*Amending Maximum Rates of Interest payable by certain Building and Investment Societies on Renewals of Deposits.*

BLEDISLOE, Governor-General.

ORDER IN COUNCIL.

At the Government Buildings at Wellington, this 8th day of August, 1932.

Present:

THE RIGHT HON. G. W. FORBES, PRESIDING IN COUNCIL.

WHEREAS, pursuant to the provisions of section fifty-one of the National Expenditure Adjustment Act, 1932 (hereinafter referred to as "the said Act"), an Order in Council was made on the seventh day of June, one thousand nine hundred and thirty-two, and published in the *New Zealand Gazette* of the ninth day of June, one thousand nine hundred and thirty-two, fixing the maximum rates of interest

payable on moneys deposited with any building society or any investment society, and it is desirable to amend such maximum rates in the manner and to the extent hereinafter set forth:

Now, therefore, His Excellency the Governor-General of the Dominion of New Zealand, in exercise of the power and authority conferred on him by the said Act, and acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby declare that in the case of the renewal on or before the first day of July, one thousand nine hundred and thirty-three, of any deposit (other than a deposit in the Savings-bank Department of such society) made before the first day of July, one thousand nine hundred and thirty-two, with any building or investment society having its principal place of business in the Provincial District of Taranaki, the maximum rates of interest payable under any such renewal shall be one-half per centum per annum lower than the rate payable on such deposit immediately before the renewal, or the appropriate rate provided under the said Order in Council of the seventh day of June, one thousand nine hundred and thirty-two, whichever is the higher.

F. D. THOMSON,  
Clerk of the Executive Council.

*Amending Regulations relating to Passenger-services under the Transport Licensing Act, 1931.*

BLEDISLOE, Governor-General.

ORDER IN COUNCIL.

At the Government Buildings at Wellington, this 8th day of August, 1932.

Present:

THE RIGHT HON. G. W. FORBES, PRESIDING IN COUNCIL.

IN pursuance and exercise of the powers conferred on him by the Transport Licensing Act, 1931, His Excellency the Governor-General of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby make the following regulations by way of amendment to the Transport Licensing (Passenger-services) Regulations, 1931 (hereinafter referred to as "the said regulations"), and the Transport Licensing (Passenger-services) Regulations Amendment No. 1, published in the *Gazette* of the seventeenth day of December, one thousand nine hundred and thirty-one, at page 3494, and the twenty-eighth day of April, one thousand nine hundred and thirty-two, at page 1145, respectively.

REGULATIONS.

1. THESE regulations may be cited as the Transport Licensing (Passenger-services) Regulations Amendment No. 2.

2. Regulation 7 of the said regulations is hereby amended by adding, after clause (1) thereof, the following:—

"The application shall be made at least ten days before the date on which, if the application be granted, the applicant proposes to commence the temporary passenger-service to which the application relates: Provided that this condition shall not be deemed to prohibit a Licensing Authority, or the Chairman or Acting Chairman thereof, from dispensing with the foregoing requirement and dealing with any application for a temporary passenger-service license at any time it or he deems fit."

3. Regulation 11 of the said regulations is hereby amended—

(a) By inserting in clause (9) thereof, after the word "duplicate," the words "(either personally or by registered letter addressed to the Commissioner of Transport)," and

(b) By substituting in clause (9) thereof for the word "fourteen" the words "twenty-one," and

(c) By adding the following clause:—  
"(16) Any subpoena, order, or other document requiring to be signed by the Appeal Board shall be valid and effective if signed by the Chairman, or, in his absence, by any member of the Appeal Board."

4. Regulation 12 of the said regulations is hereby amended as follows:—

(a) By revoking clauses (1), (2), and (3), and substituting therefor the following clauses:—

"(1) (i) For each day or part of a day occupied by him in travelling from or to his usual place of residence to or from the sittings of the Transport Appeal Board or of a District Licensing Authority, or occupied by him at the sittings of the Board or Authority, as the case may be, there shall be paid—

"(a) To every member of the Transport Appeal Board other than the Chairman thereof a fee of £2 14s.:

"(b) To every member of a District Licensing Authority other than the Chairman or Acting Chairman thereof a fee of £1 14s.:

"(c) To the Chairman or Acting Chairman of a District Licensing Authority a fee of £2 11s.

"(ii) For each hour or part of an hour during which he is occupied or engaged in the business of a District Licensing Authority otherwise than as aforesaid there shall, subject to the approval of the Commissioner of Transport, be paid—

"(a) To the Chairman or Acting Chairman of a District Licensing Authority a fee at the rate of 7s. 6d. per hour:

"(b) To any member of a District Licensing Authority other than the Chairman or Acting Chairman thereof, a fee at the rate of 5s. per hour:

"Provided that none of the fees the payment whereof is authorized by this paragraph shall be payable in respect of any time forming part of a day in respect of which the fees authorized by paragraph (i) hereof are payable.

"(2) During his term of office there shall be paid—

"(a) To the Chairman or Acting Chairman of the Central Licensing Authority an allowance at the rate of £495 per annum:

"(b) To each member of the Central Licensing Authority other than the Chairman an allowance at the rate of £315 per annum:

"Provided that, if pursuant to the provisions of section 12 (1) of the said Act a deputy has been appointed in the place of a member of the Central Licensing Authority, the said allowances shall be payable to the deputy while acting as such, and not to the original member.

"(3) (i) In addition to the payments authorized by clauses (1) and (2) of this regulation, there shall be paid to each member of the Transport Appeal Board, a District Licensing Authority, and the Central Licensing Authority, respectively, for each day or part of a day on which he is occupied or engaged on the business of the Board or Authority and while so occupied or engaged is absent from his usual place of residence a further allowance by way of board and lodging expenses of £1 2s. 6d. per day.

"(ii) For the purpose of calculating this allowance, the term 'day' shall be deemed to comprise twenty-four hours, and the day shall be deemed to commence at the hour of departure from the usual place of residence of a member of the Board or Authority.

"(iii) Where a member of the Board or Authority leaves and returns to his usual place of residence the same day, actual and reasonable expenses only shall be paid."

(b) By revoking the words "travelling-expenses" in clause (4), and substituting therefor the words "locomotion expenses."

(c) By adding the words "or hours" after the word "days" in clause (7).

5. Regulation 15 of the said regulations is hereby revoked.

6. Regulation 21, as amended by the Transport Licensing (Passenger-services) Regulations Amendment No. 1, is hereby further amended—

(i) By adding to clause (1) thereof the following—

"(g) For every subpoena issued by the Appeal Board . . . . .	£	s.	d.
	0	5	0

"(h) Accompanying every application for an amendment to a license under section 34 of the said Act . . . . .

	£	s.	d.
	0	10	0

"Provided that the said amount may at the discretion of the Commissioner of Transport be refunded if the application is withdrawn before it is considered by the licensing authority."

(ii) By adding thereto the following additional clauses:—

"(7) Failure to pay the fees or any of the fees prescribed by paragraph (f) of clause 5 of this regulation shall be deemed to be a determination of the appeal within the meaning of subsections (4) and (5) of section 43 of the said Act, as from the date the fee should have been paid.

"(8) Notwithstanding anything hereinbefore to the contrary, the whole or any portion of any fee or fees payable under this regulation may, on the certificate of the Commissioner of Transport, be refunded on either of the following grounds, namely:—

"(a) That the application in respect of which the fee or fees are payable has been withdrawn, or that other action in respect of the application has been nullified, and that in consequence the work and expense of the Department or Board or Authority has been reduced to an extent justifying the refund; or

"(b) That the passenger-service in respect of which the fees are payable is used for only the occasional carriage of passengers, or is used for the carriage of passengers to such a limited extent that the full fees payable under this regulation would be disproportionate having regard to the amount of the passenger business."

7. Every application under section 34 of the said Act by the licensee for the amendment or revocation of any of the terms or conditions of a passenger-service license shall be in Form L set out in the Schedule hereto or to the effect thereof.

*Education Act, 1914: Amended Regulations.*

BLEDISLOE, Governor-General.

## ORDER IN COUNCIL.

At the Government Buildings at Wellington, this 8th day of August, 1932.

Present:

THE RIGHT HON. G. W. FORBES, PRESIDING IN COUNCIL.

IN pursuance and exercise of the powers conferred on him by the Education Act, 1914, and of all other powers enabling him in that behalf, His Excellency the Governor-General of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby revoke the regulations at present in force relating to the Intermediate Examination made by Orders in Council as shown in the Schedule hereto; and, further, doth hereby make the following regulations in substitution therefor; and with the like advice and consent doth prescribe that this Order shall come into force on the date of publication thereof in the *New Zealand Gazette*.

