By-laws under the Rotorua Borough Act, 1922.

WHEREAS by section 8 of the Rotorua Borough Act, 1922, the control and ownership of electric light and power for supply of electric energy to the Borough of Rotorua is vested in the Department of Tourist and Health Resorts, as incorporated by the Rotorua Town Act, 1907, and the Rotorua Borough Act, 1922:

And whereas in respect of these works the said Department has all the power for the time being conferred by law on Borough Councils, except the power to borrow money or make and levy any special rate:

And whereas by the license granted by the Governor-General in Council as published in the *New Zealand Gazette* of the 5th November, 1931, and 1st October, 1936, the said Department is authorized to generate electricity and erect electric lines within the Borough of Rotorua and portion of the County of Rotorua as set out in the Schedules to the said licenses:

Now, therefore, the said Department, in pursuance of such powers and all other powers thereunto enabling it, doth hereby make the by-laws hereinafter set forth; and doth hereby revoke Part XIII of the Rotorua Town By-laws, 1909, as amended and published in the *New Zealand Gazette* of the 15th September, 1932, and further amendments thereto as published in the *New Zealand Gazette* of 9th March, 1933, and 30th August, 1934, and substitutes therefor the following new by-laws, and doth hereby declare that the said new by-laws and such revocation shall take effect and shall come into force on the 1st day of February, 1937.

BY-LAWS.

SUPPLY OF ELECTRIC ENERGY.

PART I.—GENERAL.

“The Department” means the Department of Tourist and Health Resorts.

“District Manager” means the officer of the Department for the time being in charge of the District Office of the Department.

“Departmental officer” means the officer for the time being in charge of the Department’s electrical supply at Rotorua, and also any officer authorized by him to act for the Department.

“Wireman” means any person licensed under the Wiremen’s Registration Act, 1925.

“Office” means the District Office of the Department situate in Fenton Street, Rotorua.

System of Supply.

1. Energy will be supplied by the single-phase and three-phase alternating-current system at a frequency of 50 cycles per second, and at a pressure of 115 volts single-phase and 200 volts three-phase, and also at 230 volts single-phase and 400 volts three-phase in the Rotorua Borough area. In the area outside the borough supply will be given at 230 volts single-phase and 400 volts three-phase:

Provided, however, that a supply at 115 volts single-phase will only be available pending completion of the change-over to the 230 volts single-phase system.

Applications.

2. Applications for supply of electrical energy must be made on the official application form, obtainable at the office or the substation.

3. This form, duly completed and signed by the consumer and the wireman, must be handed in to the substation, and written permission obtained from the Department before work is commenced. Applicants should first ascertain from the Department whether the supply is available; and, in event of any extension of the distributing main being necessary, whether such extension will be made by the Department free of charge.

4. The Department may require an applicant to pay the whole or part of the cost of any lines, poles, fittings, &c., for any distance in excess of 60 ft. via route of wire from the property boundary to premises to be connected.

5. Where considered necessary, pole-top fuses will be supplied by the Department.

6. At least fourteen days’ notice should be given to the Department by the wireman of supply required; and, while every effort will be made to give the supply by the date quoted, the Department is not bound in any way to do so.

7. Upon acceptance of the application a departmental officer will inspect the premises by appointment, and indicate to the wireman the position of the meter-board and the point of entry for the service mains. The Department has the sole right to determine the point where the main shall enter the building and where the meter shall be situated.

Installations.

8. The wiring and fittings in the consumers’ premises must be in accordance with the Electrical Supply Regulations, 1935, the Electrical Wiring Regulations, 1935, and the Electrical Wiremen’s Registration Act, 1925, and any amendments thereof, and to the entire satisfaction of a departmental officer, who shall be given free access to such premises during the progress of the said work, and shall, if he deem it necessary, have the right to require the wireman to open up any joint, or to remove any casing, conduit, wires, or fittings, for the purposes of ascertaining if the work has been properly executed. The wireman must reinstatate at his own expense any work such officer may have examined in the manner set forth.

9. The main cutouts, main switch, and meters are to be placed as near to the point of entry of the mains as possible, and, provided such position is convenient, it is advisable that the distributing-board be placed in immediate proximity to the meter.

