THE HONOURABLE W. DOWNIE STEWART PRESIDING IN COUNCIL.

WHEREAS by section one hundred and fourteen of the Local Bodies' Loans Act, 1926, it is provided that, notwithstanding anything to the contrary in any Act or in any rule of law, where a local authority or public body has been authorized before the passing of the said Act, or is thereafter authorized, to borrow money, whether pursuant to a poll of ratepayers or otherwise howsoever, whether the rate of interest or the term of years of the loan was or was not specified or determined, and such money or any part thereof has not been borrowed, the local authority or public body may, with the precedent consent of the Minister of Finance, borrow such money, or such amount thereof as has not been borrowed, at such rate of interest, or for such term, as may be prescribed by the Governor-General by Order in Council:

And whereas the Ashburton Electric-power Board has been authorized to borrow the sum of two hundred and ninety-six thousand five hundred pounds for electric works, and is now desirous of borrowing an additional sum of twenty-nine thousand six hundred and fifty pounds under the authority of section nineteen of the Local Bodies' Loans Act, 1926, for the purpose of completing the undertaking:

And whereas the Minister of Finance has given his precedent consent as required by the above-recited section one hundred and fourteen, and it is desired that the rate of interest at which the money may be borrowed be not exceeding five and three-quarters per centum per annum:

Now, therefore, His Excellency the Governor-General of the Dominion of New Zealand, in pursuance and exercise of the power and authority vested in him as aforesaid, and acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby prescribe that the rate of interest that may be paid by the Ashburton Electric-power Board in respect of the said loan of twenty-nine thousand six hundred and fifty pounds shall be a rate not exceeding five and three-quarters per centum per annum, and the said Ashburton Electric-power Board is hereby authorized to borrow the said sum of twenty-nine thousand six hundred and fifty pounds accordingly.

Present:

THE HONOURABLE W. DOWNIE STEWART PRESIDING IN COUNCIL.

WHEREAS by section one hundred and fourteen of the Local Bodies' Loans Act, 1926, it is provided that, notwithstanding anything to the contrary in any Act or

in any rule of law, where a local authority or public body has been authorized before the passing of the said Act, or is thereafter authorized, to borrow money, whether pursuant to a poll of ratepayers or otherwise howsoever, whether the rate of interest or the term of years of the loan was or was not specified or determined, and such money or any part thereof has not been borrowed, the local authority or public body may, with the precedent consent of the Minister of Finance, borrow such money, or such amount thereof as has not been borrowed, at such rate of interest, or for such term, as may be prescribed by the Governor-General by Order in Council:

And whereas the Inglewood County Council has been authorized to borrow the sum of three hundred and fifty pounds for the purpose of erecting two bridges on the Rugby Road:

And whereas the Minister of Finance has given his precedent consent as required by the above-recited section one hundred and fourteen, and it is desired that the rate of interest at which the money may be borrowed be not exceeding six per centum per annum:

Now, therefore, His Excellency the Governor-General of the Dominion of New Zealand, in pursuance and exercise of the power and authority vested in him as aforesaid, and acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby prescribe that the rate of interest that may be paid by the Inglewood County Council in respect of the said sum of three hundred and fifty pounds shall be a rate not exceeding six per centum per annum, and the said Inglewood County Council is hereby authorized to borrow the said sum of three hundred and fifty pounds accordingly.

Present:

THE HONOURABLE W. DOWNIE STEWART PRESIDING IN COUNCIL.

WHEREAS by section one hundred and fourteen of the Local Bodies' Loans Act, 1926, it is provided that, notwithstanding anything to the contrary in any Act or in any rule of law, where a local authority or public body has been authorized before the passing of the said Act, or is thereafter authorized, to borrow money, whether pursuant to a poll of ratepayers or otherwise howsoever, whether the rate of interest or the term of years of the loan was or was not specified or determined, and such money or any part thereof has not been borrowed, the local authority or public body may, with the precedent consent of the Minister of Finance, borrow such money, or such amount thereof as has not been borrowed, at such rate of interest, or for such term, as may be prescribed by the Governor-General by Order in Council:

And whereas the Christchurch City Council has been authorized to borrow the sum of five thousand seven hundred and forty-five pounds for the purpose of paying off the balance of the North Linwood Channelling Loan:

And whereas the Minister of Finance has given his precedent consent as required by the above-recited section one hundred and fourteen, and it is desired that the rate of interest at which the money may be borrowed be not exceeding five and three-quarters per centum per annum:

Now, therefore, His Excellency the Governor-General of the Dominion of New Zealand, in pursuance and exercise of the power and authority vested in him as aforesaid, and acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby prescribe that the rate of interest that may be paid by the Christchurch City Council in respect of the said sum of five thousand seven hundred and forty-five pounds shall be a rate not exceeding five and three-quarters per centum per annum, and the said Christchurch City Council is hereby authorized to borrow the said sum of five thousand seven hundred and forty-five pounds accordingly.

Acting Clerk of the Executive Council.

Regulations as to the Constitution of the Tuwharetoa Trust Board and Matters relevant thereto.

CHARLES FERGUSSON, Governor-General.

ORDER IN COUNCIL.

At the Government Buildings at Wellington, this 18th day of October, 1926.

Present :

THE HONOURABLE W. DOWNIE STEWART PRESIDING IN COUNCIL.

IN pursuance and exercise of the powers conferred on him by section sixteen of the Native Land Amendment and Native Land Claims Adjustment Act, 1926, His Excellency the Governor-General of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby make the following regulations with respect to the Tuwharetoa Trust Board, and otherwise for the purpose of giving effect to the said section :-

REGULATIONS.

- In these regulations—
"Board" means the Tuwharetoa Trust Board ;
"Member" means a member of the Board ;
"Chairman" means the Chairman of the Board ;
"Under-Secretary" means the Under-Secretary for Native Affairs :

"The said section" means section 16 of the Native Land Amendment and Native Land Claims Adjustment Act, 1926.

MEMBERS.

2. The Board shall consist of eight members, being members of the Tuwharetoa Tribe, to be appointed by the Governor-General in Council as provided in paragraph (a) of the said section.

3. Subject to the provisions of these regulations as to resignation or forfeiture of office, a member shall hold office for two years, and thereafter until his successor has been appointed. A retiring member may be reappointed.

4. A member may at any time be removed from office by the Governor-General if the Governor-General is of opinion that that member is, from any cause, incapable of efficiently performing the duties of his office, or has been guilty of any misconduct which renders him unfit for office.

5. A member may at any time resign his office by notice in writing under his hand sent or delivered to the Under-Secretary.

6. The office of any member of the Board shall be vacated if he becomes bankrupt or is convicted of an offence punishable by imprisonment.

7. When a member of the Board dies, or resigns, or forfeits his office, or is removed from office, the Governor-General may appoint some person to fill the vacancy so created, who shall hold office for the unexpired term of his predecessor and thereafter until his successor is appointed.

8. The powers of the Board shall not be affected by any vacancy in the membership thereof.

MEETINGS.

9. The Board shall meet for the despatch of business at such times and places as the Board or Chairman may appoint, and a meeting may be summoned at any time by the Chairman.

10. The Native Minister may direct a meeting to be convened at any time, and thereupon such meeting shall be held.

11. (1.) The first meeting of the Board shall be held at such time and place as may be directed by the Native Minister.

(2.) At its first meeting the Board shall elect one of its members to be Chairman, and such member when so elected shall thereupon preside over the meeting of the Board at which he has been so elected, but he shall not come into office until his election as Chairman of the Board has been approved by the Native Minister.

(3.) At every meeting for the election of a Chairman the Secretary of the Board shall preside, and in any case of an equality of votes shall determine the election by lot in such manner as the Board directs.

(4.) The Secretary of the Board shall forthwith submit to the Native Minister the name and description of the member elected to be Chairman of the Board.

12. All questions coming before the Board at any meeting shall be decided by a majority of the votes of the members present thereat.

13. At every meeting the Chairman, or, in his absence, some other member to be chosen by those present, shall preside, and the Chairman or presiding member shall have a deliberative vote, and in case of equality of votes shall have a casting-vote also.

14. A quorum at any meeting of the Board shall consist of five members, and no business shall be transacted at any meeting unless a quorum is then present.

15. If within half an hour after the time for which a meeting of the Board has been appointed, whether by summons or by adjournment, a quorum is not present, the member or members present, or, if no member be present, an officer of the Board, may adjourn the meeting to such time and place as is thought fit.

16. All proceedings and resolutions of the Board shall be recorded in a minute-book to be kept for the purpose. At the end of each and every meeting the Chairman or Secretary of the Board shall supply a copy of or an extract from the minutes of the Board to the Under-Secretary.

SEAL.

17. The seal of the Board shall be such as is determined by the Board and approved by the Native Minister, and shall be kept in the custody of the Chairman or of such officer of the Board as it may appoint for the purpose.

18. The seal of the Board shall not be affixed to any document except in the presence of two members of the Board and of the Secretary or other responsible officer of the Board, all of whom shall attest the sealing of the document.

OFFICERS.

19. (1.) The Board may from time to time, with the approval of the Native Minister, appoint some fit and proper person to be the Secretary of the Board, and, with the like approval,

may at any time remove any such Secretary and appoint some other fit person in the place of the Secretary so removed.

(2.) The Secretary of the Board shall be deemed to be the servant of the Board and shall receive such salary or other remuneration as the Board, with the approval of the Native Minister, shall determine.

(3.) The Secretary shall have all such powers and duties as the Board shall determine, and he shall at all times conform to the direction of the Board in that behalf.

