on such list.

IVc. APPOINTMENTS.

73. The appointment of a principal of a technical school shall be made by the board of managers, or by the controlling authority, as the case may be, having direct control of the technical school under these regulations: Provided that before making the appointment the appointing body shall in all cases consult with the Director as to the qualifications and suitability of the several applicants for appointment; provided further that all such appointments must be approved by the Minister before payment of salary may be made under these regulations.

74. (i.) No teacher shall be appointed to a full-time position under these regulations unless the time-table of the classes which he instructs and his qualifications for the position have been approved by the Director.

(ii.) Subject to his right of appeal, the appointment of a permanent teacher may be determined by the Board on giving three months' notice signed by its secretary; and such appointment may be determined by the teacher on giving at least two months' notice in writing of his intention to do so:

Provided that in either case, if such notice expires during the currency of any school vacation, a teacher who has been employed in the Education service throughout the preceding period of twelve months shall be entitled to salary until the end of such vacation; and a teacher who has not been so employed shall be entitled, at the discretion of the Board, to salary for a part of the vacation not exceeding one-fourth of his period of actual teaching during that year.

75. (i.) Applications for all full-time positions under these regulations shall be invited by advertisement in the *New Zealand Education Gazette* at least ten days before the appointment is made, or in such other manner as the Minister may approve.

(ii.) No teacher shall engage in or continue in the practice of any profession or any teaching, "coaching," or other work that interferes with the due and proper discharge of his duties.

(iii.) No teacher shall use any room or workshop or equipment belonging to a technical or manual-training school for doing private work except by special permission of the managers, with the consent of the Minister.

(iv.) If in the opinion of the managers any teacher has failed to comply with the conditions of (ii) and (iii) above, his engagement may be terminated by the managers, subject to his right of appeal under Part XI of the Education Act, 1914.

76. (i.) A relieving teacher classified under these regulations and employed for not less than twenty hours weekly shall be paid at the minimum rate of salary determined by his classification: Provided that in approved cases a higher rate of salary than that determined by the classification above may be approved by the Director.

(ii.) The salary of a relieving teacher shall be paid for the period during which he actually discharges the duties of his position: Provided that a relieving teacher employed for two months or more during any calendar year shall be entitled, at the discretion of the managers, to salary for part of the school vacation immediately following any such period of engagement, such part not to exceed one-fourth part of the period of actual teaching during that year.

(iii.) Where the services of a relieving teacher are required for less than a school week part-time rates of salary, as provided in clause 83 of these regulations, may be paid: Provided that no relieving teacher may be appointed for less than a school week unless more than one member of the permanent approved staff is absent from duty.

IVd. SALARIES AND ALLOWANCES.

(NOTE.—The salaries shown in clause 77 hereof and in Schedule I to clause 80 hereof have been adjusted in accordance with the Public Expenditure Adjustment Act.)

77. (i.) Where the appointment of a principal of a technical school or schools has been approved by the Minister the salary of such principal shall be determined according to the following scale of minimum and maximum salaries:—

Total Weekly Hours.	Annual Salary of Principal.	Annual Increments.
	£	
Under 150	380-480	5 of £20 each.
150-224	480-530	2 of £20 and 1 of £10.
225-299	530-570	2 of £20.
300-399	570-620	2 of £20 and 1 of £10.
400-499	620-670	2 of £20 and 1 of £10.
500-599	670-720	2 of £20 and 1 of £10.
600-699	720-765	1 of £20 and 1 of £25.
700-799	765-815	2 of £20 and 1 of £10.
800 and over	815-860	1 of £20 and 1 of £25.

For the purposes of this clause "total weekly hours" shall be the average for the preceding year of the total weekly hours of instruction by principal, vice-principal, and assistants in charge of classes, including manual-training classes; evening-class time to count time and a quarter: Provided that in the case of the appointment of a principal to a newly constituted technical school the Director may determine the rate of salary in accordance with the scale herein on the estimated probable "total weekly hours" of instruction as defined herein; provided further that the salary of such principal in any school shall not be reduced unless the total weekly hours fall for three years below the minimum of the corresponding class: Provided further that where the salary of a principal or vice-principal is reduced owing to reduction in the total weekly teaching-hours, such reduction shall not diminish his salary below the maximum salary corresponding to the actual total weekly teaching-hours.

