(ii) At all points where it is necessary for the said electric lines to be carried across the first-mentioned wires, they shall be carried across and under the same at right angles if possible,

and the first-mentioned wires shall be carefully insulated at the expense of the licensee over a sufficient length to prevent any contact in the event of accident to either line, and proper guard-wires effectively earthed shall be provided where necessary, at the like expense, to prevent the first-mentioned wires or any other overhead wires from getting into contact with the said electric lines. 6. The design of all poles, posts, standards, brackets, and other attachments used in connection with the said electric lines shall be subject to the approval of the Minister, and they shall be constructed in accordance with such approved design, and erected in such manner as is approved in writing by the Minister.

7. The licensee shall take all reasonable precautions in constructing, placing, and maintaining the said electric lines and other works of all descriptions, and also in working the undertaking so as not to injuriously affect by fusion or electrolytic action any gas or water pipes, sewers, drains, or conduits, or other pipes, structures, or substances, or to injuriously interfere with the working of any telegraph, telephone, electric-lighting, or electric-fire-alarm lines or apparatus.

8. This license shall, unless sooner determined in accordance with the provisions hereinafter expressed, continue in force for a period of ten years from the date hereof. Upon expiry of the said term, or upon sooner determination of this license by revocation or otherwise, all rights hereby granted to the licensee shall cease and determine; but such expiration or determination shall not relieve the licensee of any liability theretofore incurred under this license.

9. The licensee shall rectify to the satisfaction of the Minister of Telegraphs or the Minister of Railways any interference or disturbance caused by the erection or operation of the licensee's system that affects the satisfactory working of the telegraph-lines which are the property of the Telegraph or Railways Departments and which were erected prior to the licensee's lines.

10. Notwithstanding anything contained in the regulations incorporated herein, no extensions or lines other than those along the routes hereinbefore described shall be deemed to be authorized by this license.

11. No electric car shall be supplied with electric power from the lines hereby authorized to be erected unless the licensee first receives from the Minister of Public Works a Warrant authorizing the use of that car.