20. The Board may from time to time appoint such other officers and workmen of the Board as shall be found necessary and expedient for the proper carrying out of the business of the Board.

ACCOUNTS.

21. All moneys received by the Board shall be acknowledged on a printed form of receipt. A counterfoil of each receipt shall be retained by the Board, and shall be countersigned by some person (other than the receiving officer), who shall certify the same as a true copy of the receipt issued.

22. Proper books of accounts and other books shall be kept by the Board, in which shall be entered correct records of all moneys received and paid out by the Board.

23. Receipts shall be numbered consecutively, and the number of each receipt shall be quoted in the cash-book and other books of accounts kept by the Board.

24. All books and vouchers shall, on request, be produced to the Under-Secretary or to any Inspector appointed by the Native Minister to examine the same.

25. All such accounts shall be subject to audit by the Audit Office.

26. (1.) At the close of each year ending on the 31st day of March, the Board shall cause to be prepared a statement showing the total receipts and expenditure of the Board during that year, together with a balance-sheet showing its assets and liabilities.

(2.) Within thirty days after the close of each such year, the Board shall transmit or cause to be transmitted two copies of the aforesaid statement of receipts and expenditure and balance-sheet under the seal of the Board to the Controller and Auditor-General, who shall examine and certify to the correctness thereof, and transmit one copy thereof, certified as aforesaid, to the Under-Secretary.

ADMINISTRATION OF FUNDS.

27. (1.) All moneys received by the Board shall be paid into the Bank of New Zealand at Rotorua (or such other branch of that bank as the Native Minister may direct) to the credit of an account to be called the Tuwharetoa Trust Board Account.

(2.) No moneys shall be paid out of such account except by cheque signed by two members of the Board and countersigned by an officer of the Public Service to be appointed in that behalf by the Native Minister.

28. All reasonable expenses properly incurred by the Board may be paid out of moneys in its account.

29. Members of the Board shall be paid for their attendance at all regular and special meetings of the Board to which they shall be duly summoned to attend, the sum of £1 (one pound) for each and every day of attendance at such meetings, together with actual and reasonable travelling-expenses in going to and returning from such meetings as follows: Fares actually payable by public conveyance (whether by rail, steamer, coach, or tram) by the most direct route; provided that, where any such public conveyance is not available, or available only at greater cost, either (1) the expenses attaching to a member's use of his own horse or vehicle, at a rate not exceeding 8d. per mile counted both ways, together with actual garage or stabling expenses, not exceeding 5s. for each night that a horse or vehicle has to be kept from home, or (2) fares actually paid for motor-car or other special conveyance.

30. If and whenever the Board desires to borrow money pursuant to the authority in that behalf conferred by the said section, it shall forward to the Under-Secretary a statement showing the purpose for which the money is proposed to be borrowed, the amount of money to be borrowed, the interest to be paid, and the particulars of the expenditure to be undertaken.

31. If any question shall arise as to the expenditure of any money by the Board, or as to the proportion in which any benefits shall be allocated amongst the respective hapus entitled thereto, or as to whether any project resolved upon by a public meeting of the members of the Tuwharetoa Tribe should be undertaken by the Board, any person aggrieved by the Board's decision thereon may apply to the Native Minister to decide the matter at issue. The Native Minister may thereupon decide the question in dispute or what is right and proper to do under the circumstances, and shall direct the Board accordingly, and the Board shall thereupon act upon such direction.

C. A. JEFFERY,
Acting Clerk of the Executive Council.

Commission to inquire into and report as to Grievances alleged by Maoris.

CHARLES FERGUSSON, Governor-General.

To all to whom these presents shall come, and to the Honourable SIR WILLIAM ALEXANDER SIM, Kt., of Dunedin, and to the Honourable VERNON HERBERT REED, M.L.C., of Paihia, Bay of Islands, and to WILLIAM COOPER, Esquire, of Gisborne, Native Associate: Greeting!

WHEREAS under the powers conferred by the New Zealand Settlements Act, 1863, the New Zealand Settlements Act Amendment, 1864, the New Zealand Settlements Amendment and Continuance Act, 1865, and the New Zealand Settlements Acts Amendment Act, 1866 (hereinafter collectively referred to as "the said Acts"), Proclamations and Orders in Council were from time to time made pursuant to which lands theretofore held by Natives became Crown lands freed and discharged from the title, interest, or claim of such Natives by reason of the fact that such Natives or some of them had been engaged in rebellion against Her then Majesty's authority, the purpose of the said Acts being (as recited in the said New Zealand Settlements Act, 1863) that it was necessary that adequate provision should be made for the permanent protection and security of the well-disposed inhabitants of both races, for the prevention of future insurrection or rebellion, and for the establishment and maintenance of Her Majesty's authority and of law and order throughout the colony, the best and most effectual means of attaining those ends being the introduction of a sufficient number of settlers able to protect themselves and preserve the peace of the country:

And whereas provision was made by the said Acts for compensation to be granted to all such persons as had any title, interest, or claim to any land taken under the said Acts; excluding from any such compensation the classes of persons defined in section five of the New Zealand Settlements Act, 1863; such compensation being ascertained in the manner provided by the said Acts by the awards of Compensation Courts or by the Government, and being granted either in money, or in scrip, or by grant of land:

And whereas numerous claims for compensation under the said Acts were made and dealt with in favour of such Natives having title to the lands taken under the said Acts as were proved to have been either loyal to the Crown or neutral, and consequently not within the classes excluded by the said section five of the said Act of 1863. But many Natives now allege that they (or Natives under whom they claim living at the time of the passing of the said Acts) were loyal to the Crown or neutral and were entitled to or interested in some of the lands so taken, and have not received compensation therefor. And from time to time before and since the repeal of the said Acts petitions or claims have been presented to the Government or to Parliament, and some of such claims have been inquired into and dealt with:

And whereas it is alleged on behalf of those Natives entitled or interested in the lands so taken under the said Acts who (or Natives under whom they claim) were actually in rebellion against Her Majesty or otherwise within the classes excluded from compensation by the said section five of the Act of 1863, that the confiscation of their title and interest was (a) excessive in quantity or (b) improper in the inclusion in the confiscation of land which should properly have been reserved for Native purposes:

And whereas for many years past complete peace has existed between the two races, and it is deemed desirable to review the whole position created by and consequent upon the said Acts, and to cause inquiry to be made as hereafter provided with the object of enabling Parliament to remedy such grievances as may appear now to have just and reasonable foundation:

Now, therefore, I, General Sir Charles Fergusson, Baronet, Governor-General of the Dominion of New Zealand, in exercise of the powers conferred by the Commissions of Inquiry Act, 1908, and of all other powers and authorities enabling me in this behalf, and acting by and with the advice and consent of the Executive Council of the said Dominion, do hereby constitute and appoint you, the said

Sir William Alexander Sim,
Vernon Herbert Reed, and
William Cooper

to be a Commission to inquire into and report upon the following matters:—

1. Whether, having regard to all the circumstances and necessities of the period during which Proclamations and Orders in Council under the said Acts were made and confiscations effected, such confiscations or any of them exceeded in quantity what was fair and just, whether as penalty for rebellion and other acts of that nature, or as providing for protection by settlement as defined in the said Acts.

2. Whether any lands included in any confiscation were of such a nature as that they should have been excluded for some special reason.
3. Whether any, and if so, what Natives (having title or interest in lands confiscated), are in your opinion justly entitled to claim compensation in respect of the confiscation of such title or interest, and, if so, what Natives or classes or families of Natives are now entitled by descent or otherwise to claim and receive such compensation.
4. Whether reserves or other provision subsequently made for the support and maintenance of Natives within one or more of the classes excepted by the said section five were in regard to any particular tribe or hapu inadequate for the purpose:

Provided that, in considering the subject-matter of question 1 (a), you shall not have regard to any contention that Natives who denied the sovereignty of Her then Majesty and repudiated Her authority could claim the benefit of the provisions of the Treaty of Waitangi; (b) you shall not accept any contention that the said Acts or any of them were *ultra vires* of the Parliament of the Dominion; (c) you shall have regard to the then circumstances of the colony, and in estimating the value of an excess of confiscation (if any) you shall have regard to the value of the confiscated land as at the date of confiscation, and not to any later increment of the value thereof.

And, in respect of your inquiry under question 1, if you find that the said confiscations or any of them were in fact excessive, having regard to the matters which hereinbefore you are directed to take into consideration, you shall report what compensation in money should in your opinion be made in respect of such excess of confiscation, and shall further report whether the amount of such compensation should be appropriated for the benefit of any special person, tribe, or hapu, or (having regard to the difficulty of present ascertainment of title) should be appropriated in such manner that it may be applied for the benefit of all the Natives of the North Island of New Zealand.

And you are hereby further authorized to inquire into the claims and allegations made by the respective petitioners in the petitions referred to in the Schedule hereto so far as such claims and allegations are not covered by the preceding terms of this Commission and to make such recommendation thereon as appear to accord with good conscience and equity in each case.

And with the like advice and consent I do further appoint you the said

Sir William Alexander Sim

to be the Chairman of the said Commission.

And you are hereby authorized and required to conduct any inquiry under these presents at such times and places as you deem expedient, with power to adjourn from time to time and place to place as you think fit, and to call before you and examine on oath or otherwise such persons as you think capable of affording you information on any of the matters aforesaid, and to call for and examine all such documents as you deem necessary to afford you the fullest information on any such matters; and you or any two of you shall and may from time to time proceed to the execution hereof and of any power, matter, or thing herein contained.

