THE RIGHT HON. G. W. FORBES PRESIDING IN COUNCIL.

WHEREAS it is provided by section nine of the Local Authorities Interest Reduction and Loans Conversion Act, 1932-33, that, with the precedent consent of the Governor-General, given by Order in Council under section thirteen of the said Act, after compliance with the provisions of Part II of the Act, and subject to and in accordance with the provisions of such Order in Council, any local authority may issue new securities in conversion of any existing securities to which the said Act applies:

And whereas by the said section thirteen it is further provided that the Governor-General, by the Order in Council giving his consent to the conversion of existing securities by a local authority, may make such provisions as he thinks fit with respect to all or any of the matters specified in the said section, and that, subject to the provisions of the said Act, every Order in Council under the said section shall have the force of law as if enacted in the said Act, anything to the contrary in any other Act or in any regulations made under the said Act or any other Act notwithstanding:

And whereas the Wanganui-Rangitikei Electric-power Board (being a local authority within the meaning of the said Act) has issued securities in respect of the loan specified in the First Schedule hereto, and such securities are existing securities to which the said Act applies:

Now, therefore, His Excellency the Governor-General of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, and in pursuance and exercise of the powers and authorities conferred on him by the said Act, and of all other powers and authorities enabling him in this behalf, doth hereby consent to the issue by the said local authority of new securities in conversion of any existing securities to which this Order applies, and with respect to such conversion doth hereby make the following provisions.

(2) The holder of any existing securities bearing interest at a rate which, as reduced in accordance with Part I of the Act, exceeds the rate of interest payable on the new securities shall on the conversion of such securities be entitled to receive new securities for the same aggregate amount of principal as is secured by the existing securities, and, in addition thereto, shall be entitled to receive a premium on such principal computed in accordance with the Third Schedule hereto.

16. (2) For such purpose the local authority shall permanently appropriate a sum which bears the same proportion to the annual contribution payable, before the date of conversion, to the existing sinking fund of such loan as the aggregate amount of principal secured by such unconverted securities bears to the aggregate amount of principal secured by all the existing securities issued in respect of such loan, and shall pay such sum to the Commissioners yearly and every year until the maturity date of such unconverted securities, or until the Commissioners are satisfied that the accumulations of sinking fund will suffice to redeem such securities at maturity.

(3) The first of such yearly payments shall be made not later than one year after the date on which the last annual contribution payable before the date of conversion to the existing sinking fund of such loan was payable.

(4) Subject to the provisions of this Order, the provisions of sections forty to forty-four of the Local Bodies' Loans Act, 1926, shall, so far as applicable and with all necessary modifications, apply with respect to such sinking fund:

Provided that nothing in the said sections or in this Order shall authorize the removal or suspension of the Public Trustee as Commissioner of any sinking fund.

19. The existing sinking fund of the loan referred to in the First Schedule hereto shall be applied by the Commissioners thereof in or towards making the following payments, in the following order of priority, namely:—

- (a) Firstly, in transferring to the Commissioners of the sinking fund hereinbefore required to be created for the unconverted securities issued in respect of such loan a sum which bears the same proportion to the amount of such existing sinking fund at the date of conversion as the aggregate amount of principal secured by such unconverted securities bears to the aggregate amount of principal secured by all the existing securities issued in respect of such loan:
- (b) Secondly, in payment in accordance with the directions of the local authority of any cash payments required or authorized by this Order to be made in respect of premiums:
- (c) Thirdly, in redemption of existing securities that may be redeemed by the local authority pursuant to the power in that behalf conferred by the next succeeding clause:
- (d) Fourthly, if all the holders of the existing securities issued in respect of that loan consent thereto, in payment of the balance to the local authority.

(1) Where the whole of the existing securities issued in respect of any loan referred to in the First Schedule hereto are held by one holder, who is Commissioner of the existing sinking fund of such loan, the local authority may agree with such holder for the redemption of any such securities at the date of conversion.

(2) Payment of the moneys required for the purpose of any such redemption shall be made out of the existing sinking fund of the loan.

The provisions of sections twenty-two, twenty-three, and twenty-four of the New Zealand Debt Conversion Act, 1932-33 (relating to the adjustment of premiums as between capital and income and to the powers of trustees and other persons in relation thereto), shall apply with respect to existing securities converted into new securities in accordance with this Order in the same way as they apply with respect to securities converted under that Act, save that the references in the said section twenty-two to the first day of April, one thousand nine hundred and thirty-three, shall be construed as references to the day following the date of conversion.

(2) For such purpose the local authority shall permanently appropriate a sum which bears the same proportion to the annual contribution payable, before the date of conversion, to the existing sinking fund of such loan as the aggregate amount of principal secured by such unconverted securities bears to the aggregate amount of principal secured by all the existing securities issued in respect of such loan, and shall pay such sum to the Commissioners yearly and every year until the maturity date of such unconverted securities, or until the Commissioners are satisfied that the accumulations of sinking fund will suffice to redeem such securities at maturity.

(3) The first of such yearly payments shall be made not later than one year after the date on which the last annual contribution payable before the date of conversion to the existing sinking fund of such loan was payable.

(4) Subject to the provisions of this Order, the provisions of sections forty to forty-four of the Local Bodies' Loans Act, 1926, shall, so far as applicable and with all necessary modifications, apply with respect to such sinking fund:

Provided that nothing in the said sections or in this Order shall authorize the removal or suspension of the Public Trustee as Commissioner of any sinking fund.