(ii.) A vice-principal may be appointed in any technical school in which the average weekly teaching hours exceed 800. Where the appointment of a vice-principal of a technical school or schools has been approved by the Minister the salary of such vice-principal shall be determined by the excess of "total weekly hours" as defined in subclause (i) hereof above 800 in accordance with the scale of minimum and maximum salaries for principals: Provided that the maximum annual salary payable to a vice-principal shall not in any case exceed £720.

(iii.) Where no residence is provided for a principal or for a vice-principal there shall be paid to such principal or vice-principal a house allowance of £60 per annum.

78. So far as the provisions of clause 84 (ii) hereof may allow, the commencing-salary under these regulations shall be for each teacher the minimum of the class of salary payable to him under clause 80 hereof: Provided that on the recommendation of the classifying officers the Minister may approve of a commencing-salary for any such teacher at any rate of salary up to the maximum salary for such class; provided also that on the recommendation of the classifying officers the Minister may in special cases approve of the payment to a teacher of a rate of salary above the maximum salary of his class; provided also that, so far as may be consistent with the provisions of clause 84 (ii) hereof, in the case of a position of unusual responsibility requiring specially high skill in practical work, the Minister may approve the payment to a teacher classified in Division II of the salary appropriate to the class in Division I next below that in which he is placed in Division II.

79. On the 1st day of February in each year the salary payable to each principal and each vice-principal whose appointments have been approved by the Minister, and to each teacher classified under the regulations holding an appointment approved by the Director, shall be increased by the annual increment appropriate to his class until he reaches the maximum of his class.

80. Subject to the provision of clause 84 (ii) hereof the salaries payable to technical-school and manual-training teachers classified under these regulations employed full time, whether in primary, secondary, or technical classes, or in combination of such classes, exclusive of any additions to salaries otherwise authorized by these regulations, shall be the class of salary corresponding to the class in which the teacher is classified as set out in Schedule I hereunder: Provided that, unless the Minister is satisfied that the duties of any position are commensurate with the corresponding class of salary, he may direct that a salary of a lower class shall be payable in respect of such position; provided further that no teacher shall be entitled to receive the salary of a full-time instructor in any class of salary unless the conditions of clause 87 hereof have been fulfilled; provided also that where the average weekly half-days as computed under clause 87 hereof exceed ten in any term or quarter or during a period when both day and evening classes are in session the teacher may receive extra salary on account of the excess half-days as defined in clause 87 hereof, calculated at the rate per half-day assigned in Schedule I for his class: Provided, also, that the ordinary grade salary of a teacher shall not be reduced owing to the fact that he is managing or controlling a boarding-establishment belonging to the school, but his remuneration over and above board and residence for such services in connection with the boarding-establishment shall be determined by consultation between the principal and the board, subject in all cases to the approval of the Minister.

In cases where two or more teachers successively occupy a given position in one term or one year, as the case may be, each such teacher shall be entitled to receive such extra salary-payments as he shall have earned on account of excess half-days in respect of such position.

SCHEDULE II.

(iii.) On the recommendation of the Board made on the advice of the principal, the Director may approve the payment of not more than £30 per annum in addition to the salary prescribed in Schedule I in the case of one female assistant in any mixed technical high school with over 100 day scholars.	

82. 83. Part-time teachers engaged in instructing approved classes shall be classified in Division I or Division II, and there shall be paid to the controlling authority with respect to such teachers a teacher-hour capitation of—

Division I—Men, 8s. ; women, 6s. 6d. :

Division II—Men, 6s. 6d. ; women, 5s. :

evening hours being counted time and a quarter : Provided that the rates of payment of individual teachers may be varied by the managers, subject to the approval of the Minister, so long as the average rate of payment per hour for each class is substantially equal to the corresponding rate of teacher-hour capitation : Provided further that in special circumstances the Minister may approve the payment of higher rates than those specified herein to specialist teachers taking advanced classes.