And using all diligence you are required to report to me under your hands and seals not later than the thirtieth day of June, one thousand nine hundred and twenty-seven, your opinion on the aforesaid matters.

And you are hereby strictly charged and directed that you shall not at any time publish or disclose, save to me in pursuance of these presents, or by my direction, the contents or purport of any report so made or to be made by you.

And it is hereby declared that these presents shall continue in full force although your inquiry is not regularly continued from time to time or from place to place.

And, lastly, it is hereby further declared that these presents are issued under and subject to the provisions of the Commissions of Inquiry Act, 1908.

178A. For candidates for appointment as junior draughtsmen the following subjects are compulsory :—

	Maximum Marks.
(1.) English	500
(1A.) Handwriting	100
(2.) Arithmetic	300
(3.) History	300
(15.) Mathematics, or (16) alternative mathematics ..	400
(27.) Trade drawing	200
(28.) Drawing (freehand and instrumental) ..	200
Maximum obtainable ..	2,000

181. The legibility of handwriting and the setting-out of matter will in all cases be taken into account when assigning marks to papers in the various subjects.

The scope of the Entrance Examination is as follows :—

GROUP I.

(1.) *English.*

The English paper will be designed to test the literary comprehension and appreciation of the candidates, and a standard will be required in written composition such as can reasonably be attained after two years' secondary study of good English models. Great importance will be attached not only to correctness of composition, but also to originality of thought and expression. Pronunciation and accent will also be tested by a question based upon some simple phonetic system in conformity with the international phonetic script.

Grammar will be treated from the functional point of view. No formal parsing will be required. Sentences, clauses, phrases, and parts of speech should receive just enough attention to allow candidates to do analysis and to explain clearly errors in accidence and syntax.

Questions may also be set on synthesis, direct and indirect speech, punctuation, the construction of sentences to indicate the meanings and uses of words, letter-writing, and the precis of literary or other matter.

(1A.) *Handwriting.*

The copying from print or manuscript of prose, poetry, business letters, tabulated matter, and commercial papers. In the assessment of marks for handwriting consideration will be given chiefly to legibility, regularity, neatness, and speed. Handwriting will be taken into account in all subjects tested by written examination.

(2.) *Arithmetic.*

Vulgar and decimal fractions; metric system; approximations, proportion; partnerships; averages; percentages; profit and loss; bankruptcies; taxes, premiums; simple and compound interest; bankers' discount; stocks and shares; simple cases of exchange; square root; cube root of numbers reducible to prime factors not greater than 11; areas of plane rectilinear figures and of circles; mensuration of the prism, pyramid, sphere, circular cylinder, and circular cone. The use of algebraical symbols and processes, of graphical methods and of logarithms, will be permitted. Special importance will be attached to correct methods of setting out work.

(3.) *History.*

(Reasonable choice of questions will be permitted.)

1. The various racial elements contributing to the formation of the British nation; the story of their fusion. The Union of England and Scotland (1707) and of Great Britain and Ireland (1801); their subsequent relationship.

2. Constitutional progress and the development of democratic government. Suggested headings: Magna Charta; the Model and First Parliaments; Tudor despotism; progress during the seventeenth and eighteenth centuries, as marked by the struggle with the Stuarts and by the development of party government and the Cabinet system; the work of the great Prime Ministers; the Reform Bills, 1832, 1867, 1884.

3. The growth of the Empire from the age of discovery.

4. Leading recent developments in the Pacific.

5. History of New Zealand :—

(a.) The Maori before the advent of the white man,

- (b.) Early explorers, traders, missionaries.
- (c.) Commencement of systematic colonization ; leading colonizers.
- (d.) Chief conflicts with the Maoris.
- (e.) Crown colony period ; Provincial Government ; present Constitution.
- (f.) Discovery of gold ; development of primary industries.
- (g.) Work of early Governors ; policy of leading Premiers.
- (h.) Features of modern progress.

6. Landmarks of industrial and social progress during the eighteenth and nineteenth centuries.

7. An elementary knowledge of civics under the following headings ; The Crown, Privy Council, Parliament, local governments, franchise, and elections. Executive functions of Government ; Law Courts, methods of preventing and punishing crime ; taxation, customs, the national debt ; principal State Departments ; land-settlement ; co-operation ; methods of industrial peace ; causes and prevention of poverty.

GROUP II.

(4.) *General Experimental Science.*

(All science candidates take Section 1. In addition, chemistry candidates take Section 2 ; other science candidates take *either* Section 2 *or* Section 3.)

Section 1.—British and metric systems of measurement. Errors of observation and errors arising from too great reliance upon arithmetical calculations. Volumes of solids and liquids. Use of the balance. Flotation (iceberg, ship, Plimsoll line, submarine boat, dirigible). Principle of Archimedes. Density and specific gravity of solids and liquids. Common hydrometer and lactometer. Simple experiments dealing with solution of gases and solids in liquids. Evaporation, condensation, distillation, filtration, crystallization, emulsion.

Section 2.—Ideas of pressure and thrust in fluids (U tube, water-level, spirit-level, gauge-glass, town water-supply, artesian well). Transmission of fluid pressure (hydraulic press, jack, pressure-gauge). Pressure of gases (Boyle's law, syringe, siphon, cycle-pump, lift-pump). The barometer (mercurial and aneroid). Representation of forces. The spring balance. Experimental determination of the resultant of two concurrent forces and of parallel forces ; graphical determination of the former. Moments and the couple. Tests of accuracy of a balance and methods of weighing. Centre of gravity and its bearing on equilibrium. Determination of position of centre of gravity in very simple cases. Simple and common contrivances based upon the lever and the inclined plane.

Section 3.—Simple experiments on the properties and composition of air. Combustion (fire, candle, bunsen burner, gas-stoves, petrol). Ventilation and heating of rooms. Oxidation and the formation of oxides, particularly oxides of carbon. Respiration and the carbon cycle. Composition and properties of water. Simple experiments of oxygen, hydrogen, and carbon.

And either—

- (a.) The difference between chemical and physical change and between mechanical mixtures and chemical compounds ; indestructibility of matter ; hard and soft waters ; chief impurities of water ; an elementary study of sulphuric acid, caustic soda, common salt, washing-soda, copper sulphate, and limestone as examples of acids, alkalies, and salts ; *or—*
- (b.) Simple study of the plant as an organic whole ; an elementary knowledge of the chemical constituents of plants and the sources from which the plant derives them, treated as a cycle of transformations from living to non-living matter and back again ; simple qualitative and quantitative experiments illustrating the nutrition of plants, the conduction of water and food substances in the plant, storage of reserve material, respiration, and transpiration ; influences of temperature, moisture, and light on the growth of plants.

The candidate will be expected to show that he has acquired by actual experiment, observation, and measurement his knowledge of the matters set forth in the sections of the above syllabus selected by him ; but he will not be expected to show that he is familiar with other than the simple apparatus and appliances commonly used in connection with elementary instruction in practical physics or chemistry in secondary schools. He will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the syllabus.

(5.) *Chemistry.*

Air; its weight; rusting of iron and the effect on the composition of air; effect of heating in air, lead, copper, sulphur, phosphorus, magnesium; volumetric analysis of air; detection of water and carbon dioxide in the air; constituents of air; respiration and the carbon cycle.

Air and combustion; the burning of a candle; structure of candle and gas flame; fuels (wood, coal, coke, charcoal, coal-gas, kerosene, petrol); products of combustion; danger of imperfect combustion.

Water; natural waters; common impurities and methods of removing them (*e.g.*, sedimentation, boiling, distillation, chlorination); hardness of water; composition of water; water of crystallization (easy experiments).

The determination and graphic representation of the solubility of solids in water at different temperatures (easy cases).

Preparation (laboratory and commercial) and properties of oxygen, nitrogen, and hydrogen.

Elements, mixtures, compounds; chemical and physical changes; indestructibility of matter; symbols, formulæ, equations; the determination in easy cases of the weight of the materials required to yield or to combine with a given weight of a given substance.

Experiments illustrating modes of chemical action. The nature and general properties of oxides, acids, bases and salts.

The most important properties of carbon, sulphur, phosphorus, and sulphuric acid; the preparation and properties of the oxides of carbon, sulphur dioxide, chlorine, ammonia, hydrochloric acid and nitric acid.

An elementary experimental study of limestone, quicklime, slaked lime, washing-soda, caustic soda, common salt, and copper sulphate.

The candidate will be expected to show that he has acquired by actual experiment, observation, and measurement his knowledge of the matters set forth in the above syllabus; but he will not be expected to show that he is familiar with other than the simple apparatus and appliances commonly used in connection with elementary instruction in practical chemistry in secondary schools. He will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the syllabus.

(6.) *Magnetism and Electricity.*

Properties of magnets; methods of making magnets; induction; elementary notions of the magnetic field and lines of force; the earth as a magnet; dip; declination; mariner's compass.

Electrification by friction and by induction; conductors and non-conductors; the gold-leaf electroscope and its use; distribution of electrification on conductors; hollow conductors; the electrophorus.

Elementary notions of the electric current, of the means of producing it, of its magnetic, heating, and chemical effects; water and silver voltameters; elementary notions of electromotive force and resistance; Ohm's law; electrical units (ampere, volt, ohm, watt, Board of Trade unit).

The galvanometer, its use in detecting changes in the strength of a current and in comparing (roughly) the strength of different currents and the resistances of different conductors; ammeters and voltmeters (treated simply); the resistance-box.

Electromagnet; electric bell; glow-lamp.

Very elementary ideas of electro-magnetic induction.

