Provisional Plan for Reorganization of Flax Industry.

PURSUANT to the provisions of subsection (3) of section 9 of the Industrial Efficiency Act, 1936, I hereby give notice that a provisional plan of rehabilitation and reorganization of the flax (*Phormium tenax*) industry has been prepared by the Bureau of Industry, and that the following are the material proposals contained in the plan:—

1. Minimum guaranteed prices for phormium fibre to be declared from time to time, such prices to be based on a grade schedule, and to remain in force for a sufficient time to secure necessary stability in the industry.

2. A system of licensing of flaxmills to be introduced.

3. An immediate advisory service for flaxmillers to be established by the Government, such service being designed to make available to flaxmillers the most up-to-date information in regard to improvements in the methods and machinery used in the processing of phormium fibres.

4. The Government to provide finance for—

- (a) The purchase of approved grades of phormium fibre at declared selling points.
- (b) The marketing under the control of the State of such fibre overseas and internally.
- (c) The provision of stocks overseas, and the prosecution of publicity and investigational work, including the maintenance of contact with spinners of fibre, with a view to encouraging the greater use of New Zealand phormium overseas.

5. Government protection to be given for the development of the domestic textile industry by means of restricting importations of raw or manufactured material as occasion warrants.

6. The fostering of the domestic manufacture of textiles, cordage, &c., from phormium.

7. The control, if considered necessary, of the level of royalties charged on *Phormium tenax* supplied to mills.

8. A properly staffed and equipped research organization to be established with the object of investigating all problems associated with the cultivation, processing, and utilization of *Phormium tenax*.

9. A suitable area of land to be purchased by the Government and used for the following purposes:—

- (a) To supply phormium leaf, including cultivated leaf, to a Government-operated mill to be established on the lines indicated in section 10.
- (b) To propagate and grow phormium plants of approved strains.
- (c) For experimental work on planting, cultivation, harvesting, and utilization of phormium.

10. A Government mill to be established, consisting of—

- (a) An experimental section.
- (b) A commercial section of approximately 300 tons per annum capacity.

11. Approved strains of phormium plants to be tested and multiplied, and distribution arranged to commercial areas.

12. An Industrial Committee to be set up under the Industrial Efficiency Act, the Committee to be given by regulations the necessary powers to reorganize and control the industry in accordance with the plan of rehabilitation.

Any person or organization who, in his opinion, will be directly affected thereby if and when the plan is brought into operation is requested, if he so desires, to forward to me in writing, within one month of the date of publication of this notice, any recommendations or objections to the plan.