IV. STAFFING AND DUTIES.

84. (i.) In every technical high school there shall be not more than one full-time assistant for each complete twenty-eight pupils on the roll of the school at the 1st day of March : Provided that where instructors are employed part time in a technical high school each ten half-days of such part-time instruction shall count as the weekly service of one normal full-time assistant.

(ii.) Of the equivalent full-time staff of assistant teachers employed by a technical school board not more than one-sixth of the total number shall receive net salaries, excluding allowances, in excess of £335 per annum for women and £460 per annum for men, and not more than one-third net salaries, excluding allowances, in excess of £290 for women and £390 for men, the nearest whole number being taken in each case : Provided that, except where otherwise prescribed in these regulations, each teacher shall be paid the salary corresponding to his classification unless he be appointed, with the approval of the Director, after this regulation comes into force, to a position in which the maximum salary payable is less than that corresponding to his classification, in which case he shall receive the maximum salary corresponding to the position to which he is appointed. The Director of Education shall, on the coming into force of this regulation, require the governing body of each technical school or technical high school to submit for his approval its proposals under this clause in respect of the staff of such school, and such proposals shall be subject to revision in his discretion.

85. In cases where technical day schools having part-time pupils in attendance are staffed, in whole or in part, by full-time teachers, there shall be not more than one full-time assistant for each complete twenty-eight units in the "equivalent full-time roll number," each ten half-days of part-time instruction to count as the weekly service of one full-time assistant. The "equivalent full-time roll number" shall be determined by adding to the number of full-time day pupils on the roll of the school at the 1st day of March the number obtained by dividing by twenty the total average weekly hour-attendances of part-time day pupils at the school for the last two weeks in March and the first two weeks in April.

86. In general no class shall be approved unless in addition to the conditions otherwise prescribed there is, in the opinion of the Director, an adequate number of pupils on the roll of such class.

87. Full-time teachers under these regulations shall be expected to give service up to ten half-days per week for at least forty weeks in the year, no period of less than two hours' duration being counted as a half-day (evening hours counting time and a quarter), except where a shorter period has been approved under clause 6 (iii), nor more than two school hours of supervision of drill or sports included weekly : Provided that half-days in excess of ten shall be deemed to be overtime : Provided further that in the case of itinerant instructors occupied for not less than ten half-days weekly in travelling and teaching in day classes, overtime rates may be paid on account of evening and Saturday classes.

88. Notwithstanding anything in these regulations, the Minister shall have power in exceptional cases to determine the number of teachers who may be employed at any time in any technical school or technical high school. In any doubtful cases the decision of the Minister is to be final.

89. For the purposes of these regulations the term "board of managers" shall be held to include the controlling authority in any case where there is no board of managers.

V. INSPECTION.

90. All manual, technical, and continuation classes and schools shall be inspected from time to time by the Superintendent of Technical Education, an Inspector of Technical Schools, and such other Inspectors of the Department as may be deputed thereto. The Superintendent of Technical

Education, in collaboration with such other Inspectors, shall submit to the Director at the close of each year a report on the condition and suitability of the premises and fittings, the sufficiency and condition of the apparatus, &c., used in the instruction, the character and quality of the instruction, the sufficiency of the teaching staff, and the manner in which the rules and regulations for the general management and conduct of the classes have been carried out.

91. In general no notice of any visit of inspection shall be given unless the inspecting officer deems it advisable to hold a formal examination in order to gain more precise information as to the efficiency of the teaching, in which case not less than ten days' notice of the intended examination shall be given.

92. At any visit the inspecting officer may—

- (a.) Make such notes on the quality of teaching and on the discipline, tone, spirit of initiative, and organization of the school as will enable him to proceed with confidence to the annual classification of the teachers:
- (b.) Make such investigations of the work of the pupils as will enable him to advise the Principal of the school in making recommendations to the Director in respect of free places, leaving-certificates, &c., concerning pupils at the school:
- (c.) Verify the allocation of the receipts and expenditure in respect of manual, technical, and continuation classes, for which purpose he may require in respect of all classes recognized under the Act the production of all necessary accounts, books, registers, and documents:
- (d.) Make such notes as are necessary for the production of the annual report to the Director:

Provided that none of the duties enumerated in this clause shall interfere with the chief duty of the inspecting officer—namely, to endeavour to give such criticism, demonstrations, and advice as will best promote the efficiency of the schools and classes.