The candidate will be expected to show that he has acquired by actual experiment, observation, and measurement his knowledge of the matters set forth in the above syllabus; but he will not be expected to show that he is familiar with other than the simple apparatus and appliances commonly used in connection with elementary instruction in practical physics in primary or secondary schools. He will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the syllabus.

(7.) *Technical Electricity.*

Simple experiments with compass and magnet.

Elementary magnetic properties of iron and steel. An elementary study of magnetic fields and lines of force.

The Leclanche cell. Magnetic field about a wire carrying a current. Solenoids and electromagnets. The electric bell. The relay, the telegraph, and the telephone.

Practical units of current, quantity, electromotive force, resistance, power and energy. Laws of resistance. Use of Ohm's law for simple circuits.

Heating effect of an electric current treated quantitatively. Heaters, hot-wire instruments, and fuses. Electric lamps.

Principles underlying construction and use of ammeters and voltmeters (moving-iron and moving-coil).

Production of electro motive force by change of magnetic flux through an electric circuit. Simple application of principle to direct-current generators and motors.

Very elementary ideas of the alternating current, including its employment for experimental work in simple non-inductive circuits, within the limits of the above syllabus. Practical use of the transformer.

The candidate will be expected to show that he has acquired by actual experiment, observation, and measurement his knowledge of the matters set forth in the above syllabus. He will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the syllabus.

(8.) *Heat and Light.*

Experiments to illustrate the expansion of solids, liquids, and gases (qualitatively). Measurement of expansion of solids and liquids. Practical applications of the principle of expansion. Mercury and alcohol thermometers. Maximum and minimum thermometers. The anomalous expansion of water and its significance.

Experiments on melting and solidifying points (paraffin wax, butter, water), on boiling-points (water, salt solution). Effect of pressure on the boiling-point (digester). Change of volume on solidification (water, paraffin). Change of volume on vaporization and applications (steam-pressure). Distillation and fractional distillation (water, alcohol, mineral oil).

Distinction between temperature and heat quantity. Units of heat. Measurement of specific heats of solids and liquids by method of mixtures. Absorption of heat during fusion and vaporization (treated simply) and applications thereof.

Heat transference (very elementary). Safety-lamp, hay-box, ventilation, winds, hot-water heating-system, cooling system of petrol-engine, thermos flask.

Nature and propagation of light. Pinhole images. Shadows and eclipses.

Intensity of illumination. Candle-power photometry.

Laws of reflection of light at plane surfaces. Images in plane mirrors.

Laws of refraction of light at plane surfaces. Passage of light through a plate, a prism, and a lens. Formation of images by single convex lenses. Simple magnifying-glass. Camera. Astronomical telescope. Periscope.

Dispersion of light. The spectrum. The rainbow. Colour of bodies.

The candidate will be expected to show that he has acquired by actual experiment, observation, and measurement his knowledge of the matters set forth in the above syllabus; but he will not be expected to show that he is familiar with other than the simple apparatus and appliances commonly used in connection with elementary instruction in practical physics in primary or secondary schools. He will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the syllabus.

(9.) *Heat-engines.*

Expansion by heat of solids, liquids, and gases. Expansion joints. Thermometers, mercurial and water-tube. Fahrenheit and centigrade scales (the former to be used in all calculations involving practical applications).

A simple study of Boyle's and Charles's laws and of isothermal and adiabatic expansion (the latter treated only with the aid of steam tables).

Specific heat of water, copper, iron. The British thermal unit. Calorific values of various fuels, including coal-gas and petroleum products.

Latent heat and total heat of steam at various temperatures. Wet, dry, and superheated steam. Simple calculations on mixtures of water at various temperatures; mixtures of steam and water; evaporative power of fuels.

Transference of heat by conduction, convection, and radiation. Heat-insulation. Simple studies of common types of boilers and condensers.

A very elementary study of Joule's equivalent in connection with the conversion of heat into work in cylinders of simple steam-engine, gas-engine, petrol-engine. Indicator-diagrams for the above, and their use in practice. Principles underlying impulse and reaction steam turbines.

Simple studies in design of cylinder, piston, slide-valve and poppet-valve, steam-valve, water-gauge, pressure-gauge, injector, feed-pump, carburettor.

The candidate will be expected to show that he has acquired by actual experiment, observation, and measurement his knowledge of the matters set forth in the above syllabus. He will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the syllabus.

(10.) *Home Science.*

Simple experiments and investigations bearing on the following:—

1. Expansion of solids, liquids, and gases. Conduction, convection, and radiation treated simply, and especially in their relation to household appliances and operations.

2. The chief properties of carbohydrates, fats, proteins, and mineral matter.

3. The composition and structure of milk, eggs, meat, root and green vegetables and fruit, and of wheat in comparison with other common cereals.

4. Principles on which are based the various methods of preparing and cooking foods, including the use of baking-powders and yeast.

5. Changes in weight and character of foods in cooking.

6. Changes in food due to the agents of digestion.

The candidate will be required to forward before the date of the examination a certificate in the prescribed form that she has carried out satisfactorily a course of practical work based on the above syllabus.

(11.) *Agriculture.*

The candidate will be expected to show (a) that he has a practical knowledge of the operations incident to the work of a school-garden, and (b) that he has conducted experiments and observations bearing on the life and growth of plants, on the lines indicated below under the head of "Experimental and Observational Work":—

(a.) *Work in the Garden.*—General: Preparation of the land; digging, trenching, hoeing, raking, and surface cultivation. Drawing drills. Sowing. thinning, pricking off, hardening, and planting out seedlings. Methods of treating light and heavy soils. Fertilizers; the time of year and the condition in which to apply fertilizers; the selection of fertilizers for particular purposes. Use of lime, soot, clay, road-sweepings, ashes, leaf-mould, &c., as soil-improvers. Arrangement of the garden to the best advantage from the points of view of space, succession of crops, and weeding.

Special: Methods of plant-cultivation. Cultivation and management of—

(i.) Green, pod-bearing, and tap-rooted vegetables, potatoes, onions, vegetable marrows, tomatoes. Gathering and storing of vegetables.

(ii.) Cereals and other grasses, and fodder-plants generally. Succession of crops. An elementary study of the common weeds of the candidate's district.

(b.) *Experimental and Observational Work.*—The seed: Parts of the seed. Conditions necessary for germination and growth. Testing the vitality of seeds. The collection and preservation of seed. Experiments illustrating the phenomena of germination and the establishment of the young plant (e.g., absorption of moisture by seeds; temperature of and pressure exerted by germinating seeds; how seeds escape from their covers; how seeds get buried in the soil; how young plants get above the ground; and how they deal with obstacles met with during the process; how seeds on the surface get their roots into the ground; proof that germinating seeds take in oxygen and give out carbon dioxide, &c.).

The root: The function of the root. Root-systems. The use of root-hairs and root-caps. Effect of injury to these parts. How roots grow. Experiments illustrating the work of roots (e.g., relation between root-hairs and soil-particles; exploration of soil by roots in search of moisture; the quantity of water required by roots; use made by roots of mineral matters dissolved out of soil by water; proof that roots require air and give out carbon dioxide, &c.).

The leaf: The general structure, forms, and functions of leaves, treated simply.

Stems and their modifications. Buds.

The flower and fruit: The parts of the flower and their functions. Causes influencing the opening and closing of flowers. Pollination. The formation of fruits. Different types of fruits. Devices for the protection of seeds from foes. Dissemination of seeds.

The soil: How soil is made. The mechanical analysis of soil. The texture of soil. The soil as a sponge from which a plant may obtain water,

as a storehouse of plant-food, and as a laboratory in which plant-food is prepared and dissolved. Experiments with soils (*e.g.*, how moisture is held in the soil; how moisture moves through the soil; how the moisture-holding capacity of a soil may be increased; conservation of moisture; evaporation at surface of different soils; how the texture of a soil may be improved; conditions governing soil temperature).

The candidate will be required to forward before the date of examination a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the above syllabus.

(12.) *Botany.*

The candidate will be required to show that he has acquired his knowledge of the following topics by observation, investigation, and experiment:—

The organs of flowering-plants, their arrangement and principal modifications; their functions, so far as can be ascertained by observation and simple experiments.

The main phenomena of the life-history (excluding microscopic processes) of common flowering-plants; germination; establishment and growth; comparison of different types of germination; the mechanism of pollination; fruit and seed dispersal.

Adaptation of plants to their surroundings and to cold and drought; protection against animals. Comparison of creeping-plants, climbing-plants, rosette-forming plants, grass-like plants, shrubs and trees. Plant societies.

The description and dissection of commonly occurring native and introduced flowering-plants (technical descriptions will not be demanded).

The candidate will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical instruction based on the above syllabus.

(13.) *Dairy Science.*

The constituents of milk; causes of variations and of defects in the composition of milk; the physical and chemical properties of milk; the coagulation of milk; the composition of skimmed milk, separated milk, buttermilk, and cream; the uses and value of separated milk, buttermilk, and whey; methods of determining the fat in milk; acidity and the estimation of acidity; sampling; the care of milk; influence of temperature on milk; pasteurizing and sterilizing milk; objections to the use of chemical preservatives; conveyance of milk; milk as a medium for conveying disease.

Methods of raising and separating cream; the ripening of cream; use of starters; the process of churning; composition of butter; washing, working, and salting butter; common faults in butter.

A very elementary knowledge of the general anatomy and physiology of the cow, with special reference to the parts concerned in nutrition and milk-production; the care, management, and feeding of dairy cows and calves.

