Bonus for a Commercially Practicable Method or Process of effecting Major Improvements in connection with the Preparation and Manufacture of New Zealand Hemp.—(Notice No. Ag. 2881.)

Department of Agriculture,
Wellington, 8th February, 1930.

SUBJECT to the conditions hereinafter appearing, the New Zealand Government hereby offers to pay £10,000 as a bonus or bonuses for major improvements in connection with the extraction and dressing of fibre from the New Zealand hemp plant (*Phormium tenax*):—

(1) The machine or process in regard to which the whole or any part of the bonus is to be paid shall be recommended by a committee set up by the Government, and shall be approved by the Government.

(2) The £10,000 will be paid wholly or in part for a commercially practicable process of extracting and dressing the fibre of New Zealand hemp (*Phormium tenax*), whether by machinery or otherwise, whereby there shall be obtainable—

- A greatly improved quality of fibre marketable at a higher price.
- A considerably greater quantity of strong white fibre per ton of green leaf.
- A substantial reduction in the cost of producing the fibre.

Provided that in determining the amount of the bonus to be paid for any such process due regard shall be had to the rate of any royalty required to be paid by millers for the use of such process, and no bonus whatever will be paid—

- Unless it can be satisfactorily demonstrated that the improved process submitted in comparison with the best of present methods will enable the net returns from an efficient flax-mill to be increased by at least 15 per cent.; or
- If the amount of any such royalty will absorb the whole or substantially the whole of the increased net return above referred to.

(3) Any applicant for the bonus or part of the bonus must have fulfilled the following conditions at the time of application:—

- The machine or process in question must have extracted the fibre from not less than 500 tons of green leaf.
- The fibre extracted from the 500 tons of green leaf must have been graded by a Government Grader, and not less than 90 per cent. of such fibre must have reached a grade not lower than "good fair."

(4) Applications for the bonus must be addressed to the Director-General, Department of Agriculture, Wellington, and must reach him not later than noon of the 30th November, 1931. They must be enclosed in an envelope clearly marked "Application for *Phormium* bonus."

(5) Each applicant shall state what royalty, if any, would require to be paid by millers for the use of his process during the currency of his patent rights.

(6) As soon as possible after the expiry of the time for receiving applications for the bonus (30th November, 1931), the Government will appoint a committee of not less than five—of whom two shall be New Zealand hemp millers—to open and examine the applications, to investigate such of the competing machines or processes as it considers worthy of trial, and to make recommendations to the Government as to the payment of the bonus, having regard to the amount of royalty, if any, specified in such applications.

(7) Each applicant must give, at his own expense, such reasonable demonstrations of the working of his machine or process as shall be demanded by the said committee, and such demonstrations shall take place in New Zealand.

The Census and Statistics Act, 1926.—Agricultural and Pastoral Statistics.

Census and Statistics Office,
Wellington, 11th February, 1930.

THE following estimated average yields per acre of wheat, oats, and barley for the season 1929-30 have been compiled from reports furnished by Stock Inspectors of the Department of Agriculture throughout the Dominion, and are now published for general information.

District.	Wheat. Bushels per Acre.	Oats. Bushels per Acre.	Barley. Bushels per Acre.
North Island ..	34-03	39-47	38-39
Nelson ..	24-00	30-00	35-00
Marlborough ..	30-72	35-00	34-91
Canterbury ..	30-40	38-61	31-54
Otago ..	30-89	38-26	36-26
Southland ..	36-61	45-50	41-17
Average (estimated) for the Dominion, season 1929-30 ..	30-56	39-71	33-89
Average (actual) for the Dominion, season 1928-29 ..	34-60	41-93	40-06

In accordance with the above estimates, the total yield of wheat for the Dominion should be approximately 7,100,000 bushels, as against an actual yield of 8,832,864 bushels for the season 1928-29.

The percentage of oats threshed for the five seasons ending with 1928-29 was 28-87 of the total area under that crop. Assuming that a similar proportion is threshed this year,

the total yield of grain should be approximately 3,150,000 bushels, as against an actual yield of 3,065,113 bushels for the season 1928-29.