## APPLICATION OF EXISTING SINKING FUNDS.

19. The existing sinking fund of every loan referred to in the First Schedule hereto shall be applied by the Commissioners thereof in or towards making the following payments, in the following order of priority, namely:—

(a) Firstly, in transferring to the Commissioners of the sinking fund hereinbefore required to be created for the unconverted securities issued in respect of such loan a sum which bears the same proportion to the amount of such existing sinking fund at the date of conversion as the aggregate amount of principal secured by such unconverted securities bears to the aggregate amount of principal secured by all the existing securities issued in respect of such loan;

(b) Secondly, in transferring the balance to the Commissioners of the consolidated sinking fund created to provide for repayment of the new securities issued under the Wanganui-Rangitikei Electric-power Board Loans Conversion Order, 1933 (No. 3).

(2) Subject to the provisions of this Order, the provisions of the Local Bodies' Loans Act, 1926, and of any other Act shall, so far as applicable and with all necessary modifications, apply with respect to such special rate, and with respect to the principal, interest, and other charges in respect of such securities, as if such special rate were made and levied in respect of a special loan raised under Part I of the said Local Bodies' Loans Act, 1926.

(3) Upon the making of such special rate every special rate heretofore made in respect of any existing securities to which this Order applies shall cease to be a security for the existing securities to which this Order applies.

## SECURITIES HELD BY TRUSTEES.

21. The provisions of sections twenty-two, twenty-three, and twenty-four of the New Zealand Debt Conversion Act, 1932-33 (relating to the adjustment of premiums as between capital and income and to the powers of trustees and other persons in relation thereto), shall apply with respect to existing securities converted into new securities in accordance with this Order in the same way as they apply with respect to securities converted under that Act, save that the references in the said section twenty-two to the first day of April, one thousand nine hundred and thirty-three, shall be construed as references to the day following the date of conversion.

## BROKERAGE.

NOTE.—A pleasant winter month, with rainfall 16 per cent. above normal. Total bright sunshine, 133.5 hours, 41 per cent. of the possible, and one sunless day. Frost was recorded on the grass on five mornings, and slight hail fell on the night of the 4th and the early morning of the 5th. On the 10th a heavy north-west gale was experienced. One gust of 80 m.p.h. occurred at 5.30 p.m., and there were several gusts between 75 and 78 m.p.h. during the day. Mean dew-point at 9 a.m., 42.6°; and mean vapour pressure, 0.272 in.

NOTES ON THE WEATHER FOR AUGUST, 1933.

General.—August was an excellent winter month. Reports from almost all parts of the country show that the season is unusually far advanced. There has already been some growth of grass, and crops and pastures are looking very well. Though temperatures have been about normal there has been an absence throughout the winter of days when strong winds, cold, and rain, hail or snow, combine to produce severe conditions for man, beast, and plant. The mountains are unusually free from snow for the time of year, while on the low levels there have been no falls of consequence. Stock have come through the winter very well, especially dairy cattle. The shortage of rainfall continues in Canterbury, Marlborough, and some other eastern areas. In parts of Canterbury feed is scarce and reserves are practically exhausted. Parts of the Wairarapa, also, are experiencing rather stringent conditions. The situation even in these districts would, however, be righted by good rains during the next two months, and the general outlook is very satisfactory.

Rainfall.—The distribution of rainfall during the month was too patchy to describe in detail. In general there was a deficiency in eastern districts, while western districts had approximately the average. The principal areas with an excess were on the Taranaki coast, about Cook Strait, and in the western parts of Otago and South Canterbury. In the Auckland Province conditions varied considerably from place to place. In Canterbury, Hawke's Bay, and Poverty Bay totals were much below average.

Temperatures.—Mean temperatures were rather above normal over the greater part of the country, but the contrary was the case in eastern districts from Marlborough northwards and in the far North. There was an absence of extremes of any kind, and frosts were less numerous and less severe than usual.

Sunshine.—The differences between the total sunshine recorded at various places and the averages for August did not show any systematic arrangement. Excellent records were experienced at Tauranga (211.1 hours), Lake Tekapo (197.0 hours), and New Plymouth (193.3 hours).

Pressure Systems.—None of the storms experienced during the month were severe, and there was a marked tendency for those coming from Australia to lose intensity before crossing the Dominion.

The first four days were cold, showery, and rather boisterous, owing to the passage of westerly depressions on the 2nd and 4th, the latter being the deeper of the two. Each was followed by southerly gales, while some parts had westerly or northerly gales as the second approached. Snow was widespread on the high levels, and numerous hailstorms were reported.

A fine spell followed until another westerly depression arrived on the 10th. This caused northerly gales, which were particularly strong in the Cook Strait area. At Carterton some damage was done by a small tornado. Again there were some hailstorms and a certain amount of snow on the high levels. Rain was almost general and many of the falls heavy. In South Auckland some flooding was reported.

A particularly fine and calm spell was then experienced, and it was not until the 21st and the 22nd that a complex depression once more caused practically general rains. There were north-easterly gales at many places from Cook Strait northwards on the 21st.

A fifth westerly storm passed slowly between the 24th and the 27th. All parts of the Dominion experienced some rain, and many of the falls were again heavy. Thunderstorms occurred at many places, especially in the North Island. A part of Auckland was affected by a short-lived hailstorm on the 27th in which some of the stones were unusually large. Pressure remained low to the east of the North Island for some time, and on the 28th heavy rains fell in the Hawke's Bay and Poverty Bay districts.
