Now, therefore, His Excellency the Governor-General of the Dominion of New Zealand, acting by and with the advice and consent of the Executive Council of the said Dominion, and in pursuance and exercise of the powers and authorities conferred on him by section eleven of the Local Government Loans Board Act, 1926, as set out in section twenty-nine of the Finance Act, 1932 (No. 2), and of all other powers and authorities enabling him in this behalf, doth hereby vary certain of the determinations aforesaid in respect of the said sum by prescribing as follows:—

GALWAY, Governor-General.

WHEREAS the Grey County Council proceeded by way of special order to raise a loan of seven hundred and fifty pounds (£750) to be known as "Coal Creek Flood-protection Loan, 1937" (hereinafter called "the said loan"):

And whereas the proceedings in connection with the said loan were irregular or defective in that the public notice of the resolution to make the special order authorizing the raising of the loan although given once in each of four weeks was not given once in each of the four weeks immediately preceding the day on which the meeting was held for the purpose of confirming that resolution as required by subsection (c) of section ninety-nine of the Counties Act, 1920:

And whereas it appears that the ratepayers of the district have not been misled by such irregularity as aforesaid and it is expedient to validate the same:

NOTE.—The month was remarkable for the amount and intensity of the rainfall. On the 7th, 11th, and 26th-27th, abnormally heavy falls occurred. On the 7th, in little over an hour, 1.08 in. was registered. Many slips occurred on the 11th and again on the 26th-27th. A north-west gale blew on the 7th and one from the south-east on the 11th.

NOTES ON THE WEATHER FOR DECEMBER, 1939.

General.—For the whole Dominion December was rather a mixed month, but fine, warm weather predominated. Most of the precipitation came in substantial falls and the rain had refreshing effects, sustaining good pasture growth, especially in the North Island where very satisfactory crops of ensilage and hay have been harvested. The land over the greater part of Canterbury and Otago has continued too dry for the cereal crops, and with the feed shortage the autumn prospects are poor. Some of the coastal districts, however, had better rains which will help to fill the wheat. The reports indicate the excellent condition of stock. White butterflies are in evidence but in restricted numbers.

Rainfall.—Many districts had heavy rain but the totals came close to the average over a large part of the country. Falls in the North Island tended to be slightly above the average, but in the immediate neighbourhood of Wellington December was the wettest of any month since records were first taken. In the South Island there were rainfall deficits, most marked in South Canterbury and Otago, while the rainfall was somewhat above normal in the far south-west, and in considerable excess along the east coast from Banks Peninsula northwards.

On several occasions there were scattered hail showers associated with thunderstorms, more especially in Hawke's Bay. During the month flooding occurred in the north of the South Island and twice in the south of the Wellington Province.

Temperatures equalled or exceeded normal values, departures in the south being slightly larger than those in the north. Some departures in Otago exceeded 4° F. Humid conditions over a part of the month gave cloudy nights, resulting in fairly high minimum temperatures.

Sunshine.—The number of hours of bright sunshine either approached closely or exceeded the normal figures. Both Auckland and Blenheim averaged some two hours a day above normal, but Napier headed the list with its 291 hours.

Pressure Systems.—On the 1st, pressure was high to the east, and several disturbances crossing the Dominion kept the weather rather unsettled, with rain chiefly in the central provinces. The situation soon developed into the westerly type with a predominance of fair to fine weather, but by the 6th the centre of high pressure had moved eastwards off New Zealand. With an advancing trough, disturbances brought a southerly change, and rain developed in the south and west and became fairly general, but the weather in Canterbury and northern Hawke's Bay remained fair.

A temporary improvement followed, but an intense cyclone formed in the North Tasman Sea on the night of the 9th and moved south-eastwards across northern New Zealand. North-easterly gales blew over the Auckland Peninsula, where the weather continued stormy as the heavy rain spread south and east. Moderate to strong southerlies became general and reached gale force in a number of places. The heaviest falls were in the Wellington Province, where several floods occurred, particularly in the Hutt Valley. On the 11th there were thunderstorms in the Hawke's Bay region.

By the 13th the improvement had become general and temperatures were mild again. While pressure in the north was high, a series of weak disturbances passed in the south giving rain on the 14th to the west coast and resulting in a weak southerly change with some showers on the 15th.