VI. RETURNED SOLDIERS.

93. A controlling authority or a technical school board may agree, subject to the approval of the Director, to admit, without payment of fees, discharged soldiers certified by a registered medical practitioner or public hospital authority to be—(a) unfitted to re-enter on their former occupations; and (b) likely to benefit by attendance at courses of instruction as offered and approved.

6. In the calculation of the proportion of produce or labour of such countries for the purpose of paragraph (d) of the preceding regulation, none of the following items shall be included or considered:—

(a.) Any amount of duty so payable in excess of the duty payable upon the like goods being the produce or manufacture of a country the produce or manufactures of which are entitled to be entered for duty under the British Preferential Tariff may be held by the Collector at the port of entry on deposit pending the production of an invoice having printed or written thereon a certificate in the prescribed form.

(b.) If the invoice, having written or printed thereon a certificate as aforesaid, is produced to the Collector within six months from the date of payment of the deposit, and the Collector is satisfied that the goods are the produce or manufacture of a country the produce or manufactures of which are entitled to be entered for duty under the British Preferential Tariff, such deposit shall be returned to the importer; but if such invoice is not so produced, the amount of the deposit shall be paid into the Public Account as duty payable under the said section, unless the Minister shall in any case, at his discretion, direct—

(i.) That the amount of the deposit shall be returned to the importer; or

(ii.) That the amount of the deposit shall be returned to the importer on payment of a penalty not exceeding the amount of such deposit.

11. Notwithstanding anything in these regulations, if the Collector is satisfied (a) that any goods entered for duty under the British Preferential Tariff are *bona fide* entitled to be so entered, and (b) that any goods liable under the Tariff to *ad valorem* duty have been entered on the basis of the current domestic value thereof as defined by the Customs Acts, he may, in such special cases as he thinks fit, accept, with respect to such goods, a certificate in such one of the forms prescribed in the Second Schedule to the Customs Regulations gazetted on the 7th day of December, 1922, as is applicable; provided that, with respect to any such goods concerning which claim is made that under paragraph (d) of Regulation 5 hereof they are entitled to be entered for duty under the British Preferential Tariff, the certificate shows that the expenditure in material produced in countries

Dated this 24th day of November, 1925.

G. JAS. ANDERSON,
For Postmaster-General.

By-laws under the Government Railways Act, 1908.

IN pursuance and exercise of the power and authority conferred by the Government Railways Act, 1908, and of all other powers and authorities in that behalf, I, Joseph Gordon Coates, Minister of Railways, do hereby amend or further amend the by-laws made under the said Act on the 29th day of May, 1909, by making the following alterations therein:—

By omitting from By-law No. 1 the definition of "General Manager," and substituting therefor the following:—

"'Board' means the Government Railways Board established under the Government Railways Act, 1908."

By omitting from the said by-laws the words "General Manager" in the places in which such words occur, and substituting therefor the word "Board."

By omitting By-law No. 27, and substituting therefor the following:—

"27. (1.) No person who shall not have been duly authorized or licensed thereto by the Manager shall come in or upon any carriage, vehicle, or premises of the railway for the purpose of removing any passenger's luggage, unless such person shall have been engaged by such passenger for such purpose.

"(2.) No person shall ply for hire within the precincts of any railway as a porter, unless such person shall be the holder of a license from the Manager.

"(3.) Applications for a porter's license shall be in the handwriting of, and signed by, the applicant, and addressed to the Manager, and shall give particulars of the candidate's age and previous employment, with any references or copies of testimonials as to character and fitness that the applicant may think fit to supply or submit.

"(4.) Applicants for a license shall be persons of sober habits and good moral character and address, and able to read and write with facility.

"(5.) If the Manager approve of any candidate's application he may issue to him, upon payment of a sum of ten shillings (10s.), being a deposit as security for the due and faithful performance by him of his duties, a license in such form as the Manager thinks fit, available for a period of twelve calendar months from the date thereof (unless sooner determined or revoked as hereinafter provided) at the station therein mentioned: Provided that upon the expiry or sooner determination of a license, otherwise than by revocation for misconduct, the person named in the license or his executors, administrators, or assigns, shall be entitled on demand to have returned the deposit money paid in connection with the issue of such license.

