NOMINAL CAPACITY OF BUILDINGS.

10. The nominal capacity of a building shall be ascertained according to the nature and use of the occupancy thereof in manner following:—

- (a) Except as provided in the subsequent paragraphs hereof, the nominal capacity shall be a number of units equal to the largest number of persons likely, in the opinion of the Superintendent, to be present in the building at any one time;

- (e) In the case of every building, being an institution used for sick or infirm persons or children, and every building which by reason of the construction or situation thereof or the nature of the use or occupancy thereof is, in the opinion of the Superintendent, liable to unusual damage from fire or unusually exposed to risk of fire, or liable to subject its inmates to unusual risk in the event of fire, the nominal capacity shall be one and a half times the number of units ascertained under all the preceding paragraphs of this clause (so far as applicable):

Provided that in no case shall any account be taken of persons present or likely to be present only in the ground-floor of the building or any part thereof below the ground-floor:

Provided also that whenever a structural alteration or addition to a building is made, or whenever, in the opinion of the Superintendent, a change in the nature of the use or occupancy of a building has occurred or is likely to occur, or whenever there has been an erection, alteration, or change of use of any building in the vicinity of a building, or whenever any matter has occurred by reason of which the inmates of a building are, in the opinion of the Superintendent, exposed to increased risk of danger from fire, the Superintendent may make a fresh computation of the nominal capacity of such building.

NOMINAL CAPACITY OF PARTS OF BUILDINGS.

11. The nominal capacity of any storey or other part of a building required to be ascertained separately shall be ascertained in the like manner as aforesaid, *mutatis mutandis*.

PART II.—OWNER TO PROVIDE FIRE-ESCAPES.

NEW BUILDINGS.

12. The owner of every building hereafter erected shall, before such building is occupied by any person, provide in connection therewith the fire-escapes hereby declared to be necessary for such building.

EXISTING BUILDINGS.

13. The owner of every building heretofore erected shall, within a reasonable time after being required by the Superintendent by notice in writing so to do, provide in connection therewith the fire-escapes hereby declared to be necessary for such building.

BUILDINGS SUBJECT TO BY-LAW BY CHANGE OF USE.

14. When the nature of the use or occupation of any building, whether heretofore or hereafter erected, to which this by-law does not apply, is changed so that this by-law applies thereto the owner of such building shall, within a reasonable time after being required by the Superintendent by notice in writing so to do, provide in connection therewith the fire-escapes hereby declared to be necessary for such building.

BUILDINGS SUBJECT TO BY-LAW BY STRUCTURAL ALTERATION.

15. When structural additions or alterations are made to any building, whether heretofore or hereafter erected, to which this by-law does not apply so that this by-law applies thereto, the owner of such building shall forthwith (and without the necessity of any notice) provide in connection therewith the fire-escapes hereby declared to be necessary for such building.

FRESH COMPUTATION OF NOMINAL CAPACITY.

16. When a fresh computation of the nominal capacity of any building has been made as hereinbefore provided, the owner of such building shall, within a reasonable time after being required by the Superintendent by notice in writing so to do, provide in connection therewith the fire-escapes hereby declared to be necessary for such building according to such fresh computation.

PART III.—FIRE-ESCAPES DECLARED TO BE NECESSARY.

NUMBER OF FIRE-ESCAPES PER BUILDING.

17. It shall be necessary for every building to be provided with a separate and sufficient fire-escape not connecting with any other fire-escape for every one hundred units or part of one hundred units of the nominal capacity of the building; and, where the nominal capacity of any storey of a building exceeds one hundred units, it shall be necessary for such storey to be provided with a separate and sufficient fire-escape not connecting with any other fire-escape for every complete one hundred units of the nominal capacity of that storey.

ALTERNATIVE ESCAPES.

18. In every case where the nominal capacity of any building or part of a building entails the provision of more than one fire-escape, the number of fire-escapes provided shall be such that each fire-escape is sufficient for a nominal capacity of at least one-third more than a nominal capacity, ascertained by dividing the total nominal capacity of such building or part of a building by the number of fire-escapes provided:

Provided that for the purposes of this and the last preceding clause hereof any fire-escape of greater width at every exit than the minimum width prescribed by clause 38 hereof shall be deemed sufficient for an additional twenty-five units of nominal capacity for every complete 2 ft. of width additional to the said minimum.