10. The board must be erected at such a height that the meter-dial will not be more than 7 ft. from the floor and in a well-lighted position. The meter-board shall be drilled ready for the erection of the meters, and leads shall be provided for connecting up the meter. The connections on main-board must be in the order of main cutout, main meter, main switch.

11. All distribution-boards must be provided with suitable cutouts which can be sealed. These will be fixed and sealed by the Department, and must not be opened or the fuses changed by other than a departmental officer. Space must be provided on such board for the Department’s meters. The Department may make a charge for renewing any sealable fuse if the fuse has been blown by a fault in the consumer’s installation.

12. If in any premises there are (a) any temporary wires or fittings, or (b) if any instructions relative to the installation deemed necessary by a departmental officer have not been complied with, or (c) if the whole of the work is not completed with all fittings fixed and fuses in place, the Department will not supply energy to such premises unless written consent to such supply has previously been obtained from the Department.

Temporary Work.

13. Temporary wiring will only be allowed by special permission of the Department. Temporary work must not be connected up until it has been inspected and passed by a departmental officer.

Motors.

14. Where a three-phase supply is available, motors of over 1 horse-power must be three phase. On single-phase mains connection of larger size motors will be granted only by special permission of the Department previously obtained. All motors shall be installed, and starting-devices provided, so that a minimum of disturbance is caused in the supply-lines by the starting-current.

15. Energy used to drive motor generators for lighting purposes will be charged for at lighting rates.

Testing.

16. On completion of any work the wireman shall notify the Department in writing, and a test for departmental purposes will then be made. If satisfactory, supply will be given; but should the installation be incomplete or the test prove unsatisfactory, supply will be refused until defects have been remedied. A charge of not less than 5s. will be made for each subsequent test. These tests are for departmental purposes only, and do not release the wireman from any liability to the consumer should a fault subsequently develop.

Inspection.

17. The consumer will at all reasonable times give a departmental officer access to his premises for the purposes of reading the meter or testing and examining all internal electric lines, meters, and other fittings. If in the opinion of such officer the electric lines, meters, or other fittings shall be deemed unsatisfactory, the Department may immediately cut off the supply until such defect is remedied.

18. The Department shall not be responsible for any delay in connecting a consumer to the supply mains.

Alterations or Additions.

19. The consumer shall not, after a supply of energy has been given, make or allow to be made any alterations or additions to the wiring, fittings, or apparatus connected thereto until a written application has been made to the Department and such application has been granted by the Department.

20. The alterations or extensions will be treated as if they formed part of a new installation, and must not be connected until they have been inspected and passed by a departmental officer.

21. If the above conditions are not complied with the consumer's supply is liable to be disconnected without notice.

Interruptions.

22. Electrical energy will be supplied continuously, but the Department will not be responsible for any inconvenience or loss that may be sustained by a consumer in consequence of interruptions or defects of supply caused by strikes, tempests, or earthquakes, or accidents to machinery, electric lines, or other apparatus, or on account of its being deemed necessary by the Department to cut off the supply for temporary repairs or in consequence of any operation of the Department.

Formal Contracts and Deposits.

23. The Department may require any consumer to enter into a formal contract, or to pay a deposit as security for energy supplied.

24. In the event of no formal contract being entered into between the Department and the consumer, the latter, after the supply has commenced, shall be held to have agreed to, and shall be bound by, these conditions of supply.

Meters.

25. A meter or meters will be provided free of charge to measure the total power going into an installation, but if for the purposes of the consumer (a) check meters or (b) any other special meters are installed to meet the requirements of the consumer, the consumer shall pay a monthly charge of 6d. for each extra meter.

26. If the accuracy of a meter is questioned by a consumer the Department will arrange for a test to be made provided the sum of 5s. is deposited at the office. If the meter be found after testing to register within 2½ per cent. of the quantity passing through it, the meter shall be deemed to be correct, and the deposit aforementioned shall be forfeited.

27. If the meter is not correct, adjustment will be made in the consumer's account for one month, and the deposit will be returned.

Change of Occupancy.

28. Each consumer will be held responsible for the electric energy consumed on the premises specified in the application until written notice has been received by the Department that the supply is to be discontinued or transferred. Such notice must be given to the Department forty-eight hours before the consumer wishes the supply to be cut off. In the event of a consumer ceasing to require the supply and failing to give the required notice in advance, such consumer shall be charged for all supply registered on the meter.