"(6.) No licensed porter shall be deemed to be in the employ of the Railway Department, and His Majesty the King shall not be in any way liable for the acts or defaults of any porter to any person, whether an employer of such porter or not.

"(7.) On application being made by a porter the Manager may, in his discretion, transfer such porter's license to another person, who shall hold the same subject to the provisions of this by-law.

"(8.) Every porter shall, during the time he is on duty in connection with his calling, wear the cap, with the badge as lettered and numbered, supplied to him by the Manager, and shall be clean in his person and tidily and suitably dressed.

"(9.) Every porter shall observe, obey, and be bound by all general by-laws for the time being in force applicable to the conduct of persons while on railway premises not inconsistent with this present by-law, as well as any instructions for the time being in force issued generally to porters by the Stationmaster and any instructions given to him specially by the Stationmaster, and shall observe, obey, and be bound by any directions that he may from time to time receive from the officers of the Railway Department authorized to give same.

"(10.) Every porter for a single payment in respect of each trip or article carried, on being engaged by the person having control of luggage intended to be despatched by train or placed in the parcels office, shall forthwith take such luggage from the vehicle by which it was brought to the station, or from the person engaging him, as the case may require, and place the same in the railway carriage or on such part of the station as his employer may indicate, or take such luggage to the luggage-office or cloak-room if so directed by such employer, subject, nevertheless, so far as

regards luggage intended to be despatched by train, to the following proviso—that is to say, if the luggage is intended to be carried in the luggage-van of any train, or if the luggage is not of a kind, or is in quantity in excess of that permitted to be carried free by the passenger or passengers concerned, having regard to the class and train by which such passenger or passengers propose to travel, the porter shall take such luggage into the place appointed and hand the same over to the proper officer of the Railway Department to be dealt with by such officer. If any such luggage, after being weighed or checked and the charges or excess fare (if any) paid, is intended to be carried in the carriage with a passenger, the porter, if the proper officer sanction his so doing, shall, without claim for further fee or payment, at the request of his employer, place the same in the carriage selected, or on such part of the station indicated by the employer.

“Save as in this clause expressly provided, no porter shall further or otherwise interfere with or handle any luggage that may be intended to be conveyed in a luggage-van.

“(11.) Every porter for a single payment in respect of each trip or article carried, on being engaged by the person having the control of luggage arriving by passenger train, shall take charge of all such luggage entrusted to his care carried in the carriage with a passenger or handed to him by his employer or for which checks have been handed to him to claim at the van or elsewhere on the station, and shall forthwith convey and place such luggage in the vehicle indicated by his employer, or, if so directed, in the cloak-room, or place it on such part of the station as the employer may direct.

“(12.) Each porter shall be entitled to claim and be paid by the person employing him in respect of his services at the following rates and no more :—

	s. d.
“(a.) When a single article of luggage only has to be transported	0 6
“(b.) When there are more articles than one to be transported :	
for each necessary trip on which the porter transports	
more than one of such articles to or from the cab,	
tram, vehicle, railway-carriage, parcels-office, or part of	
station directed or appointed, as the case may be	1 0

“(13.) Any porter into whose hands any luggage or other property may come which is not duly claimed, or any porter finding or noticing any luggage in a railway-carriage or on the station apparently overlooked by the owner, shall forthwith convey the same to the lost-luggage office, and hand it over to the officer there in charge.

“(14.) Any porter may surrender, or the Manager may withdraw, any license issued under this by-law by giving one calendar month's written notice, and after the expiration of one calendar month from the receipt of such notice by the person for whom it was intended the license to which it applies shall cease to be in force.

“(15.) If it appear at any time that any porter has been guilty of a breach of this or any other by-law made under the Government Railways Act, or of any of the instructions referred to in clause (9) hereof, or is otherwise unfit to hold a license, the Manager may suspend for a stated time or revoke, as may seem fit, the license of such porter, and no license while so suspended or when so revoked shall be deemed to be of any force or virtue hereunder, and the cap and badge of any person whose license is revoked shall be delivered up to the Stationmaster.