## REGULATIONS.

## INTERMEDIATE EXAMINATION: SPECIAL EXAMINATION FOR SENIOR FREE PLACES.

1. An examination, to be termed the Intermediate Examination, shall be held annually in the month of November or December at such convenient centres as the Director of Education shall appoint, and shall be open to candidates of either sex who desire to obtain a qualification by examination for a Senior Free Place in a secondary school, district high school, or technical school.

## CANDIDATES' NOTICES.

2. Every candidate for the Intermediate Examination must give notice to sit for such examination. Such notice must be on the form provided, and must be addressed to the Director of Education, and sent so as to be delivered at the office of the Education Department, Wellington, not later than the 8th day of September preceding the examination. All such notices shall include the names of the optional subjects selected by the candidate.

Candidates who are pupils of public post-primary schools at the date of application may, at the discretion of the Minister, be admitted without fee. Otherwise, each candidate's application must be accompanied by a receipt for the payment of 10s. at some money-order office of the Post and Telegraph Department of New Zealand.

These provisions notwithstanding, late applications received after the 8th day of September, and on or before the 22nd day of September, may be accepted by the Education Department, provided that the application is in each case accompanied by a receipt for a late fee of 10s., paid at some money-order office of the Post and Telegraph Department of New Zealand.

## SELECTION OF SUBJECTS.

5. In order to pass the examination, a candidate must gain not less than 40 per cent. of the total possible maximum of marks assignable under these regulations.

6. The legibility of handwriting and the setting-out of matter will in all cases be taken into account when assigning marks to papers in the various subjects.

## SCOPE AND STANDARD OF EXAMINATION.

7. The scope of the examination in subjects (1) to (28) inclusive enumerated in clause 4 hereof is as set forth below. The scope of the examination in any other subject selected in accordance with the provisions of clause 8 hereof is such as may reasonably be expected at the end of a two-years course in a post-primary school.

8. School candidates taking courses of instruction which include subjects not enumerated in clause 4 hereof may, with the approval of the Director, include such subjects among those selected by them towards the prescribed maximum of 1,800 marks. In the case of any such subject the maximum marks assignable shall be 200. The examination in such subjects and in subjects (29) to (36) inclusive in the schedule of subjects contained in clause 4 hereof shall be based upon a prescription supplied by the school and approved by the Director for this purpose.

## PUBLICATION OF RESULTS.

9. As soon as may be after the examination, the names of candidates who pass the Intermediate Examination shall be published in the *New Zealand Gazette*. Candidates shall be notified of the result of the examination, and shall be entitled to receive a statement of the marks obtained in the several subjects.

For any other statement of marks obtained a fee of 2s. 6d. shall be payable in the manner specified in clause 2 hereof.

## GROUP I.

(1) *English*.

The English paper will be designed to test the literary comprehension and appreciation of the candidates, and a standard will be required in written composition such as can reasonably be attained after two years' secondary study of good English models. Great importance will be attached not only to correctness of composition, but also to originality of thought and expression.

Grammar will be treated from the functional point of view. No formal parsing will be required. Sentences, clauses, phrases, and parts of speech should receive just enough attention to allow candidates to do analysis and to explain clearly errors in accidence and syntax.

Questions may also be set on synthesis, direct and indirect speech, punctuation, the construction of sentences to indicate the meanings and uses of words, letter-writing, and the precis of literary or other matter.

(1A) (a) *Handwriting*.

The copying from print or manuscript of prose, poetry, business letters, tabulated matter, and commercial papers. In the assessment of marks for handwriting consideration will be given chiefly to legibility, regularity, neatness, and speed. Handwriting will be taken into account in all subjects tested by written examination.

or

(b) *Lettering*.

The test in lettering will consist of (1) drawing not more than three Roman letters about two inches high, (2) setting out in plain capitals based on the Roman forms a short title with sub-title in "lower case" letters of the same general character.

(2) (a) *Arithmetic*.

Vulgar and decimal fractions; metric system; approximations, proportion; partnerships; averages; percentages; profit and loss; bankruptcies; taxes, premiums; simple and compound interest; bankers' discount; stocks and shares; simple cases of exchange; square root; cube root of numbers reducible to prime factors not greater than 11; areas of plane rectilinear figures and of circles; mensuration of the prism, pyramid, sphere, circular cylinder, and circular cone. The use of algebraical symbols and processes, of graphical methods and of logarithms, will be permitted. Special importance will be attached to correct methods of setting out work.

or

(b) *Practical Mathematics*.

Long tots; vulgar and decimal fractions; metric system; proportion; averages; percentages; cost, length, time, angle, area, volume, mass, weight; square root; cube root of numbers reducible to prime factors not greater than 11; areas of plane rectilinear figures, and of circles; mensuration of the prism, pyramid, sphere, right circular cylinder, and right circular cone; use of logarithms; the straight-line graph and its application to simple practical problems; evaluation of simple explicit functions; methods of estimating irregular areas; errors; approximations; rough checks. The construction of plane figures with sides of constant or zero curvature from sufficient data; and the solution of triangles by drawing to scale; simple geometrical constructions required in drawing such figures; plotting graphs from given numerical data and reading interpolation from graphs so plotted.

## GROUP II.

(3) *General Experimental Science*.

(Candidates who select this subject in addition to chemistry are required to take Section 1 and Section 2. Other candidates who select this subject take Section 1 and either Section 2 or Section 3.)

*Section 1.*—British and metric systems of measurement. Errors of observation and errors arising from too great reliance upon arithmetical calculations. Volumes of solids and liquids. Use of the balance. Flotation (iceberg, ship, Plimsoll line, submarine boat, dirigible). Principle of Archimedes. Density and specific gravity of solids and liquids. Common hydrometer and lactometer. Simple experiments dealing with solution of gases and solids in liquids. Evaporation, condensation, distillation, filtration, crystallization, emulsion.

*Section 2.*—Ideas of pressure and thrust in fluids (U tube, water-level, spirit-level, gauge-glass, town water-supply, artesian well). Transmission of fluid pressure (hydraulic press, jack, pressure-gauge). Pressure of gases (Boyle's law, syringe, siphon, cycle-pump, lift-pump). The barometer (mercurial and aneroid). Representation of forces. The spring balance. Experimental determination of the resultant of two concurrent forces and of parallel forces; graphical determination of the former. Moments and the couple. Tests of accuracy of a balance and methods of weighing. Centre of gravity and its bearing on equilibrium. Determination of position of centre of gravity in very simple cases. Simple and common contrivances based upon the lever and the inclined plane.

*Section 3.*—Simple experiments on the properties and composition of air. Combustion (fire, candle, Bunsen burner, gas-stoves, petrol). Ventilation and heating of rooms. Oxidation and the formation of oxides, particularly oxides of carbon. Respiration and the carbon cycle. Composition and properties of water. Simple experiments of oxygen, hydrogen, and carbon.

*And either—*

(a) The difference between chemical and physical change and between mechanical mixtures and chemical compounds; indestructibility of matter; hard and soft waters; chief impurities of water; an elementary study of sulphuric acid, caustic soda, common salt, washing-soda, copper sulphate, and limestone as examples of acids, alkalies, and salts; or—

(b) Simple study of the plant as an organic whole; an elementary knowledge of the chemical constituents of plants and the sources from which the plant derives them, treated as a cycle of transformations from living to non-living matter and back again; simple qualitative and quantitative experiments illustrating the nutrition of plants, the conduction of water and food substances in the plant, storage of reserve material, respiration, and transpiration; influences of temperature, moisture, and light on the growth of plants.

The candidate will be expected to show that he has acquired by actual experiment, observation, and measurement his knowledge of the matters set forth in the sections of the above syllabus selected by him; but he will not be expected to show that he is familiar with other than the simple apparatus and appliances commonly used in connection with elementary instruction in practical physics or chemistry in secondary schools. He will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the syllabus.

#### (4) *Chemistry.*

Air; its weight; rusting of iron and the effect on the composition of air; effect of heating in air, lead, copper, sulphur, phosphorus, magnesium; volumetric analysis of air; detection of water and carbon dioxide in the air; constituents of air; respiration and the carbon cycle.

Air and combustion; the burning of a candle; structure of candle and gas flames; fuels (wood, coal, coke, charcoal, coal-gas, kerosene, petrol); products of combustion; danger of imperfect combustion.

Water; natural waters; common impurities and methods of removing them (*e.g.*, sedimentation, boiling, distillation, chlorination); hardness of water; composition of water; water of crystallization (easy experiments).

The determination and graphic representation of the solubility of solids in water at different temperatures (easy cases).

Preparation (laboratory and commercial) and properties of oxygen, nitrogen, and hydrogen.

Elements, mixtures, compounds; chemical and physical changes; indestructibility of matter; symbols, formulæ, equations; the determination in easy cases of the weight of the materials required to yield or to combine with a given weight of a given substance.