NUMBER OF EXITS PER STOREY.

19. It shall be necessary for every storey of a building to be provided with a separate exit to a fire-escape for every fifty units or part of fifty units of the nominal capacity of that storey.

DISTANCE TO EXIT.

20. It shall be necessary for every room in a building (exclusive of bath-rooms, lavatories, and other rooms of a like nature) to have access to a sufficient fire-escape access to which is obtained either directly or by means of a level unimpeded passageway of a length measured along the course thereof of not more than 100 ft. from the door or nearest door of such room to the exit:

Provided that in the case of a building so constructed that the distance in a straight line from the door of any room to the nearest exterior wall of the building having space beside it for a fire-escape is a distance of more than 100 ft., then in respect of such room such distance shall be deemed to be substituted for the length of 100 ft. hereinbefore prescribed.

FIRE-ESCAPES TO COMPLY WITH BY-LAW.

21. No fire-escape shall be deemed sufficient for the purposes of this by-law unless it conforms in all respects with the requirements relating to fire-escapes hereinafter contained,

and unless the exits thereto conform in all respects with the requirements relating to exits hereinafter contained, and unless it is at all times maintained in good, sound, and substantial order and condition, and unless all moving parts thereof and of all exits thereto are at all times maintained in free working condition.

CLEARANCE OF FIRE-ESCAPES.

22. No fire-escapes shall be deemed sufficient for the purposes of this by-law if—

- (a) At any time any part thereof is occupied by any goods or other movable article:
- (b) The space to a height of 6 ft. above any part of the footway is at any time occupied by any object so as to reduce the width of the space vertically above the footway of the fire-escape below the minimum width of 30 in. prescribed by clause 38 hereof.

APPROVAL OF PLANS.

23. Any person proposing to provide a fire-escape for any building, whether in pursuance of any requirement under this by-law or otherwise, may submit to the Superintendent particulars of plans and specifications of such fire-escape and the exits thereto, and of such building, and of the actual or intended nominal capacity thereof, and if the Superintendent considers such particulars sufficient to enable him to do so he may, by notice in writing, approve the same, and a fire-escape with exits thereto, both constructed in accordance with such plans and specifications shall, if such construction has been commenced within three calendar months of the date of such approval, be deemed (so far only as regards matters appertaining to the design and construction thereof) to be sufficient for the purposes of this by-law.

UNIMPEDED PASSAGE-WAYS.

24. No passage shall be deemed an unimpeded passageway for the purposes of this by-law unless it complies with all the following requirements:—

- (a) It lies for the whole of its course on one floor of the building:
- (b) It is of a height at its lowest part of at least 8 ft. and a width at its narrowest part of at least 3 ft.:
- (c) It is separated by a substantial partition from any staircase, lift-well, or other opening extending through any floor of the building:
- (d) It is not at any time occupied by any furniture, curtain, or other movable object placed so as to reduce the height and width of the passage-way below the aforesaid minimum measurements:
- (e) It is provided with a notice of the words "TO FIRE-ESCAPE" and a mark of direction, both permanently marked on or affixed to a wall thereof in a conspicuous position and in conspicuous lettering at least 6 in. high at every place where two or more passages meet or the passage-way changes its direction:

Provided that the requirements set out in paragraph (e) hereof shall not apply to a passage in any part of a building which part is occupied solely as a private dwelling or solely as an office, warehouse, or counting-house in which not more than ten persons are regularly engaged.

PART IV.—EXITS.

SIZE OF EXITS.

25. The exit of every fire-escape shall be a window, door, or other opening in the exterior wall of the building of such a size that when opened it shall not in any part be less than 3 ft. wide nor less than 6 ft. high, exclusive of any projections or fittings connected therewith:

Provided that in case of an exit serving only for one room having not more than five hundred square feet of floor space it shall be sufficient if the exit, when opened, has a rectangular space of at least six square feet and a width unobstructed by projections or fittings of at least 30 in.

LEVEL OF EXITS.

26. The sill or lower part of the exit shall be horizontal, and shall be not more than 6 in. above the footway of the fire-escape and shall, if the nominal capacity of the part of the building served by the exit exceeds one hundred units, be flush with the floor of the storey, and shall in other cases be not more than 30 in. above the floor of the storey, and if more than 12 in. above such floor, then it shall be provided with an interior step having a raiser of half the distance from the floor to the exit and a tread of at least 7 in.:

Provided that in case of an exit serving only for one room having not more than five hundred square feet of floor-space no step shall be required, and the sill of the exit may be not more than 24 in. above the floor of the room.