The percentage of barley threshed for the five seasons ending with 1928-29 was 98-23 of the total area under that crop. Assuming that a similar proportion is threshed this year, the total yield of grain should be approximately 680,000 bushels, as against an actual yield of 781,102 bushels for the season 1928-29.

BOARD OF TRADE.—NOTICES TO MARINERS FOR FOREIGN-GOING SHIPS.—MONTHLY SUMMARY.

London, 1st January, 1930.

Distress Signals.

The experience of the Board of Trade shows that two of the existing statutory distress signals, viz.: "a continuous sounding with any fog-signal apparatus" and "flames on the vessel" are not only liable to abuse, but when used as distress signals have often given rise to misunderstanding. A succession of signals on the whistle or siren is frequently made for other purposes than of indicating distress, e.g., for summoning a pilot, and may be mistaken for a "continuous sounding." Similarly, working lights and "flare up" lights are authorized for use by fishing vessels and other small craft, and the simplest way of making a "flare up" light is to dip a rag in paraffin and set it alight. Unfortunately, small vessels in distress frequently make the signal "flames on the vessel" in the same manner. Thus it is often impossible to decide whether "flare up" lights are being shown or whether distress signals are being made, especially in areas where fishing is carried on. As a result uncertainty and delay have occurred and lives have been lost in consequence.

Distress signals should be as distinctive as possible, so that they may be recognized at once and assistance despatched

without delay. Thus, instead of making an indefinite succession of blasts on the fog signalling apparatus when in distress, mariners should make the "continuous sounding" by repeating the Morse signal SOS (· · — — — · · ·) on the whistle or fog-horn. If this is done there can be no mistake as to the meaning of the signal. Similarly, by night, if signalling for help by means of a lamp or flashing light the same signal SOS should always be used.

As regards the "flames on the vessel" signal, unless the flames making the signal are sufficiently large to attract immediate attention their chances of being recognized as a distress signal are very poor. The best distress signal is the signal rocket, and wherever possible a supply of rockets should be carried. Where this is not practicable an effective firework signal, which can be held in the hand while being discharged, should be provided in place of the rockets; such a signal should show a brilliant red flare and throw five or more red stars to a height of 80 feet. Failing either of these two signals a supply of ordinary red flares should always be carried. These red flares are now recognized by general custom as distress signals and, though not so effective as either rockets or the hand firework, are much more distinctive than the burning of rags, articles of clothing, &c., soaked in paraffin which should be used only as a last resource. Use should not be made of these red flares in any circumstances for any other purpose than that of indicating distress.—18th November, 1929 (36/2060.)

In the event of his failure to do so, the Board may forfeit the deposit paid by him and again offer the land at the upset rental, freed from any obligations to the defaulting lessee.

6. The Board reserves the right to withdraw any section or lot at any time prior to the time for receiving the tenders.

In addition, the successful tenderer shall continue to pay such ground rent half-yearly in advance during the currency of the license.

Terms of Sale.

1. All instalment-payments shall be secured by "on demand" promissory notes made and endorsed to the satisfaction of the Commissioner of State Forests, and interest at the rate of 1 per cent. per annum in excess of current bank overdraft rates will be charged on all notes overdue from the date of maturity to the date of payment.

4. The above-mentioned quantities, qualities, and kinds as to the said timber shall be taken as sufficiently accurate for the purposes of this sale, and no contract for the purchase shall be voidable, nor shall the successful purchaser be entitled to any abatement in price by reason of the said timber being of less quantity, quality, or kind than as stated herein, or in any advertisement having reference to the said timber.

5. A return, verified by affidavit, giving the number of logs out of each species and their contents must be made quarterly by the licensee on the last days of March, June, September, and December, respectively, in each year. A return, similarly verified, must be made on the same dates showing the output of sawn timber of each species. These returns may be ascertained and verified by the inspection of the books of the mill, or by such other means as the Conservator may require, and for this purpose the accounts and books shall be open to the inspection of the Conservator, a Forest Ranger, or other duly authorized officer.

6. Intending tenderers are expected to visit the locality and to satisfy themselves in every particular on all matters relative to the sale.

7. Each tenderer must state the total price that he is prepared to pay for each species. The highest or any tender will not necessarily be accepted, and the timber described is submitted for sale subject to the final acceptance of the tender by the Commissioner of State Forests.