Experiments illustrating modes of chemical action. The nature and general properties of oxides, acids, bases and salts.

The most important properties of carbon, sulphur, phosphorus, and sulphuric acid; the preparation and properties of the oxides of carbon, sulphur dioxide, chlorine, ammonia, hydrochloric acid and nitric acid.

An elementary experimental study of limestone, quicklime, slaked lime, washing-soda, caustic soda, common salt, and copper sulphate.

The candidate will be expected to show that he has acquired by actual experiment, observation, and measurement his knowledge of the matters set forth in the above syllabus; but he will not be expected to show that he is familiar with other than the simple apparatus and appliances commonly used in connection with elementary instruction in practical chemistry in secondary schools. He will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the syllabus.

(5) *Magnetism and Electricity.*

Properties of magnets; methods of making magnets; induction; elementary notions of the magnetic field and lines of force; the earth as a magnet; dip; declination; mariner's compass.

Electrification by friction and by induction; conductors and non-conductors; the gold-leaf electroscope and its use; distribution of electrification on conductors; hollow conductors; the electrophorus.

Elementary notions of the electric current, of the means of producing it, of its magnetic, heating, and chemical effects; water and silver voltmeters; elementary notions of electromotive force and resistance; Ohm's law; electrical units (ampere, volt, ohm, watt, Board of Trade unit).

The galvanometer, its use in detecting changes in the strength of a current and in comparing (roughly) the strength of different currents and the resistances of different conductors; ammeters and voltmeters (treated simply); the resistance-box.

Electromagnet; electric bell; glow-lamp.

Very elementary ideas of electro-magnetic induction.

The candidate will be expected to show that he has acquired by actual experiment, observation, and measurement his knowledge of the matters set forth in the above syllabus; but he will not be expected to show that he is familiar with other than the simple apparatus and appliances commonly used in connection with elementary instruction in practical physics in primary or secondary schools. He will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the syllabus.

(6) *Technical Electricity.*

Simple experiments with compass and magnet.

Elementary magnetic properties of iron and steel. An elementary study of magnetic fields and lines of force.

The Leclanche cell. Magnetic field about a wire carrying a current. Solenoids and electromagnets. The electric bell. The relay, the telegraph, and the telephone.

Practical units of current, quantity, electromotive force, resistance, power and energy. Laws of resistance. Use of Ohm's law for simple circuits.

Heating effect of an electric current treated quantitatively. Heaters, hot-wire instruments, and fuses. Electric lamps.

Principles underlying construction and use of ammeters and voltmeters (moving-iron and moving-coil).

Production of electro motive force by change of magnetic flux through an electric circuit. Simple application of principle to direct-current generators and motors.

Very elementary ideas of the alternating current, including its employment for experimental work in simple non-inductive circuits, within the limits of the above syllabus. Practical use of the transformer.

The candidate will be expected to show that he has acquired by actual experiment, observation, and measurement his knowledge of the matters set forth in the above syllabus. He will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the syllabus.

(7) *Heat and Light.*

Experiments to illustrate the expansion of solids, liquids, and gases (qualitatively). Measurement of expansion of solids and liquids. Practical applications of the principle of expansion. Mercury and alcohol thermometers. Maximum and minimum thermometers. The anomalous expansion of water and its significance.

Experiments on melting and solidifying points (paraffin wax, butter, water), on boiling-points (water, salt solution). Effect of pressure on the boiling-point (digester). Change of volume on solidification (water, paraffin). Change of volume on vaporization and applications (steam-pressure). Distillation and fractional distillation (water, alcohol, mineral oil).

Distinction between temperature and heat quantity. Units of heat. Measurement of specific heats of solids and liquids by method of mixtures. Absorption of heat during fusion and vaporization (treated simply) and applications thereof.

Heat transference (very elementary). Safety-lamp, hay-box, ventilation, winds, hot-water heating-system, cooling system of petrol-engine, thermos flask.

Nature and propagation of light. Pinhole images. Shadows and eclipses. Intensity of illumination. Candle-power photometry.

Laws of reflection of light at plane surfaces. Images in plane mirrors.

Laws of refraction of light at plane surfaces. Passage of light through a plate, a prism, and a lens. Formation of images by single convex lenses. Simple magnifying-glass. Camera. Astronomical telescope. Periscope.

Dispersion of light. The spectrum. The rainbow. Colour of bodies.

The candidate will be expected to show that he has acquired by actual experiment, observation, and measurement his knowledge of the matters set forth in the above syllabus; but he will not be expected to show that he is familiar with other than the simple apparatus and appliances commonly used in connection with elementary instruction in practical physics in primary or secondary schools. He will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the syllabus.

#### (8) *Heat-engines.*

Expansion by heat of solids, liquids, and gases. Expansion joints. Thermometers, mercurial and water-tube. Fahrenheit and centigrade scales (the former to be used in all calculations involving practical applications).

A simple study of Boyle's and Charles's laws and of isothermal and adiabatic expansion (the latter treated only with the aid of steam tables).

Specific heat of water, copper, iron. The British thermal unit. Calorific values of various fuels, including coal-gas and petroleum products.

Latent heat and total heat of steam at various temperatures. Wet, dry, and superheated steam. Simple calculations on mixtures of water at various temperatures; mixtures of steam and water; evaporative power of fuels.

Transference of heat by conduction, convection, and radiation. Heat-insulation. Simple studies of common types of boilers and condensers.

A very elementary study of Joule's equivalent in connection with the conversion of heat into work in cylinders of simple steam-engine, gas-engine, petrol-engine. Indicator-diagrams for the above, and their use in practice. Principles underlying impulse and reaction steam turbines.

Simple studies in design of cylinder, piston, slide-valve and poppet-valve, steam-valve, water-gauge, pressure-gauge, injector, feed-pump, carburettor.

The candidate will be expected to show that he has acquired by actual experiment, observation, and measurement his knowledge of the matters set forth in the above syllabus. He will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the syllabus.

#### (9) *Home Science.*

Simple experiments and investigations bearing on the following:—

1. Expansion of solids, liquids, and gases. Conduction, convection, and radiation treated simply, and especially in their relation to household appliances and operations.

2. The chief properties of carbohydrates, fats, proteins, and mineral matter.

3. The composition and structure of milk, eggs, meat, root and green vegetables and fruit, and of wheat in comparison with other common cereals.

4. Principles on which are based the various methods of preparing and cooking foods, including the use of baking-powders and yeast.

5. Changes in weight and character of foods in cooking.

6. Changes in food due to the agents of digestion.

The candidate will be required to forward before the date of the examination a certificate in the prescribed form that she has carried out satisfactorily a course of practical work based on the above syllabus.

(10) *Agriculture.*

The candidate will be expected to show (a) that he has a practical knowledge of the operations incident to the work of a school-garden, and (b) that he has conducted experiments and observations bearing on the life and growth of plants, on the lines indicated below under the head of "Experimental and Observational Work"—

(a) *Work in the Garden.*—General: Preparation of the land; digging, trenching, hoeing, raking, and surface cultivation. Drawing drills. Sowing, thinning, pricking off, hardening, and planting out seedlings. Methods of treating light and heavy soils. Fertilizers; the time of year and the condition in which to apply fertilizers; the selection of fertilizers for particular purposes. Use of lime, soot, clay, road-sweepings, ashes, leaf-mould, &c., as soil-improvers. Arrangement of the garden to the best advantage from the points of view of space, succession of crops, and weeding.

Special: Methods of plant-cultivation. Cultivation and management of—

- (i) Green, pod-bearing, and tap-rooted vegetables, potatoes, onions, vegetable marrows, tomatoes. Gathering and storing of vegetables.
- (ii) Cereals and other grasses, and fodder-plants generally. Succession of crops. An elementary study of the common weeds of the candidate's district.

(b) *Experimental and Observational Work.*—The seed: Parts of the seed. Conditions necessary for germination and growth. Testing the vitality of seeds. The collection and preservation of seed. Experiments illustrating the phenomena of germination and the establishment of the young plant (e.g., absorption of moisture by seeds; temperature of and pressure exerted by germinating seeds; how seeds escape from their covers; how seeds get buried in the soil; how young plants get above the ground; and how they deal with obstacles met with during the process; how seeds on the surface get their roots into the ground; proof that germinating seeds take in oxygen and give out carbon dioxide, &c.).

The root: The function of the root. Root-systems. The use of root-hairs and root-caps. Effect of injury to these parts. How roots grow. Experiments illustrating the work of roots (e.g., relation between root-hairs and soil-particles; exploration of soil by roots in search of moisture; the quantity of water required by roots; use made by roots of mineral matters dissolved out of soil by water; proof that roots require air and give out carbon dioxide, &c.).