DOORS OF EXITS.

27. An exit shall not be closed otherwise than by a door or doors or glass window pane or panes or other material complying with all the following requirements—

- (a) They shall be arranged so as to open either by swinging outwards on vertical hinges or by sliding laterally;
- (b) If opening outwards, they shall be of such a size as not to extend at any stage of opening over more than half the width of the footway of the fire-escape, and be capable of folding back flat against the exterior wall of the building;
- (c) They shall at all times be kept capable of being easily opened without the aid of a key or other detachable contrivance;
- (d) They shall bear on the interior thereof if of opaque material or in a conspicuous position adjacent thereto if of transparent material the words "Fire Escape" permanently marked in conspicuous lettering at least 6 in. high;
- (e) They shall not have any curtain, blind, screen, or other obstruction on or near to the interior side thereof;

Provided always that the requirements set out in paragraph (e) hereof shall not apply to an exit that serves only one room having a floor-space not exceeding five hundred square feet, and that the requirements set out in paragraphs (a), (d), and (e) hereof shall not apply to an exit serving only a part of a building, which part is occupied solely as a private dwelling or solely as an office, warehouse, or counting-house in which not more than ten persons are regularly engaged.

28. If in the case of an exit from a part of a building which part is occupied solely as a private dwelling or solely as an office, warehouse, or counting-house in which not more than ten persons are regularly engaged, such exit is closed by a hung window, then both sashes of such window shall be of equal size, and the window shall be capable of opening to the full extent of the space occupied by the lower sash when closed.

PART V.—CONSTRUCTION AND MAINTENANCE OF FIRE-ESCAPES.

STRENGTH.

29. Every part of a fire-escape shall be substantially built so as to be capable, in the opinion of the Superintendent, of supporting a number of persons equal to the units of the nominal capacity for which it is required, and so as to be capable of supporting on every part of the footway a live load of 150 lb. per square foot.

UPPER TERMINATION.

30. The top of every fire-escape shall end at a landing giving convenient access to the roof of the building which it serves, or of some adjacent building, except in cases where, in the opinion of the Superintendent, such access would result in danger.

LOWER TERMINATION.

31. The foot of every fire-escape shall end outside the building in either—

- (a) A public or private road or street; or
- (b) An unimpeded space open to the sky of at least five hundred square feet and measuring at least 8 ft. across in any distance, and having access to a public or private road or street; or
- (c) An unimpeded space open to the sky of at least sixty-four square feet and measuring at least 8 ft. across in any direction, and contiguous to and having direct communication through at least one gate or door with a public or private road or street.

HEIGHT OF TERMINAL ABOVE GROUND.

32. The lower landing of every fire-escape shall be not more than 15 ft. above the ground-level.

LADDER TO GROUND.

33. Where the lower end of any fire-escape is more than 6 ft. above the ground it shall be connected with the ground by means of a telescopic sliding ladder, cantilever ladder, counter-balance stairs, or other efficient contrivance other than a hinged drop-ladder or a folding ladder, and such ladder or stairs shall, as regards width and general construction, comply with all the requirements of this by-law relating to fire-escapes so far as applicable.

PART VI.—FOOTWAY OF FIRE-ESCAPES.

LANDINGS AT EXITS.

34. The footway of the fire-escape in front of every part of any exit shall be in the form of a horizontal landing or platform, or have a pitch of not more than one in ten.

FOOTWAYS NOT TO CROSS WINDOWS.

35. The footway of any fire-escape shall not pass across the front of any window or other opening in the exterior wall of the building which it serves, nor be less than 2 ft. 6 in. below the lowest point or 1 ft. above the highest point of any such window or other opening:

Provided that this stipulation shall not relate to any window or other opening which is intended to be an exit to such fire-escape, or which is normally kept closed by means of iron shutters, wire-glass set in metal frames, or other approved fire-resisting material:

Provided also that the requirements of this clause shall not apply to a fire-escape the footway of which is connected with lower terminations at each side of the window or other opening or series of windows or other openings across the front of which it passes.

CONSTRUCTION OF FOOTWAY.

