NOTE.—On the whole a windy, wet, and unsettled month, with mean temperatures 2.5 degrees below the average for August. Rainfall for the month was 75 per cent. above the normal. Total bright sunshine, 146.1 hours, 45 per cent. of the possible, and four sunless days. Frost was recorded on the grass on nine mornings, and hail fell on four days. Fog was in evidence on four days, and light flakes of snow fell on the 5th and 6th. Mean dew-point at 9 hrs., 39.1°; and mean vapour pressure, 0.238 in.

SUMMARY FOR THE MONTH OF AUGUST, 1932.

General.—August was a cold month in all parts of the Dominion, but in the latter half there were a number of mild days. Rainfall was still below average over the greater part of the Dominion, but the heavy rain from the 27th to the 29th caused a considerable excess in most of Taranaki and in Southern Wellington. Feed is rather scarce, especially for cattle. The low temperatures, however, were mitigated by the abundance of bright sunshine, and, following the rain towards the end of the month, the grass began to show signs of growth in most districts. Sheep appear to be doing fairly well, though there have been some losses of lambs during the cold snaps. The snow of the early part of the month and the floods of the latter end caused serious losses of stock in the Wairarapa.

Rainfall.—In the South Island there were only scattered parts of Canterbury and Otago that had more than the normal rainfall. In the North Island, in addition to the areas mentioned, parts of the Auckland Peninsula had more than the average. In Hawke's Bay and at many other places the month was a very dry one.

Temperatures.—The temperature was everywhere from one and a half to three degrees below normal. There were many severe frosts in the first half of the month, and from the 22nd to the 26th.

Sunshine.—All parts had more sunshine than usual. Nelson recorded 233.7 hours and Blenheim 218.1 hours, while the total of 208 hours at Waimate was very much above the average.

Pressure Systems.—The month began with a continuance of the same type of weather as had ruled during July. Depressions were mainly of cyclonic type, with the centres pursuing tracks which kept to the north of New Zealand. The most important of these cyclones passed Norfolk Island on the 3rd, and its passage coincided with that of a westerly depression to the southward. From Norfolk Island it moved in a south-easterly direction, becoming deeper in the process. The southerly winds in the rear of this depression were very cold and strong and peculiarly persistent. On every day from the afternoon of the 2nd, when they first reached the southernmost portion of the Dominion, until the evening of the 6th, when they finally died away, they brought hail, snow, and winds of gale force to many places. At first the full severity of the southerly was experienced only in the far South, but gradually it spread northwards. The 5th was a particularly bitter day. Snow fell down to low levels over an area covering the greater part of the South Island and all the interior and the high levels of the North. Even at Thames and on the Hauraki Plains there was a light fall. The Wairarapa suffered relatively the most severely, snow commencing on the night of the 3rd and not ceasing finally until the 6th. The total fall was the heaviest since 1918.

On the 7th an anti-cyclone moved on to New Zealand, the highest pressures being experienced in the South Island. This anti-cyclone maintained its position until the 13th, when it began to move away eastward. Barometers were at times very high. Although cyclones still continued to pass by to the northwards, bringing unsettled weather to varying proportions of the North Island, the weather was otherwise very fine. Many severe frosts were experienced, especially in the South Island.

The anti-cyclone just mentioned was the precursor to a more spring-like régime. Following it, depressions, though well developed, were of the normal westerly type. From the 13th to the 15th, as the first of these depressions approached, occurred the first really mild weather for a long period. The first two days, especially, were beautifully fine and produced

a most grateful impression. On the 15th the northerly winds freshened and rain became widespread in western and northern districts. By the time the depression had passed on the night of the 16th almost general rains had been recorded, with heavy falls in many places. This depression had been followed in Australia by an extremely intense anti-cyclone, the barometer in South Australia approaching 30.8 inches. New South Wales and Victoria suffered a very unusually cold spell with much snow. These conditions, however, failed to reach New Zealand, the southerly actually experienced being of only slight severity.

Another rather vigorous westerly depression passed during the 21st to 22nd. Rains were fairly extensive, especially in western districts and the North Island generally. In the southerly which followed this storm snowfalls were again fairly widespread.

The last storm of the month was a double westerly depression, the primary being followed by a secondary. It was not deep as it crossed the Tasman Sea on the 26th and 27th, but on the latter day a sharp rise of pressure and a change to southerly winds extended rapidly from Tasmania across the South Tasman Sea to Southern New Zealand. By the morning of the 28th the southerly invasion had covered the South Island, but appeared to have expended itself. Over the North Island, however, the northerlies not only continued to blow, but freshened. Throughout the 28th the situation remained almost unchanged, light southerly winds prevailing to just beyond Wellington, while above them and to the northward blew a strong northerly current of warm air heavily charged with moisture. As a result, torrential rains occurred in the southern portion of the Wellington Province and adjacent parts of Cloudy Bay and the Marlborough Sounds, where the northerly winds were forced to rise over the southerly. On the high levels, and even in the town of Masterton, there was a fall of snow. On the 29th the southerlies became stronger and extended farther northward, and there were more heavy rains. Following these rains unusually severe floods occurred in the Wairarapa and Manawatu districts. From Masterton to Lake Wairarapa it was said to be the severest flood for twenty years, and losses of stock around the lake were very heavy.