The leaf: The general structure, forms, and functions of leaves, treated simply.

Stems and their modifications. Buds.

The flower and fruit: The parts of the flower and their functions. Causes influencing the opening and closing of flowers. Pollination. The formation of fruits. Different types of fruits. Devices for the protection of seeds from foes. Dissemination of seeds.

The soil: How soil is made. The mechanical analysis of soil. The texture of soil. The soil as a sponge from which a plant may obtain water, as a storehouse of plant-food, and as a laboratory in which plant-food is prepared and dissolved. Experiments with soils (e.g., how moisture is held in the soil; how moisture moves through the soil; how the moisture-holding capacity of a soil may be increased; conservation of moisture; evaporation at surface of different soils; how the texture of a soil may be improved; conditions governing soil temperature).

The candidate will be required to forward before the date of examination a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the above syllabus.

(11) *Botany.*

The candidate will be required to show that he has acquired his knowledge of the following topics by observation, investigation, and experiment:—

The organs of flowering-plants, their arrangement and principal modifications; their functions, so far as can be ascertained by observation and simple experiments.

The main phenomena of the life-history (excluding microscopic processes) of common flowering-plants; germination; establishment and growth; comparison of different types of germination; the mechanism of pollination; fruit and seed dispersal.

Adaptation of plants to their surroundings and to cold and drought; protection against animals. Comparison of creeping-plants, climbing-plants, rosette-forming plants, grass-like plants, shrubs and trees. Plant societies.

The description and dissection of commonly occurring native and introduced flowering-plants (technical descriptions will not be demanded).

The candidate will be required to forward, before the date of examination, a certificate in the prescribed form that he has carried out satisfactorily a course of practical instruction based on the above syllabus.

(12) *Dairy Science.*

The constituents of milk; causes of variations and of defects in the composition of milk; the physical and chemical properties of milk; the coagulation of milk; the composition of skimmed milk, separated milk, buttermilk, and cream; the uses and value of separated milk, buttermilk, and whey; methods of determining the fat in milk; acidity and the estimation of acidity; sampling; the care of milk; influence of temperature on milk; pasteurizing and sterilizing milk; objections to the use of chemical preservatives; conveyance of milk; milk as a medium for conveying disease.

Methods of raising and separating cream; the ripening of cream; use of starters; the process of churning; composition of butter; washing, working, and salting butter; common faults in butter.

A very elementary knowledge of the general anatomy and physiology of the cow, with special reference to the parts concerned in nutrition and milk-production; the care, management, and feeding of dairy cows and calves.

The candidate will be expected to show that during the course he has acquired a knowledge of elementary chemistry and physics sufficient to enable him to understand (a) the principles of the apparatus and appliances, and (b) the processes used in the study of milk.

The candidate will be required to forward before the date of examination a certificate in the prescribed form that he has carried out satisfactorily a course of practical work based on the above syllabus.

GROUP III.

(13) *History.*

(Reasonable choice of questions will be permitted.)

1. The various racial elements contributing to the formation of the British nation; the story of their fusion. The Union of England and Scotland (1707) and of Great Britain and Ireland (1801); their subsequent relationship.

2. Constitutional progress and the development of democratic government. Suggested headings: Magna Charta; the Model and First Parliaments; Tudor despotism; progress during the seventeenth and eighteenth centuries, as marked by the struggle with the Stuarts and by the development of party government and the Cabinet system; the work of the great Prime Ministers; the Reform Bills, 1832, 1867, 1884.

3. The growth of the Empire from the age of discovery.

4. Leading recent developments in the Pacific.

5. History of New Zealand:—

(a) The Maori before the advent of the white man.

(b) Early explorers, traders, missionaries.

(c) Commencement of systematic colonization; leading colonizers.

(d) Chief conflicts with the Maoris.

(e) Crown colony period; Provincial Government; present Constitution.

(f) Discovery of gold; development of primary industries.

(g) Work of early Governors; policy of leading Premiers.

(h) Features of modern progress.

6. Landmarks of industrial and social progress during the eighteenth and nineteenth centuries.

7. An elementary knowledge of civics under the following headings: The Crown, Privy Council, Parliament, local governments, franchise, and elections. Executive functions of Government; Law Courts, methods of preventing and punishing crime; taxation, customs, the national debt; principal State Departments; land-settlement; co-operation; methods of industrial peace; causes and prevention of poverty.

(14) *Geography.*

(a) Physical and mathematical geography, as follows: The approximate size and form of the earth; its daily rotation; the north and south line; latitude and longitude, meridians and parallels, local time; annual revolution of the earth round the sun; the altitude of the sun at the equinoxes and at the solstices; the inclination of the earth's axis to the plane of its orbit; the length of the day; the zones, the seasons, winds, and currents (treated in an elementary way), trade winds, monsoons. Rainfall and its distribution; controlling factors. Temperature; its distribution; isotherms.

Different types of climate; climatic regions of the world. Connection between temperature, moisture, and resultant vegetation. Variation of vegetation with altitude and latitude. Typical animal life in different parts of the earth. Distribution of industries and products as controlled by physical conditions (treated on very broad lines). The work of rain, rivers, ice, wind, and sea. Scales of maps; contours; easy map-reading.

(b) The physical, political, and economic geography of the British Empire.

(c) An elementary knowledge of the geography of the lands bordering upon the Pacific and of the rest of the world (including great geographical discoveries and the chief trade routes of the world).

(15) *Mathematics.*

(a) Algebra.

Fundamental operations; easy fractions; factors of expressions that are the product of two binomial factors, and of such expressions as  $a^3 \pm b^3$  and  $a^3 \pm 3a^2b + 3ab^2 \pm b^3$ , only numerical coefficients being used; common multiples and divisors to correspond; simple equations involving one or two unknown quantities; the solution by factors of easy quadratic equations involving one unknown quantity; easy problems; graphs of simple algebraical functions within the limits of the foregoing work, and graphical methods of solving simple equations involving two unknown quantities.

(b) Geometry.

No formal proofs shall be required for examination purposes of the theorems in Part I. The truth of these should be established by intuition and experiment, and the teaching of formal geometry should be based upon the quasi-axiomatic acceptance of these results.

Every candidate shall be expected to answer questions in both theoretical and practical geometry. The questions in theoretical geometry shall consist of theorems contained in subsection (a), Part II, together with questions upon these theorems; easy deductions from them and arithmetical illustrations. The questions in practical geometry shall be set on the constructions, &c., contained in subsections (b) and (c), Part II, together with easy extensions of them. All figures should be drawn accurately. The constructions in subsection (b) are those of which formal proofs shall be expected.

Any proof of a proposition shall be accepted which appears to the examiners to form part of a systematic treatment of the subject.

PART I.

If a straight line stands on another straight line, the sum of the adjacent angles so formed is equal to two right angles; and the converse.

If two straight lines intersect, the vertically opposite angles are equal.\*

When a straight line cuts two other straight lines, if a pair of corresponding angles are equal, the two straight lines are parallel; and the converse.

When a straight line cuts two other straight lines, if (i) a pair of alternate angles are equal, or (ii) a pair of interior angles on the same side of the cutting line are supplementary, then the two straight lines are parallel; and the converse.\*

Straight lines which are parallel to the same straight line are parallel to one another.\*

If two triangles have two sides of the one equal to two sides of the other, each to each, and also the angles included by those sides equal, the triangles are congruent.

If two triangles have two angles of the one equal to two angles of the other, each to each, and also a side of one equal to the corresponding side of the other, the triangles are congruent.

If two triangles have three sides of the one equal to three sides of the other, each to each, the triangles are congruent.

The area of a rectangle is measured by the product of the measures of its sides.

There is one circle and only one circle which passes through three given points not in the same straight line.

(NOTE.—The theorems marked \* may serve in the class-room as a useful introduction to the process of logical deduction.)

*Section 1:—*

## PART II.

(a) The sum of the angles of a triangle is equal to two right angles.

If the sides of a convex polygon are produced in order, the sum of the exterior angles so formed is equal to four right angles.

If two sides of a triangle are equal, the angles opposite those sides are equal; and the converse.

If two triangles have two sides of the one equal to two sides of the other, each to each, and the angles opposite to one pair of equal sides are right angles, the triangles are congruent.

(NOTE.—The ambiguous case should be discussed.)

If two sides of a triangle are unequal, the greater side has the greater angle opposite to it; and the converse.

Of all straight lines that can be drawn to a given straight line from a given point outside it, the perpendicular is the shortest.

The opposite angles of a parallelogram are equal; and the converse.

The opposite sides of a parallelogram are equal and each diagonal bisects the parallelogram; and the converse of the first part.

The diagonals of a parallelogram bisect one another; and the converse.