36. The footway of every fire-escape shall be constructed as a stairway or a runway or a combination of both.

MATERIAL OF FOOTWAY.

37. The footway of every fire-escape shall be of good iron or other substantial material and shall be continuous, save that if made of wooden strips a space of not more than three-quarters of an inch may be allowed between strips, and if made of bars of iron set transversely a space of not more than three-quarters of an inch may be left between bars.

WIDTH OF FOOTWAY.

38. The footway of any fire-escape shall—

- (a) Not be less than 30 in. wide;
- (b) Not be diminished in width between any exit and the end of the fire-escape nearest the ground;
- (c) Not be wider at any exit than at any other part thereof between such exit and either end of the fire-escape.

DESIGN OF STAIRWAY.

39. (a) No stairway shall have a pitch of more than one in three-quarters or less than one in one-and-three-quarters.

(b) The tread of any step of a stairway shall be not less than 9 in., measured as provided by clause 5 of this by-law.

(c) The riser of any step of a stairway shall be not more than 9 in. and not less than 7 in.

(d) In any fire-escape the tread and the height of the riser shall respectively be the same for every step thereof.

PITCH OF FIRE-ESCAPE.

40. No part of a fire-escape shall have a pitch of between one in two-and-a-half and one in one-and-three-quarters.

SLOPING FOOTWAYS.

41. No footway shall have a pitch of more than one in two-and-a-half.

42. All footways with a pitch of more than one in twelve shall have the footway covered with either—

- (a) Transverse battens of wood or similar material of rectangular section stretching the full width of the footway each of a breadth of not less than 1 in. nor more than 3 in. with spaces between of not less than 4 in. nor more than 7 in., and extending above the footway a height of not less than $\frac{1}{2}$ in. nor more than $1\frac{1}{2}$ in.; or
- (b) An approved non-slipping tread in an approved manner.

LANDINGS TO BE PROVIDED.

43. Every portion of a fire-escape, whether built as a runway or stairway, having a pitch of more than one in five-and-a-half shall be provided with horizontal landings or platforms at convenient intervals, and the space between landings or between a landing and the end of the fire-escape shall not, if in stairway form, contain more than fifteen steps, and shall in no case exceed a length equal to 15 ft. measured on a horizontal projection.

DESIGN OF LANDINGS.

44. Every horizontal landing or platform shall be of the full width of the footway and of a length at least equal to that width.

BENDS.

45. Whenever the direction of a stairway changes in plan a horizontal landing or platform shall be provided, and no stairway shall be constructed with winders.

PART VII.—HANDRAILS.

HANDRAILS TO BE PROVIDED.

46. Every fire-escape having a side or sides not placed against a building shall have such side or sides provided with a substantial handrail at a height above the footway (measured in the case of a stairway from the front edge of each step) of not less than 33 in. nor more than 38 in.

HANDRAILS TO BE SMOOTH.

47. Such handrails shall have a continuously smooth surface:

Provided always that an iron handrail may be attached to its supports by tee-pieces projecting not more than 3/16ths of an inch from the surface of the handrail.

GOOSENECK FINISH.

49. At the landing forming the upper termination of a fire-escape every handrail shall be shaped substantially in the form of a gooseneck.

PART VIII.—DISCRETIONS AND APPEALS.

DISPENSING POWER.

50. If in the opinion of the Superintendent safeguards other than fire-escapes are provided for prevention of danger from fire or for facilitating the escape of persons in case of fire in connection with any building then, according to the extent to which such safeguards are in the opinion of the Superintendent adequate for the purposes aforesaid, the Superintendent may, by notice in writing to the owner, waive compliance with any requirement of this by-law in respect of such building, either wholly or in part or for a limited time, and subject to such conditions as in any particular case he may think fit:

Provided that no such waiver shall restrict the right of the Superintendent at any time thereafter, upon giving notice in writing to the owner of his intention so to do, to exact full compliance with any requirement so waived:

Provided also that the powers hereby conferred shall not be exercised so as to permit any of the following matters:—

- (a) The provision at an access of a door or window arranged so as to open vertically contrary to clause 27 hereof or otherwise than by swinging outwards or sliding laterally (except where permitted under the provisions to the said clause 27).
- (b) The substitution of a fire-escape in the form of a ladder with rungs in any case where this by-law requires a fire-escape to be provided in the form of a stairway.
- (c) The use for the purposes of a fire-escape or any part thereof of rope or any other perishable material.

