By-laws under the Rotorua Borough Act, 1922.

WHEREAS by section 8 of the Rotorua Borough Act, 1922, the control and ownership of electric light and power for supply of electrical energy to the Borough of Rotorua is vested in the Department of Tourist and Health Resorts, as incorporated by the Rotorua Town Act, 1907, and the Rotorua Borough Act, 1922:

And whereas in respect of these works the said Department has all the power for the time being conferred by law on Borough Councils, except the power to borrow money or make and levy any special rate:

And whereas by the license granted by the Governor-General in Council as published in the *New Zealand Gazette* of the

5th November, 1931, and 1st October, 1936, the said Department is authorized to generate electricity and erect electric lines within the Borough of Rotorua and portion of the County of Rotorua as set out in the Schedules to the said licenses:

Now, therefore, the said Department, in pursuance of such powers and all other powers thereunto enabling it, doth hereby revoke By-laws No. 30 and 35 of the By-laws published in the *New Zealand Gazette* of the 18th February, 1937, and substitutes therefore the following amended by-laws, and doth hereby declare that such revocation shall take effect and such new by-laws shall come into force on the 1st day of February, 1939.

BY-LAW 30.

If the Department should discontinue the supply to a consumer for any of the reasons set out in By-law No. 29, or if an installation is disconnected at the request of the consumer for any reason other than a change of tenancy, then a payment of 5s. shall be made for the reconnection of such installation, together with reasonable travelling-expenses if incurred by the Department in the case of installations outside the Borough of Rotorua.

BY-LAW 35.

The price for electrical energy supplied by the Department will be calculated on the Board of Trade unit consisting of 1,000 watt-hours. All energy will be charged according to meter-register, but should a supply be given before a meter is installed the consumer shall pay for current supplied during such period a sum based upon the number and capacity of lamps and other apparatus installed.

In all cases units may, at the option of the Department, be measured as kilovolt-ampere hours instead of kilowatt-hours if the power factor of the consumer's load falls below 90 per cent.

Should the meter prove defective in any way, or be removed for testing or repair, the consumer shall pay per month for energy supplied during such period a sum based on the average former reading of the meter.

If the revenue from any existing or proposed installation does not cover the cost of supply, the Department may impose a connected-load charge in addition to the charge by meter.

Prepayment meters may be installed in any installation at the discretion of the Department.

The Department may read meters monthly or quarterly or at any other interval that best suits its convenience. Should a special reading be required at any time to suit the convenience of the consumer, such reading will be made or a card will be forwarded on which the consumer can enter the reading of the meter or meters, and an account will be prepared from the readings on this card. A charge may be levied to cover the cost of the special readings as above.

Where premises are occupied intermittently, and/or a reading of the meter is not obtained at the time of the ordinary meter-reading, a card may be left for or sent to the consumer. This card should be filled in and returned to the Department to enable an account to be prepared.

Failing the receipt of the card within a period of ten days, the Department will assume that the premises have been unoccupied for the last period between regular meter-readings and an account computed in accordance with clause 35 (g) will be forwarded to the consumer.

In cases where the previous account or accounts have been assessed in accordance with the preceding paragraph, the Department on receiving a reading of the meter, may compute the consumption on the basis that the consumer has been in occupation for the whole or part of the period from the date of the last actual reading. Such computation shall not, however, prejudice the right of the consumer to certify that the premises were occupied for a greater or lesser period than that assessed by the Department. On receiving such a certificate the Department will adjust the account accordingly, provided the periods when the premises were unoccupied exceed one month continuously.

The charges for energy supplied shall be computed monthly, and shall be as follows:—

(a) (1) Lighting:—		
1- 280 units	..	5d. per unit.
280-1,000 units	..	4d. per unit.
Over 1,000 units	..	3d. per unit.

(2) Where prepayment meters are installed the charge shall be 5½d. per unit for lighting and 1½d. per unit for domestic heating and cooking purposes. This rate will be operative from the date the new price mechanisms are installed.

(3) For motor camps, or similar installations, the following alternative tariff is available: Where not less than ten (10) prepayment meters are installed in the same installation, for supply to heating appliances only, the charge shall be 1½d. per unit with an average minimum charge of £2 per meter per annum.

A minimum may be required where these meters are installed, as provided for in clause 35 (g).

(b) For flood-lighting or advertising lighting the following alternatives to clause (a) are available:—

Neon lighting or similar	{ 3s. 6d. per month per 100 V.A. continuous. 3s. per month per 100 V.A. dusk to 11 p.m.
Metal filament lighting.	
	3s. 6d. per 100 watts, dusk to 11 p.m.