If a pair of opposite sides of a quadrilateral are equal and parallel, it is a parallelogram.

The straight line drawn through the middle point of one side of a triangle parallel to another side bisects the third side.

The straight line joining the middle points of two sides of a triangle is parallel to the third side and equal to one-half of it.

If three or more parallel straight lines make equal intercepts on any transversal, they make equal intercepts on any other transversal.

(b) To bisect a given angle.

To bisect a given straight line.

To construct a perpendicular to a given straight line (i) from a given point in the line, (ii) from a given point outside the line.

To construct an angle equal to a given angle.

To draw a straight line parallel to a given straight line.

(c) To divide a straight line into any number of equal parts or in a given ratio.

The construction of angles of  $60^\circ$ ,  $45^\circ$ ,  $30^\circ$ .

The construction of triangles and quadrilaterals from sufficient data and the solution of triangles by drawing to scale.

*Section 2:—*

(a) The area of a parallelogram is equal to the area of a rectangle on the same base and between the same parallels; and is therefore measured by the product of the measures of its base and its altitude.

Parallelograms on the same or equal bases and of the same altitude are equal in area.

The area of a triangle is equal to one-half of the area of a rectangle on the same base and between the same parallels; and is therefore measured by one-half of the product of the measures of its base and its altitude.

Triangles on the same or equal bases and of the same altitude are equal in area.

Equal triangles on the same or equal bases are of the same altitude.

The square of the hypotenuse of a right-angled triangle is equal to the sum of the squares on the other two sides; and the converse.

Geometrical proofs of the following algebraic identities:—

$$\begin{aligned} k(a + b + c) &= ka + kb + kc \\ (a + b)^2 &= a^2 + 2ab + b^2 \\ (a - b)^2 &= a^2 - 2ab + b^2 \\ a^2 - b^2 &= (a + b)(a - b). \end{aligned}$$

(b) To construct a triangle equal in area to a given quadrilateral.

To construct a rectangle equal in area to a given triangle.

(c) The determination by measurement of the areas of plane rectilineal figures.

The experimental proof of the theorem of Pythagoras.

*Section 3:—*

(a) The locus of points equidistant from two fixed points is the perpendicular bisector of the line joining the two fixed points.

The locus of points equidistant from two intersecting straight lines consists of the pair of straight lines which bisect the angles between the two given lines.

(b) The construction or plotting of the loci of points subject to simple geometrical conditions.

Section 4:—

Determination by measurement of the ratio of the circumference of a circle to its diameter.

Determination (approximately) of the area of a circle.

Construction of tangents to a given circle.

Simple cases of the construction of circles from sufficient data.

The inscription in or circumscription about a given circle, by geometrical methods, of regular figures of three, four, six, and eight sides.

(15A) *Alternative Mathematics.*

(a) General idea of number as a quantity having unlimited positive and negative range; rational and irrational numbers.

Quantities that can be wholly represented by numbers—*e.g.*, length, cost, area, angle, time. Relationships between such quantities treated graphically. Ideas of variation, variable, and function. Graphical work with two variables to give practice in curve tracing only. Ideas of continuity and limit. Linear relation between two variables—*i.e.*, the function  $Y = aX + b$ , treated symbolically and graphically with oblique as well as rectangular axes.

Dimensions of length, area, and volume functions. Simple functions stated in algebraic symbols, and commonly known as formulæ. Practice in evaluation, including cases where it is necessary to change the independent

variable in formulæ such as  $a = \frac{v-u}{t}$ ,  $T = 2\pi \sqrt{\frac{l}{g}}$ .

Simple manipulative exercises in the addition, subtraction, multiplication, division, and factorization of algebraical expressions, limited, as far as possible, to trinomials of no higher degree than the second. The methods used must invariably show work written in lines, with a full understanding of the meaning and use of the sign of equality. Simple equations involving one or two unknown quantities, and problems thereon, provided that the examples set must bear the stamp of reality, whether they be expressed in symbols or stated in words.

(b) Ideas of direction and of similarity of space. The straight line defined as one of uniform direction, and its minimum treated as a consequence of its "directness." All straight lines similar to one another: application to making of straight edges. Plane surfaces: application to surface plates.

The angle treated as a quantitative change in direction. Rotational proofs of the simple angular properties of figures, especially figures of three and four sides.

Parallels treated as straight lines in the same direction. Angular properties of figures with parallel sides.

(c) Ideas of symmetry and superposition. Uniqueness of figure formed by three given straight lines in the same plane. Congruence of triangles deduced from this result, and consequently such geometrical results in reference to triangles and parallelograms as are usually proved in an elementary course from congruent triangles.

Use of scales: scale ratio. Simple cases of proportionality, including similarity of triangles and other plane figures, treated with reference to scale ratio. The recognition and use of the sine, cosine, and tangent of an angle, regarded both as a function of the angle and as a ratio between the sides. Graphs and functional scales of sine, cosine, tangent.

Areas of rectangles, triangles, and parallelograms. Proofs by dissection, combined with symbolic expression, as in the geometrical truths illustrated by the expressions—

$$\begin{aligned} \text{Area of triangle} &= \frac{1}{2}bh = \frac{1}{2}bc \sin A = \frac{1}{2}ca \sin B \\ (a + b + c)x &= ax + bx + cx \\ (a + x)x &= ax + x^2 \\ (a \pm b)^2 &= a^2 \pm 2ab + b^2 \\ (a + b)(a - b) &= a^2 - b^2 \end{aligned}$$

Areas of similar figures proportional to the squares of the ratios of corresponding sides. Pythagoras' theorem deduced from this result together with the fact that the perpendicular from the right angle to the hypotenuse divides the triangle into two parts both similar to it.

(d) The simplest treatment of directed quantities, such as displacements, to show that certain quantities cannot be fully represented by numbers alone. Ideas of addition and subtraction for such quantities applied in simple diagrams drawn to scale, such as are usually met with in elementary practical questions on heights and distances.

(16) *Applied Mechanics.*

Linear measurements—use of scales; principle of the vernier and micrometer and their uses. Meaning of “allowance” and “tolerance” in connection with working parts of machines; limit gauges.

Ideas of mass, density and relative density. Use of balance and the experimental determination of the densities of solid bodies. Archimedes principle. Vectorial representation of force; the parallelogram, triangle, and polygon of co-planar forces; experimental determination of the resultant of two or more co-planar forces.

The use of triangle and polygon of forces for determining the stresses in a pin-jointed framework, such that not more than three members meet at any one joint. Application to simple machines such as jibs, cranes, hinges of doors and gates, &c.

Parallel forces, centres of mass and gravity. Moments of forces; resultant moments; moments to be regarded vectorially; sum of moments to be zero for equilibrium. Application to simple machines such as levers, wheel, and axle. Spur and bevel gearing.

Energy—principle of conservation of energy—kinetic energy of moving body. Potential energy.

Work, how measured; graphical representation and calculation of force-space diagrams.

Velocity ratio; application to machines, such as pulleys, worm gears. Mechanical advantage.

Friction—general laws of friction of unlubricated surfaces experimentally verified. Fluid friction.

Efficiency of machines.

Power—measurement of power experimentally; brake horse-power.

(17) *Hygiene.*

(a) *The Home.*—General considerations of site, aspect, construction, &c., in order to obtain hygienic conditions. Value of a garden, fresh air, and sunlight. Heating and lighting. Number and arrangement of rooms. Storage of food. Water-supply (quantity of water required for each person, methods of collection and distribution; effects of insufficient or impure water-supply; methods of purification). Sanitary arrangements (good systems of domestic drainage; water and earth). Dust and dirt. Disposal of refuse. Necessity for cleanliness of home and surroundings.

(b) *Personal Cleanliness.*—Cleanliness, washing and bathing; structure of skin; care of the mouth and teeth; care of the hair; care of the feet; exercise and fatigue; rest and sleep; clothing; materials; cleanliness of clothing.

(c) *Structure of the Body.*—General idea of cell as unit of tissues and organs of the body; division of labour. General form and characteristics of body; form and relative positions of parts of skeleton and of chief muscles, organs, great blood-vessels and nerve trunks. Mode of attachment and action of muscles. The structure and mechanics of the principal joints. The arrangement of the alimentary canal. The mechanics of respiration and circulation; differences between inspired and expired air, between venous and arterial blood and between blood and lymph. The physical composition and functions of blood. The general differences between arteries, capillaries, and veins, and in the flow of blood therein. The chief sources of heat-production in the body; the mean temperature of the body of man and the chief agents keeping it uniform. A general knowledge of the arrangement of the nervous system; an elementary knowledge of the functions of the brain and spinal cord.