BOARD MAY ASSUME POWERS OF SUPERINTENDENT.

51. Where by this by-law power is given to the Superintendent to decide any matter, exercise any discretion or power, waive any requirements, or approve anything, the Board may of its own motion, and either before or after the Superintendent has taken action thereon, take such matter into its own consideration, and the opinion or discretion of the Board shall be substituted for that of the Superintendent, and the action of the Board shall be substituted for any action theretofore taken by the Superintendent.

OWNER'S RIGHT OF APPEAL.

52. Where by this by-law power is given to the Superintendent to decide any matter, exercise any discretion or power, waive any requirements, or approve anything, and action has been taken accordingly by the Superintendent, or by the Board in place of the Superintendent, any person affected thereby may, by notice in writing addressed to the Board or the Secretary and delivered at the office of the Board, apply to the Board to reconsider such action, and the Board shall thereupon take the matter into its consideration, and after the person affected has been afforded a reasonable opportunity of submitting to the Board any relevant matters of fact or opinion and any evidence thereon, the Board may either confirm, modify, reverse, or otherwise deal with the action previously taken.

PART IX.—OFFENCES AND PENALTIES.

OFFENCES.

53. Every person who does or omits, or causes, or knowingly permits or suffers to be done or omitted, any act, matter, or thing contrary to the provisions hereof, or fails to comply

with any requirement hereby imposed on such person, shall be deemed to have committed a breach of this by-law, and if such act or omission or failure occurs on more than one day such person shall be deemed to have committed a separate breach of this by-law on every day on which such act or omission or failure has occurred.

PENALTIES.

Department of Internal Affairs,
Wellington, 17th July, 1930.

THE following revised regulations respecting foreign orders and medals are published for general information.

P. A. DE LA PERRELLE,
Minister of Internal Affairs.

**REGULATIONS RESPECTING FOREIGN ORDERS AND MEDALS
APPLICABLE TO PERSONS IN THE SERVICE OF THE CROWN.**

Orders.

1. No person in the service of the Crown shall accept or wear the insignia of any foreign order without having previously obtained His Majesty's permission to do so, signified either—

- (a) By Warrant under the Royal Sign-manual; or
- (b) By restricted permission conveyed through the Keeper of His Majesty's Privy Purse.

2. When permission is given by Warrant under the Royal Sign-manual, the insignia of the foreign order may be worn at all times and without any restriction.

When restricted permission is given the insignia may only be worn on the occasions specified in the terms of the letter from the Keeper of His Majesty's Privy Purse conveying the Royal sanction.

3. Full and unrestricted permission by Warrant under the Royal Sign-manual is contemplated in the following cases:—
For a decoration conferred—

- (a) For distinguished services in the saving of life.
- (b) On an officer in His Majesty's Naval, Military, or Air Forces lent to a foreign Government; on an officer in His Majesty's Naval, Military, or Air Forces attached by His Majesty's Government to a foreign navy, army, or air force during hostilities; or on any British official lent to a foreign Government and not in receipt of any emoluments from British public funds during the period of such loan.

4. Restricted permission is particularly contemplated for decorations which have been conferred in recognition of personal attention to a foreign Sovereign, the head of a foreign State, or a member of a foreign Royal Family, on the occasion of State or official visits by such personages.

5. Restricted permission will also be given for decorations conferred in the following cases:—

- (1) On British Ambassadors or Ministers abroad when the King pays a State visit to the country to which they are accredited.

(NOTE.—A State visit is defined as one on which the King is accompanied by a Minister or high official in attendance.)

- (2) On members of deputations of British regiments to foreign heads of States.

- (3) On members of special missions when the King is represented at a foreign coronation, wedding, funeral, or similar occasion; or on any diplomatic representative when specially accredited to represent His Majesty on such occasions (but not on the members of his staff).

Restricted permission will not be given to—

- (a) British Ambassadors or Ministers abroad when leaving.
- (b) British officers attending foreign manœuvres.
- (c) Naval officers of British Squadrons visiting foreign waters.

6. Both in the case of full and of restricted permission the matter will be submitted to the King by His Majesty's Principal Secretary of State for Foreign Affairs, who shall be under no obligation to consider applications for permission unless the desire of the head of a foreign State to confer upon a British subject the insignia of an order is notified to him before the order is conferred, either through the British diplomatic representative accredited to the head of the foreign State, or through the diplomatic representative of the latter at the Court of St. James.