The candidate will be expected to show that during the course he has acquired a knowledge of elementary chemistry and physics sufficient to enable him to understand (a) the principles of the apparatus and appliances, and (b) the processes used in the study of milk.

The candidate will be required to forward before the date of examination a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the above syllabus.

GROUP III.

(14.) *Geography.*

(a.) Physical and mathematical geography, as follows: The approximate size and form of the earth; its daily rotation; the north and south line; latitude and longitude, meridians and parallels, local time; annual revolution of the earth round the sun; the altitude of the sun at the equinoxes and at the solstices; the inclination of the earth's axis to the plane of its orbit; the length of the day; the zones, the seasons, winds, and currents (treated in an elementary way), trade winds, monsoons. Rainfall and its distribution; controlling factors. Temperature; its distribution; isotherms. Different types of climate; climatic regions of the world. Connection between temperature, moisture, and resultant vegetation. Variation of vegetation with altitude and latitude. Typical animal life in different parts of the earth. Distribution of industries and products as controlled by physical conditions (treated on very broad lines). The work of rain, rivers, ice, wind, and sea. Scales of maps; contours; easy map-reading.

(b.) The physical, political, and economic geography of the British Empire.

(c.) An elementary knowledge of the geography of the lands bordering upon the Pacific and of the rest of the world (including great geographical discoveries and the chief trade routes of the world).

(15.) *Mathematics.*

(a.) *Algebra.*

Fundamental operations; easy fractions; factors of expressions that are the product of two binomial factors, and of such expressions as $a^3 \pm b^3$ and $a^3 \pm 3a^2b + 3ab^2 \pm b^3$, only numerical coefficients being used; common multiples and divisors to correspond; simple equations involving one or two unknown quantities; the solution by factors of easy quadratic equations involving one unknown quantity; easy problems; graphs of simple algebraical functions within the limits of the foregoing work, and graphical methods of solving simple equations involving two unknown quantities.

(b.) *Geometry.*

No formal proofs shall be required for examination purposes of the theorems in Part I. The truth of these should be established by intuition and experiment, and the teaching of formal geometry should be based upon the quasi-axiomatic acceptance of these results.

Every candidate shall be expected to answer questions in both theoretical and practical geometry. The questions in theoretical geometry shall consist of theorems contained in subsections (a), Part II, together with questions upon these theorems; easy deductions from them and arithmetical illustrations. The questions in practical geometry shall be set on the constructions, &c., contained in subsections (b) and (c), Part II, together with easy extensions of them. All figures should be drawn accurately. The constructions in subsections (b) are those of which formal proofs shall be expected.

Any proof of a proposition shall be accepted which appears to the examiners to form part of a systematic treatment of the subject.

PART I.

If a straight line stands on another straight line, the sum of the adjacent angles so formed is equal to two right angles; and the converse.

If two straight lines intersect, the vertically opposite angles are equal.*

When a straight line cuts two other straight lines, if a pair of corresponding angles are equal, the two straight lines are parallel; and the converse.

When a straight line cuts two other straight lines, if (i) a pair of alternate angles are equal, or (ii) a pair of interior angles on the same side of the cutting line are supplementary, then the two straight lines are parallel; and the converse.*

Straight lines which are parallel to the same straight line are parallel to one another.*

If two triangles have two sides of the one equal to two sides of the other, each to each, and also the angles included by those sides equal, the triangles are congruent.

If two triangles have two angles of the one equal to two angles of the other, each to each, and also a side of one equal to the corresponding side of the other, the triangles are congruent.

If two triangles have three sides of the one equal to three sides of the other, each to each, the triangles are congruent.

The area of a rectangle is measured by the product of the measures of its sides.

There is one circle and only one circle which passes through three given points not in the same straight line.

(NOTE.—The theorems marked * may serve in the class-room as a useful introduction to the process of logical deduction.)

PART II.

Section I:—

(a.) The sum of the angles of a triangle is equal to two right angles.

If the sides of a convex polygon are produced in order, the sum of the exterior angles so formed is equal to four right angles.

If two sides of a triangle are equal, the angles opposite those sides are equal; and the converse.

If two triangles have two sides of the one equal to two sides of the other, each to each, and the angles opposite to one pair of equal sides are right angles, the triangles are congruent.

(NOTE.—The ambiguous case should be discussed.)

If two sides of a triangle are unequal, the greater side has the greater angle opposite to it; and the converse.

Of all straight lines that can be drawn to a given straight line from a given point outside it, the perpendicular is the shortest.

The opposite angles of a parallelogram are equal; and the converse.

The opposite sides of a parallelogram are equal and each diagonal bisects the parallelogram; and the converse of the first part.

The diagonals of a parallelogram bisect one another; and the converse.

If a pair of opposite sides of a quadrilateral are equal and parallel, it is a parallelogram.

The straight line drawn through the middle point of one side of a triangle parallel to another side bisects the third side.

The straight line joining the middle points of two sides of a triangle is parallel to the third side and equal to one-half of it.

If three or more parallel straight lines make equal intercepts on any transversal, they make equal intercepts on any other transversal.

(b.) To bisect a given angle.

To bisect a given straight line.

To construct a perpendicular to a given straight line (i) from a given point in the line, (ii) from a given point outside the line.

To construct an angle equal to a given angle.

To draw a straight line parallel to a given straight line.

(c.) To divide a straight line into any number of equal parts or in a given ratio.

The construction of angles of 60° , 45° , 30° .

The construction of triangles and quadrilaterals from sufficient data and the solution of triangles by drawing to scale.

Section 2:—

(a.) The area of a parallelogram is equal to the area of a rectangle on the same base and between the same parallels; and is therefore measured by the product of the measures of its base and its altitude.

Parallelograms on the same or equal bases and of the same altitude are equal in area.

The area of a triangle is equal to one-half of the area of a rectangle on the same base and between the same parallels; and is therefore measured by one-half of the product of the measures of its base and its altitude.

Triangles on the same or equal bases and of the same altitude are equal in area.

Equal triangles on the same or equal bases are of the same altitude.

The square of the hypotenuse of a right-angled triangle is equal to the sum of the squares on the other two sides; and the converse.

Geometrical proofs of the following algebraic identities:—

$$\begin{aligned} k(a+b+c) &= ka + kb + kc \\ (a+b)^2 &= a^2 + 2ab + b^2 \\ (a-b)^2 &= a^2 - 2ab + b^2 \\ a^2 - b^2 &= (a+b)(a-b). \end{aligned}$$

(b.) To construct a triangle equal in area to a given quadrilateral.

To construct a rectangle equal in area to a given triangle.

(c.) The determination by measurement of the areas of plane rectilinear figures.

The experimental proof of the theorem of Pythagoras.

Section 3:—

(a.) The locus of points equidistant from two fixed points is the perpendicular bisector of the line joining the two fixed points.

The locus of points equidistant from two intersecting straight lines consists of the pair of straight lines which bisect the angles between the two given lines.

(b.) The construction or plotting of the loci of points subject to simple geometrical conditions.

Section 4:—

Determination by measurement of the ratio of the circumference of a circle to its diameter.

Determination (approximately) of the area of a circle.

Construction of tangents to a given circle.

Simple cases of the construction of circles from sufficient data.

The inscription in or circumscription about a given circle, by geometrical methods, of regular figures of three, four, six, and eight sides.

(16.) *Alternative Mathematics.*

(a.) General idea of number as a quantity having unlimited positive and negative range; rational and irrational numbers.

Quantities that can be wholly represented by numbers—*e.g.*, length, cost, area, angle, time. Relationships between such quantities treated graphically. Ideas of variation, variable, and function. Graphical work with two variables to give practice in curve tracing only. Ideas of continuity and limit. Linear relation between two variables—*i.e.*, the function $Y = aX + b$, treated symbolically and graphically with oblique as well as rectangular axes.

Dimensions of length, area, and volume functions. Simple functions stated in algebraic symbols, and commonly known as formulæ. Practice in evaluation, including cases where it is necessary to change the independent variable in formulæ such as $a = \frac{v-u}{t}$, $T = 2\pi \sqrt{\frac{l}{g}}$.

Simple manipulative exercises in the addition, subtraction, multiplication, division, and factorization of algebraical expressions, limited, as far as possible, to trinomials of no higher degree than the second. The methods used must invariably show work written in lines, with a full understanding of the meaning and use of the sign of equality. Simple equations involving one or two unknown quantities, and problems thereon, provided that the examples set must bear the stamp of reality, whether they be expressed in symbols or stated in words.

(b.) Ideas of direction and of similarity of space. The straight line defined as one of uniform direction, and its minimum treated as a consequence of its "directness." All straight lines similar to one another: application to making of straight edges. Plane surfaces: application to surface plates.

The angle treated as a quantitative change in direction. Rotational proofs of the simple angular properties of figures, especially figures of three and four sides.

Parallels treated as straight lines in the same direction. Angular properties of figures with parallel sides.

(c.) Ideas of symmetry and superposition. Uniqueness of figure formed by three given straight lines in the same plane. Congruence of triangles deduced from this result, and consequently such geometrical results in reference to triangles and parallelograms as are usually proved in an elementary course from congruent triangles.

Use of scales: scale ratio. Simple cases of proportionality, including similarity of triangles and other plane figures, treated with reference to scale ratio. The recognition and use of the sine, cosine, and tangent of an angle, regarded both as a function of the angle and as a ratio between the sides. Graphs and functional scales of sine, cosine, tangent.