(d) *First Aid and Home Nursing.*—Signs of fracture, first aid to be rendered in such accidents; treatment of bruises and sprains. Bandaging with triangular and roller bandages. Artificial respiration and its application in cases of drowning or suffocation. Treatment of cuts and wounds; points where the main blood-vessels may be compressed. Treatment of faints, burns, scalds, bites, stings, and poisoning. Arrangement of a sick-room and general care of the sick. Infection, disinfection. Common disinfectants and antiseptics, their use and action.

The candidate will be expected to be familiar with the more important steps to be taken in dissecting, say, a rabbit, and he may be required to recognize and describe parts of the animal body from specimens or photographs.

The study of food and ventilation, which usually forms part of a prescription in hygiene, is included in the prescription for home science.

## GROUP IV.

(18) *Latin.*

Candidates will be expected to show such a knowledge of the language and of its vocabulary and grammar as may be gained from a two years' study of the subject. Translation will be set of a standard not higher than that of the simpler books of Cæsar. With the aid of a vocabulary of unusual words, the candidate will be expected to render into English easy passages of unprepared translation, or to answer in Latin easy questions expressed in Latin upon the same passages, or to render into Latin easy sentences based expressly upon the language and subject-matter of one of the passages.

(19) *French.*

Candidates will be expected to show such a knowledge of the language and of its vocabulary and grammar as may be gained from a two years' study of the subject. The candidate should be able, with the aid of a vocabulary of unusual words, to render into English easy passages of unprepared translation and to answer questions in grammar thereon, also to answer in French easy questions expressed in French upon the same passages. The rendering into French of easy sentences or passages or the writing in French of a free composition of a simple kind on a familiar subject will also be required. Pronunciation will be tested on phonetic lines.

(20) *Maori.*

Candidates will be expected to show such a knowledge of the language and of its vocabulary and grammar as may be gained (1) by easy conversation in Maori about the facts of everyday life, (2) by the study of the story of Tawhaki in Sir George Grey's "Mythology and Traditions of the New-Zealanders"; but candidates will not be expected to have read that particular story, nor will the passages for translation necessarily be taken from it. Great importance will be attached to translation from Maori, and to the writing of easy passages and sentences in Maori.

(21) *Shorthand.*

Transcribing into shorthand, fully vocalized, a short printed passage as a test of accuracy and neatness of shorthand outline. Writing in shorthand an easy passage dictated at the rate of fifty words a minute, and transcribing it accurately into longhand.

(22) *Book-keeping and Commercial Correspondence.*

The requirements will include commercial arithmetic and tots and easy précis-writing.

Book-keeping: The object and value of book-keeping. Double entry, its meaning and advantages. The form, nature, and classification of accounts; the balancing and closing of accounts. The explanation of simple commercial terms such as debit, credit, balance, profit (gross and net), interest, discount, commission, insurance, assets, liabilities, capital, bankruptcy, composition, bad debts, folio, trial balance, company (limited and unlimited), invoice, receipt, voucher, cheque, bill of exchange. A knowledge of the transactions involved and the special terms used in connection with cheques, promissory notes, and bills of exchange. The forms and uses of the cash-book, the purchase-book or invoice-book, the sales-book or day-book, the journal and the ledger, and methods of keeping them. Journalizing an easy set of transactions, posting the journal, taking out trial balance, preparing profit-and-loss account, and balance-sheet. The prevention, detection, and rectification of errors.

(23) *Woodwork Theory.*

Tools and timbers: The classification, description (illustrated by hand-sketches), proper uses, and correct handling of tools; care of tools; their hardening, grinding, and sharpening; the functions of their several parts; the mechanical principles underlying their construction and manipulation.

A very elementary knowledge of the geographical distribution, appearance, and general character (including structure of trunk and limbs) of trees from which the timbers in common use in New Zealand are obtained; the countries and ports from which New Zealand receives its supplies of foreign timbers; the forms in which timber is brought into the market; the growth, felling, conversion, seasoning, storage, and preservation of timber; measurement of timber; selection of timber for particular purposes;

methods of working hard and soft woods ; appearance, characteristic properties (including specific gravity), and defects of timbers. Candidates may be required to identify specimens of timbers in common use.

Bench-work : Measuring and setting out work ; dressing a piece of timber truly ; principles to be observed in designing joints and fastenings. Processes—sawing, planing, paring, grooving and trenching, slotting, gouging, cutting curves, shaping and filing, chamfering, finishing ; fastening-devices—nails, screws, dowels, pins, cleats, keys, and wedges. Joints—the ordinary joints, including haunched mortise and tenon, bridle, mitre, common dovetail. Use of glues.

(24) *Metal-work Theory.*

The use of scales, calipers, and micrometer and vernier calipers ; measurement to ordinary tolerances in fitting and machine work. Simple workshop calculations, including questions involving elementary mensuration. The characteristics and properties of the commoner metals and alloys employed in metal-work, such as iron, steel, copper, brass, zinc, aluminium, &c.

The description, use, and care of setting out, measuring, and testing instruments and of hand tools. The setting-out of a simple piece of work from the drawing. Bench and forge work of a very simple character, drilling, hand riveting, soldering, and brazing.

(25) *Dressmaking and Needlework Theory.*

Selection : Choice and selection of clothes ; comparison of cost and wearing-values of cotton, linen, silk, wool, and mixtures ; suitable colours and appropriate style of clothes.

Patterns : Making of simple drafts from pupils' own measurements without reference to charts or other mechanical devices ; use and adaptation of commercial patterns.

Making up : Making up of articles for personal and household use ; the various stitches and processes used in dressmaking ; the application of ornamental stitchery to garments and household articles.

Care : Care of clothes ; removal of stains ; pressing ; mending and repairing garments, household linen and furnishings. Adaptation of adult garments for children's wear as required.

(26) *Housecraft Theory.*

House : Arrangements of house and position of equipment (especially with regard to kitchen, dining-room, and pantry) ; principles, construction, management of ranges, and of gas, electric, and oil stoves ; hot-water services ; how to set, light, and regulate fires ; fuels and economy of fuels. Care and cleaning of stoves, kitchen sinks and traps ; care and cleaning of floors, walls, windows, woodwork (plain, painted, and polished) ; the yard, including care and cleaning of drains, dustbins, and closets ; appliances for cleansing purposes ; cleaning and care of other things of the house. Arrangement of daily and weekly work.

Laundry : Choice and care of utensils and appliances. Sorting, steeping, washing, and finishing a household wash. Simple methods of disinfecting ; removal of stains ; treatment of fast and loose colours.

Foods : (a) Preservation of foods for out-of-season use.

(b) Planning, preparation, cooking, and serving of meals (including school lunches) for the different seasons of the year for a family consisting of adults and children. The meals should contain all the essentials of a normal diet for adults and children, and be chosen so that economical meals can be prepared, using different methods of cooking, without great expenditure of energy and time. The meals should be compared with respect to their values as sources of carbohydrates, fats, proteins, minerals, vitamins, and roughage.

(c) Modifications of diet suitable for invalids and convalescents.

(27) *Trade Drawing.*

All candidates must take Part I, and either Part IIA or IIB.

I. Use and care of drawing-instruments, including scales, pencils, pens, compasses, dividers, protractors, set-squares, and T square. How to test the accuracy of drawing-instruments, and how to correct errors. Hand-sketching in plan, elevation, and section. Use of squared paper.

IIA. *Engineering, &c.*—Measuring simple machine parts, determining position of centre lines, and dimensioning sketches. Sketching simple machine parts from memory. Drawing centre-lines, and completing plans, elevations, and sections to scale in pencil from dimensioned sketches of

simple machine parts. Tracing in ink, and dimensioning, &c. Conventional representation of screw-threads. Details of nuts, bolts, studs, rivets, cotters, keys, pins, and other fastening and locking devices.

II.B. *Building, &c.*—Hand-sketching in isometric projection. Proportions of the ordinary woodwork joints. Plans, elevations, and sections of simple building elements such as roof-joints, floor-construction, doors and door-frames, casement frames and sashes, cupboards, gates, &c. Details and proportions of simple mouldings, fastenings, &c.

Tracing in ink and dimensioning, &c.

(28) *Drawing.*

Any two of the following :—

I. *Freehand Drawing.*—Free drawing with pencil or brush. The candidate shall be required to draw on a quarter imperial sheet of paper (i) a natural object, or (ii) a fashioned or artificial object or group of such objects placed before him either above or below the line of sight. The object or objects are to be represented as seen from the point of view at which the candidate may be seated. The candidate may use the pencil or brush to estimate the apparent relative sizes of the objects or parts of the objects to be drawn, but only by holding it between the eye and the objects. No other form of measuring and no ruling or other mechanical means of execution are allowed. The drawing should express as clearly as possible the forms, contours, and textures of the several objects and their relative proportions and positions, and must fairly fill the sheet of drawing-paper.