In no case can applications be considered in respect of decorations conferred more than five years previously, or offered in connection with services or events so long prior to the nomination.

7. When His Majesty's Principal Secretary of State for Foreign Affairs shall have taken the King's pleasure on any such application, and shall have obtained His Majesty's permission for the person in whose favour it has been made to wear the insignia of a foreign order, he shall signify the same to His Majesty's Principal Secretary of State for the Home Department, in order that he may cause a Warrant, if it be a case for the issue of a Warrant as defined in Rule 2, to be prepared for the Royal Sign-manual.

When such Warrant shall have been signed by the King, a notification thereof shall be inserted in the *Gazette*.

Persons in whose favour such Warrants are issued will be required to pay to His Majesty's Principal Secretary of State for the Home Department a stamp duty of 10s.

8. The Warrant signifying His Majesty's permission may, at the request and at the expense of the person who has obtained it, be registered in the College of Arms. Every such Warrant as aforesaid shall contain a clause providing that His Majesty's license and permission does not authorize the assumption of any style, appellation, rank, precedence, or privilege appertaining to a Knight Bachelor of His Majesty's Realms.

Medals.

9. Medals, with the exceptions specified below, and State decorations not carrying membership of an order of chivalry, are subject to the regulations in the same manner as orders, but permission is given by letter and not by Royal Warrant.

10. Medals for saving or attempting to save life at sea or on land, whether conferred on behalf of the head or Government of a foreign State or by private life-saving societies or institutions may be accepted and worn without restriction.

8. Medals, with the exception specified below, and State decorations not carrying membership of an order of chivalry, are subject to the regulations in the same manner as orders, but permission to wear is given by letter and not by Royal Warrant. NOTE.—A dry and sunny month, with temperatures considerably below the mean of previous years. Total bright sunshine, 172.5 hours, 56 per cent. of the possible, and two sunless days. Precipitation at Karori Reservoir, near Kelburn, was 39 per cent. below the normal. Frost was recorded on the grass on three mornings; hail fell on the 22nd and 29th, and lightning was seen and thunder heard on the 29th. Fog was in evidence on seven mornings. Mean dew-point, 44.6°; and mean vapour pressure, 0.294 in.

SUMMARY FOR THE MONTH OF MAY, 1930.

The relatively dry weather which had ruled since the beginning of February continued into May until the middle of the month. The first half of the month, owing to the persistence of anticyclonic pressure, was remarkably fine over the whole of the Dominion, with clear mild days and cool nights. Low-pressure waves crossed southern New Zealand during the nights of the 13th and 14th, but as they were of slight intensity the rainfall accompanying them was confined to the western districts of the South Island. On the night of the 15th, however, a secondary depression of cyclonic form developed west of New Zealand and, on the morning of the 16th, was centred west of Farewell Spit. Fairly general rain set in at this time, with heavy falls in places, particularly from Nelson and Marlborough northwards. By the morning of the 18th this cyclone had passed away eastwards, and since at this time an extensive anticyclone covered the whole of Australia and the Tasman Sea, indications appeared favourable for the development of another lengthy spell of fine weather. From the 18th onward, however, until the close of the month, there was a remarkable frequency of depressions of the westerly type which moved along the southern edge of the anticyclone. As a consequence, strong and squally winds between west and south-west prevailed during this period, and there were many rapid and severe weather changes. On the 20th, 21st, 26th, 27th, and 29th, there were sharp southerly changes, and thunder and hail occurred at places, while snow fell frequently on the highlands and, in the South Island, on parts of the lowlands.

Although considerable rain fell after the middle of the month, except in south-west Otago where a slight excess occurred, the total for the whole month was everywhere below the average.

The cold of the latter part of the month and the frosty nights during the first half had an adverse effect on pastures. Consequently, though stock remained, on the whole, in good condition, supplementary feeding had to be resorted to in some districts. The rain, too, came too late to cause any appreciable response in growth of vegetation, so that the outlook for winter feed is far from encouraging, more particularly in the eastern districts. On the other hand, it permitted the carrying-out of agricultural work which had been seriously retarded by the prolonged dryness of the soil.

EDWARD KIDSON, Director.