“(16.) In this by-law the following words and expressions, unless repugnant to or inconsistent with the context, shall include the meanings hereby assigned to them :—

“‘Luggage’ includes any goods, articles, or things belonging to or over which any passenger, or intending passenger, by any train has any control, carried or intended to be carried on the railway :

“‘Porter’ means a luggage-porter duly licensed under this by-law :

“‘Stationmaster,’ when used without words of limitation, includes in addition to the officer appointed Stationmaster, or Acting-Stationmaster, the officer for the time being on duty in charge of the station in the absence of the Stationmaster or Acting-Stationmaster.”

Given under my hand this 21st day of November, 1925.

J. G. COATES, Minister of Railways.

Notice to Persons in whom is vested Ecclesiastical Authority over Religious Bodies.

Registrar-General's Office,
Wellington, 25th November, 1925.

THE attention of the persons or person within the Dominion of New Zealand in whom is vested ecclesiastical authority over any of the religious bodies enumerated in the Third Schedule annexed to an Act of the General Assembly of New Zealand intitled the Marriage Act, 1908, and of all other persons concerned, is directed to the 11th section of the above-mentioned Act, requiring the several ecclesiastical authorities as aforesaid to send in to the Registrar-General, in the month of December in every year, a correct list of their Officiating Ministers within the meaning of the Marriage Act, 1908, of each of the said religious bodies.

The following are the religious bodies above referred to:—

- The Church of the Province of New Zealand, commonly called the Church of England.
- The Presbyterian Church of New Zealand.
- The Roman Catholic Church.
- The Methodist Church of New Zealand.
- All Congregational Independents.
- Baptists.
- The Lutheran Church.
- All Hebrew Congregations.

In default of any person having ecclesiastical authority over any of the religious bodies named above, the name of the Officiating Minister of any congregation of such religious body may be certified to by two recognized office-bearers thereof.

A minister of religion not connected with any of the aforesaid bodies must send to the Registrar-General in the month of December in each year a certificate signed—

- (a.) By the recognized head in New Zealand of the religious body to which he belongs; or
- (b.) By two duly recognized ministers of such religious body; or
- (c.) By ten adult members thereof, who append to their signatures their description as being such members, declaring that such minister is their Officiating Minister, the said signatures and descriptions being attested by some person who shall verify the signatures to the certificate as the genuine signatures of the persons whose they purport to be, by a statutory declaration signed by such person and appended to the certificate.

Neglect in sending the certificate will deprive the minister of his status as an Officiating Minister under the Marriage Act.

N.B.—It is requested that the Christian names and the addresses of the several ministers may be specified in the lists sent in to the Registrar-General.

In order to obviate the necessity for further inquiry, it is also requested that the reason for omitting the name of any minister be stated (such as on account of death, absence from New Zealand, or as the case may be).

W. W. COOK, Registrar-General.

DESCRIPTION OF RUNS.

Run 608: This run is situated in the Wart Hill and Whitecombe Survey Districts and contains 15,000 acres, of which area 13,700 acres are west of the Pomahaka River, with a homestead-site of 1,300 acres east of the river. The main portion of the run comprises a series of spurs and ridges, some of which are boggy with rough broken creeks and gullies, containing in parts patches of bush and scrub. The whole area for the most part is well clothed with tussock and other native grasses, which provide abundance of summer feed. The aspect generally is easterly, and there are about 2,500 acres lying into the river below an altitude of 2,500 ft. The country is well watered by the Pomahaka River, Jordan Creek, and their tributaries. The distance from the main portion of the run to the homestead-site is about nine miles by a bridle and driving track. There are two areas set apart for resting stock on this track, one of 5 acres near the Pomahaka sheep-bridge and one of 50 acres known as Weatherall's; both areas are shown on the plan.

A fair proportion of the homestead-site can be cultivated for the growing of winter feed. This area is situated about thirteen miles and a half by road from Edievale Railway-station, which is the terminus of the Tapanui Branch line. Eleven miles and a half of this road is formed. The Moa Flat school is about six miles, and the Dunrobin Post-office about ten miles and a half distant. The altitude of the portion of the run to the west of the river is from about 1,200 ft. to 4,700 ft., and the homestead-site is from 1,400 ft. to 2,000 ft. The general description of the run may be considered fair, if worked under expert management.