The weather improved on the 30th, and the 31st was a perfect day with clear skies, mild temperatures, and little wind.

Pastoral Run in Marlborough Land District open for License by Public Auction.

District Lands and Survey Office,
Blenheim, 17th October, 1932.

NOTICE is hereby given that the undermentioned pastoral run will be offered for license by public auction at the District Lands and Survey Office, Blenheim, at 2.30 o'clock p.m. on Monday, 21st November, 1932, under the provisions of the Land Act, 1924.

SCHEDULE.

MARLBOROUGH LAND DISTRICT.

Marlborough County.—Hodder and Avon Survey District.

(National-endowment Land.)

RUN 109: Area, 14,300 acres. Upset annual rental, £150. Term of license, twenty-one years.

Weighted with £648 15s for improvements, consisting of a cob whare (old), £30, half value 850 chains boundary fences, £318 15s., grassing, £300. This sum is payable in cash.

The run is situated in the Avon District, approximately twenty-five miles by good metalled road from Blenheim to Avondale Homestead, and then two miles by bridle track. A considerable portion of the country is rough and broken with numerous barren tops which rise to an altitude of 5,475 ft., rocky faces and shingle slides.

Manuka scrub and poor scraggy bush makes the back portion, approximately 6,000 acres, very difficult to muster.

An area of about 3,000 to 4,000 acres adjoining Lee-field and Avondale is quite good tussock land and should make excellent ewe country provided that the necessary subdivisional fencing is erected and the country cleared of wild pigs. The fences have been considerably knocked about by cattle and will require repairing.

The holding is well watered by running streams and should carry 3,000 dry sheep, but under good management should be able to carry 1,000 ewes and 2,000 dry sheep. The run is subject to rabbit rates, and applicants should inform themselves regarding same.

Full particulars may be obtained on application to the undersigned.

P. R. WILKINSON,
Commissioner of Crown Lands.

(L. and S. 8/6/82.)

S.G. RUN 122: Area, 4,594 acres. Half-yearly rent, £5 15s.

Weighted with £107 5s., for improvements which comprise wool-shed £50, storeroom £10, 26 chains subdivisional fencing £19 10s., and half value 74 chains boundary fencing, £27 15s. This sum is payable in cash or by a cash deposit of £7 5s., the balance to be secured by instalment mortgage to the State Advances Department, term 30 years, interest 6 per cent.

The run is situated in Wairau Valley, access being from Blenheim by good metalled road for thirty-five miles, thence by three miles of poor dray-track over the Wairau River. The majority of this country lies away from the sun and for the most part is thickly covered in fern and manuka with a slight sprinkling of danthonia on the lower slopes. Near the tops poor bush is prevalent. The tops are rock bound and subject to snow in winter. There are several acres of river flats, poor and covered with scab weed, and on account of stones cannot be effectively cultivated.

This run has previously been worked in conjunction with the run adjoining No. 123, and together carried approximately 800 sheep.

This property rises to an altitude of approximately 4,500 ft. The whole run is very broken, but well watered.

Patriarch and Mount Olympus Survey District.

S.G. Run 123: Area, 4,625 acres. Half-yearly rent, £8 13s. 6d.

Weighted with £486 5s., for improvements comprising three-roomed house (old and in poor condition) £60, stable and yard £40, dip and yards £25, whare £20, wool-shed (old poor order) £30, water-race £25, 100 chains drains £50, half value of 63 chains boundary fences £15 15s., 294 chains internal fences £220 10s. This sum is payable in cash or by a cash deposit of £96 5s., the balance (£390) to be secured by instalment mortgage to the State Advances Department, term thirty years, interest 6 per cent.

The run is situated in Wairau Valley, access being from Blenheim by good metalled road for thirty-five miles, thence by three miles of poor dray-track over the Wairau River. It is considered that about 50 acres is good ploughable country and with further draining would grow good crops. This run has previously been worked in conjunction with Run 122, and together carried approximately 800 sheep.

With the exception of the 50 acres ploughable flats the run lies away from the sun, the lower slopes being thickly covered with manuka scrub and fern with a slight sprinkling of danthonia.

Towards the tops poor bush is prevalent and the actual tops are rock bound and subject to heavy falls of snow.

This property rises to an altitude of approximately 4,000 ft. Full particulars may be obtained at this office.