Areas of rectangles, triangles, and parallelograms. Proofs by dissection, combined with symbolic expression, as in the geometrical truths illustrated by the expressions—

$$\begin{aligned} \text{Area of triangle} &= \frac{1}{2}bh = \frac{1}{2}bc \sin A = \frac{1}{2}ca \sin B \\ (a + b + c)x &= ax + bx + cx \\ (a + x)x &= ax + x^2 \\ (a \pm b)^2 &= a^2 \pm 2ab + b^2 \\ (a + b)(a - b) &= a^2 - b^2 \end{aligned}$$

Areas of similar figures proportional to the squares of the ratios of corresponding sides. Pythagoras' theorem deduced from this result together with the fact that the perpendicular from the right angle to the hypotenuse divides the triangle into two parts both similar to it.

(d.) The simplest treatment of directed quantities, such as displacements, to show that certain quantities cannot be fully represented by numbers alone. Ideas of addition and subtraction for such quantities applied in simple diagrams drawn to scale, such as are usually met with in elementary practical questions on heights and distances.

(17.) *Hygiene.*

(a.) *The Home.*—General considerations of site, aspect, construction, &c., in order to obtain hygienic conditions. Value of a garden, fresh air, and sunlight. Heating and lighting. Number and arrangement of rooms. Storage of food. Water-supply (quantity of water required for each person, methods of collection and distribution; effects of insufficient or impure water-supply; methods of purification). Sanitary arrangements (good systems of domestic drainage; water and earth). Dust and dirt. Disposal of refuse. Necessity for cleanliness of home and surroundings.

(b.) *Personal Cleanliness.*—Cleanliness, washing and bathing; structure of skin; care of the mouth and teeth; care of the hair; care of the feet;

exercise and fatigue; rest and sleep; clothing; materials; cleanliness of clothing.

(c.) *Structure of the Body*.—General idea of cell as unit of tissues and organs of the body; division of labour. General form and characteristics of body; form and relative positions of parts of skeleton and of chief muscles, organs, great blood-vessels and nerve trunks. Mode of attachment and action of muscles. The structure and mechanics of the principal joints. The arrangement of the alimentary canal. The mechanics of respiration and circulation; differences between inspired and expired air, between venous and arterial blood and between blood and lymph. The physical composition and functions of blood. The general differences between arteries, capillaries, and veins, and in the flow of blood therein. The chief sources of heat-production in the body; the mean temperature of the body of man and the chief agents keeping it uniform. A general knowledge of the arrangement of the nervous system; an elementary knowledge of the functions of the brain and spinal cord.

(d.) *First Aid and Home Nursing*.—Signs of fracture, first aid to be rendered in such accidents; treatment of bruises and sprains. Bandaging with triangular and roller bandages. Artificial respiration and its application in cases of drowning or suffocation. Treatment of cuts and wounds; points where the main blood-vessels may be compressed. Treatment of faints, burns, scalds, bites, stings, and poisoning. Arrangement of a sick-room and general care of the sick. Infection, disinfection. Common disinfectants and antiseptics, their use and action.

The candidate will be expected to be familiar with the more important steps to be taken in dissecting, say, a rabbit, and he may be required to recognize and describe parts of the animal body from specimens or photographs.

The study of food and ventilation, which usually form part of a prescription in hygiene, are included in the prescription for home science.

GROUP IV.

(18.) *Latin*.

Candidates will be expected to show such a knowledge of the language and of its vocabulary and grammar as may be gained from a two years' study of the subject. Translation will be set of a standard not higher than that of the simpler books of Cæsar. With the aid of a vocabulary of unusual words, the candidate will be expected to render into English easy passages of unprepared translation, or to answer in Latin easy questions expressed in Latin upon the same passages, or to render into Latin easy sentences based expressly upon the language and subject-matter of one of the passages.

(19.) *French*.

Candidates will be expected to show such a knowledge of the language and of its vocabulary and grammar as may be gained from a two years' study of the subject. The candidate should be able, with the aid of a vocabulary of unusual words, to render into English easy passages of unprepared translation and to answer questions in grammar thereon, also to answer in French easy questions expressed in French upon the same passages. The rendering into French of easy sentences or passages or the writing in French of a free composition of a simple kind on a familiar subject will also be required. Pronunciation will be tested on phonetic lines.

(20.) *Maori*.

Candidates will be expected to show such a knowledge of the language and of its vocabulary and grammar as may be gained (1) by easy conversation in Maori about the facts of everyday life, (2) by the study of the story of Tawhaki in Sir George Grey's "Mythology and Traditions of the New Zealanders"; but candidates will not be expected to have read that particular story, nor will the passages for translation necessarily be taken from it. Great importance will be attached to translation from Maori, and to the writing of easy passages and sentences in Maori.

(21.) *Shorthand*.

Transcribing into shorthand, fully vocalized, a short printed passage as a test of accuracy and neatness of shorthand outline. Writing in shorthand an easy passage dictated at the rate of sixty words a minute, and transcribing it accurately into longhand.

(22.) *Book-keeping and Commercial Correspondence*.

The requirements will include commercial arithmetic and tots and easy précis-writing.

Book-keeping: The object and value of book-keeping. Double entry, its meaning and advantages. The form, nature, and classification of accounts; the balancing and closing of accounts. The explanation of simple commercial terms such as debit, credit, balance, profit (gross and net), interest, discount, commission, insurance, assets, liabilities, capital, bankruptcy, composition, bad debts, folio, trial balance, company (limited and unlimited), invoice, receipt, voucher, cheque, bill of exchange. A knowledge of the transactions involved and the special terms used in connection with cheques, promissory notes, and bills of exchange. The forms and uses of the cash-book, the purchase-book or invoice-book, the sales-book or day-book, the journal and the ledger, and methods of keeping them. Journalizing an easy set of transactions, posting the journal, taking out trial balance, preparing profit-and-loss account, and balance-sheet. The prevention, detection, and rectification of errors.

(23.) *Woodwork.*

Tools and timbers: The classification, description (illustrated by hand-sketches), proper uses, and correct handling of tools; care of tools; their hardening, grinding, and sharpening; the functions of their several parts; the mechanical principles underlying their construction and manipulation.

A very elementary knowledge of the geographical distribution, appearance, and general character (including structure of trunk and limbs) of trees from which the timbers in common use in New Zealand are obtained; the countries and ports from which New Zealand receives its supplies of foreign timbers; the forms in which timber is brought into the market; the growth, felling, conversion, seasoning, storage, and preservation of timber; measurement of timber; selection of timber for particular purposes; methods of working hard and soft woods; appearance, characteristic properties (including specific gravity), and defects of timbers. Candidates may be required to identify specimens of timbers in common use.

Bench-work: Measuring and setting out work; dressing a piece of timber truly; principles to be observed in designing joints and fastenings. Processes—sawing, planing, paring, grooving and trenching, slotting, gouging, cutting curves, shaping and filing, chamfering, finishing; fastening-devices—nails, screws, dowels, pins, cleats, keys, and wedges. Joints—the ordinary joints, including haunched mortise and tenon, bridle, mitre, common dove-tail. Use of glues.

The examination in woodwork shall consist of a written examination only, but, in addition, every candidate in the subject of woodwork shall be required to hand to the supervisor at the examination a piece of woodwork specified for the particular examination and designed by him, as a specimen of his work performed under ordinary workshop conditions, such specimen to be made during the three months immediately preceding the date of the examination, and to be accompanied by the freehand sketch or the finished drawing from which the piece of work was executed. With the specimen of work there must be sent a certificate signed by the class instructor and the Principal of the school that the work is the candidate's unaided effort, executed without the supervision or direction of the instructor.

(24.) *Metal-work.*

The use of scales, calipers, and micrometer and vernier calipers; measurement to ordinary tolerances in fitting and machine work. Simple workshop calculations, including questions involving elementary mensuration. The characteristics and properties of the commoner metals and alloys employed in metal-work, such as iron, steel, copper, brass, zinc, aluminium, &c.

The description, use, and care of setting out, measuring, and testing instruments and of hand tools. The setting-out of a simple piece of work from the drawing. Bench and forge work of a very simple character, drilling, hand riveting, soldering, and brazing.

The examination in metal-work shall consist of a written examination only, but, in addition, every candidate in the subject of metal-work shall be required to hand to the supervisor at the examination a piece of metal-work specified for the particular examination and designed by him, as a specimen of his work performed under ordinary workshop conditions, such specimen to be made during the three months immediately preceding the date of the examination, and to be accompanied by the freehand sketch or the finished drawing from which the piece of work was executed. With the specimen of work there must be sent a certificate signed by the class instructor and the director of the school that the work is the candidate's unaided effort, executed without the supervision or direction of the instructor.

(25.) *Dressmaking and Needlework.*

Selection: Choice and selection of clothes; comparison of cost and wearing-values of cotton, linen, silk, wool, and mixtures; suitable colours and appropriate style of clothes.

Patterns: Making of simple drafts from pupils' own measurements without reference to charts or other mechanical devices; use and adaptation of commercial patterns.

Making up: Making up of articles for personal and household use; the various stitches and processes used in dressmaking; the application of ornamental stitchery to garments and household articles.

Care: Care of clothes; removal of stains; pressing; mending and repairing garments, household linen and furnishings. Adaptation of adult garments for children's wear as required.

Practical Work.—Plan a complete wardrobe, illustrating the book with drawings or magazine illustrations, giving patterns of suitable material for each garment and estimating cost. The clothing budget should include everything worn by the girl, and be planned to cover a period of two years. The care and use of the machine. Drafting of patterns to actual measurements. Making up and repairing garments and household articles. At least five articles should be made and finished each year, of which one or two may be handwork; at least three repairs should be done.