II. *Instrumental Drawing.*—The candidate will be expected to be familiar with the geometrical operations and constructions set out in the prescription for geometry in subject (15). Mathematics: The measurement of straight lines and of angles. The construction of plain scales. Drawing to scale from dimensioned sketches. The methods of enlarging and of reducing a given diagram. Plans and elevations of straight lines and of plane figures lying in, standing vertically on, or inclined to the horizontal plane (but not in the latter case inclined also to the vertical plane). Plans and elevations and conventional isometric views of the following solids and of simple objects based thereon: the cube, the rectangular block, the triangular and square prism, the square and the hexagonal pyramid, the solid or object, as the case may be, having its base in the horizontal plane.

III. *Design.*—The planning and design of simple pattern. Elementary principles governing leading lines, distribution of parts and masses, and general arrangement. Rhythm and balance. The study of natural forms and their adaptation to elementary design for craft such as stencilling, leatherwork, needlework, wood-carving, plasterwork, &c.

Simple exercises in writing and illuminating. The Roman alphabet, uncials and half-uncials; use of the first-named in design.

Candidates may be required to draw or model natural forms, and to draw or model designs (based on the natural form drawn) to fill set spaces, or to be executed in given simple materials.

BLEDISLOE, Governor-General.

ORDER IN COUNCIL.

At the Government Buildings at Wellington, this 8th day of August, 1932.

Present :

THE RIGHT HON. G. W. FORBES, PRESIDING IN COUNCIL.

IN pursuance and exercise of the powers conferred upon him by the Exhibitions Act, 1910 (hereinafter called "the said Act"), His Excellency the Governor-General of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, doth hereby authorize the holding of a public exhibition of works of industry and art to be conducted by the Canterbury Agricultural and Pastoral Association (Incorporated) and the Canterbury Manufacturers' Association (Incorporated) in the King Edward Barracks at Christchurch, from the sixth day of August, one thousand nine hundred and thirty-two, to the twentieth day of August, one thousand nine hundred and thirty-two (both days inclusive), and to be known as the Canterbury Winter Show and Exhibition of Industries, and doth hereby declare the said exhibition to be an exhibition within the meaning of the said Act, and doth hereby suspend, subject, however, to the conditions set out in the Schedule hereto, all the provisions of the Shops and Offices Act, 1921-22, the Factories Act, 1921-22, and the Industrial Conciliation and Arbitration Act, 1925, and of all awards and industrial agreements in force under the last-named Act in so far as such provisions relate to the hours of commencing or ceasing work, or to the issue of permits for overtime or extended hours, or to holidays or half-holidays, or to the closing of shops to any person, and so far as such provisions relate to hours of work done or business conducted or service carried out in or upon the premises aforesaid during the period aforesaid by or on behalf of the bodies conducting the said exhibition, or by or on behalf of any exhibitor of works of industry or art at the said exhibition, or by any person employed in or about the said exhibition.

SCHEDULE.

(1) EIGHT hours shall constitute a day's work in or about the exhibition, and, with the exception set out in clause 2 hereof, such hours shall be worked consecutively.

(2) No person shall be employed in or about the exhibition for more than four hours without an interval of at least three-quarters of an hour for a meal.

(3) Any person employed during any day in or about the exhibition who is employed on such day in excess of eight hours or before the hour of 8 a.m. or after the hour of 10.30 p.m. (whether such excess employment is in or about the exhibition or otherwise) shall be paid for such excess

D

employment at not less than one-half as much again as the ordinary rate for the first two hours and at not less than twice the ordinary rate thereafter, and any person employed in or about the exhibition on any day that would, but for the provisions of this Order in Council, have been a whole holiday for such person by virtue of any Act or of any award or industrial agreement shall be paid for all work done on such day at not less than twice the ordinary rate, whether such work is performed wholly in or about the exhibition or otherwise.

(4) No female shall be employed in or about the exhibition after the hour of 10.30 p.m.

(5) For the purposes of the enforcement of an award or industrial agreement, any provision of which has been suspended by this Order in Council, any officer of the industrial union or association concerned, who is authorized in writing in that behalf by such union or association, shall be entitled to interview at his place of employment any person employed in or about the exhibition under that award or industrial agreement at such time or times as may be agreed upon by and between such officer and the employer of such person, and for this purpose any such officer shall be entitled at any reasonable time to have access to the register of passes issued by the Canterbury Winter Show and Exhibition Executive.

(6) Nothing in this Order in Council shall be deemed to affect any provisions in an award or industrial agreement relating to preference of employment.

*Withdrawing Land from the Operation of the Kauri-gum Industry Act, 1908.*

BLEDISLOE, Governor-General.

ORDER IN COUNCIL.

At the Government Buildings at Wellington, this 8th day of August, 1932.

Present :

THE RIGHT HON. G. W. FORBES, PRESIDING IN COUNCIL.

WHEREAS by section one hundred and sixty-two of the Land Act, 1924, it is enacted that the Governor-General may, by Order in Council on the recommendation of the Land Board, declare that any land comprised in a kauri-gum reserve shall, from a date to be specified in the Order, cease to be subject to the Kauri-gum Industry Act, 1908, and on and after the date so specified the land to which the Order relates shall become subject to the provisions of the Land Act, 1924 :

And whereas the Land Board of the North Auckland Land District has duly passed a resolution recommending that portion of the Puketotara Kauri-gum Reserve, as described in the Schedule hereto, be excepted from the operations of the Kauri-gum Industry Act, 1908, and it is expedient to give effect to such recommendation :

Now, therefore, I, Charles, Baron Bledisloe, Governor-General of the Dominion of New Zealand, in pursuance and exercise of the power and authority conferred upon me by section one hundred and sixty-two of the Land Act, 1924, and acting by and with the advice and consent of the Executive Council of the said Dominion, do hereby order and declare that portion of the Puketotara Kauri-gum Reserve, as described in the Schedule hereto, shall, from the nineteenth day of August, one thousand nine hundred and thirty-two, cease to be subject to the Kauri-gum Industry Act, 1908.

SCHEDULE.

ALL that area in the North Auckland Land District, Bay of Islands County, situate in Block I, Kawakawa Survey District, containing by admeasurement 78 acres, more or less, and being portion of Puketotara Kauri-gum Reserve, as described in *New Zealand Gazette*, 1901, No. 31, page 757, bounded as follows : Commencing at a point on a public road bearing 73° 37' distance 774 links ; and bearing 101° distance 899.1 links approximately from the north-eastern corner of Section 13, Block IV, Omopere Survey District ; thence on the north by the aforesaid road bearing 101° distance 190 links approximately ; bearing 85° 50' distance 1009.6 links ; bearing 75° 39' distance 942.2 links ; and bearing 83° 15' distance 816 links ; on the east by the other portion of Puketotara Kauri-gum Reserve, bearing 184° 51' 30" distance 4600 links approximately, and on the south-west and west by the Crown land 4100 links and 1000 links respectively. As the same is more particularly delineated on a plan marked L. and S. 6/4/1A, deposited in the Head Office, Department of Lands and Survey, at Wellington, and thereon edged red. *Land permanently reserved in the Otago Land District for the Purposes of the General Government.*

BLEDISLOE, Governor-General.

WHEREAS by the three-hundred-and-fifty-ninth section of the Land Act, 1924, it is enacted that the Governor-General may from time to time set apart temporarily as reserves, notwithstanding that the same may be then held under pastoral license, any Crown lands which in his opinion are required for any of the purposes in the said section mentioned:

And whereas by the three-hundred-and-sixtieth section of the said Act it is provided that land temporarily reserved under the said three-hundred-and-fifty-ninth section may, at the expiration of one month, but not later than six months, after the publication in the *Gazette* of notice of such temporary reservation, be permanently reserved, and that notice of such permanent reservation shall be published in the *Gazette*:

And whereas the land described in the Schedule hereto was by Warrant dated the eleventh day of May, one thousand nine hundred and thirty-two, and published in the *Gazette* of the nineteenth day of that month, temporarily reserved under the authority of the said Act for the purposes of the General Government:

Now, therefore, I, Charles, Baron Bledisloe, Governor-General of the Dominion of New Zealand, in pursuance and exercise of the powers and authorities conferred upon me by the said Act, do hereby permanently reserve the land described in the Schedule hereto for the purposes of the General Government, for which the said land was so temporarily reserved as aforesaid.

