NOTE.—Areas of Sections 7s and 14s are subject to slight alteration.

Reporoa Settlement is situated about twenty-five miles from Rotorua on the Rotorua-Taupo Road. There is a school and a post and telephone office on the settlement. The portion of the estate which is now being offered is generally level to undulating, the soil on the higher land being of pumice formation. Most of the sections contain a proportion of partially drained swamp land of good quality, some of which is in surface-sown grass and rough feed, and is capable of growing good pasture when further drained. Practically the whole of the area being offered is ploughable

when fully drained. Sections are watered by drains and in some cases by streams. About 20 acres on the north boundary of Section 7, about 10 acres of part Section 35s, and a small area of Section 9s are mineralized.

PRESS OPINIONS.

The Hon. G. M. Thomson in writing this manual has evidently taken up a labour of love. He writes not so much for the scientific as for the general reader. It is a valuable and likely to be one of the most popular works issued by the Board of Science and Art. It is a notable addition to Mr. Thomson's other works.—*Evening Post*, Wellington, N.Z.

A bright little book. Mr. Thomson has provided a book sufficiently scientific to be authoritative, and yet informal and simple enough to be interesting to the young and uneducated. We shall look forward eagerly to Part II.—*Herald*, Timaru, N.Z.

It is a book of unusual interest. There is nothing like it in print, and the wonder is that it has not been done before. Mr. Thomson is to be thanked for producing a work so useful and so timely. Technical terms and scientific language have been avoided as far as possible, with the result that we have a narrative as interesting as any romance. It will prove a valuable and useful book.—*Evening Star*, Dunedin, N.Z.