Every candidate for examination in dressmaking and needlework shall be required to hand to the supervisor at the examination a specimen or specimens of work done within a period of three months preceding the date of examination, such specimen work to be accompanied by a certificate, signed by the class instructor and the Principal of the school, that the work is the candidate's unaided effort, executed without the supervision or direction of the instructor.

(26.) *Housecraft.*

House: Arrangements of house and position of equipment (especially with regard to kitchen, dining-room, and pantry); principles, construction, management of ranges, and of gas, electric, and oil stoves; hot-water services; how to set, light, and regulate fires; fuels and economy of fuels. Care and cleaning of stoves, kitchen sinks and traps; care and cleaning of floors, walls, windows, woodwork (plain, painted, and polished); the yard, including care and cleaning of drains, dustbins, and closets; appliances for cleansing purposes; cleaning and care of other things of the house. Arrangement of daily and weekly work.

Laundry: Choice and care of utensils and appliances. Sorting, steeping, washing, and finishing a household wash. Simple methods of disinfecting; removal of stains; treatment of fast and loose colours.

Foods: (a.) Preservation of foods for out of season use.

(b.) Planning, preparation, cooking, and serving of meals (including school lunches) for the different seasons of the year for a family consisting of adults and children. The meals should contain all the essentials of a normal diet for adults and children, and be chosen so that economical meals can be prepared, using different methods of cooking, without great expenditure of energy and time. The meals should be compared with respect to their values as sources of carbohydrates, fats, proteins, minerals, vitamins and roughage.

(c.) Modifications of diet suitable for invalids and convalescents.

Practical Work.—House: Planning the arrangements of two or more rooms in a house. Actual practice in cleaning and care of the house in illustration of the above.

Laundry: Practical work to illustrate the above as far as can be done in the school or under school-hostel conditions.

Foods: Preservation of foods; preparation and serving of meals, including practice of individual dishes as required.

(27.) *Trade Drawing.*

All candidates must take Part I, and either Part IIA or IIB.

I. Use and care of drawing-instruments, including scales, pencils, pens, compasses, dividers, protractors, set-squares, and T square. How to test the accuracy of drawing-instruments, and how to correct errors. Hand-sketching in plan, elevation, and section. Use of squared paper.

IIA. Engineering, &c.—Measuring simple machine parts, determining position of centre lines, and dimensioning sketches. Sketching simple machine parts from memory. Drawing centre-lines, and completing plans, elevations, and sections to scale in pencil from dimensioned sketches of simple machine parts. Tracing in ink, and dimensioning, &c. Conventional representation of screw-threads. Details of nuts, bolts, studs, rivets, cotters, keys, pins, and other fastening and locking devices.

II.B. Building, &c.—Hand-sketching in isometric projection. Proportions of the ordinary woodwork joints. Plans, elevations, and sections of simple building elements such as roof-joints, floor-construction, doors and door-frames, casement frames and sashes, cupboards, gates, &c. Details and proportions of simple mouldings, fastenings, &c.

Tracing in ink and dimensioning, &c.

Every candidate for examination in trade drawing shall be required to hand to the supervisor at the examination a specimen or specimens of work done in the drawing office within a period of three months preceding the date of examination, such specimen work to be accompanied by a certificate signed by the class instructor and the director of the school that the work is the candidate's unaided effort, executed without the supervision or direction of the instructor.

(28.) *Drawing.*

Any two of the following:—

I. Freehand Drawing.—Free drawing with pencil or brush. The candidate shall be required to draw on a quarter imperial sheet of paper (i) a natural object, or (ii) a fashioned or artificial object or group of such objects placed before him either above or below the line of sight. The object or objects are to be represented as seen from the point of view at which the candidate may be seated. The candidate may use the pencil or brush to estimate the apparent relative sizes of the objects or parts of the objects to be drawn, but only by holding it between the eye and the objects. No other form of measuring and no ruling or other mechanical means of execution are allowed. The drawing should express as clearly as possible the forms, contours, and textures of the several objects and their relative proportions and positions, and must fairly fill the sheet of drawing-paper.

II. Instrumental Drawing.—The candidate will be expected to be familiar with the geometrical operations and constructions set out in the prescription for geometry in subject (15). Mathematics: The measurement of straight lines and of angles. The construction of plain scales. Drawing to scale from dimensioned sketches. The method of enlarging and of reducing a given diagram. Plans and elevations of straight lines and of plane figures lying in, standing vertically on, or inclined to the horizontal plane (but not in the latter case inclined also to the vertical plane). Plans and elevations and conventional isometric views of the following solids and of simple objects based thereon: the cube, the rectangular block, the triangular and square prism, the square and the hexagonal pyramid, the solid or object, as the case may be, having its base in the horizontal plane.

III. Design.—The planning and design of simple pattern. Elementary principles governing leading lines, distribution of parts and masses, and general arrangement. Rhythm and balance. The study of natural forms and their adaptation to elementary design for crafts such as stencilling, leatherwork, needlework, wood-carving, plasterwork, &c.

Simple exercises in writing and illuminating. The Roman alphabet, uncials and half-uncials; use of the first-named in design.

Candidates may be required to draw or model natural forms, and to draw or model designs (based on the natural form drawn) to fill set spaces, or to be executed in given simple materials.

Every candidate in Drawing III (Design) will be required to hand to the supervisor a specimen of craft-work, together with working drawings, designed and executed within a period of three months preceding the date of examination, such specimen work to be accompanied by a certificate signed by the class instructor and the Principal of the school that the work is the candidate's own effort, executed without the supervision or direction of the instructor.

As witness my hand, this 11th day of October, 1926.

Redefining Boundaries of the Borough of Waihi and the Counties of Ohinemuri and Tauranga.

Department of Internal Affairs,
Wellington, 22nd October, 1926.

PURSUANT to the provisions of section 141 of the Municipal Corporations Act, 1920, the boundaries of the Borough of Waihi are hereby defined as set out in the First Schedule hereto, the boundaries of the said borough having been altered by Proclamation dated the 29th day of May, 1926, made under the Municipal Corporations Act, 1920, and published in *Gazette* No. 36, of the 4th day of June, 1926.

And also in pursuance of the provisions of the said section 141 of the Municipal Corporations Act, 1920, the boundaries of the Counties of Ohinemuri and Tauranga affected by the said Proclamation dated the 29th day of May, 1926, are hereby defined as set out under their respective headings in the Second Schedule hereto.

And also in pursuance of the provisions of the said section 141 of the Municipal Corporations Act, 1920, the boundaries of the ridings of Waihi and Katikati affected by the said Proclamation dated the 29th day of May, 1926, are hereby defined as set out under their respective headings in the Third Schedule hereto.

FIRST SCHEDULE.

BOUNDARIES OF BOROUGH OF WAIHI.

ALL that area in the Auckland Land District bounded towards the west generally by the Waitete Stream from its confluence with the Ohinemuri River to its intersection with the northern boundary of Section 29, Block XV, Ohinemuri Survey District; towards the north by a right line running due east to the north-western corner of Section 9, Block XV aforesaid; thence towards the west by a right line 4500 links in length, bearing $0^{\circ} 21'$; towards the north-east by a right line through Section 75 of the aforesaid Block XV to the south-western corner of a former reserve for water-conservation, about 810 links; towards the north generally by that reserve through Sections 75 and 91 of the aforesaid Block XV, across a road, through Section 17 of Block XI of the aforesaid survey district, to the eastern boundary of the said Section 17; towards the west by that boundary to its intersection with the northern boundary of Section 1, Block XI aforesaid; towards the north-west by a right line to the Waihi Gold-mining Company's Dam on Walmsley's Creek; towards the north generally by the said creek to its confluence with the Ohinemuri River; towards the east and south generally by that river to a point in line with the south-eastern boundary of Suburban Allotment 25; towards the south-east by a right line to the easternmost corner of that allotment; towards the north-east by the road forming the north-eastern boundary-lines of Suburban Allotment 24 and Sections 83, 89, 88, 87, 86, 110, and 131 of Block XVI of the said survey district to the Waihi Beach Road; thence towards the south-west and south by that road to Tauranga Road; towards the north-east by the south-western side of that road to the north-western boundary of Suburban Allotment 39; towards the south-east by that allotment and the production of its north-western boundary-line to the Waimata Stream; towards the west and south generally by that stream and the Ohinemuri River to the place of commencement.

Also all the above-mentioned Waihi Beach Road, extending from the aforesaid Tauranga Road to the sea passing through Blocks XVI, Ohinemuri, IV, Aroha, I, Katikati North, and III, Waihi North Survey Districts.

Also all that area of land being part of Waihi No. 2, Waihi No. 3, and part of Waihi No. 5 Blocks, as shown on certificate of title, Volume 386, folio 245, deposited in the office of the District Land Registrar at Auckland (Survey Office plan No. 20870).

SECOND SCHEDULE.

BOUNDARIES OF THE COUNTY OF OHINEMURI.

ALL that area in the Auckland Land District bounded towards the north-east by the sea from the mouth of the Otahu River to the north-eastern boundary of Part Waihi No. 2 Block; thence by the said north-eastern and north-western boundaries of the aforesaid block and the south-western boundaries of 3 and part 5 of the aforesaid Waihi Block (which said blocks are included in Waihi Borough—S.O. plan No. 20870), to a point in line with the mouth of the Waihi River and Te Aroha Mountain; thence by that line to Te Aroha Mountain; thence towards the south by a right line running due west to the eastern boundary of the Borough of Te Aroha; thence

by that borough to where it meets the Waihou River; thence towards the west in a northerly direction by the centre of the said river to the south-eastern corner of the Hauraki Plains County (as described in *Gazette*, 1923, page 823); thence by the eastern boundary of the said county to the confluence of the Waihou and Hikutaia Rivers; thence towards the north by the southern boundary of the County of Thames (as described in the Second Schedule to the Hauraki Plains, Thames, Ohinemuri, and Piako Counties Act, 1919) to the mouth of the Otahu River, the place of commencement; excluding the Boroughs of Waihi and Paeroa.