Disconnection.

29. It shall be a breach of these by-laws—

(a) If the consumer makes use of the electrical supply for any other purpose than that set forth in his application, or uses or deals with the energy supplied by the Department in any manner so as unduly or improperly to interfere with the efficient supply of energy to other consumers; or

(b) If the consumer shall refuse access to his premises at any reasonable time to a departmental officer for the purpose of inspecting, testing, reading, removing, or fixing the meter, or of inspecting and testing the consumer's wiring and fittings; or

(c) If the consumer's installation shall, upon testing, not comply with the tests as set out in the Wiring Regulations, 1935; or

(d) If the consumer or any person with his knowledge or connivance tamper with, break the seals of, or wilfully damage any meter or apparatus on his premises, being the property of the Department, or shall fraudulently obtain a supply of electricity from the Department's service wires or apparatus; or

(e) If the consumer make default in paying for the electric energy supplied to him; or

(f) If the consumer shall in any way contravene the terms in his application and the Department in addition to taking action for any such breach may discontinue the supply of electric energy to such consumer.

Reconnection.

30. If the Department should discontinue the supply to the consumer for any of the reasons in clause 29, then a payment of 5s. shall be made for the reconnection of the installation.

31. When an installation has been disconnected, reconnection shall be made by a departmental officer only.

Saving.

32. In any matter relating to material or workmanship which forms part of any installation, connected or to be connected to the Department's mains, but which is not specially provided for in these by-laws, the decision shall be made by the Department, and such decision shall be final.

33. The Department reserves the right to decide the particular charge of those quoted in clause 35 which shall apply to any consumer; to restrict the use of any apparatus to defined hours; to refuse to give supply, or to continue to supply any apparatus the use of which is prejudicial to the supply given to other consumers; to make special charges for supply of energy in cases not provided for in these by-laws.

34. The Department may from time to time make, alter, amend, or revoke by-laws to regulate and determine—

- (1) The sale and distribution of electricity;
- (2) The terms and conditions under which electrical installations may be used by consumers.

Charges.

35. The price for electrical energy supplied by the Department will be calculated on the Board of Trade unit consisting of 1,000 watt-hours. All energy will be charged according to meter register, but should a supply be given before a meter is installed the consumer shall pay for current supplied during such period a sum based upon the number and capacity of lamps and other apparatus installed.

In all cases units may, at the option of the Department, be measured as kilovolt-ampere hours instead of kilowatt-hours if the power factor of the consumer's load falls below 90 per cent.

Should the meter prove defective in any way, or be removed for testing or repair, the consumer shall pay per month for energy supplied during such period a sum based on the average former reading of the meter.

If the revenue from any existing or proposed installation does not cover the cost of supply, the Department may impose a connected-load charge in addition to the charge by meter.

Prepayment meters may be installed in any installation at the discretion of the Department.

The charges for energy supplied shall be computed monthly, and shall be as follows:—

(a) (1) Lighting—

1-40 units ..	6d. per unit net.
41-280 „ ..	5d. „
281-1,000 „ ..	4d. „
Over 1,000 „ ..	3d. „

(2) Where prepayment meters are installed the charge shall be 6½d. per unit for lighting and 2½d. per unit for domestic heating and cooking purposes. This rate will be operative from the date the new price mechanisms are installed.

(3) For motor camps, or similar installations, the following alternative tariff is available: Where not less than ten (10) prepayment meters are installed in the same installation, for supply to heating appliances only, the charge shall be 1½d. per unit with an average minimum charge of £2 per meter per annum.

A minimum may be required where these meters are installed, as provided for in clause 35 (h).

(b) For floodlights, or advertising-lighting, the following alternative to clause (a) is available: The consumer may pay a monthly charge at the rate of 1s. 6d. per 100-watt lamp, the energy consumed to be charged for at ordinary heating-rates (clause (e)).

(c) (1) For domestic heating, power, and electrical appliances and supply of a similar nature—

1-16 units ..	3d. per unit net.
17-48 „ ..	1½d. „
Balance units ..	1d. „

Churches shall be included under this scale.