(c) (1) For domestic heating, power, and electrical appliances and supply of a similar nature:—

1-48 units	1½d. per unit net.
Balance units	1d. per unit net.

Churches shall be included under this scale.

(2) When the consumer installs an electric cooking-range the charge for all the energy consumed by such range during the six months immediately following its installation shall be 1d. per unit.

At the expiry of the six-months period energy supplied for the range will be charged as per scale (c) (1).

(3) Where in domestic installations supply is given to consumers for lighting and heating, lighting and power, or all three through one meter, or the supply is given through separate meters, the readings of these meters may be combined and the consumption shall be charged per the following scale:—

Number of Rooms.	Units at Lighting Rate.	Units at Domestic Heating Rate.
1	5	Balance.
2	6
3	7
4	8
5	10
6	12
7	13
8	14
9	16
10	18
11	20
12	22
13	24
14	26
15	28

Bathroom, scullery, pantry, linen-press, halls, W.C., wash-house not to count as rooms.

Should a dispute arise as to what constitutes a room, the decision of the Department shall be final. Where residences are let as apartments or flats and require separate meters for various tenants each set of rooms shall be separately rated as per Schedule.

(d) (1) For commercial or domestic hot-water heating, where the use is limited to "off peak" hours, supply will be given at a special net rate per unit of 1½d.

(2) If to control this use of energy it is necessary to use a time-switch, the consumer shall supply an approved time-switch.

(3) If the switch is supplied by the Department the consumer shall pay rent for such at the rate of 12s. per annum.

(4) Under special conditions this rate will be available for energy consumed for industrial or other approved purposes between the hours of 10.30 p.m. and 7 a.m. These conditions will be supplied on request.

(e) (1) For industrial motor supply, office radiators, and similar appliances, where the supply is not used during the evening hours—

1 to 20 units	3d. per unit.
21 to 1,000 units	2d. per unit.
Balance of units	1d. per unit.

(2) If the supply is used during evening hours as well as daylight hours the charges shall be for the whole consumption at the rate of 3d. per unit.

(3) When a consumer installs a synchronous motor, and such motor is operated at not less than unity power-factor, a special and additional discount of 10 per cent. will be allowed.

(f) For farms and milking-plants the charge shall be as follows, such charges being subject to a special minimum

charge based on the distance of the consumer's installation from the point of supply:—

- Lighting: As per scale (a) (1).
- Heating: As per scale (c) (1) and cooking.
- Water-heating: Energy for water-heating in the milking-shed will be supplied at the rate of £5 per kilowatt per annum, provided that the water-heater is on a change-over switch with the motor, so that the heater and motor cannot be used simultaneously.
- Power for milking and separating:—
 - 1-20 units per month 3d. per unit.
 - 21-1,000 units per month 2d. per unit.
 - Over 1,000 units per month 1d. per unit.

Pumping motor supply; where this supply is metered the charge shall be as for milking and separating; where not metered the charge shall be £8 per horse-power per annum if on a change-over switch with the milking-motor, £10 per horse-power per annum if unrestricted.

Where such supply is taken between the hours of 10.30 p.m. and 7 a.m. the charge shall be at the rate of one-third of a penny per unit, with a minimum charge of 4s. per month.

(g) The minimum charge shall be not less than 2s. 6d. per month for all consumers in the Borough of Rotorua, and not less than 4s. per month for all other consumers, except that for churches, schools, and other approved institutions special arrangements may be made.

(h) (1) All charges are net monthly charges, and the net account will be computed on these charges. The gross amount payable will be the above net account plus an additional charge of twopence (2d.) per one shilling (1s.) of the net account (parts of a ls. not to be taken into account for the purpose of computing this charge). If payment is made on or before due date (see clause (i)) the additional charge will be deducted as a discount.

(2) The additional charge as in (h) (1) shall not be added to accounts for Government Departments, local bodies, hospitals, Fire or other Boards.

(i) Discount will be allowed on current accounts only, and is subject to the following conditions, namely:—

- (1) That the full amount of the account, including all arrears, is paid within fourteen days of the reading of the meter.
- (2) Except that, irrespective of date of reading of meter, discount will be allowed only if payment is made on or before the last working-day of such month in which the meter is read.
- (3) Except that should the last day of the period allowed for discount be a Saturday, Sunday, or public holiday, discount shall be allowed on the working-day immediately following.
- (4) For accounts rendered under clause 35 (f) discount will be allowed if the account is paid on or before the twenty-fourth day of the month in which the account is issued.
- (5) In any case of hardship the Minister in Charge of the Department may allow discount if payment is made within seven days after the last ordinary day for the allowance of discount.