BOUNDARIES OF THE COUNTY OF TAURANGA.

Bounded towards the north-east generally by the ocean from the south-eastern corner of part of Waihi No. 5 Block (part of Waihi Borough) to a point on the coast north of Trig. Station J-1 (Otamarakau) in Block IV, Waihi South Survey District; thence towards the east by a line running due south through the aforesaid Trig. Station J-1 to a point due east of Trig. Station 1039, Otanewainuku; thence towards the south by a straight line running due west through the aforesaid Trig. Station 1039 to a point on a straight line joining Trig. Station 27, Puwhenua, and Trig. Station 146, Te Weraiti; thence towards the south-west by the aforesaid straight line to the aforesaid Trig. Station 146; thence towards the north-east by a straight line to Trig. Station 909, Wai-anuanu; towards the south-west by the north-eastern boundary of the Okauia No. 1 Block "A" portion; towards the north-west by Crown land; towards the south-west generally by lines drawn from hill to hill along the summit of the range forming the western boundary of the Tauranga Confiscated District to the Confiscation-line; towards the south-east by the aforesaid Confiscation-line to Trig. 567, Te Aroha; thence towards the north-west by the Ohinemuri County to the Waihi Beach Road, across that road, and again by the Ohinemuri County to the western boundary of the aforesaid part of Waihi No. 5 Block (part of Waihi Borough); thence towards the east by the western boundary of the aforesaid part of Waihi No. 5 Block; across a public road (the Waihi Beach Road aforesaid), and towards the north by the southern boundary of the aforesaid part of Waihi No. 5 Block to the south-eastern corner, the place of commencement: save and excepting the Borough of Tauranga, the Town District of Te Puke, and that portion of the Waihi Beach Road (part of Borough of Waihi) which lies within the above-described boundaries.

THIRD SCHEDULE.

BOUNDARIES OF THE RIDING OF WAIHI.

NEW ZEALAND.—NORTH ISLAND.—NORTHERN COAST.—FIRTH OF THAMES.

Marine Department,
Wellington, N.Z., 22nd October, 1926.

River Thames or Waiho (Waihou) River.—Kirikiri Bridge under Construction.

INFORMATION is hereby given that at a position about 530 ft. above Kopu Wharf a road-traffic bridge across Waihou River is under construction.

During the construction two fixed red lights, horizontally disposed, will be exhibited between sunset and sunrise, one each on the outermost down-stream and the outermost up-stream edge of the work.

All vessels must pass westward of the two red lights.

Attention is drawn to the provisions of Regulation No. 34 of Schedule A, "General Harbour Regulations," which require that—

"Steamships about to pass any dredging-machine at work in any harbour, or any licensed ferry, or public work in progress, must slow their engines at such a distance before approaching any such dredge, ferry, or work to ensure their passing it at a speed not greater than dead-slow."

CROWN LANDS NOTICE.*Timber in Hawke's Bay Land District for Sale by Public Auction.*

District Lands and Survey Office,
Napier, 27th October, 1926.

NOTICE is hereby given that the undermentioned milling-timber will be offered for sale by public auction at the District Lands and Survey Office, Napier, at 11 o'clock a.m. on Wednesday, 15th December, 1926, under the provisions of the Land Act, 1924, and the Timber Regulations thereunder.

SCHEDULE.**HAWKE'S BAY LAND DISTRICT.—HAWKE'S BAY COUNTY.**

SECTION 1, Block VI, and Section 3, Block VII, Maungaharuru Survey District:—

Rimu	2,969,500 superficial feet.
Matai	1,720,600 ..
Rewarewa	82,500 ..
Kahikatea	170,400 ..
Total	4,943,000 ..

Upset price: £12,000.

Time for removal: Six years.

Terms of Payment.

A deposit of 5 per cent. to be paid in cash on the fall of the hammer, together with £1 ls. license fee; balance in half-yearly instalments payable 1st January and July, over period of six years, first payment falling due on 1st January, 1927.

All instalment payments shall bear interest at the rate of 5 per cent. per annum as from the date of auction, and, with interest added, shall be secured by "On demand" promissory notes endorsed by two approved sureties; and such bills are to be completed and lodged with the Commissioner of Crown Lands within fourteen days after the purchaser has been notified to complete.

Conditions of Sale.

1. Intending purchasers are expected to visit the locality and satisfy themselves in every particular on all matters relating to the sale.

2. The right is reserved to the Commissioner of Crown Lands to withdraw this timber from sale before the date fixed for sale.

3. The aforementioned quantities, qualities, and kinds as to the said timber shall be taken as sufficiently accurate for the purpose of this sale, and no contract for purchase shall be voidable, nor shall the successful purchaser be entitled to any abatement in price, by reason of the said timber being of less quantity, quality, and kind than as stated herein or in any advertisement having reference to the said timber, nor shall any extra sum be claimed by the Crown if the said quantity of timber is found to be in excess of that stated herein.

4. The license shall be subject to any right of tramway already granted or that may hereafter be granted over the lands comprised therein, and the Land Board may authorize the laying-down and working of tram-lines through the lot by other persons than the licensee.

5. The lots will be sold generally in accordance with the areas and boundaries as shown on a map at the District Lands and Survey Office, Napier.

6. No compensation will be given, nor shall any be claimed, for any error, discrepancy, or misdescription whatever in respect of these lots, or the timber thereon, or in these conditions.

7. Should any dispute arise as to the boundaries the decision of the Commissioner of Crown Lands shall be final.

8. In the event of no bids being received for this timber, applications may be received and dealt with at any time thereafter (unless previously formally withdrawn), providing, however, that the amount offered is not less than the upset price stated herein.

9. If the purchaser is unable to cut the whole of the timber within the term specified owing to causes beyond his control, the license may be extended for a further term of two years, subject to clause 88 of the Forest Regulations.

10. The purchaser shall have the right to cut the timber for the period specified, but shall have no right to the use of the land.

11. The timber shall be cut in a face, and the Crown reserves the right to follow up the mill-workings by felling and grassing such areas as from time to time become available, and of disposing of the same.

12. The licensee shall not allow any sawdust to find its way into any watercourse of any description.

13. The totara-trees on the block, estimated to contain 37,550 ft. of defective timber, suitable for fencing-posts and house-blocks, must not be felled, and is to be left for the use of future lessees.

14. The attention of intending purchasers is directed particularly to clauses 9, 18, 22, 27, and 58 of the Forest Regulations under the Land Act, 1908, dated 31st March, 1908.

The promissory notes will be presented at intervals as indicated in terms of payment, but they may be presented for payment at earlier dates if more than a due proportion of the timber is found to be cut, or should any breach of the conditions occur, or if in the opinion of the Commissioner the interest of the Crown is jeopardized.

Sale plans and full particulars may be obtained from this office.

J. D. THOMSON,
Commissioner of Crown Lands.

WAITEMATA COUNTY COUNCIL.

RESOLUTION MAKING SPECIAL RATE.

IN pursuance and exercise of the powers vested in it by the Local Bodies' Loans Act, 1913, and its amendments, and the Public Works Act, 1908, and its amendments, and by virtue of a Warrant dated the 21st day of June, 1926, issued under the hand of His Excellency the Governor-General, in terms of section 119 of the Public Works Act, 1908, the Waitemata County Council doth hereby, by special order, resolve to borrow the sum of £5,100 for the purpose of providing the Waitemata County Council's share of the cost of constructing a bridge over the Wairau Estuary at the Inga Road site, for a period of 36½ years at a rate of interest not exceeding 5½ per centum per annum, together with a sinking fund of at least 1 per centum per annum, and declares that the cost of the raising of the loan, but not the first year's interest on the said loan shall be payable out of the moneys so raised. And that for the purpose of providing interest and sinking fund and other charges on the said loan of £5,100 the Waitemata County Council hereby makes and levies a special rate of one farthing in the pound upon the rateable value of all rateable property in the Takapuna Riding of the County of Waitemata, and

that such special rate shall be an annually recurring rate during the currency of the said loan, and be payable half-yearly on the 1st day of June and the 1st day of December in each and every year during the currency of such loan, being a period of 36½ years, or until the loan is fully paid off.

PRESS OPINIONS.

The Hon. G. M. Thomson in writing this manual has evidently taken up a labour of love. He writes not so much for the scientific as for the general reader. It is a valuable and likely to be one of the most popular works issued by the Board of Science and Art. It is a notable addition to Mr. Thomson's other works.—*Evening Post*, Wellington, N.Z.

A bright little book. Mr. Thomson has provided a book sufficiently scientific to be authoritative, and yet informal and simple enough to be interesting to the young and uneducated. We shall look forward eagerly to Part II.—*Herald*, Timaru, N.Z.

It is a book of unusual interest. There is nothing like it in print, and the wonder is that it has not been done before. Mr. Thomson is to be thanked for producing a work so useful and so timely. Technical terms and scientific language have been avoided as far as possible, with the result that we have a narrative as interesting as any romance. It will prove a valuable and useful book.—*Evening Star*, Dunedin, N.Z.