#### SCHEDULE.

ALL that area in the Otago Land District, containing by admeasurement 29.7 perches, more or less, being Section 1390A, and part Sections 32 and 35, Block XXXIII, Town of Havelock, and bounded as follows: Towards the north-west by a public road, 153.8 links and 249.8 links; towards the south-east by the railway reserve, 228.6 links; towards the south-west and south-east by part Section 34, Block XXXIII, Town of Havelock, 49.6 links and 199.9 links respectively: be all the aforesaid linkages more or less. As the same is more particularly delineated on the plan marked L. and S. 6/7/30A, deposited in the Head Office, Department of Lands and Survey, at Wellington, and thereon bordered red.

As witness the hand of His Excellency the Governor-General, this 3rd day of August, 1932.

*Hauraki Plains Drainage Area.—Notice of Intention to make and levy Rates.*

Department of Lands and Survey,  
Wellington, 5th August, 1932.

NOTICE is hereby given that it is intended, pursuant to the Hauraki Plains Act, 1926, to make and levy, on the unimproved value of all land within the district constituted under the said Act, the general rates to meet maintenance costs for the period 1st April, 1932, to 31st March, 1933, as described in the Schedule hereto.

The amount of such rates will be payable in one sum on the 26th August, 1932.

The valuation roll of the district is open for inspection at the office of the Collector of Rates, Chief Drainage Engineer's Office, Room 44, Government Buildings, Customs Street, Auckland, and a copy of same may be inspected at the office of the Chief Drainage Engineer, at Kerepehi, at all times at which those offices are open for the transaction of public business.

## SCHEDULE.

CLASS A : On the unimproved value of all land classified as Class A by the Appraiser appointed under the said Act—Threepence and twenty-two one-hundredths of a penny (3·22d.) in the pound.

*Authorizing the Laying-off of Road of less Width than 66 ft.*

Department of Lands and Survey,  
Wellington, 10th August, 1932.

WHEREAS in the opinion of the Minister of Lands it is inexpedient, by reason of the fact that the land shown upon the plan of Town of Brighton View Extension No. 3, affecting part Section 3A, Duncan Settlement in Block VII, Dunedin and East Taieri Survey District, is intended to be used wholly for residential purposes, that part of Edna Street shown therein should be of the width of 66 ft.

Now, therefore, I, Ethelbert Alfred Ransom, Minister of Lands, do hereby, in pursuance of the power conferred upon me by section 17, subsection (1), of the Land Act, 1924, and of every other power me thereunto enabling, authorize the laying-off of part of Edna Street of a width of not less than 40 ft.: Provided always that it shall not be lawful for any person to erect or cause to be erected any building at a less distance than 33 ft. from the middle of such road.

Given under my hand this 4th day of August, 1932.

E. A. RANSOM, Minister of Lands.

(L. and S. 25/709.)

*Rangitaiiki Land Drainage.—Notice of making and levying Rates.*

I, ETHELBERT ALFRED RANSOM, Minister of Lands, in the exercise of powers conferred upon me by the Rangitaiiki Land Drainage Act, 1910, and its amendments, do hereby make and levy on the unimproved value of all land within the district constituted under the said Act the general rates to meet maintenance costs for the period 1st April, 1932, to 31st March, 1933, as described in the First Schedule hereto; and the special rates to meet interest on capital for the period 1st April, 1932, to 31st March, 1933, as described in the Second Schedule hereto.

The amount of such rates will be payable in one sum on the 12th August, 1932.

The rate-book of the district is open for inspection at the office of the Collector of Rates, Chief Drainage Engineer's Office, Room 44, Government Buildings, Customs Street, Auckland, and a copy of same may be inspected at the office of the Chief Drainage Engineer, at Thornton, near Whakatane, at all times at which those offices are open for the transaction of public business.

NOTE.—A dry and sunny month, with comparatively light N.W. and S. winds prevailing. Precipitation, which amounted to 2.18 inches, was 48 per cent. below the average for June. It was the driest June since 1916, when only 133 points of rain were recorded. Total bright sunshine, 135.7 hours, 49 per cent. of the possible, and four sunless days. Frost was recorded on the grass on two mornings, and fog was in evidence on five days. Hail fell on the 28th, lightning was seen on four days, and thunder was heard on the 25th. Mean dew-point at 9 hours, 41.2°; and mean vapour pressure, 0.258 in.

SUMMARY FOR THE MONTH OF JUNE, 1932.

General.—The accounts received from different districts regarding the weather in June vary markedly according to whether or not they were exposed to the westerly winds which prevailed during the latter half of the month. Temperatures were actually below normal everywhere except in the southern half of the South Island, but in the Poverty Bay and Hawke's Bay districts, in Marlborough, North Canterbury, and parts of the interior of South Canterbury and Otago, the dry, sunny weather and absence of wind gave an impression of mildness. The effect on vegetation was evidently similar to that on man, since there are several reports of the early appearance of spring flowers, and some growth occurred in pastures. On the other hand, in the central and western portions of the North Island a series of severe frosts in the first half of the month was followed by a period of dull, wet, and boisterous weather. Pastures deteriorated in consequence, and cattle are losing condition. On the west coast of the South Island, though rainfall was somewhat above normal, conditions were not quite so bad. Similarly, in Southland the weather was very dull and the rain much above the average, but the mean temperature was about normal for June, and there were no severe cold snaps or heavy snowfalls. The country, therefore, is in a satisfactory state for the time of year. In the wheatgrowing districts the weather was favourable for farm work, and the sowing is well advanced.

Rainfall.—Rainfall was above normal in the western districts of both Islands and also in Southland. In the latter province and in the South Taranaki Bight the excesses were heavy. Much the greater part of the rest of the country had less than half the average for June.

Temperatures.—As already intimated, mean temperatures were, for the most part, below normal. The departures were, however, seldom large, and over the southern half of the South Island the normal was exceeded slightly. Several falls of snow occurred on the high levels, and the ranges now have a thick coating. In the low country there were no falls of any importance. Frosts were very numerous and frequently severe. The interior of the North Island, especially the Waikato district, experienced unusually heavy frosts in the first half of the month.

Sunshine.—In Taranaki and western Wellington and in the southern half of the South Island less than the average sunshine was recorded. At Invercargill the total duration was only 52.5 hours. Elsewhere the totals were considerably above the June average.

Winds.—Westerly and south-westerly winds prevailed, especially during the latter half of the month. About Foveaux Strait, and in Taranaki and the South Taranaki Bight, they were frequently boisterous.

*Thunderstorms.*—Thunderstorms were unusually frequent and severe, particularly in districts with a westerly aspect.  
*Pressure Systems.*—The first important storm occurred between the 4th and the 7th. This was a cyclonic depression which developed in the Tasman Sea, the centre crossing Otago on the 5th. Rain was almost general, and some severe thunderstorms were reported. One of these did damage to electric-power lines in North Auckland on the night of the 6th. On this same night there were extensive snowfalls on the ranges of both Islands.

The period from the 15th to the 28th was very disturbed. A series of depressions passed, the majority being of the westerly type. Showers or heavy rain were experienced every day in western and far southern districts. Thunder and hail storms were also of frequent occurrence. The Manawatu and neighbouring rivers were in flood for several days. Between the 16th and 18th some of the Southland rivers also were flooded. The heaviest and most widespread rain occurred on the 16th and 17th, when a cyclone again crossed Otago. Small tornadoes were experienced respectively at Whakatane on the night of the 16th and at Marton on the evening of the 25th. In both cases several buildings were wrecked. Eastern districts did not fare badly during the greater part of this time, but on the 28th a strong southerly set in, and a bitterly cold day was experienced throughout the country. Precipitation was almost general. Snow fell on the high levels of both Islands; and reached the low levels, but only in small quantities, in eastern and southern parts of the South Island. During the period here referred to barometers remained unusually low. On the 17th many places recorded pressures below 29 in. From the 29th the weather began to improve.

Minister's Decisions under Customs Acts.

Customs Department, Wellington, 4th August, 1932.

IT is hereby notified for public information that the Hon. the Minister of Customs has decided to interpret the Customs Acts in relation to the undermentioned articles as follows:—

NOTES.—(a) "Not elsewhere included" appears as n.e.i.; "other kinds" as o.k.; "articles and materials suited for, and to be used solely in, the fabrication or repair of goods within New Zealand" as a. and m.s. (b) Articles marked thus † are revised decisions. (c) Wherever the General Tariff rate shown opposite any goods enumerated in these decisions is lower than that provided for in the First Schedule to the Customs Amendment Act, 1927, action has been taken by the Minister under section 11 of the Customs Amendment Act, 1927. In such cases the reduced rate is marked with an asterisk. (d) Steam-engines, gas-engines, oil-engines, and electric or other motors are not, unless otherwise indicated, to be regarded as parts of the machines with which they are imported. (e) Surtax as provided for in section 5 of the Customs Acts Amendment Act, 1930, or primage duty as provided for in section 4 of the Customs Acts Amendment Act, 1931, as the case may be, is payable in addition to the duties set out hereunder.