(2) When the consumer installs an electric cooking-range the charge for all the energy consumed by such range during the six months immediately following its installation shall be 1d. per unit.

At the expiry of the six-months period energy supplied for the range will be charged as per scale (c) (1).

(3) Where in domestic installations supply is given to consumers for lighting and heating, lighting and power, or all three through one meter, or the supply is given through separate meters, the readings of these meters may be combined and the consumption shall be charged per the following scale :—

Number of Rooms.	Units at Lighting Rate.	Units at Domestic Heating Rate.
1	5	Balance.
2	6	„
3	7	„
4	8	„
5	10	„
6	12	„
7	13	„
8	14	„
9	16	„
10	18	„
11	20	„
12	22	„
13	24	„
14	26	„
15	28	„

Bathroom, scullery, pantry, linen-press, halls, W.C., washhouse not to count as rooms.

Should a dispute arise as to what constitutes a room, the decision of the Department shall be final. Where residences are let as apartments or flats and require separate meters for various tenants each set of rooms shall be separately rated as per Schedule.

- (d) (1) For commercial or domestic hot-water heating, where the use is limited to "off peak" hours, supply will be given at a special net rate per unit of ½d.
- (2) If to control this use of energy it is necessary to use a time-switch, the consumer shall supply an approved time-switch.
- (3) If the switch is supplied by the Department the consumer shall pay rent for such at the rate of 12s. per annum.
- (4) Under special conditions this rate will be available for energy consumed for industrial or other approved purposes between the hours of 10.30 p.m. and 7 a.m. These conditions will be supplied on request.
- (e) (1) For industrial motor supply, office radiators, and similar appliances, where the supply is not used during the evening hours—
 - 1 to 20 units 3d. per unit.
 - 21 to 1,000 units 2d. per unit.
 - Balance of units 1d. per unit.
- (2) If the supply is used during evening hours as well as daylight hours the charges shall be for the whole consumption at the rate of 3d. per unit.
- (3) When a consumer installs a synchronous motor, and such motor is operated at not less than unity power-factor, a special and additional discount of 10 per cent. will be allowed.
- (4) For each unit for arc generators, for picture-theatres, or for similar supply, 4d. per unit.
- (f) For farms and milking plants the charge shall be as follows, such charges being subject to a special minimum charge based on the distance of the consumer's installation from the point of supply :—

Lighting : As per scale (a) (1).

Heating : As per scale (c) (1) and cooking.

Water-heating : Energy for water-heating in the milking-shed will be supplied at the rate of £5 per kilowatt per annum, provided that the water-heater is on a change-over switch with the motor, so that the heater and motor cannot be used simultaneously.

Power for milking and separating :—

1-20 units per month	..	3d. per unit.
21-1,000 units per month	..	2d. per unit.
Over 1,000 units per month	..	1d. per unit.

Pumping motor supply : Where this supply is metered the charge shall be as for milking and separating ; where not metered the charge shall be £8 per horse-power per annum if on a change-over switch with the milking motor, £10 per horse-power per annum if unrestricted.

Where such supply is taken between the hours of 10.30 p.m. and 7 a.m. the charge shall be at the rate of one-third of a penny per unit, with a minimum charge of 4s. per month.

(g) All charges are net monthly charges, and the net account will be computed on these charges. The gross amount payable will be the above net account plus an additional charge of twopence (2d.) per one shilling (1s.) of the net account (parts of a 1s. not to be taken into account for the purpose of computing this charge). If payment is made on or before due date (see clause (i)) the additional charge will be deducted as a discount.

(h) The minimum charge shall be not less than 2s. 6d. per month for all consumers in the Borough of Rotorua, and not less than 4s. per month for all other consumers, except that for churches and other approved institutions, special arrangements may be made.

(i) Discount will be allowed on current accounts only, and is subject to the following conditions, namely :—

(1) That the full amount of the account, including all arrears, is paid within fourteen days of the reading of the meter.

(2) Except that irrespective of date of reading of meter, discount will be allowed only if payment is made on or before the last working-day of such month.

(3) Except that should the last day of the period allowed for discount be a Saturday, Sunday, or public holiday, discount shall be allowed on the working-day immediately following.