Run 609: This run is situated in the Wart Hill Survey District and contains 11,620 acres, of which area 10,610 acres are west of the Pomahaka River, with a homestead-site 1,010 acres east of the river. The main part of the run comprises a series of somewhat broken spurs and ridges, which in some cases are boggy. Portions of the creeks and gullies are rough and contain patches of bush and scrub. The whole area is for the most part fairly well clothed with tussock and other native grasses. The aspect generally is north to east, and there are about 4,500 acres facing on to the river below an altitude of 2,500 ft. The country is well watered by the Pomahaka River, the Jordan, and the N. and S. twin creeks. The access from the main portion of the run to the homestead-site is by an unformed driving and bridle track for a distance of about six miles. An area of 50 acres enclosing yards and house known as Weatherall's can be used as a resting-place for stock.

A fair proportion of the homestead-site can be cultivated for growing winter feed. This area is situated about fourteen miles and three-quarters by road from Edievale, which is the terminus of the Tapanui Branch Railway line. Eleven miles and a half of this road is formed. The Moa Flat school is about seven miles and a quarter distant, and the Dunrobin Post-office about eleven miles and three-quarters distant. The altitude of the run to the west of the Pomahaka is from about 1,150 ft. to 4,740 ft., and the homestead-site from about 1,350 ft. to 2,200 ft. This is a good well-balanced run, with an area, including the homestead-site, of about 5,500 acres below an altitude of 2,500 ft. and a little over 6,000 acres about that elevation.

Run 610: This run is situated in Wart Hill Survey District, and contains 10,130 acres, of which area 9,070 acres are west of the Pomahaka River, with a homestead-

site of 1,060 acres east of the river. The main part of this run comprises a series of broken spurs and ridges. The gullies and creeks are in parts somewhat rough, but the whole area is, on the whole, well clothed with tussock and other native grasses. The aspect, generally, is south-east, and there are about 4,000 acres lying into the Pomahaka River and Sandy Creek, below an altitude of 2,500 ft. The run is well watered by the Pomahaka River and Sandy Creek and its tributaries. The access from the main portion of the run lying west of the Pomahaka to the homestead-site is by an unformed driving and bridle track for a distance of ten miles; an area of 5 acres near the Pomahaka sheep-bridge and an area of 50 acres known as Weatherall's, and shown upon the plan, may be used as resting-places for stock. Some of the homestead-site can be cultivated for the growing of winter feed.

This area is situated about fifteen miles and a half by road from Edievale, which is the present terminus of the Tapanui Branch Railway-line. Eleven miles and a half of this road is formed. The Moa Flat School is eight miles and the Dunrobin Post-office twelve miles and a half distant. The altitude of the run west of the Pomahaka is from about 1,150 ft. to about 4,300 ft., and the homestead-site from about 1,050 ft. to 2,000 ft. This is a good well-balanced run, with an area, including the homestead-site, of about 5,100 acres below an altitude of 2,500 ft., and about 5,000 acres above this elevation.

Run 611: Situated in Wart Hill Survey District and bounded to the west generally by the Pomahaka River. Access is by road from Edievale about sixteen miles and a quarter distant; about eleven miles and a half of this road has been formed. Edievale is the present terminus of the Tapanui Branch line. The nearest post-office is at Dunrobin, about thirteen miles distant, and the Moa Flat school is situated about eight miles and three-quarters from the run.

The run, for the most part, is composed of a series of ridges, which on the whole are fairly well clad with tussock and other native grasses, with a few isolated patches of scrub and flax. The faces lying into the Pomahaka have a westerly aspect and are very steep and do not carry much feed. The altitude is from about 1,100 ft. to 2,420 ft. The run is watered by the Pomahaka River, the Wart Hill and Valley Creek. The general description of the run can be considered only fair.

IMPROVEMENTS.

The improvements, which have to be paid for in cash, comprise—

Run 608: Half interest in 892 chains of boundary-fences, value, £352 16s.

Run 609: Half interest in 510½ chains of boundary-fences; iron hut, stone hut, horse-paddock; total value, £269 16s. 4d.
